## Heritage Signature® Auction #1241

# U.S. Coins

Featuring: The Twelve Oaks Collection, Part III • The Cherny Collection • The Walter Freeman Collection, Part II • The Wasatch Collection of Liberty Quarter Eagles • Selections From the Collection of Dr. Donald Knaack • The Fenn Family Collection, Part II • The Hamilton Collection, Part IV

October 31-November 2, 2016 | New York

### Signature® Floor Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Waldorf Astoria • Herbert Hoover Suite  
301 Park Avenue • New York, NY 10022

#### Session 1

Monday, October 31 • 6:00 PM ET • Lots 3572-4306

#### Session 2

Tuesday, November 1 • 12:00 PM ET • Lots 4307-5108

#### Session 3 – PREMIER

Tuesday, November 1 • 6:00 PM ET • Lots 5109-5679

### Signature® Internet Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

#### Session 4

Wednesday, November 2 • 2:00 PM CT • Lots 7001-8588

### LOT SETTLEMENT AND PICK-UP

Tuesday, November 1 • 9:00 AM – 12:00 PM ET

Wednesday, November 2 • 9:00 AM – 12:00 PM ET

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

**This auction is subject to a Buyer's Premium of 17.5% (minimum \$19).**

### BIDDING METHODS

#### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

#### Live Floor Bidding

Bid in person during the floor sessions.

#### Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Friday, October 28, by 12:00 PM CT.

Client Service: 866-835-3243

#### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session.

[HA.com/1241](http://HA.com/1241)

#### Fax Bidding

Fax bids must be received on or before Friday, October 28, by 12:00 PM CT. Fax: 214-409-1425

#### Mail Bidding

Mail bids must be received on or before Friday, October 28.

Dear Bidder,

Hot on the heels of our Dallas Signature event, we are pleased and excited to return to the East Coast for Heritage's next U.S. Coins Signature Auction at the Waldorf Astoria. Two fast-paced days of floor bidding joins our always-popular online session to see nearly 3,700 lots from 150+ individual consignors change hands.

Seven Featured Collections deserve special recognition:

### THE TWELVE OAKS COLLECTION, PART III

Focused mainly on federal gold coinage, this extensive collection was assembled by a Midwest numismatist over a number of decades. **Collectors and dealers alike will benefit from knowing that the very same numismatist also assembled the important Highland Collection, which was sold by another auction firm in 2015.** This is our third installment from the collection, with more than 600 lots presented in all of the floor sessions including the Premier Session and our popular online Signature® Internet Session.

### THE CHERNY COLLECTION

The Cherny Collection is one of the finest sets of Saint-Gaudens double eagles we have recently handled. Complete by date and mint except for the 1927-D (and the 1933), the set includes Saints ranging from Gem High Reliefs – both Flat Rim and Wire Rim variants – as well as a run of late-date double eagles that excels not only in certified grade, but also in aesthetic appeal. Equally high-end middle dates feature an exceptional 1920-S in MS65 PCGS – Ex: Dallas Bank Collection, the Akers and Bowers plate coin.

A collection of Standing Liberty quarters makes up the balance of the consignment, led by attractive examples of the 1920-D in MS65 Full Head PCGS and the 1923-S in MS65 Full Head PCGS CAC. All of the quarters are in high Mint State grades, lacking only a few dates and mints for completion.

### THE WALTER FREEMAN COLLECTION, PART II

Part I of The Walter Freeman Collection appeared at our Dallas event, with coins in collector-friendly grades to satisfy many numismatic interests. Type and series collectors will find carefully selected examples in a cross-section of circulated and Uncirculated conditions. Here is just a sampling:

- 1787 Fugio cent, STATES UNITED, 4 Cinquefoils and Pointed Rays MS64 PCGS
- 1838-C half eagle VF35 PCGS
- 1875-CC twenty cent, BF-2, MS64 PCGS
- 1900 Lafayette dollar, DuVall 1-B, MS64 PCGS
- 1868-S eagle VF20 PCGS

### THE WASATCH COLLECTION OF LIBERTY QUARTER EAGLES

Focused entirely on Liberty Head quarter eagles, the Wasatch name appears at or near the top of many quarter eagle Registry Set categories, including the #1 ranking for the Liberty Head \$2-1/2 Gold Basic Set Circulation Strikes 1840-1907. The Liberty Head quarter eagle Mintmark Set in circulation strike format is 100% complete as well. The Premier Session and Session Two gold portions of the auction present many examples from this fine PCGS Registry Set collection, with additional coins in the Signature® Internet final session. Gold specialists will be able to fill any holes in their collections and find many important upgrades. The branch mint gold lots are particularly attractive and in-demand.

### SELECTIONS FROM THE COLLECTION OF DR. DONALD KNAACK

Ten dollar gold pieces comprise the greatest part of this small but important consignment of rare gold. A 1797 Heraldic Eagle ten in AU50 NGC joins a conditionally rare 1799 Small stars Obverse eagle, MS63 NGC, as well as a 1795 eagle with 13 Leaves on the reverse, BD-4 variety, in AU53 PCGS Secure make up a portion of the consignment. Dr. Knaack is a noted early gold specialist and he has been a prominent collector for many decades. He is credited with confirming the authenticity of a number of discovery pieces, and has identified many numismatically significant varietal issues.

#### **THE FENN FAMILY COLLECTION, PART II**

High-grade mintmarked gold highlights selections from the Fenn Family Collection, Part II. We offered Part I of this fine collection at Long Beach in February of 2013. Additional lots from the Fenn Family Collection will appear as Part III of the upcoming FUN event in January, 2017.

#### **THE HAMILTON COLLECTION, PART IV**

Bust halves and other early type from the remarkable Hamilton Collection continue to cause a stir with collectors from coast to coast. The coins were assembled between two and three decades ago, with the slabbed coins remaining in their original holders from the early days of third-party certification. Raw coins have been recently certified. We are pleased to present additional selections from The Hamilton Collection here, as well as in the upcoming FUN auction in January.

Other notable New York lots are too numerous to describe in this letter, although we must mention the 1870-S Seated dollar in XF40 NGC that headlines the Premier Session. It is the former Miles-Queller coin, one of only nine confirmed examples known to survive.

Please join us and our friends, clients, and dealer associates for a great event in the Big Apple. Heritage's New York office is ready and willing to serve any of your numismatic or bidding questions, as well as discuss future consignments. As always, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGELive!®.

Sincerely,

Greg Rohan  
President

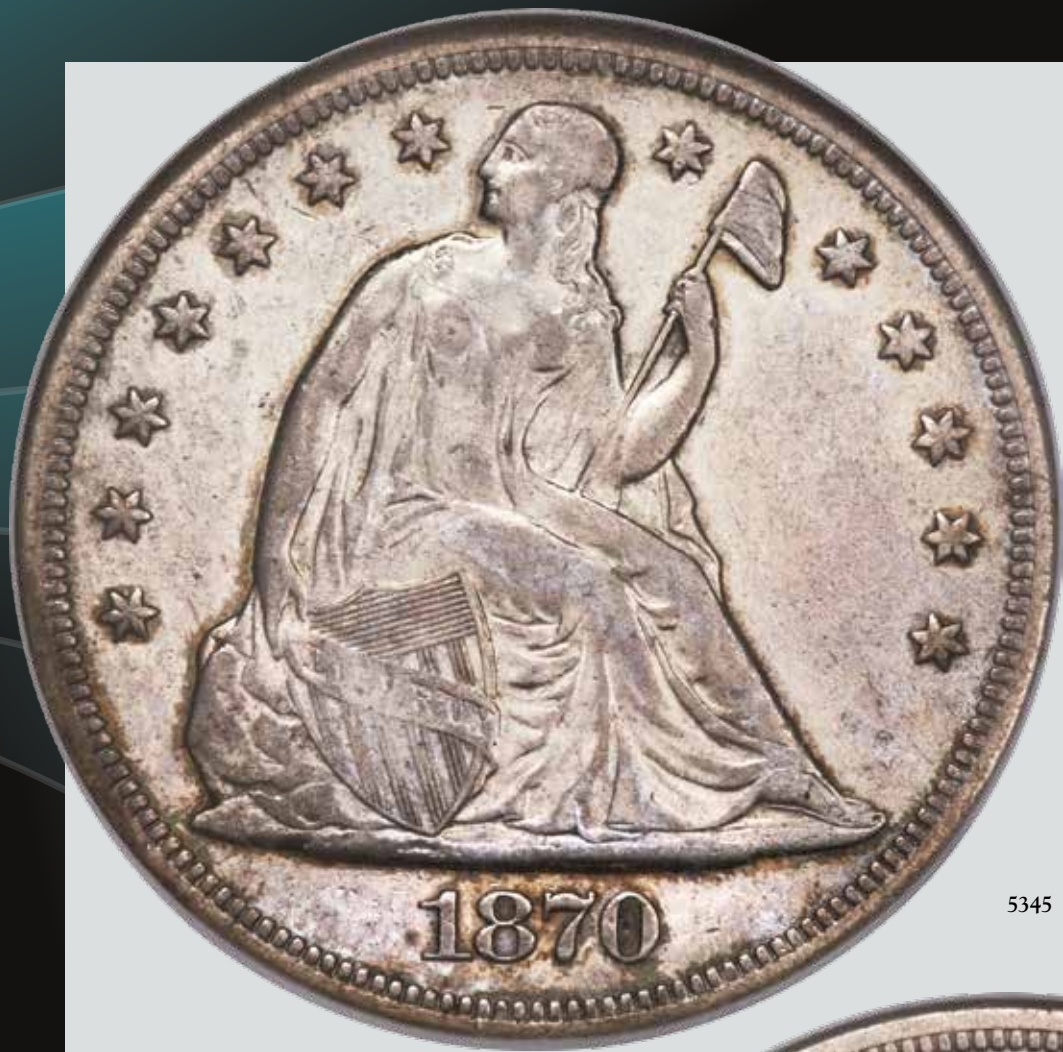

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

### 1652 Pine Tree Threepence, VF25 Noe-34, Salmon 1-A, Pellets at Trunk

**3572** 1652 Pine Tree Threepence, Pellets at Trunk, VF25 PCGS Secure. Noe-34, W-630, Salmon 1-A, R.4. 14.6 gn. The two Boyd/Ford examples weighed 17.6 and 18.7 grains. A walnut-brown representative with generally pleasing surfaces despite small depressions west of the 1 in the date. A few peripheral letters on the upper obverse and left reverse are off the flan. The tree is virtually complete, and the date and denomination are bold. Listed on page 41 of the 2017 *Guide Book*. NGC ID# 5JDS, PCGS# 45365 Base PCGS# 21

**3573** 1723 Hibernia Halfpenny MS65 Red and Brown PCGS. CAC. M. 4.73-Gb.9, W-13120, R.6. An exceptional, high-end representative of William Wood's Hibernia Halfpenny. Glossy burgundy-brown patina graces both sides, with tinges of copper-red in the protected regions. Excellent surface preservation and boldly struck design elements only add to the outstanding visual appeal. Listed on page 47 of the 2017 *Guide Book*. Population: 8 in 65 Red and Brown, 2 finer. CAC: 4 in 65, 0 finer (9/16).  
*Ex: Chicago Signature (Heritage, 4/2014), lot 3821. NGC ID# 2ATD, PCGS# 181*

**3574** 1787/1788 Connecticut Copper, Mailed Bust Left VF20 PCGS. M. 9-R, W-2860, High R.4. The U.S. Constitution banned state coinage, and was ratified on June 21, 1788. This may be the reason why the final date digit of a 1788 Connecticut reverse die would be overdated with a 7. A very scarce variety, listed on page 63 of the 2017 *Guide Book*. This medium brown example has a moderate flan flaw west of Liberty's waist, and the right-side legends are indistinct. NGC ID# 2B2S, PCGS# 352

**3575** 1787 New Jersey Copper, No Sprig Above Plow — Cracked Planchet — AU53 NGC. Maris 64-t, W-5380, R.1. A flan defect at 7 o'clock is of mint origin. A lovely New Jersey copper with exemplary tan-brown surfaces. The wide letter U in the reverse legend makes Maris 64-t fairly easy to attribute. Listed on page 72 of the 2017 *Guide Book*. NGC ID# AUL8, PCGS# 506

**3576** 1786 Vermont Copper, VERMONTENSIVM, VF25 PCGS. RR-8, Bressett 6-E, W-2030, R.4. A medium brown example with pleasing definition on the trees and rising sun. Small flan pits (as made) are scattered, and the surfaces are lightly granular. A majority of the legends are clear, though STELLA and PUBLICA have a few faint letters, and the 86 in the date is weak. Listed on page 74 of the 2017 *Guide Book*. NGC ID# 2B57, PCGS# 545

**3577** 1787 Fugio Cent, UNITED STATES, Cinquefoils, AU50 PCGS. N. 15-H, W-6890, R.4. An evenly struck, well-detailed example with fairly smooth chocolate-brown surfaces. Some minor corrosion does appear around portions of the obverse margins, including some dark discoloration within the sun rays. A collectible example of the UNITED STATES, Pointed Rays type. NGC ID# 2B8F, PCGS# 889

**3578** 1783 Georgivs Triumpho Token AU50+ PCGS. Baker-7, W-10100, R.3. Specialists have debated whether this token depicts George Washington or King George III, but it has been an accepted part of early American numismatics since the 19th century. A charming and unblemished olive-brown example with the usually encountered die break across Liberty's left (facing) shoulder. Listed on page 79 of the 2017 *Guide Book*. NGC ID# 2B6K, PCGS# 664

## HALF CENTS

**3579** 1793 C-1, B-1, High R.3 — Damage — PCGS Genuine. Fine Details. About half of the legends, including the date, are sharp. The other half range from faint to partial. The deep brown surfaces are granular, and slightly glossy across portions of the reverse border. The left obverse field exhibits light hair-thin marks. Our EAC grade Good 4.

### 1793 C-2 Half Cent, VF Details

**3580** 1793 C-2, B-2, R.3 — Damage — PCGS Genuine. VF Details. Obverse rim abrasions at 5 o'clock and 10:30 explain the PCGS designation, along with a less conspicuous mark along the base of the BER in LIBERTY. The obverse is somewhat porous, while the reverse is only lightly granular. A well defined medium brown half cent of the very scarce first-year, single-year Liberty Cap, Head Left type. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

**3581** 1793 C-3, B-3, R.3 — Tooled — PCGS Genuine. Fine Details. A deep brown introductory year half cent with above-average sharpness. Clusters of pinscratches near HALF CENT and Liberty's nose correspond to the PCGS designation. Only minimally granular. Our EAC grade AG3. NGC ID# 2222, PCGS# 35009 Base PCGS# 1000

**3582** 1793 C-4, B-4, Low R.3 — Damage — PCGS Genuine. Fine Details. Manley Die State 2.0. A lavender-brown example. Noticeable marks affect the ER in LIBERTY and the neck curls. Lesser abrasions are noted on Liberty's hair, and between the IB in LIBERTY. A few letters in AMERICA are faint, but the remainder of the legends are bold. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

**3583** 1794 Normal Head, C-2a, B-2b, High R.2 — Environmental Damage — PCGS Genuine. XF Details. Manley Die State 3.0. A practically unabraded deep brown half cent with pleasing sharpness and evenly microgranular surfaces. This lot will satisfy many early copper type collectors. Our EAC grade Fine 15. NGC ID# 2223, PCGS# 35024 Base PCGS# 35015

**3584** 1794 Normal Head, C-4a, B-6b, R.3, Fine 15 PCGS. Manley Die State 2.0, "rare," without the usual field bulge near the shoulder curl. An evenly defined ebony-brown example with bold legends and lightly granular surfaces. A few faded thin marks are noted on the obverse field near the portrait. Our EAC grade VG8. NGC ID# 2223, PCGS# 35036 Base PCGS# 35015

**1794 C-4b, B-6a Half Cent, Fine Details  
Extremely Rare Large Edge Letters**

- 3585 1794 Large Edge Letters, C-4b, B-6a, R.7 — Damage — PCGS Genuine. Fine Details.** The Large Edge Letters are frequently seen on C-1, identified as C-1a, but rarely on any other die marriage among the 1794 half cents, each identified as the “b” subvariety for C-2 through C-6. Collectively known fondly as the “B-Babies,” only about 50 such pieces exist for all five die marriages. That population includes slightly more than a dozen examples of C-4b.

Commodore W.C. Eaton first reported this sub-variety in the November 1921 issue of *The Numismatist*, although his discovery specimen is untraced today. However, general knowledge of the variety remained hidden until the mid-1970s. Two examples were on display at the 1976 “Half Cent Happening,” a gathering of half cent aficionados, including this cataloger who saw both pieces at that event in Ann Arbor, Michigan.

This deep steel-toned example has the sharpness of Very Fine, with heavy corrosion and some slight smoothing of the surfaces. A small defect appears at the lower left obverse. Our EAC grade VG8. PCGS# 35039 Base PCGS# 35015

- 3586 1794 High Relief Head, C-7, B-7, High R.5 — Environmental Damage — PCGS Genuine. Fine Details.** Manley Die State 2.0. A very scarce to rare die marriage. The medium brown surfaces are evenly microgranular but acceptable to most collectors. All legends are readable, although HALF CENT is faint. The date is sharp. There are no consequential marks. Our EAC grade VG7. NGC ID# 2223, PCGS# 35057 Base PCGS# 35054

- 3587 1794 High Relief Head, C-9, B-9, R.2, VF25 PCGS.** Manley Die State 3.0. A pleasing walnut-brown representative of the first-year Liberty Cap, Head Right half cent. Evenly defined throughout, and although planchet striations are apparent near the borders, relevant marks are confined to a small tick or two on the cheek. Our EAC grade Fine 15. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

- 3588 1794 High Relief Head, C-9, B-9, R.2, VF25 NGC.** A medium brown representative with evenly microgranular surfaces. We note only an obverse field tick near 3 o'clock and a couple of dull thin lines near OF. The last of the nine 1794 die varieties designated by Roger S. Cohen in his classic reference “*The Little Half Sisters*”. Our EAC grade Fine 12. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054

**1795 C-3, B-3 Half Cent, VF Details  
Extremely Rare Early Die State**

- 3589 1795 Plain Edge, Punctuated Date, C-3, B-3, High R.5 — Damage — PCGS Genuine. VF Details.** Manley Die State I, an extremely rare state with HALF CENT boldly visible on the reverse. This is the rarest die pair of all 1795 half cents, and presents an extremely important opportunity for advance collectors to acquire a well-detailed example. Less than three dozen exist in all grades, and most are in lower grades with the finest known EAC-graded VF35. Olive-brown and tan surfaces exhibit several small nicks on each side that PCGS describes as damage. The overall appearance of this piece is exceptional, and it will undoubtedly find a new home with an advanced half cent variety collector. Our EAC grade VG10. PCGS# 35077 Base PCGS# 1012

- 3590 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2, VF20 PCGS. CAC.** Although unspecified on the holder, this is a thin-planchet example with no evidence of undertype on either side. The obverse is light olive-brown and the reverse is medium brown. Marks are trivial save for a minor obverse edge bump at 2:30. Struck slightly off center toward 8 o'clock. Our EAC grade Fine 12. Ex: *Schaumburg Central States Signature* (Heritage, 4/2012), lot 3039, which realized \$2,300. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

- 3591 1797 Lettered Edge, Low Head, C-3b, B-3a, R.4 — Damage — PCGS Genuine. Fine Details.** Manley writes, “most survivors are in very low grades,” but this medium brown half cent has generally clear legends, and the portrait and wreath are nicely defined. The reverse rim is crimped near the fraction, and the surfaces are moderately granular and inoffensively abraded. Our EAC grade Good 6.

**Lustrous 1800 C-1, B-1 Half Cent, MS62 Brown  
Later Die State**

- 3592 1800 C-1, B-1, R.1, MS62 Brown NGC.** Despite its late die state, nearly all of the border detail is present on both sides of this lovely first-year Draped Bust half cent. Steel-brown surfaces retain hints of very faded mint red in the protected areas on each side. Our EAC grade AU55. NGC ID# 222B, PCGS# 35119 Base PCGS# 1051

1802 C-1, B-1 Half Cent, Fair Details  
Reverse of 1800

**3593** 1802/O Reverse of 1800, C-1, B-1, R.6 — Environmental Damage — PCGS Genuine. Poor/Fair Details. The obverse of this olive-brown half cent exhibits an outlined bust, with LIBERTY and the date extremely weak. The obverse exhibits trivial stains, and slight roughness. Just enough of the reverse remains to provide positive attribution. Several green corrosion spots are evident. A remnant from a previously struck large cent is noted on the reverse, including a letter S and border dentils. Our EAC grade Poor 1. NGC ID# 222C, PCGS# 35122 Base PCGS# 1054

**3594** 1802/O Reverse of 1802, C-2, B-2, R.3, VG10 PCGS. Manley Die State 3.0, "rare." A deep brown example of this better Draped Bust date. All legends are bold, including HALF CENT. Minimally abraded save for a tick on the right ribbon loop and a pair of hair-thin lines above HALF. Our EAC grade VG8. NGC ID# 222D, PCGS# 35125 Base PCGS# 1057

**3595** 1803 C-1, B-1, R.1, AU55 NGC. Manley Die State 2.0. The scarcest of the three major die states, which features a crack above HALF but without any branch crack below. A lightly marked deep brown half cent with substantial cartwheel sheen despite moderate wear on the cheek and curls. Our EAC grade VF35. NGC ID# 222E, PCGS# 35128 Base PCGS# 1060

**3596** 1803 Widely Spaced 3, C-3, B-3, R.1, AU58 NGC. Manley Die State 5.0. The obverse field is buckled near the ribbon and shoulder curl. Golden-brown fields cede to medium brown devices. Satiny and minimally abraded with one small spot below the I in LIBERTY. Our EAC grade XF45.  
Ex: Charlotte ANA Signature (Heritage, 3/2003), lot 5031. NGC ID# 222E, PCGS# 35134 Base PCGS# 1060

**3597** 1804 Crosslet 4, Stems, C-10, B-9, R.1, MS62 Brown NGC. Manley Die State 3.0. A dusky olive-green and walnut-brown type coin. The lustrous surfaces are refreshingly void of contact. The denominator shows a few flecks. A late die state without dentilation, but an exemplary example in terms of technical preservation. Our EAC grade XF45. NGC ID# 222F, PCGS# 35158 Base PCGS# 1069

**3598** 1804 Plain 4, Stems, C-11, B-12, High R.3, XF40 PCGS. Manley Die State 1.0. Cohen-11 is the only die variety with stems on the wreath and a Plain 4. Unlike a few other 1804 marriages, C-11 is very scarce, and typically encountered in Very Fine or lower grades. This lightly worn deep brown example is evenly struck, and displays faint rim marks and a few unobtrusive abrasions. Our EAC grade VF30. NGC ID# 222F, PCGS# 35170 Base PCGS# 1066

**3599** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown NGC. Manley Die State 2.0. A coruscating medium brown Draped Bust type coin. The strike is good, although the high points of the wreath lack full detail. The sole mentionable imperfection is a small spot within the lower loop of the second S in STATES. Our EAC grade AU50. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

**3600** 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown PCGS. Manley Die State 3.0 with rim breaks over MER and minimal dentilation. Golden-brown and olive-green shades alternate across the fields. The motifs are medium brown. A sharply struck, satiny, and unabraded Draped Bust type coin. Our EAC grade AU50. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

1805 C-2, B-2 Half Cent, Fine Details  
Rare Small 5, Stems Variety

**3601** 1805 Small 5, Stems, C-2, B-2, FS-301, High R.5 — Graffiti — PCGS Genuine. Fine Details. Perfect dies as always. The reverse is the same die that was used for the 1803 C-4 half cents, and Ron Manley believes that this 1805 die marriage was struck *before* the 1803 half cents. The 1805 C-2, B-2 half cent is one of the six rarest Draped Bust varieties. A complete variety set of Draped Bust half cents includes 32 coins. A scratch crosses the neck and drapery with myriad less obtrusive scratches on both sides. Otherwise, the olive and reddish-brown surfaces of this piece are smooth and attractive. Our EAC grade Good 5. PCGS# 35182 Base PCGS# 1087

**3602** 1805 Small 5, Stems, C-3, B-3, R.4, Good 6 PCGS. Manley Die State 2.0. The Small 5, Stems is easily the scarcest among the three *Guide Book* listings for the date. This is likely due to an early failure of the obverse die. The present coin shows buckling on the right obverse field, as made and usual for C-3. The medium brown surfaces are minimally abraded and lightly granular. Our EAC grade Good 4. NGC ID# 222H, PCGS# 35185 Base PCGS# 1087

**3603** 1809/6 9 Over Inverted 9, C-5, B-5, R.1, MS62 Brown PCGS. Manley Die State 2.0, "rare." Obverse dentils are present only between 11 and 12 o'clock. The reverse has dentils near 12 o'clock, and between 5 and 8 o'clock. Clashed near the T in CENT. This unabraded and lovely half-cent is mostly chocolate-brown, although a blush of microgranular gray toning is present on the lower obverse. Our EAC grade AU55. NGC ID# 222N, PCGS# 35233 Base PCGS# 1126

**3604** 1825 C-2, B-2, R.1, MS63 Brown PCGS. Manley Die State 3.0. A pleasing golden-brown and olive-green half cent. Marks are inconsequential. Two small, unobtrusive spots are noted on the jaw and below the Y in LIBERTY. Housed in a green label holder. Our EAC grade AU55. NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

1828 Half Cent, C-3, MS65 Brown  
Usual 13 Stars Obverse

**3605** 1828 13 Stars, C-3, B-2, R.1, MS65 Brown NGC. Manley Die State 4.0, the usual late die state for this marriage. The olive-brown obverse exhibits traces of faded mint red with a few trivial spots, and the reverse has splashes of brown toning on the faded red mint surfaces. Our EAC grade MS60. NGC ID# 222V, PCGS# 35261 Base PCGS# 1147

**3606 1833 C-1, B-1, R.1, MS65 Brown PCGS. CAC.** Manley Die State 2.0. A sharply struck and satiny olive-brown Gem. Patience and a loupe are required to locate the few inconsequential imperfections. A desirable Classic Head type coin. Our EAC grade MS60. NGC ID# 222Z, PCGS# 35282 Base PCGS# 1162

**3607 1853 C-1, B-1, R.1, MS66 Brown PCGS.** A well struck and impressively unabraded Premium Gem. The blended apple-green and mahogany-brown surfaces shimmer with satin luster. Glimpses of faded red cling to protected areas of the reverse. A desirable type example. Our EAC grade MS62. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

**3608 1854 C-1, B-1, R.1, MS65 Red and Brown PCGS.** Brick-red congregates about the legends and stars. The motifs and open fields are medium brown. Lustrous and unmarked with an intricate strike. A desirable Gem of this later and lower mintage date. Our EAC grade MS63. NGC ID# 26YY, PCGS# 35331 Base PCGS# 1231

**3609 1855 C-1, B-1, R.1, MS64 Red PCGS. CAC.** A splendid orange-red near-Gem. Minor carbon is scattered, and portions of the obverse have moderately mellowed toward steel-gray. Our EAC grade MS64.

*Ex: Long Beach Signature (Heritage, 9/2004), lot 5042. NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235*

## PROOF HALF CENT

**1841 B-1 Half Cent, PR63 Brown  
Large Berries Original**

**3610 1841 Original, B-1, R.5, PR63 Brown PCGS.** Housed in a first-generation PCGS holder, this Select proof is a lovely example of an Original strike with large berries in the wreath. A prominent die crack is noted through stars 3 to 6 on this obverse die. Both sides exhibit olive-brown surfaces with splashes of blue toning and traces of faded mint red color. A splendid example for the advanced collector. Our EAC grade PR60. Population: 9 in 63 Brown, 15 finer (9/16). NGC ID# 26Z6, PCGS# 1254

## LARGE CENTS

**3611 1793 Wreath, Vine and Bars Edge, S-6, B-7, R.3 — Graffiti — PCGS Genuine. Fine Details.** A minimally granular lavender-brown example. Several straight thin marks cross the portrait, partly effaced by subsequent wear. Minor rim bumps are at 9:30 on the obverse and 7 o'clock on the reverse. All legends are clear, as are a majority of the reverse dentils. Our EAC grade AG3. NGC ID# 223H, PCGS# 35450 Base PCGS# 1347

**1794 Head of '94 Cent, VF35  
Early Die State S-43**

**3612 1794 Head of 1794, S-43, B-32, R.2, VF35 PCGS.** An early die state lacking evidence of obverse or reverse die cracks. Somewhat unevenly struck with weakness at the right obverse and reverse borders, and inside the upper part of the wreath. Otherwise, this is a pleasing piece with smooth olive-brown surfaces. Trivial verdigris is noted on each side with minor corrosion around ATE in STATES. Our EAC grade Fine 12. NGC ID# 223P, PCGS# 35594 Base PCGS# 901374

**1794 S-59, B-57 Cent, XF40**

**3613 1794 Head of 1794, S-59, B-57, R.3, XF40 PCGS.** A splendid cent with smooth deep olive patina and splashes of darker steel toning. Both sides exhibit the usual minor handling marks associated with the grade, but they are mostly inconsequential. A single small mark on Liberty's cheek below the eye may serve to locate the pedigree. Our EAC grade VF30. NGC ID# 223P, PCGS# 35639 Base PCGS# 901374

**3614 1794 Head of 1795, S-67, B-59, R.3, Fine 15 PCGS.** A medium brown representative of the scarce 1794 Head of 1795 subtype. Most legends are bold. Only the UNI in UNITED is weak, due to mint-made planchet fissures. Mentionable marks are limited to a small obverse rim knock at 10 o'clock. Our EAC grade VG7. NGC ID# 223R, PCGS# 35684 Base PCGS# 1365

**3615 1796 Reverse of 1795, S-97, B-20, R.3 — Smoothed — PCGS Genuine. VF Details.** The golden-brown obverse has been burnished. The medium brown reverse is evenly and moderately granular. No marks are apparent. LIBERTY is blurry but readable. The remaining legends are sharp. Our EAC grade Good 5. NGC ID# 223W, PCGS# 35825 Base PCGS# 1401

**1796 S-119 Cent, VF30  
Unusual Circulated Example**

- 3616 1796 Reverse of 1797, S-119, B-40, R.3, VF30 PCGS.** Early Die State. The obverse is cracked through the 17 of the date as always, and the reverse has a tiny rim break covering two dentils over TA in STATES. The S-119 cent is known as one of the Nichols Find varieties, and most examples are in Mint State grades. In fact, MS60 or finer pieces outnumber circulated examples, perhaps two to one. Pleasing olive and chestnut-brown surfaces exhibit trivial scrapes and circulation marks. Our EAC grade Fine 15. NGC ID# 223W, PCGS# 35870 Base PCGS# 1407
- 3617 1797 Reverse of 1797, Stems, S-138, B-20, R.1, VF25 NGC.** The characteristic die bulge through S OF A is clearly visible on this pleasing piece. Both sides have attractive medium brown and mahogany surfaces with slightly darker devices. A lovely specimen. Our EAC grade Fine 15.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 3086, which realized \$1,380. NGC ID# 2242, PCGS# 35945 Base PCGS# 1422*
- 3618 1797 Reverse of 1797, Stems, S-140, B-22, R.1, VF20 PCGS.** A medium brown representative with pleasing detail for the VF20 level. Evaluation beneath a lens reveals a few pinscratches on the left side of the wreath and above Liberty's shoulder. Our EAC grade Fine 12.  
*Ex: Long Beach Signature (Heritage, 5/2012), lot 3070. NGC ID# 2242, PCGS# 35951 Base PCGS# 1422*
- 3619 1798 Second Hair Style, S-166, B-32, R.1, VF35 PCGS.** Breen Die State V. A popular variety distinguished by the diagonal die crack across the fraction. The walnut-brown surfaces are free from distractions. The reverse is slightly misaligned toward 12 o'clock, which causes uneven wear on the upper obverse border. Our EAC grade VF20.  
*Ex: FUN Signature (Heritage, 1/2010), lot 77. NGC ID# 2244, PCGS# 36068 Base PCGS# 1434*
- 3620 1799 S-189, B-3, R.2, Fair 2 PCGS. CAC.** The date is surprisingly sharp, with all but the lower loops of the 9s clear. TED S and OF AME are also readable. The surfaces are closer to glossy than granular, and the top of Liberty's neck has a small depression. The 1799 is the stopper to a date collection of large cents. Our EAC grade Fair 2. NGC ID# 2246, PCGS# 36140 Base PCGS# 1443
- 3621 1800 S-197, B-12, R.1, VF35 PCGS. CAC.** The distinctive and well known "Q" variety, named for the die breaks near the 00 in the date. Another dramatic die break bonds the IB in LIBERTY. A deep brown Choice VF example. A few minor marks near the profile, but luster emerges from the hair. Our EAC grade VF25.  
*Ex: Fort Worth Signature (Heritage, 3/2010), lot 113. NGC ID# 2248, PCGS# 36179 Base PCGS# 1449*

**Near-Mint 1802 S-232 Cent**

- 3622 1802 S-232, B-12, R.1, AU58 NGC. CAC.** The popular variety with a T punched over a Y in LIBERTY. Another noteworthy feature is the prominent cud over the AT in STATES. This partly lustrous cent is mostly medium brown on the obverse, while the reverse has light sea-green toning aside from a blush of golden-brown near 5 o'clock. Crisply struck and attractive with the usual mint-made clashmarks for the variety, including dentils incused near AMERICA. Our EAC grade AU50. NGC ID# 224E, PCGS# 36305 Base PCGS# 1470
- 3623 1806 S-270, B-1, R.1, XF40 PCGS.** Breen Die State IV, clashed. A smooth and pleasing walnut-brown cent. The portrait exhibits a few mint-made thin lines, which were on the planchet prior to the strike. The sole dies for the date, and elusive in better circulated grades. Our EAC grade VF20. NGC ID# 224L, PCGS# 36436 Base PCGS# 1513

**1808 S-278 Cent, XF45  
Early Die State**

- 3624 1808 S-278, B-2, R.3, XF45 NGC.** This early die state example has no evidence of obverse rim breaks that eventually appear above stars 5 and 6, and elsewhere in later die states. All 13 stars are completely outlined on this pleasing Choice XF cent. The mahogany and chestnut brown surfaces show splashes of maroon with trivial handling marks and traces of corrosion on the reverse. A pleasing example overall. Our EAC grade VF20. NGC ID# 224P, PCGS# 36460 Base PCGS# 1543
- 3625 1809 S-280, B-1, R.2, VF30 PCGS.** A scarce date in the short-lived Classic Head large cent series. This example has pleasing olive, chestnut, and steel-brown surfaces that show occasional small grade-consistent marks. Our EAC grade Fine 15.  
*Ex: Tampa FUN Signature (Heritage, 1/2011), lot 3148. NGC ID# 224R, PCGS# 36466 Base PCGS# 1546*

**Scarce Choice AU 1812 Cent  
Large Date, Sheldon-288**

**3626 1812 Large Date, S-288, B-3, R.2, AU55 PCGS.** Deep brown overall, but faded orange-gold persists in protected regions. Well struck except for the left-side stars. The obverse has a few minor abrasions, while the reverse is remarkably devoid of marks. Our EAC grade XF40. Population: 4 in 55, 17 finer (9/16).  
*Ex: Central States Signature (Heritage, 4/2002), lot 5026. NGC ID# 224W, PCGS# 36505 Base PCGS# 1564*

**3627 1813 S-292, B-2, R.2, XF40 PCGS.** This deep brown example has ample design detail, and is smooth except for two tiny ticks above the O in ONE and a minor reverse rim knock at 5:30. Classic Head cents are notorious for their conditional scarcity relative to their design successors, the Matron Head cents. Our EAC grade VF30.  
*Ex: Dallas Signature (Heritage, 10/2009), lot 83, which realized \$1,955. NGC ID# 224X, PCGS# 36511 Base PCGS# 1570*

**3628 1814 Crosslet 4, S-294, B-1, R.1, XF45 PCGS.** A pleasing lavender-brown representative that shows no remotely relevant marks or spots. Minor strike-throughs (as made) are northeast of the E in ONE and the T in CENT. Just two die marriages for the date, readily distinguished by the shape of the 4 in the date. Our EAC grade VF30. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

**3629 1814 Plain 4, S-295, B-2, R.1, XF45 PCGS.** Breen Die State X. A medium to deep brown example with an area of ebony toning near the final star. Thin marks are noted on Liberty's throat and across the B in LIBERTY. Although no cents are dated 1815, cents were likely struck that year from late state S-295 dies, such as the present lot. Our EAC grade VF20.  
*Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 7206. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576*

**3630 1816 N-2, R.1, MS64 Brown NGC.** Medium brown overall, but glimmers of orange-red accompany design recesses. Contact is confined to the field near the bar below CENT. The only spot is subtle, and relegated near the second 1 in the date. The dies are rotated 45 degrees clockwise. Our EAC grade MS60. NGC ID# 224Z, PCGS# 36526 Base PCGS# 1591

**3631 1818 N-10, R.1, MS64 Red and Brown PCGS. CAC.** A coruscating Choice cent. Brick-red shades are prominent but the portrait and open fields are steel-gray. Essentially free from marks. The borders display a few small spots. Although seen less often than the 1820 N-13, the 1818 N-10 was among the Matron Head varieties prevalent in the Randall Hoard. Our EAC grade MS60. NGC ID# 2253, PCGS# 36629 Base PCGS# 1601

**1819/8 N-2 Cent, MS64 Brown  
Early Die State**

**3632 1819/(8) Large Date, N-2, R.1, MS64 Brown PCGS. CAC.** Although some light die cracks appear on the obverse, this is an early die state showing clear evidence of the overdate feature. Later die states from a lapped die lack the overdate feature and are less desirable as such. This Choice Mint State example has full cartwheel luster on its chestnut-brown surfaces with a patch of maroon patina along the right reverse border. Our EAC grade MS60. NGC ID# 2255, PCGS# 36631 Base PCGS# 1603

**3633 1820 Large Date, N-13, R.1, MS64 Brown PCGS.** The present near-Gem exhibits satiny and unabraded apple-green and golden-brown surfaces. Small wedge-shaped rim depressions near star 1 appear as made. Likely once part of the famed Randall Hoard. Our EAC grade AU50. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

**3634 1820 Large Date, N-13, R.1, MS64 Brown PCGS.** The triple-punched L in LIBERTY is a pick-up point for this well-known Randall Hoard variety. This lustrous and impressively unabraded Choice cent offers olive-green and chestnut-brown toning. A small spot near star 3 provides an identifier. Our EAC grade MS60.  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 7137. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615*

**3635 1821 N-1, R.1, XF45 PCGS. CAC.** A low mintage date with only two die marriages, neither of which were prominent in the Randall Hoard. This chocolate-brown example has pleasing surfaces, despite minor field contact above the N in ONE. Our EAC grade VF25.  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 7188, which realized \$2,185. NGC ID# 2258, PCGS# 36706 Base PCGS# 1621*

**3636 1823/2 N-1, R.2, VF30 PCGS.** A deep brown midgrade example of the conditionally challenging 1823/2 overdate. The 2 underdigit is readily observed. Among the few minor marks, only a tick above the C in CENT merits mention. Our EAC grade Fine 15. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

**3637 1823/2 N-1, R.2, VF35 PCGS. CAC.** An obvious overdate with much of the underdigit 2 apparent. Although N-1 is available in well circulated condition, better grade examples are very scarce. This medium brown cent displays considerable hair definition, and mentionable marks are limited to a line through star 12 and contact west of the O in ONE. Our EAC grade Fine 15. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

**1823 Copper Restrike Cent, N-3, MS66 Brown  
Privately Produced from Mint Dies**

- 3638 1823 Private Restrike, N-3, R.2, MS66 Brown PCGS. CAC.** At one time the Philadelphia Mint discarded used dies as scrap steel, until they realized that the dies could be used to produce coinage outside the Mint. Joseph Mickley purchased some of the old dies, and they later appeared in the auction of his collection. It is believed that these pieces were first struck in the mid to late-1860s, although the dies still exist today, now in the ANA Money Museum in Colorado Springs.

This Premium Gem exhibits a late state of the dies with advanced die rust and prominent obverse and reverse die cracks. Both sides have full cartwheel luster and olive-brown surfaces that exhibit traces of original orange color. A lovely example for the advanced specialist or *Guide Book* collector. Our EAC grade MS60+. Population: 6 in 66 Brown, 0 finer. CAC: 2 in 66, 0 finer (9/16). NGC ID# 225C, PCGS# 81627

- 3639 1827 N-5, R.2, MS63 Brown NGC.** A mahogany-brown example with traces of brick-red in protected regions. Well struck aside from the leaves below the C in AMERICA. The cheek displays minute marks, while the reverse is nearly pristine. Our EAC grade AU55. Ex: *Long Beach Signature* (Heritage, 2/2002), lot 5069; *Charlotte ANA* (Heritage, 3/2003), lot 5061; *Long Beach Signature* (Heritage, 2/2011), lot 3045, which realized \$1,495. NGC ID# 225H, PCGS# 36850 Base PCGS# 1651

**1827 Large Cent, MS64 Brown  
Newcomb-8, Later Die State**

- 3640 1827 N-8, R.3, MS64 Brown PCGS.** A fairly late die state with cracks through several stars. A splendid chocolate-brown cent that boasts semiprooflike fields, a good strike, and an absence of abrasions. The grade is limited solely by moderate granularity near AMERICA. Our EAC grade AU55. NGC ID# 225H, PCGS# 36859 Base PCGS# 1651

- 3641 1829 Large Letters, N-2, R.2, MS62 Brown NGC.** N-2 always has a die crack through the first four stars, and the present example is the later die state with an additional crack through the final three stars. A bold chocolate-brown cent with minor field marks near the forehead and the ME in AMERICA. Our EAC grade AU50. Ex: *Long Beach Signature* (Heritage, 9/2008), lot 184. NGC ID# 225K, PCGS# 36913 Base PCGS# 1663

- 3642 1835 Head of 1836, N-14, R.2, MS64 Brown NGC.** Ex: Mervis Collection. An early die state struck from crisp dies, showing a delicate crack through the tops of AME. Both sides are well centered with crisp, bold denticles. The hair buns and upper hair details are a trifle blunt, with opposing weakness on the lower right part of the wreath. Exceptional surfaces display full cartwheel luster and only a single thin line below the wreath stem. This outstanding example likely falls at the low end of the condition census. Our EAC grade MS62.

Ex: *Adam Mervis Large Cent Collection* (Heritage, 1/2014), lot 2190, which realized \$2,232.50. NGC ID# 225S, PCGS# 37063 Base PCGS# 1714

**1835 Cent, MS64 Red and Brown  
Head of 1836, N-15**

- 3643 1835 Head of 1836, N-15, R.2, MS64 Red and Brown PCGS. CAC.** A small die defect appears below 35 in the date. This copper-orange and steel-blue near-Gem cent has smooth, minimally marked surfaces with glowing luster. The strike is good, though the stars, curls, and wreath leaves are incompletely defined. Eye appeal is excellent. Our EAC grade MS63. Population: 12 in 64 (2 in 64+) Red and Brown, 1 finer. CAC: 6 in 64, 3 finer (9/16). PCGS# 37067 Base PCGS# 1715

- 3644 1837 Head of 1838, N-10, R.1, MS65 Brown PCGS. CAC.** A medium brown Gem with myriad pockets of fire-red about the stars, letters, curls, and wreath. Free from abrasions or spots. The strike shows softness on the denticles and the first ten stars. Our EAC grade MS62. PCGS# 37135 Base PCGS# 1729

- 3645 1838 N-10, R.1, MS65 Brown PCGS. CAC.** An early die state without any sign of the usual die crack through F AM. A magnificent Gem with undisturbed and lustrous chocolate-brown surfaces. The stars are lightly brought up but the portrait and wreath are bold. Our EAC grade MS60. PCGS# 37207 Base PCGS# 1741

- 3646 1844 N-7, R.2, MS63 Brown PCGS.** Grellman Die State a. Die lines along the left border of the C in CENT confirm status as Newcomb-7. A splendid chocolate-brown example with glimpses of deeper orange, mahogany, and gunmetal toning, especially near the ON in ONE and the CE in CENT. Our EAC grade AU55.

Ex: *FUN Signature* (Heritage, 1/2003), lot 5223; *Ed Lepordo Collection, Part One* (Heritage, 2/2009), lot 7215. PCGS# 397737 Base PCGS# 1856

- 3647 1847/47 Large Over Small 47, N-18, R.5, AU58 PCGS.** Grellman Die State a. N-2 is the usually encountered Large Over Small 7 variety. The rarer N-18 is from different dies, and shows strong repunching atop the 8 and 7. Bold die lines near ERIC are also diagnostic. A sea-green and rose-red cent with refreshingly unabraded surfaces. Our EAC grade AU50. NGC ID# 226D, PCGS# 405929 Base PCGS# 1880

- 3648 1850 N-7, R.2, MS66 Brown PCGS.** Newcomb Die State b. Brick-red accompanies design recesses. The legends and devices are lavender-brown. A lustrous and unabraded Premium Gem. The sole imperfections are small cobalt-blue freckles on the field near the chin and shoulder. Our EAC grade MS60. NGC ID# 226G, PCGS# 405880 Base PCGS# 1889

- 3649 1850 N-7, R.2, MS66 Brown NGC. CAC.** Grellman Die State b. Hints of brick-red cling to ONE CENT and AMERICA, but this high-grade type coin is predominantly chocolate-brown. The satiny surfaces are unabraded save for minor ticks on Liberty's chin. The major motifs are well struck, though several stars are incomplete. Our EAC grade MS62. NGC ID# 226G, PCGS# 405880 Base PCGS# 1889

**1851 N-2 Cent, MS66 Red and Brown  
Rare Early Die State**

- 3650 1851 N-2, R.1, MS66 Red and Brown PCGS. CAC.** Grellman Die State a. Bob Grellman reports that lines at the throat and inner curl are visible, although often dull, on the early die state, and that Mint State examples are rare. He further notes that the obverse die lines are no longer visible on the late die state with many Mint State examples known from a small hoard. Those die lines are visible on this example that retains most of its brilliant orange luster with just a touch of bluish-brown toning. There are no low areas on either side that are usually seen on the later die states. Our EAC grade MS64. NGC ID# 226H, PCGS# 406651 Base PCGS# 1893

- 3651 1851 N-10, R.1, MS65 Red and Brown PCGS. CAC.** Die State b, both sides flowlined with diagnostics weakened. This Gem Red and Brown coin shows considerable copper-red luster within recesses, while open areas are steel-gray. The strike is sharp on the central devices and softer around the peripheries. Marks are essentially absent, though we note a small spot near star 3. Our EAC grade MS63. NGC ID# 226H, PCGS# 406678 Base PCGS# 1893

- 3652 1851 N-11, N-12, R.1, MS66 Brown PCGS. CAC.** Grellman Die State b. Glimpses of orange-red emerge from the legends, stars, and other design crevices. The remainder of this coruscating high-grade cent is steel-gray. Smooth aside from a faint V-shaped line on Liberty's cheek. Our EAC grade MS62. NGC ID# 226H, PCGS# 406680 Base PCGS# 1892

- 3653 1852 N-16, R.1, MS66 Brown PCGS. CAC.** Grellman Die State b. Die lumps on ONE CENT allow rapid attribution. A medium brown Premium Gem with ample hints of faded Red about the stars and letters. Lustrous and unabraded without spots. The eye appeal is outstanding. Our EAC grade MS60. NGC ID# 226J, PCGS# 147269 Base PCGS# 1898

- 3654 1853 N-3, R.1, MS66 Brown PCGS. CAC.** Grellman Die State a. Many pockets of orange-red accompany design recesses, though the open fields and high points are sea-green. Both sides are remarkably free from carbon and contact. The strike is sharp except on star 5. Our EAC grade MS62. NGC ID# 226K, PCGS# 405982 Base PCGS# 1901

**1853 Braided Hair Large Cent, MS65 Red  
N-25, The Ultimate Red Type Coin**

- 3655 1853 N-25, R.1, MS65 Red PCGS. CAC.** This coin almost single-handedly gives new meaning to the "Red" designation, for it is nearly as bright and fresh looking as any of the new Lincoln cents one might pick up in pocket change today. The base of the 1 in the date is recut, and a mint-made spur from a denticle near the first star confirms this more available variety. Liberty's portrait is crisply struck, as is the reverse wreath, though most of the stars lack central details. The rims show nearly complete dentilation, though those at the upper-left obverse border are a trifle weak. A simply astounding Braided Hair large cent. Our EAC grade MS60. Population: 1 in 65 Red, 0 finer (9/16).  
Ex: ANA Signature (Heritage, 8/2004), lot 5135. NGC ID# 226K, PCGS# 403925 Base PCGS# 1903

- 3656 1856 Slanted 5, N-14, R.1, MS65 Red and Brown PCGS. CAC.** Grellman Die State b. Fire-red outlines the legends, wreath, and stars. The open fields and high points are steel-blue. An outstanding Mature Head type coin. Marks are essentially absent, though we note a couple of unimportant strike-throughs (as coined) on the central reverse. Our EAC grade MS63. NGC ID# 226N, PCGS# 406211 Base PCGS# 1923

**FLYING EAGLE CENTS**

- 3657 1857 MS64 NGC.** Even when put under scrutiny with a loupe, it is difficult to differentiate this Choice 1857 Flying Eagle cent from a full Gem in terms of quality and eye appeal. The strike is sharp, and the glowing coppery-amber surfaces are devoid of mentionable abrasions or spots. NGC ID# 2276, PCGS# 2016

- 3658 1857 MS64 NGC.** Type of 1857. This near-Gem 1857 Flying Eagle cent displays razor-sharp detail and luminous satin luster with rose, orange, and olive hues cast throughout the golden-tan fields. A few tiny marks do not distract. NGC ID# 2276, PCGS# 2016

- 3659 1857 MS64 PCGS.** Frosty olive-tan fields give way to glossy raised devices with faint-orange luster around the raised elements on this near-Gem Flying Eagle cent. Only a few deep-toned flecks are visible in out-of-the-way crevices where they do not detract from the smooth and attractive surfaces. NGC ID# 2276, PCGS# 2016

- 3660 1857 MS64+ PCGS.** Type of 1857. This lustrous Flying Eagle type coin displays luminous tan-gold fields and sharply struck design elements. There are no significant abrasions. NGC ID# 2276, PCGS# 2016

- 3661 1857 MS64 PCGS. CAC.** An essentially mark-free Choice cent. The dusky tan-gold surfaces are smooth and lustrous. The strike is crisp except on the tail and the right-side cotton leaves. A mint-made strike-through below CENT denies a higher grade. NGC ID# 2276, PCGS# 2016

- 3662 1857 MS64 PCGS. CAC.** A sharply struck near-Gem example of this smooth and appealing Flying Eagle cent. Pale orange luster glows from the borders around tan-gold centers. The optimal collecting grade is MS64 for the issue, since there is little downside between MS63 and MS64 while a large premium is paid for full Gem MS65 coins. CAC endorsement adds to the appeal. NGC ID# 2276, PCGS# 2016

**3663 1857 Obverse of 1856, Snow-2, FS-401b, MS64 PCGS.** Type of 1856. The O in OF is wide and squared on this variety, struck from dies prepared with the 1856 obverse hub. The present coin displays the usual strike weakness on the eagle's tailfeathers along with attractive tan-gold luster and unabraded surfaces. Eye appeal is pleasing. PCGS# 410434 Base PCGS# 2016

### 1858 Flying Eagle Cent, MS65 Popular Large Letters Variant

**3664 1858 Large Letters MS65 PCGS. CAC.** High Leaves, Closed E. A delightful Gem example of the short-lived Flying Eagle design, with sharply detailed design elements and well-preserved copper-red surfaces that radiate vibrant mint luster on both sides. Produced in large numbers, and reasonably available through MS65, the 1858 Large Letters Flying Eagle cent is a rare issue in finer grades. PCGS has graded 34 numerically finer examples (9/16). NGC ID# 2277, PCGS# 2019

## INDIAN CENTS

### 1859 Cent, Nearly 'White' MS65 Single-Year Example for Type

**3665 1859 MS65 PCGS. CAC.** This Gem seemingly has it all: a full strike, vibrant luster, attractive nearly "white" color, and status as a first and single-year type. The CAC endorsement for quality within the grade and eye appeal make it all the more desirable. Each side is undeniably clean for the assessment, the only mark of note being a tick on the E in CENT. PCGS reports just 32 numerically finer examples (9/16). NGC ID# 227E, PCGS# 2052

**3666 1860 MS65 PCGS. CAC.** An array of colors emerge from primarily tan-gold luster on this Gem 1860 Indian cent. The strike is sharp throughout, and the satiny surfaces are devoid of significant abrasions. Finer examples are elusive. NGC ID# 227F, PCGS# 2058

**3667 1861 MS66 PCGS.** Satiny tan-gold luster illuminates unabraded surfaces on this sharp Premium Gem 1861 Indian cent. This issue is scarce in MS66 and rare any finer. Population: 79 in 66 (3 in 66+), 13 finer (9/16). NGC ID# 227G, PCGS# 2061

**3668 1863 MS66 PCGS.** A sharp strike prevails despite the advanced die state that produces metal flowlines in the fields. This greenish-gold 1863 Indian Head cent displays well-preserved surfaces and is ideal for representation of the copper-nickel type. Population: 68 in 66 (8 in 66+), 0 finer (9/16). NGC ID# 229D, PCGS# 2067

**3669 1864 Copper-Nickel MS65 PCGS.** Typical tan-gold luster shows lemon-yellow and lavender hues when tilted beneath a light. This Copper-Nickel type coin is well-struck and free of major abrasions. PCGS lists 31 higher-grade examples (9/16). NGC ID# 227K, PCGS# 2070

**3670 1866 MS66 Red and Brown PCGS. CAC.** Delicate bluish-brown toning is primarily visible on the obverse of this impressive Premium Gem. Perhaps 65% of the original mint red remains intact. The strike is bold with full diamonds, complete feather definition, and a boldly defined shield. Population: 7 in 66 Red and Brown, 0 finer. CAC: 2 in 66, 0 finer (9/16). NGC ID# 227P, PCGS# 2086

**3671 1869 MS65 Red and Brown PCGS. CAC.** This slightly better date is elusive in Gem condition. The present Red and Brown coin displays rich copper-red luster with soft burgundy overtones. The strike is sharp, and only a few faint flecks are seen. PCGS lists eight Red and Brown coins finer (9/16). NGC ID# 227T, PCGS# 2095

### 1869 Indian Cent, MS66 Red and Brown Clearly a Registry Set Candidate

**3672 1869 MS66 Red and Brown PCGS.** Blue overtones dominate the obverse, with orange luster claiming the margins of this Premium Gem cent. The strike is razor-sharp on the headdress and on the reverse, where a long, strong die crack runs through the right-hand edge of the wreath. Marks are minimal anywhere on the coin. Tied for numeric finest at either service — a seldom-seen example of the Premium Gem grade in this format. Population: 8 in 66 Red and Brown, 0 finer (9/16). NGC ID# 227T, PCGS# 2095

### 1869 Cent, MS65 Red Full Strike, Vibrant Luster

**3673 1869 MS65 Red PCGS.** Pumpkin-orange color paints this strongly struck and lustrous Gem. Only incidental contact emerges beneath a lens, along with scattered tiny gray flecks on the central reverse. A comparatively low mintage date. Certified in a green label holder. Population: 29 in 65 Red, 7 finer (9/16). NGC ID# 227T, PCGS# 2096

**3674 1871 MS64 Red and Brown PCGS.** Bold N in ONE. A semikey Choice cent that has a sharp strike and ample glimpses of peach-gold color. The high points are medium brown, and we note a solitary thin vertical mark on the left obverse field. NGC ID# 227V, PCGS# 2101

**1873 Cent, MS64+ Red  
Scarce Closed 3 Variant**

- 3675 1873 Closed 3 MS64+ Red PCGS.** Red examples of the 1873 Closed 3 Indian cent are sought-after rarities with only 56 examples at PCGS and NGC combined. Appearances at auction are about as scant as the coins themselves. This Choice representative nearly meets the requirements for an even higher grade. Amber-gold surfaces are well-preserved. A small spot of dark color occurs above the date. Minor incompleteness appears on the ribbon, hair curls, and upper wreath leaves. Population: 20 in 64 (2 in 64+) Red, 21 finer (9/16). NGC ID# 227X, PCGS# 2111

- 3676 1877 VF30 PCGS.** The bottoms of the letters BER are incomplete on this piece that displays smooth olive-brown surfaces. A few trivial marks are noted, with traces of verdigris on the reverse. *From The Twelve Oaks Collection, Part III.* NGC ID# 2284, PCGS# 2127

**1883 Indian Cent, MS66 Red  
Bright, Even Red Surfaces**

- 3677 1883 MS66 Red PCGS. CAC.** The 1883 is one of the earlier dates the collector can occasionally locate for type purposes. This is a lovely, problem-free example that has bright red surfaces with just a tinge of yellow intermixed. The strike is strong throughout and there are no mentionable abrasions. Population: 29 in 66 Red, 6 finer. CAC: 7 in 66, 4 finer (9/16). NGC ID# 228A, PCGS# 2147

**1893 Indian Cent, MS66 Red  
Fiery Red Luster**

- 3678 1893 MS66 Red PCGS.** While the Panic of '93 greatly influenced the mintages of larger denominations, the Indian cent was unaffected and more than 46 million pieces were struck. Carbon spots are the bane of most 1893 Red examples, even in higher Mint State grades. This Premium Gem cent is refreshingly free of carbon, with only a few tiny and well-hidden flecks on the reverse. Frosty fire-red color dominates both sides with strong mint luster and a sharp (but not full) strike. The eye appeal is excellent. Few coins equal the present example, and finer pieces are virtually unobtainable. Population: 35 in 66 (4 in 66+) Red, 1 finer (9/16). NGC ID# 228M, PCGS# 2186

- 3679 1894 MS65+ Red PCGS.** The Plus designation on this coin will appeal to Registry Set collectors. The strike is sharp, and each side displays frosty orange-gold luster without noticeable abrasions. A few tiny specks are seen on the obverse. PCGS lists 34 finer Red submissions (9/16). NGC ID# 228N, PCGS# 2189

- 3680 1900 MS66 Red NGC.** This pristine Premium Gem exhibits fiery orange luster and bold design motifs, and is free of marks or spots. An outstanding example for the Indian cent connoisseur. Census: 47 in 66 (3 in 66+) Red, 4 finer (9/16). NGC ID# 228V, PCGS# 2207

- 3681 1909 MS66 Red PCGS. CAC.** A high-grade orange-gold cent. The strike is good, contact is absent, and the lustrous surfaces show only minor carbon. The Longacre initial appears die doubled (Snow-1, FS-101), although no premium is associated with the variety. Housed in a green label holder. NGC ID# 2297, PCGS# 2237

- 3682 1909-S MS64 Red and Brown PCGS.** This important final-year San Francisco Mint Indian cent retains about 40% of its original orange color with delicate bluish-brown toning on each side. A splendid near-Gem for the small cent aficionado. NGC ID# 2298, PCGS# 2239

- 3683 1909-S MS65 Red and Brown PCGS.** This Gem Red and Brown coin shows primarily yellow-gold luster with wisps of chestnut toning on each side. The strike is well-done, particularly on the upper three headdress feathers, which show partial definition where there usually is none. The luster is frosty and devoid of significant abrasions. PCGS lists five finer coins in the Red and Brown category (9/16). NGC ID# 2298, PCGS# 2239

- 3684 1909-S MS64 Red PCGS.** One of the two keys to the Indian cent series, along with the 1877, the 1909-S only had a mintage of 309,000 pieces. Full red pieces are difficult to come by. This is a near-Gem with full red mint luster. A few shallow marks and scattered flyspecks limit the grade, but this is a lovely example from the final year of issue for the long-lived Indian cent series. NGC ID# 2298, PCGS# 2240

**PROOF INDIAN CENTS**

- 3685 1859 PR63 PCGS.** This sharply defined Select proof Indian cent is a pleasing representative of the first-year issue, nicely illustrating the one-year design. The reflective fields exhibit subdued golden-tan proof surfaces. NGC ID# 2299, PCGS# 2247

- 3686 1863 PR64 PCGS. CAC. Snow-PR2.** A sharply detailed Choice proof from a tiny Civil War mintage of 460 pieces. This chestnut-gold specimen is ideal aside from a small reverse spot at 2 o'clock. Snow-PR2 is called "very rare" by Rick Snow. The dies have medal turn, as seen on the Judd-299 pattern.  
*Ex: Stadtem-Gardner Collections (Stack's, 2/1965), lot 1205; Teich Family Collection (Heritage, 1/2013), lot 3114. NGC ID# 229D, PCGS# 2262*

**1864 Indian Cent, PR66 Brown  
Bronze, No L**

- 3687 1864 Bronze No L PR66 Brown PCGS. CAC.** A gorgeous Premium Gem proof, this elusive issue features a bold strike and splendid surfaces. Both sides have lightly mirrored fields around the sharply defined design motifs, displaying sea-green patina. Population: 7 in 66 (1 in 66+) Brown, 2 finer. CAC: 1 in 66, 0 finer (9/16). NGC ID# 229F, PCGS# 2276
- 3688 1864 Bronze No L PR65 Red and Brown PCGS.** The later bronze 1864 proof cent, suitable for date representation. This Gem Red and Brown example displays olive-gold and lavender hues on the obverse with deeper gold and copper-brown reverse toning. A few scattered specks are present. The obverse has modest field-device contrast. Population: 39 in 65 Red and Brown, 16 finer (9/16). NGC ID# 229F, PCGS# 2277
- 3689 1869 PR66 Red and Brown PCGS.** A beautifully rendered Red and Brown proof with appreciable cameo contrast on each side. A splendid array of violet-red, purple-gray, and rose hues adorn the fields, giving this Gem 1869 proof outstanding eye appeal. Population: 13 in 66 Red and Brown, 0 finer (9/16). NGC ID# 229M, PCGS# 2295

**1870 Cent, PR65 Red  
Seldom Seen So Well-Preserved**

- 3690 1870 PR65 Red PCGS.** Shallow N in ONE. The Mint was not in the habit of recording production figures for minor proof coinage before 1878. It is estimated that at least 1,000 proof cents were struck in 1870, all with a Shallow N. Examples are usually seen with Red and Brown coloration, and all Red coins are very scarce. That is an understatement when it comes to Red Gems, which are downright rare. This luminous amber-gold specimen offers predictably full design definition without any overt evidence of contact. A small lintmark appears above the headdress feathers. Population: 28 in 65 Red, 3 finer (9/16). NGC ID# 229N, PCGS# 2299
- 3691 1875 PR65 Red and Brown PCGS.** Splashes of turquoise and blue toning reside on the exquisite orange mint surfaces of this Gem proof. Both sides have bold design motifs and excellent eye appeal. Population: 39 in 65 (2 in 65+) Red and Brown, 10 finer (9/16). NGC ID# 229U, PCGS# 2313

- 3692 1875 PR65 Red and Brown PCGS. CAC.** Ruby-red highlights combine with lime-green accents around the devices of this otherwise flame-orange Gem proof. The strike is comprehensively sharp throughout both sides. Nicely mirrored surfaces attend this Red and Brown proof, which is clearly more Red than Brown. Population: 39 in 65 (2 in 65+) Red and Brown, 10 finer. CAC: 6 in 65, 0 finer (9/16). NGC ID# 229U, PCGS# 2313

- 3693 1876 PR66 Brown PCGS.** A popular Centennial-year Indian cent, this Premium Gem proof features a bold strike and reflective chestnut and olive-brown surfaces, exhibiting delicate blue overtones on each side. A hint of faded mint red adds to the eye appeal. Population: 12 in 66 Brown, 0 finer (9/16). NGC ID# 229V, PCGS# 2315

- 3694 1879 PR66 Red and Brown PCGS. Snow-PR1.** The date is lightly repunched within the loops of the 8 and 9. A splendid cherry-red and pumpkin-gold Premium Gem with a blush of forest-green above the wreath ribbon. Well struck and mark-free with scattered tiny gray flecks on the lower obverse. NGC ID# 229Y, PCGS# 2325

- 3695 1881 PR66 Brown PCGS.** A vibrant blue- and violet-toned, glassy-mirrored Premium Gem proof with stunning visual impact. This is one of the most impressively patinated Indian Head proof cents we have offered — scarce in this condition — and unforgettable with the vivid coloration. Population: 24 in 66 Brown, 1 finer (9/16). NGC ID# 22A2, PCGS# 2330

- 3696 1882 PR66 Red and Brown PCGS.** A fully struck and reflective proof that is free of distractions. Each side displays vivid toning in shades of forest-green, rose-red, and olive-gold. Population: 38 in 66 Red and Brown, 5 finer (9/16). NGC ID# 22A3, PCGS# 2334

- 3697 1885 PR65 Red PCGS.** This shining reddish-orange Gem has lost none of its fire. Crisply struck with plenty of eye appeal. Population: 19 in 65 Red, 12 finer (9/16). NGC ID# 22A6, PCGS# 2344

- 3698 1892 PR66+ Red and Brown PCGS. CAC.** Lavender-rose, olive-green, and sun-orange hues are well-balanced across mirrored fields and sharp, satiny design elements. This high-end Red and Brown proof 1892 cent displays considerable eye appeal. Population: 39 in 66 (1 in 66+) Red and Brown, 1 finer. CAC: 5 in 66, 1 finer (9/16). NGC ID# 22AE, PCGS# 2364

- 3699 1894 PR65 Red PCGS.** This fully struck Gem Red proof exhibits fire-orange surfaces and reflective fields. The devices are satiny and well-preserved. The 1894 proof is elusive this fine in the Red color category, and finer pieces are rare. Population: 29 in 65 Red, 10 finer (9/16). NGC ID# 22AG, PCGS# 2371

**1894 Indian Cent, PR66 Red  
Unavailable Any Finer**

- 3700 1894 PR66 Red PCGS.** The fields show nice mirrors when viewed at an angle, and the natural red color deepens slightly across the central devices. Aside from one or two pinpoint planchet irregularities and a few microscopic flecks, the smooth surfaces are virtually without fault. The strike is crisp-to-sharp throughout, with only minor evidence of the often-seen weakness at the first three headdress feather tips. Neither PCGS nor NGC reports a numerically finer proof for the issue. Population: 10 in 66 Red, 0 finer (9/16). NGC ID# 22AG, PCGS# 2371

- 3701 1906 PR66 Red and Brown PCGS.** An impressive Premium Gem proof, this 1906 Indian cent exhibits splashes of iridescent toning over its rich orange mint surfaces. A highly attractive example with a low population. Population: 22 in 66 (1 in 66+) Red and Brown, 2 finer (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 22AV, PCGS# 2406

## LINCOLN CENTS

### 1909 VDB Cent, MS65+ Red FS-1101, Doubled Die Obverse

- 3702 1909 VDB Doubled Die Obverse, FS-1101, MS65+ Red PCGS.** CAC. All four numerals of the date and RTY in LIBERTY are noticeably die doubled on this popular *Cherry-pickers'* variety. Examples of the 1909 VDB with the doubled obverse die are rare any finer than this high-end, peach-red Gem. The coin displays vibrant luster over the frosty, finely textured surfaces. A few light marks exist on the shoulder and some microscopic flecks (invisible in-hand) require a glass for viewing. CAC endorsed. Population: 26 in 65 (2 in 65+) Red, 5 finer (9/16). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425

- 3703 1909-S VDB MS62 Brown NGC.** Fully lustrous tan surfaces host splashes of golden mint color on each side of this sharply detailed key Lincoln cent. NGC ID# BYKW, PCGS# 2426

### 1909-S VDB Lincoln Cent, MS65 Red and Brown Important Demand Rarity

- 3704 1909-S VDB MS65 Red and Brown PCGS.** Original red color cedes to chestnut-brown centers with lovely blue overtones on this Gem cent. The attractively toned surfaces are virtually free of marks, while the strike is crisp and sharp. While other 20th century cents and varieties are arguably rarer or more elusive, none can match the aura or the unceasing demand of 1909-S VDB. This irrefutable series key will find a home in one of the finest high-grade sets. PCGS reports just 58 pieces in a finer numeric grade in Red and Brown (9/16). NGC ID# 22B2, PCGS# 2427

- 3705 1910-S MS66 Red PCGS.** CAC. A stunning Premium Gem, this brilliant San Francisco Mint cent exhibits bold design definition and frosty light orange mint luster, resulting in exceptional eye appeal. Both sides are virtually perfect, showing only minuscule marks. CAC: 28 in 66, 0 finer (9/16). NGC ID# 22B6, PCGS# 2440

- 3706 1911-D MS66 Red PCGS.** The 1911-D is scarce this well-preserved and prohibitively rare finer. The coin here displays luminous fire-orange luster without abrasions or noteworthy specks. Significant die erosion produces metal flowlines in the fields. Population: 57 in 66 (5 in 66+) Red, 1 finer (9/16). NGC ID# 22B8, PCGS# 2446

- 3707 1913-S MS65 Red and Brown PCGS.** CAC. Glossy luster emits bronzed copper-gold luster on this Gem Red and Brown 1913-S cent. The strike is sharp despite slight evidence of die erosion in the reverse fields. There are no bothersome abrasions. Finer coins are nonexistent at PCGS. Population: 48 in 65 Red and Brown, 0 finer. CAC: 13 in 65, 0 finer (9/16). NGC ID# 22BF, PCGS# 2466

### 1914-D Cent, MS62 Red and Brown Conditionally Scarce Key Date

- 3708 1914-D MS62 Red and Brown NGC.** An unworn and immensely appealing representative of this popular Lincoln cent key, well-defined with primarily copper-orange surfaces that show occasional violet and brown elements. Despite a handful of minor abrasions on each side and minor carbon, it is an important, conditionally scarce survivor.  
Ex: ANA Signature (Heritage, 7-8/2008), lot 1201. NGC ID# 22BH, PCGS# 2472

- 3709 1915-D MS66 Red and Brown PCGS.** CAC. This luminous amber-red and light brown Premium Gem is among the finest Red and Brown coins certified. The strike is sharp, and eye appeal is pleasing. The 1915-D cent is seldom seen this fine regardless of color designation. Population: 3 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 2 in 66, 0 finer (9/16). NGC ID# 22BL, PCGS# 2481

### 1915-D Cent, MS66 Red Just One Finer Piece at PCGS

- 3710 1915-D MS66 Red PCGS.** A delightful coin for the specialist who demands original color and surfaces. Full Red appears on both sides with no noticeable fading, and only a few carbon flecks scatter across both sides, particularly at O in ONE and above the date. The fields and raised devices are excellent, with a only tiny ticks found under scrutiny including a short mark hidden in Lincoln's hairline. A prize for the Lincoln cent collector and a coin that is currently tied behind one numerically finer coin at PCGS. Population: 35 in 66 Red, 1 finer (9/16). NGC ID# 22BL, PCGS# 2482

- 3711 1915-S MS64 Red and Brown PCGS.** Both sides of this fully lustrous and sharply struck near-Gem Lincoln cent exhibit light tan surfaces with a few trivial spots. PCGS has only certified 26 finer Red and Brown examples (9/16). NGC ID# 22BM, PCGS# 2484

**3712 1915-S MS64 Red and Brown PCGS.** Rich copper-orange and olive-tan elements mingle on this lustrous San Francisco cent. Both sides have considerable "life" to them, and there are no singularly distracting flaws. NGC ID# 22BM, PCGS# 2484

**3713 1916 MS67 Red PCGS.** A sharp strike complements luminous, frosty surfaces on this full Red Superb Gem example. The obverse exhibits a bright golden interior surrounded by vivid copper-orange borders, while the reverse is primarily the former color. A few faint flecks are noted in the left obverse field. Population: 69 in 67 (10 in 67+) Red, 0 finer (9/16). NGC ID# 22BN, PCGS# 2488

**3714 1918-S MS65 Red and Brown PCGS.** Lesser-graded pieces are easily found for the 1918-S, yet Gem Uncirculated examples are scarcely available and finer pieces are extremely rare. This Red and Brown Gem is lustrous and strictly original with blaze-orange undertones and bluish-brown accents. A strong radial die crack crosses the left sheaf of wheat, and two prominent die dots exist — one between U and N of UNITED and another between D and S of UNITED STATES. The strike is sharp despite the advanced state of the reverse die. Population: 27 in 65 (1 in 65+) Red and Brown, 0 finer (9/16). NGC ID# 22BX, PCGS# 2511

**1922-D Cent, MS66 Red and Brown  
None Certified Finer in Any Color Designation**

**3715 1922-D MS66 Red and Brown PCGS.** CAC. PCGS has only certified three examples of the 1922-D in MS66 Red and Brown, and there are none finer at either service. Even in Brown and Red designations there are none certified finer (9/16). This example is boldly struck and displays rich copper-orange luster. There are no mentionable carbon specks. NGC ID# 22C8, PCGS# 2538

**3716 1922 No D, Strong Reverse, FS-401, XF40 PCGS.** CAC. Die Pair 2. A chocolate-brown example of the famous sans-mintmark *Guide Book* variety. Abrasions are relegated to the vicinity of the E in CENT. The sharply defined wheat ears distinguish Die Pair 2 from the less valuable Weak Reverse (Die Pair 1 and 3) varieties. *From The Walter Freeman Collection, Part II.* NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**3717 1922 No D, Strong Reverse, FS-401, XF40 PCGS.** CAC. Die Pair 2. A lovely chocolate-brown representative of this desirable key date variety. The wheat ears, TRUST, and the final 2 in the date are all sharp, characteristic of better grade FS-401 examples. No marks are consequential. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Cent, AU53  
FS-401, Strong Reverse**

**3718 1922 No D, Strong Reverse, FS-401, AU53 PCGS.** CAC. Die Pair 2. The obverse and reverse dies clashed on this pairing, and subsequent die polishing to remove evidence of the clashing inadvertently removed the mintmark. The reverse die was replaced before more coins were struck, thus this die pair is commonly called the Strong Reverse. Light reddish-brown color covers both sides and there are faint traces of mint luster around the devices. A few minor marks can be found with a magnifier, but this is definitely an above-average example of this rare and widely sought-after variant in the Lincoln cent series.

*Ex: Fort Worth Signature (Heritage, 3/2010), lot 275.* NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Cent, MS63 Red  
Weak Reverse**

**3719 1922 Weak Reverse MS63 Red PCGS.** Die Pair 3. The obverse is weak and the reverse is weaker on this brilliant "No D" Lincoln cent. The surfaces are frosty bright orange with a few splashes of dark patina and iridescent toning. Although the second tier variety, this is an important piece in exceptional condition, and one that is rarely found in mint condition, much less with intact mint color. Population: 4 in 63 Red, 3 finer (9/16). NGC ID# 2U6G, PCGS# 2542 Base PCGS# 2539

**3720 1923-S MS64 Red NGC.** Both sides of this Choice Mint State 1923-S Lincoln cent exhibit considerable strike weakness that is typical of the issue. However, the surfaces display brilliant and highly lustrous orange mint color that is unlike many "Red" examples of this issue that are more brown than red. Census: 13 in 64 Red, 2 finer (9/16). NGC ID# 22CB, PCGS# 2548

**1924-D Cent, MS65 Red and Brown  
Just One Finer Coin at PCGS**

**3721 1924-D MS65 Red and Brown PCGS. CAC.** The orange-gold obverse is close to full Red. The reverse is dusky peach-red with a blush of forest-green near the left wheat ear. Lustrous and nearly mark-free. The strike is sharp except on the O in ONE. CAC endorsed for quality, which has seen just six qualified Red and Brown MS65 coins and none finer. Only one piece is certified in a numerically finer grade by PCGS. Population: 35 in 65 Red and Brown, 1 finer. CAC: 6 in 65, 0 finer (9/16). NGC ID# 22CD, PCGS# 2553

**3722 1926-D MS65 Red PCGS.** While the Denver Mint is not known for sharp strikes in the 1920s, the 1926-D suffers more than some of the surrounding years from less-than-full strikes. This example is bolder than most, with vibrant red and orange luster over the well-defined motifs. Carbon dotting is seemingly inescapable for the issue, and this Gem has its share on both sides, the largest spot appearing on the left wheat sheaf. Scarce in Gem Red and rare any finer. Population: 54 in 65 Red, 4 finer (9/16). NGC ID# 22CK, PCGS# 2572

**3723 1926-S MS64 Red and Brown NGC.** Satiny luster delivers auburn-brown, violet-red, and copper-orange hues on this near-Gem example, accenting the well-struck motifs. Some minor die erosion is seen in the fields. NGC lists 27 numerically finer Red and Brown examples (9/16). NGC ID# 22CL, PCGS# 2574

**1928-S Cent, MS65 Red  
Glowing Golden-Amber Surfaces**

**3724 1928-S MS65 Red PCGS.** Although slightly more accessible than the S-mint issues that preceded it, the 1928-S remains a better date from the 1920s. It is a known rarity in Gem Red condition despite a mintage of 17.2 million coins. The obverse is strongly defined, while the reverse exhibits minor softness on the O in ONE. Glowing golden-amber surfaces capture the attention of the viewer. Population: 65 in 65 (12 in 65+) Red, 5 finer (9/16). NGC ID# 22CT, PCGS# 2593

**3725 1929-S MS66 Red PCGS. Ex: Lone Star Collection.** Well-defined with attractive mint-green and orange patina. The reverse has a couple of small contact marks, and the obverse exhibits a single carbon spot, on Lincoln's shoulder. A lovely Premium Gem, in a superior state of preservation. Population: 38 in 66 (2 in 66+) Red, 0 finer (9/16).  
*Ex: Baltimore Signature (Heritage, 7/2003), lot 328; San Francisco Signature (Heritage, 7/2005), lot 5305; Long Beach Signature (Heritage, 6/2016), lot 3156. NGC ID# 22CW, PCGS# 2602*

**3726 1938-S MS67+ Red PCGS. CAC.** PCGS has awarded Plus designations to only seven MS67 Red examples with none finer (9/16). This CAC-endorsed coin displays frosty orange-gold luster with no surface distractions. The strike is sharp. CAC: 24 in 67, 0 finer (9/16). NGC ID# 22DN, PCGS# 2674

**3727 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS.** The BE in LIBERTY and the 4 in the date are nicely die doubled in a vertical direction. The variety is not to be confused with the similar FS-102, which shows stronger doubling on IN GOD WE TRUST. The present lustrous orange-red FS-101 Gem has a good strike and provides exceptional eye appeal. A loupe reveals a few microscopic blue freckles. NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

**3728 1941-S MS67+ Red PCGS. CAC.** Small S. A gorgeous orange-red Superb Gem. The strike is bold and the lustrous surfaces exhibit only the most inconsequential imperfections. As of (9/16), PCGS has certified 31 pieces as MS67+ with none finer. NGC ID# 22DY, PCGS# 2701

**1942 Cent, MS67+ Red  
Unsurpassed Quality**

**3729 1942 MS67+ Red PCGS. CAC.** With a mintage exceeding 657 million coins, the 1942 is widely available in all grades through MS67 with Red surfaces. What distinguishes this representative from the field is its spectacular quality within that grade. This marvelous Superb Gem exhibits rose accents over light pumpkin-gold surfaces. Examination with a high-powered loupe confirms the extraordinary quality. An unbeatable Registry candidate. NGC ID# 22L9, PCGS# 2704

**3730 1949-S MS67+ Red PCGS. CAC.** This is one of a dozen MS67+ Red coins at PCGS that rank as the finest at that service (9/16). The strike is full, and the frosty orange-gold surfaces are devoid of visual distractions. The CAC population in this grade is small. CAC: 40 in 67, 0 finer (9/16). NGC ID# 22EX, PCGS# 2776

**3731 1952 MS67 Red PCGS.** A Registry Set candidate of importance, this fiery orange-red cent is supremely lustrous and attractive. With a mintage exceeding 186 million pieces, the 1952 Lincoln cent would logically seem to be available in all grades except (possibly) the near-ultimate MS69 condition. Not so. Superb Gem examples are rare, and MS67 is the finest seen at either service, with a single Plus-graded coin at PCGS. Population: 23 in 67 (1 in 67+) Red, 0 finer (9/16). CAC has not endorsed any MS67 example to date. NGC ID# 22F6, PCGS# 2797

**3732 1955 Doubled Die Obverse, FS-101 — Altered Color — NGC Details. AU.** Both sides exhibit rich sea-green shades. The present partly lustrous key date cent is smooth aside from faded thin marks near the T in CENT and the O in ONE. The doubled die spread throughout the obverse legends is unchallenged within the Lincoln series. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3733 1955 Doubled Die Obverse, FS-101, AU55 NGC.** The 1955 FS-101 is arguably the best known of all doubled die varieties. It was certainly the first to be extensively promoted, as it was reported shortly after issue. This medium brown example is minimally abraded and shows slight wear on Lincoln's cheekbone. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3734 1955 Doubled Die Obverse, FS-101, AU55 NGC.** A partly lustrous example of this classic doubled die variety. The steel-gray and orange-gold surfaces display moderate obverse contact and an unobtrusive spot near the F in OF. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3735 1955 Doubled Die Obverse, FS-101, AU58 NGC.** The satiny and minimally marked walnut-brown surfaces exhibit scattered tiny gray freckles. Slight wear on the cheekbone confirms momentary service in the Eisenhower-era economy. A minor retained lamination (as made) is below the AM in AMERICA. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3736 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC.** Olive-green toning dominates, though orange-red lingers within protected areas of the obverse. This lustrous and lightly abraded key date cent has pleasing sharpness. The most famous doubled die variety of any series. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**3737 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC.** The obverse legends exhibit a spread unrivaled within the Lincoln series. This coruscating chocolate-brown example displays only inconsequential contact. Future appearances can be confirmed by small areas of tan toning both above and below the date.  
*Ex: Atlanta ANA Signature (Heritage, 4/2006), lot 158.* NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

#### 1970-S Large Date Cent, MS64 Red and Brown FS-101, Doubled Die Obverse

**3738 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown NGC.** Sharp doubling of LIBERTY and IN GOD WE TRUST characterizes this popular die variety. In fact, the doubling is visible without a glass, and is nearly as prominent as the famous 1972 Doubled Die cent. This variety is listed but unpriced in the 2017 Guide Book. Both sides are fully lustrous with blue and violet toning on the orange mint surfaces. NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

**3739 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS.** A lovely orange-red example of FS-101, the most prominent of the several doubled die obverse cent varieties minted in Philadelphia during 1972. All obverse legends are strongly doubled, to a degree surpassed only by the 1955 FS-101. Perfection is precluded by minor contact on the hair above the ear. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

**3740 1972 Doubled Die Obverse, FS-101, MS66+ Red PCGS.** The very strong doubling on the obverse legends is reminiscent of the FS-101 1955 cent. A pumpkin-gold Premium Gem with booming luster and an virtual absence of carbon. A minute tick or two is concealed on Lincoln's suit. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

#### 1972 Lincoln Cent, MS67 Red FS-101, Popular Doubled Die Obverse

**3741 1972 Doubled Die Obverse, FS-101, MS67 Red NGC.** A delightful Superb Gem example of this famous *Guide Book* variety. Strong doubling is evident on the date and lettering in LIBERTY and IN GOD WE TRUST. The design elements are sharply detailed and the lustrous original red surfaces are impeccably preserved. Census: 14 in 67 Red, 0 finer (9/16). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

### PROOF LINCOLN CENTS

**3742 1912 PR65 Red and Brown PCGS. CAC.** This sharply detailed Gem proof exhibits nearly full mint color with slight brown toning on the reverse. A few small spots are evident, preventing a higher grade. An outstanding example. Population: 56 in 65 Red and Brown, 14 finer. CAC: 10 in 65, 7 finer (9/16). NGC ID# 22KV, PCGS# 3313

**3743 1913 PR66 Red and Brown NGC.** Razor-sharp detail characterizes this Premium Gem Red and Brown 1913 proof, while the surfaces exhibit rich matte luster. Golden-orange color yields occasional bits of russet-green and violet. Census: 21 in 66 (1 in 66+) Red and Brown, 7 finer (9/16). NGC ID# 22KW, PCGS# 3316

#### 1915 Cent, PR66 Red and Brown Only One Coin Numerically Finer at NGC

**3744 1915 PR66 Red and Brown NGC.** Iridescent shades of lime-green, dusky-red, and royal-blue toning combine to provide an exceptionally rich patina over the surfaces of the Red and Brown matte proof Lincoln cent. An unforgettable Premium Gem, the proof strike is razor-sharp throughout both sides, and there are no marks, spots, or other problems to report. The 1915 proofs are rare — just 1,150 pieces were struck, and the number of survivors is clearly insufficient for the demand. This MS66 representative will be a centerpiece of any set. Census: 19 in 66 (1 in 66+) Red and Brown, 1 finer (9/16). NGC ID# 22KY, PCGS# 3322

**1936 Cent, PR65 Red  
First-Year With Satin Finish**

- 3745 1936 Type One—Satin Finish PR65 Red PCGS. CAC.** Uniform copper-gold color dominates the obverse of this luminous Gem proof, ceding to variegated copper-gold and crimson hues on the reverse. Satiny surfaces reveal just a few minuscule light flecks. Housed in a first generation holder. Population: 57 in 65 (1 in 65+) Red, 35 finer. CAC: 9 in 65, 4 finer (9/16).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 579; Central States Signature (Heritage, 4/2012), lot 3423; Long Beach Signature (Heritage, 5-6/2012), lot 3251. NGC ID# 22L2, PCGS# 3332*

- 3746 1936 Type Two — Brilliant Finish PR63 Cameo PCGS.** Cameo examples of the 1936 Type Two proof cent are rare in all grades. This Select example shows pleasing contrast with coppery-rose and peach-orange coloration. A few trivial lines limit the grade. Population: 1 in 63 Cameo, 9 finer (9/16). NGC ID# BY3A, PCGS# 83335

**1937 Lincoln Cent, PR67 Red  
None Finer at PCGS**

- 3747 1937 PR67 Red PCGS.** The original red surfaces of this spectacular Superb Gem are impeccably preserved, with deeply mirrored fields and no mentionable distractions. The design elements exhibit razor-sharp definition and eye appeal is terrific. From a limited proof mintage of 9,320 pieces. Population: 22 in 67 Red, 0 finer (9/16). NGC ID# 22L7, PCGS# 3338

- 3748 1941 PR66+ Red PCGS. CAC.** An extraordinarily attractive Premium Gem proof, this fully brilliant Lincoln cent exhibits brilliant orange mint color with highly mirrored fields and reflective devices. Sharply struck and nearly flawless. CAC: 35 in 66, 4 finer (9/16). NGC ID# 3H34, PCGS# 3350

- 3749 1942 PR66 Red PCGS. CAC.** A glittering orange-red proof with fully reflective surfaces including the raised devices, all of which are glassy-smooth and deeply mirrored. The toning varies from pale pink to flame-orange depending on the angle of view. CAC endorsed. PCGS reports only five numerically finer examples (9/16). NGC ID# 22L9, PCGS# 3353

**1942 Lincoln Cent, PR67 Red  
Even Red Color**

- 3750 1942 PR67 Red PCGS.** A magnificent Premium Gem proof, with impeccably preserved orange-red surfaces and deeply mirrored fields. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded only four numerically finer examples and none are finer at NGC (8/16). NGC ID# 22L9, PCGS# 3353

- 3751 1954 PR67 Red Deep Cameo PCGS.** Dramatic field-device contrast characterizes each side of this Superb Gem Red proof 1954 cent. The brilliant copper-pink surfaces showcase liquidlike mirroring in the fields and thick, frosty luster on the relief elements. The preservation appears almost flawless. Rarely seen this fine. Population: 14 in 67 Red Deep Cameo, 6 finer (9/16). NGC ID# 22LE, PCGS# 93371

- 3752 1957 PR68 Red Ultra Cameo NGC.** Just eight 1957 proof cents possess the PR68 Ultra or Deep Cameo designation by NGC and PCGS combined and there are no finer examples at either service (9/16). This example is, by definition, nearly flawless with unfathomably deep mirrors and ultra-frosty motifs. A stunning candidate for the finest proof cent collection. NGC ID# 22LH, PCGS# 93380

**1971-S Doubled Die Cent, PR67  
FS-101, Red Deep Cameo Proof**

- 3753 1971-S Doubled Die Obverse, FS-101, PR67 Red Deep Cameo PCGS.** Brilliant orange surfaces with deeply mirrored fields surround frosty devices on this Superb Gem doubled die obverse cent. We seldom offer an example of this scarce variety, where doubling is strong on LIBERTY and IN GOD. Lesser doubling is visible on TRUST and the date. A few tiny carbon flecks are noted as well as a faint, oblong area of deeper orange toning above the date. Here is a Superb Gem Deep Cameo Proof with Red color, a prize for the Lincoln cent proof specialist. Population: 3 in 67 Deep Cameo, 1 finer (9/16).

*From The Twelve Oaks Collection, Part III. NGC ID# AUV5, PCGS# 93533 Base PCGS# 93548*

**1990 No S Cent, PR68 Red Deep Cameo  
Vibrant Color, Famous Mintmarkless Error**

- 3754** 1990 No S, FS-101, PR68 Red Deep Cameo PCGS. Among Lincoln Memorial cents, the 1990 No S is the only missing-mintmark proof variety, and this PR68 Deep Cameo PCGS will be hotly contested by cent collectors. Vibrant flame-orange fields contrast with the frosted central motifs, all of which approach a conceivably finer grade based on the near-flawless surface quality. The key to the cent proof series. Population: 92 in 68 (1 in 68+) Deep Cameo, 41 finer (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**1990 No S Cent, PR68 Red Ultra Cameo  
FS-101, Fewer than 200 Coins Extant**

- 3755** 1990 No S, FS-101, PR68 Red Ultra Cameo NGC. Fewer than 200 1990 No S proof cents are believed extant. The egregious error occurred when Philadelphia Mint officials shipped circulation-strike dies without the mintmark to San Francisco, where they were polished and used to strike proofs. This virtually pristine specimen displays deep mirrors set against thickly frosted motifs. An important opportunity for the specialist. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**TWO CENT PIECES**

- 3756** 1864 Large Motto MS66 Red and Brown PCGS. CAC. A woodgrain pattern of auburn-brown toning accents coppery-orange luster on the obverse of this Premium Gem Large Motto coin. The reverse has similar color, but the brown toning is more of a centrally located blush with lustrous borders. The strike is sharp, and no distracting abrasions are present. Population: 29 in 66 (1 in 66+) Red and Brown, 0 finer (9/16). NGC ID# 22N9, PCGS# 3577
- 3757** 1865 Plain 5 MS65 Red PCGS. CAC. A beautiful second-year Gem. Lustrous mark-free surfaces and consistent peach-gold color proclaim the quality. The strike is sharp except on the obverse leaves near 9 o'clock. A strong lens is required to locate the few pinpoint flecks. PCGS# 38249 Base PCGS# 3584
- 3758** 1869 MS65 Red and Brown PCGS. CAC. More than half of the original orange mint color remains on this pleasing Gem two cent piece. Bluish-brown toning is primarily noted on the high points, but also in the reverse fields. Well struck from perfect dies. Population: 67 in 65 (1 in 65+) Red and Brown, 5 finer. CAC: 28 in 65, 4 finer (9/16). NGC ID# 22ND, PCGS# 3604

**PROOF TWO CENT PIECES**

**1864 Two Cent Piece, PR65 Red and Brown  
First-Year Proof Issue**

- 3759** 1864 Large Motto PR65 Red and Brown PCGS. The two cent piece made its debut in 1864 and proof mintages were quite modest. Only a handful of Small Motto proofs are known and about 100 proofs of the Large Motto design were struck, including the present coin. The original red surfaces of this attractive Gem have mellowed to olive-brown in some areas, with well-preserved reflective fields underneath. The design elements exhibit razor-sharp definition throughout and the overall presentation is most attractive. Population: 39 in 65 Red and Brown, 13 finer (9/16).  
*From The Walter Freeman Collection, Part II.* NGC ID# 274T, PCGS# 3622

- 3760** 1866 PR66 Brown Cameo NGC. The sole proof 1866 two cent piece certified as Brown Cameo by NGC (9/16). The fields reveal iridescent peach-gold and cobalt-blue shades upon rotation beneath a light. The strike is full, and the sole imperfection is a tick above the S in CENTS. NGC ID# 274V, PCGS# 3630
- 3761** 1869 PR65 Red and Brown PCGS. CAC. An olive-brown reverse complements the tangerine-orange obverse of this Gem Red and Brown 1869 proof. A few small bits of toning appear on the central obverse, although the shield and wreath nonetheless display modest contrast. The strike is sharp, and eye appeal is pleasing. CAC endorsement confirms the quality. Population: 69 in 65 (3 in 65+) Red and Brown, 24 finer. CAC: 23 in 65, 13 finer (9/16). NGC ID# 274Y, PCGS# 3640

**1869 Two Cent Piece, PR66 Red and Brown  
Only 600 Pieces Struck**

- 3762** 1869 PR66 Red and Brown PCGS. From a limited mintage of just 600 pieces, the 1869 proof two cent piece is rare in PR66 condition, and finer coins are virtually unobtainable. The impeccably preserved original red surfaces of this delightful Premium Gem have mellowed to light brown and crimson in some areas, with reflective fields and sharply detailed design elements throughout. Population: 22 in 66 Red and Brown, 2 finer (9/16). NGC ID# 274Y, PCGS# 3640
- 3763** 1871 PR66 Brown NGC. CAC. FS-102. The 1871 proof two cent piece is distinctive for its die-doubled obverse, showing a significant spread on IN GOD WE TRUST. This Premium Gem Brown example displays glassy surfaces and sharp design elements. An array of blue, violet, and sun-orange hues paint the fields. Census: 9 in 66 Brown, 2 finer. CAC: 6 in 66, 0 finer (9/16). NGC ID# 22NH, PCGS# 3645

## THREE CENT SILVER

- 3764 1855 MS64 PCGS.** This Choice 1855 is sharply struck from heavily clashed dies. The luster is frosty and shows light golden toning. There are no distracting abrasions. Population: 44 in 64, 24 finer (9/16). NGC ID# 22Z4, PCGS# 3671
- 3765 1861 MS66+ PCGS.** Although the 1861 three cent silver is usually available in MS66, this piece stands apart as the only Plus-designated example in that grade (10/16). The coin is well-struck and frosty with the usual clash marks in the fields. Incredible multicolor toning embraces much of each periphery. NGC ID# 22ZA, PCGS# 3679

## PROOF THREE CENT SILVER

### 1863 Three Cent Silver, PR66 Important Civil War Era Issue

- 3766 1863 PR66 PCGS.** The obverse of this gorgeous Premium Gem exhibits light champagne toning within a ring of electric-blue, while the reverse has rich gold at the center, within rings of blue and light green. The fields are fully mirrored with little field-to-device contrast. Population: 17 in 66 (2 in 66+), 0 finer (9/16). NGC ID# 7VZF, PCGS# 3712

### 1867 Three Cent Silver, PR66 Only 625 Pieces Struck

- 3767 1867 PR66 PCGS. CAC.** A high-end Premium Gem from a small proof mintage of 625 pieces, this coin exhibits sharply detailed design elements and deeply mirrored fields throughout. The well-preserved surfaces are blanketed in shades of pale gold toning, with occasional highlights of blue and lavender. Eye appeal is outstanding. Population: 32 in 66 (1 in 66+), 4 finer. CAC: 12 in 66, 4 finer (9/16). NGC ID# 27CD, PCGS# 3717

### 1868 Three Cent Silver, PR66 Cameo Excellent Contrast

- 3768 1868 PR66 Cameo PCGS.** This lovely Premium Gem has strong field-to-device contrast with deeply mirrored fields and softly frosted devices, all beneath splendid champagne toning. The strike is bold and the overall eye appeal is exceptional. Population: 12 in 66 (1 in 66+) Cameo, 2 finer (9/16). NGC ID# 27CE, PCGS# 83718
- 3769 1870 PR66 PCGS.** This glimmering Premium Gem proof displays a sharp strike and attractive original toning. The obverse displays aquamarine and lavender hues, while the reverse exhibits lighter rose-gold color with appreciable cameo contrast. Population: 28 in 66 (2 in 66+), 2 finer (9/16). NGC ID# 27CF, PCGS# 3721
- 3770 1871 PR66 PCGS.** This Premium Gem proof three cent silver is boldly struck and reflective with lemon-gold, mint-green, and ocean-blue toning. The 1871 proof had a mintage of 960 pieces, but the scarcity of circulation strikes of this year keeps demand high among date collectors. Population: 40 in 66 (1 in 66+), 6 finer (9/16). NGC ID# 27CG, PCGS# 3722
- 3771 1873 — Artificial Toning — NGC Details. Proof.** The proof-only 1873 has a *Guide Book* mintage of only 600 pieces, though we suspect that additional examples may have been unofficially restruck during Linderman's tenure at the Mint. The present specimen has an intricate strike and a pleasing appearance. Ocean-blue centers are bounded by straw-gold peripheries. NGC ID# 27CJ, PCGS# 3724
- 3772 1873 PR64 PCGS.** Noticeable field-to-device contrast is noted beneath rich gold and iridescent toning on this boldly defined Choice proof final-year three cent silver piece. NGC ID# 27CJ, PCGS# 3724

## THREE CENT NICKELS

- 3773 1867 MS66 NGC.** Virtually Condition Census, this Premium Gem 1867 three cent nickel displays shimmering, frosty luster on top of beautifully preserved, almost untuned surfaces. Struck from heavily clashed dies with moderate weakness on the central reverse Roman numerals. Census: 9 in 66, 3 finer (9/16). NGC ID# 26K7, PCGS# 3733
- 3774 1873 Open 3 MS65+ PCGS.** Roughly half the number of Open 3 nickels were struck in 1873 compared to their Closed 3 counterparts. This high-end Gem offers shimmering luster and complete mint brilliance that generate top-notch eye appeal. Well-struck despite softness around the borders. Population: 62 in 65 (9 in 65+), 4 finer (9/16). NGC ID# 22NR, PCGS# 3740
- 3775 1880 MS66+ PCGS. CAC.** The scant mintage of just 21,000 pieces did not prevent a fair number of high-grade survivors from being put aside by collectors and dealers. This high-end Premium Gem is imbued with lilac and pale-rose toning. One or two tiny flecks are noted, but the surfaces are otherwise virtually pristine and the strike approaches Full Details. Population: 6 in 66+, 39 finer. CAC: 21 in 66, 12 finer (9/16). NGC ID# 275C, PCGS# 3748

**1885 Three Cent Nickel, AU55  
Key to the Circulation-Strike Set**

- 3776 1885 AU55 PCGS. CAC.** The 1885 is one in a series of low-mintage issues, though its 1,000-coin production is the smallest among them. Indeed, it is the smallest total among all three cent nickels. Examples are always in high demand as the key to the circulation-strike set. This lightly circulated stone-gray example features a strong strike with minimal merging over the relief elements. A couple of marks occur on the denomination. Lovely original surfaces. Population: 7 in 55, 68 finer (9/16). CAC: 1 in 55, 18 finer (9/16). NGC ID# 275G, PCGS# 3753

**PROOF THREE CENT NICKELS**

- 3777 1866 PR65 Ultra Cameo NGC.** Gleaming deep-silver mirrors surround the pristine, frost-white portrait of Liberty on this sharply struck and dramatically contrasted Gem Ultra Cameo proof. A few cloudy flecks and microscopic die polish lines are visible with a loupe, while the reverse shows disconnected leaf tips and ribbon ends from the heavily lapped proof dies. A brilliant and visually impressive example. Census: 4 in 65 Ultra Cameo, 16 finer (9/16). NGC ID# 275L, PCGS# 93762

**1866 Three Cent Nickel, PR66 Deep Cameo  
Few Certified Finer**

- 3778 1866 PR66 Deep Cameo PCGS.** The early three cent nickel pieces are rarely encountered with Deep Cameo contrast. This example has brilliant mirrored fields and fully lustrous devices with excellent contrast beneath pale champagne toning. Population: 12 in 66 (1 in 66+) Deep Cameo, 6 finer (9/16). NGC ID# 275L, PCGS# 93762
- 3779 1867 PR66 Cameo PCGS.** Cameo contrast is infrequently seen on the early three-cent nickel coinage. This delicate gold-toned example has excellent field-to-device contrast with fully mirrored fields and satin devices that exhibit bold design motifs. Population: 43 in 66 (4 in 66+) Cameo, 4 finer (9/16). NGC ID# 275M, PCGS# 83763
- 3780 1868 PR66 Cameo PCGS. CAC.** Blushes of thin golden patina fail to inhibit the bold field-devices present on each side of this amazing Premium Gem three cent nickel proof. Deeply reflective fields lack any indication of contact. Eye appeal is tremendous. Population: 25 in 66 (1 in 66+) Cameo, 1 finer (9/16). CAC: 17 in 66, 0 finer (9/16). NGC ID# 275N, PCGS# 83764

- 3781 1869 PR66 Deep Cameo PCGS. CAC.** This is a brilliant-white Deep Cameo with a full strike and deeply reflective fields. A loupe reveals a few tiny strike-throughs on the portrait, as is typically seen on this type in proof format. Population: 18 in 66 (2 in 66+) Deep Cameo, 1 finer. CAC: 15 in 66, 0 finer (9/16). NGC ID# 275P, PCGS# 93765

- 3782 1870 PR66 PCGS.** This fully struck, golden-toned proof displays satiny obverse luster on the portrait with a frostier texture on the reverse wreath. The latter side has pleasing cameo contrast. This well-preserved coin is among the finest non-Cameos certified. Population: 18 in 66 (1 in 66+), 0 finer (9/16). NGC ID# 275R, PCGS# 3766

- 3783 1871 PR67 NGC. CAC.** Satiny and fully struck with pastel gold and ice-blue patina. Although 960 1871 proof sets were produced, the net mintage is likely considerably lower, since unsold sets were melted. Some proof 1871 three cent nickels were also sold individually. NGC has certified a total of 375 specimens, with many duplicate submissions over the past 30 years. Census: 8 in 67, 0 finer. CAC: 2 in 67, 0 finer (9/16). NGC ID# 275S, PCGS# 3767

- 3784 1872 PR66 Cameo PCGS. CAC.** Brilliant, glassy-mirrored surfaces provide excellent contrast with the frost-white devices. The strike shows only a bit of blending at the centers, while the eye appeal is terrific on both sides. A glass reveals sharp wreath definition and a thin abrasion above the top of the two uppermost leaves. CAC endorsed. Population: 21 in 66 (1 in 66+) Cameo, 1 finer. CAC: 11 in 66, 0 finer (9/16). NGC ID# 26JT, PCGS# 83768

- 3785 1873 Closed 3 PR66 Cameo PCGS.** A well-contrasted Closed 3 coin with reflective fields and a hint of light golden toning around the borders. This issue is scarce so well-preserved in the Cameo category and exceedingly rare any finer. Population: 22 in 66 (3 in 66+) Cameo, 2 finer (9/16). NGC ID# 275U, PCGS# 83769

**1875 Three Cent Nickel, PR66 Cameo  
None Certified in a Finer Numerical Grade**

- 3786 1875 PR66 Cameo NGC.** Even though the mintage of 700 proofs is understated (proofs sold outside of proof sets were not recorded by the Mint), the population of Premium Gem Cameo proofs is small. The fields of this example are deeply reflective and generous amounts of mint frost cover the devices, yielding a strong contrast. A couple of small planchet flaws are seen on the obverse, the most obvious being a small lamination or lump on the cheekbone of Liberty. A glass reveals some tiny cloudy spots with greenish residue between the bridge of the nose and the rim. Otherwise, the surfaces are nearly brilliant with an attractive sheen of golden color present. Importantly, no cameo proofs are certified by either service in numerically finer grades. To date, only 19 pieces are certified by both NGC and PCGS as MS66 Cameo. NGC Census: 8 in 66 Cameo (1 in 66+, 1 in 66★), 0 finer (8/16). Ex: Long Beach Signature (Heritage, 9/2006), lot 700. NGC ID# 22NV, PCGS# 83771

- 3787 1876 PR66 PCGS.** Both sides of this reflective proof display blended multicolor hues that form concentric bands around the margins. The strike is sharp, and there are no distracting marks. A single microscopic speck in the very center of the reverse serves as a pedigree marker. Population: 20 in 66, 1 finer (9/16). NGC ID# 275W, PCGS# 3772

**3788 1876 PR66 Cameo PCGS. CAC.** This modestly contrasted Premium Gem displays a sharp strike and a hint of light golden toning. There are no distracting marks. Finer Cameos are very rare. Population: 27 in 66 Cameo, 3 finer. CAC: 12 in 66, 0 finer (9/16). NGC ID# 275W, PCGS# 83772

### 1877 Three Cent Nickel, PR64 Proof-Only Key Issue

**3789 1877 PR64 PCGS.** Only 900 proof three cent nickels were struck in 1877 and no business-strike coins were issued, making this an important key date in the series. This impressive Choice specimen exhibits sharply detailed design elements and lightly marked nickel-gray surfaces with hazy reflectivity in the fields. NGC ID# 275X, PCGS# 3773

### 1877 Three Cent Nickel, PR65 Elusive Proof-Only Date

**3790 1877 PR65 NGC. CAC.** An intricately struck and unabraded Gem. The satiny surfaces offer light straw-gold toning. Minor carbon is noted at the top of the wreath and above the O in OF. A scarce proof-only date with a mintage of just 900 pieces. Certified in a former generation holder. CAC: 32 in 65, 26 finer (9/16). NGC ID# 275X, PCGS# 3773

**3791 1878 PR67 Cameo PCGS.** Intense, frosty luster on the motifs appears as though this coin has never been dipped. The fields are reflective, and each side displays warm yellow-gold toning. Cameo contrast is immediately apparent. Population: 37 in 67 (5 in 67+) Cameo, 1 finer (9/16). NGC ID# 275Y, PCGS# 83774

**3792 1879 PR67 Cameo NGC.** After the proof-only years of 1877 and 1878, when business strike production resumed for the three cent nickel it was a very limited run. On the other hand, proof coinage rose considerably. In 1879, 3200 proofs were struck. This is a brilliant example that has deeply reflective mirrors in the fields. The devices are noticeably frosted and present strong contrast on each side. A few tiny lint marks are seen on the reverse, the only flaws on this pristine type coin. Census: 29 in 67 Cameo (1 in 67★), 7 finer (9/16). NGC ID# 275Z, PCGS# 83775

**3793 1884 PR67 Cameo PCGS.** Razor-sharp detail complements the mirrored fields and appreciable cameo contrast on this Superb Gem proof. A hint of light champagne toning accents each side. The 1884 proof is scarce this fine and rarely encountered finer. Population: 33 in 67 (1 in 67+) Cameo, 4 finer (9/16). NGC ID# 2766, PCGS# 83780

**3794 1884 PR67 Cameo PCGS.** A sharply struck and highly attractive Superb Gem proof with light nickel-gray surfaces. This is an important opportunity for the advanced specialist or Set Registry collector to obtain a pleasing representative. Population: 33 in 67 (1 in 67+) Cameo, 4 finer (9/16). NGC ID# 2766, PCGS# 83780

**3795 1887/(6) PR66 Cameo PCGS. CAC.** A late die state of the 1887/6 overdate, without any of the underdigit 6 apparent. Light caramel-gold toning accompanies flashy and undisturbed surfaces. One small strike-through (as made) below the middle denominational column. NGC ID# 2769, PCGS# 83783

## SHIELD NICKELS

### 1866 Rays Nickel, MS66 Introductory Type, None Finer

**3796 1866 Rays MS66 NGC.** This is a splendid Premium Gem nickel with remarkable aesthetic appeal. Sharply struck and thoroughly lustrous with medium gold toning. The surfaces are essentially mark-free and exhibit several peripheral die cracks. From the first year of issue, showing Rays on the reverse. Census: 27 in 66 (2 in 66+), 0 finer (9/16).

Ex: Long Beach Signature (Heritage, 9/2006), lot 765; FUN Signature (Heritage, 1/2009), lot 610. NGC ID# 22NX, PCGS# 3790

**3797 1872 MS65 NGC. CAC.** Lustrous and unabraded with light to medium peach and steel-blue toning. An interesting arrowhead-shaped strike-through is noted on the left-side leaves, a mint-made feature similar to a dropped letter. Housed in a prior generation holder. Census: 38 in 65 (1 in 65+), 15 finer. CAC: 8 in 65, 12 finer (9/16).

Ex: New York Signature (Heritage, 12/2011), lot 3232. NGC ID# 22P6, PCGS# 3799

## PROOF SHIELD NICKELS

**3798 1866 Rays PR63 PCGS.** This Select proof exhibits brilliant light gray surfaces and delicate peripheral gold toning with excellent eye appeal. Both sides are boldly struck. NGC ID# 276G, PCGS# 3817

### 1866 Rays Nickel, PR65 Cameo Largely Brilliant With Stark Contrast

**3799 1866 Rays PR65 Cameo NGC.** Merely 600 or so proofs were struck during the inaugural year of the Shield nickel in 1866. This is one of only two proof issues With Rays, the other being the very rare 1867. This contrasted Gem Cameo specimen is brilliant with a glimpse of champagne-gold patina near the left obverse border. There is a small toning spot adjacent to the second set of olive leaves on the left. Census: 19 in 65 Cameo, 39 finer (9/16). NGC ID# 276G, PCGS# 83817

**1868 Shield Nickel, PR66 Cameo  
Elusive Contrasted Proof**

**3800 1868 PR66 Cameo PCGS.** Cameo contrast is seldom seen on the early Shield nickels and this one is tied for the finest Cameo proof that PCGS has certified. The obverse has a touch of gold toning on its light gray surfaces. Both sides have fully mirrored fields around satin luster. Population: 23 in 66 (3 in 66+) Cameo, 0 finer (9/16). NGC ID# 276J, PCGS# 83822

**3801 1871 PR66 Cameo PCGS.** The 1871 proof enjoys considerable demand from type collectors, and from date collectors who are looking for an alternative to the conditionally rare circulation strikes of this issue. Light cameo contrast is visible through the delicate champagne toning on this boldly defined Premium Gem. Population: 29 in 66 (4 in 66+) Cameo, 2 finer (9/16). NGC ID# AMU3, PCGS# 83825

**3802 1871 PR66 Cameo PCGS. CAC.** This fully struck Premium Gem proof showcases stark cameo contrast on each side, accentuated by a hint of light golden toning. Finer coins are rarities. Population: 29 in 66 (4 in 66+) Cameo, 2 finer. CAC: 16 in 66, 1 finer (9/16). NGC ID# AMU3, PCGS# 83825

**1876 Nickel, PR66 Deep Cameo**

**3803 1876 PR66 Deep Cameo PCGS. CAC.** A hint of golden patina adorns this otherwise brilliant example. The mirrored fields are virtually void of carbon and contact. The strike is razor-sharp and a wire rim is seen on the reverse between 11 and 3 o'clock. Impressive white-on-black contrast further ensures the eye appeal. Population: 4 in 66 Deep Cameo, 1 finer. CAC: 2 in 66, 0 finer (9/16). NGC ID# 276T, PCGS# 93830

**3804 1878 PR65 PCGS.** This impressive Gem proof-only 1878 Shield nickel has a bold strike and satin luster, typical of the proofs from this issue. Delicate champagne and faint blue toning appears on the obverse, with richer gold toning on the reverse. NGC ID# 276V, PCGS# 3832

**3805 1878 PR65 PCGS. CAC.** Repunching is present with the lower loop of the second 8. The honey-gold fields and devices are framed by glimpses of salmon-pink and sky-blue. A popular proof-only date. Certified in a green label holder. NGC ID# 276V, PCGS# 3832

**1879 Shield Nickel, Pastel-Toned PR67+  
Finest Certified at PCGS**

**3806 1879 PR67+ PCGS. CAC.** Proofs from 1879 are surprisingly scarce when one considers that 3,200 pieces were struck. PR67 is the finest PCGS has certified (16 in PR67, 1 in PR67+), and only one piece is possibly finer, a PR68 at NGC (9/16). This is a lovely example that displays pale pastel rings of color around each side. Strike details are complete on each side, and we see no distracting contact marks. NGC ID# 22PG, PCGS# 3833

**LIBERTY NICKELS**

**1884 Liberty Nickel, MS66  
None Numerically Finer at PCGS**

**3807 1884 MS66 PCGS.** A spectacular Premium Gem Liberty nickel, with sharply detailed design elements and vibrant mint luster throughout. A few minor die cracks show through the letters in CENTS, but the lightly toned surfaces are remarkably well-preserved. Eye appeal is outstanding. Population: 45 in 66 (12 in 66+), 0 finer (9/16). NGC ID# 22PJ, PCGS# 3845

**3808 1889 MS65+ PCGS. CAC.** Bright, softly frosted mint luster lies beneath the pale golden toning seen on each side. The only strike problem we see is weakness on some of the peripheral stars. Otherwise, this is an exceptionally clean, problem-free Liberty nickel. Finer representatives are scarce. NGC ID# 2775, PCGS# 3850

**3809 1894 MS66 PCGS.** Softly frosted luster gives this Premium Gem 1894 nickel pleasing visual appeal without any discernible toning. Some typical strike weakness appears on the lower portion of the wreath and on select obverse stars. Finer examples are prohibitively rare. Population: 53 in 66 (8 in 66+), 1 finer (9/16). NGC ID# 2779, PCGS# 3855

**3810 1894 MS66 PCGS. CAC.** Vibrant, frosty luster illuminates well-preserved surfaces on this Premium Gem 1894 nickel. Stars 1 and 2 are weak, but the corn ear to the left of the wreath bow is partially defined. A hint of pale champagne toning graces each side. Population: 53 in 66 (8 in 66+), 1 finer. CAC: 12 in 66, 0 finer (9/16). NGC ID# 2779, PCGS# 3855

**3811 1895 MS65+ PCGS.** This high-end Gem is sharply struck and displays vibrant cartwheel luster. Neither side toned, and only a few light marks on Liberty's cheek limit the grade. The issue is elusive in this grade and rarely seen finer. Population: 66 in 65 (5 in 65+), 32 finer (9/16). NGC ID# 277A, PCGS# 3856

- 3812 1896 MS65 PCGS.** Satiny luster with champagne toning characterizes each side of this Gem 1896 nickel. There are no severe abrasions. Other than the corn ear to the left of the wreath bow, this piece is well-struck. Population: 66 in 65 (2 in 65+), 23 finer (9/16). NGC ID# 277B, PCGS# 3857
- 3813 1900 MS66+ PCGS. CAC.** Satiny luster illuminates beautifully preserved surfaces on this champagne-toned high-end Premium Gem type coin. The corn ear to the left of the wreath bow is slightly weak, but the obverse elements are well-defined. No distractions are observed. Population: 70 in 66 (8 in 66+), 10 finer. CAC: 29 in 66, 3 finer (9/16). NGC ID# 22PS, PCGS# 3861
- 3814 1907 MS66 PCGS. CAC.** Satiny mint luster shows a warm golden glow that deepens toward the left-hand borders. This CAC-approved Premium Gem Liberty nickel type coin displays exceptional preservation. The lower-left portion of the wreath is partially defined, and the obverse stars are sharp. Population: 52 in 66 (4 in 66+), 1 finer. CAC: 11 in 66, 0 finer (9/16). NGC ID# 277J, PCGS# 3868
- 3815 1908 MS66 PCGS. CAC.** The 1908 nickel is easily obtainable in grades through MS65, but Premium Gems are anything but. This piece displays unusually frosty, silver-gray luster, with clean surfaces that firmly warrant the MS66 designation. A few of the right-hand stars and the lower-left portion of the wreath are slightly soft, as is typically seen. Population: 26 in 66 (5 in 66+), 0 finer. CAC: 8 in 66, 0 finer (9/16). NGC ID# 24FR, PCGS# 3869
- 3816 1910 MS66+ PCGS. CAC.** A few hints of multicolor toning emerge from dusky olive-gold patina on the well-preserved surfaces of this impressive Premium Gem. The design elements are well-detailed, and slightly subdued mint luster shines through the toning. The 1910 is an available later date in the series; however only four MS66+ pieces have been certified by PCGS with a puny one coin finer (9/16). NGC ID# 277L, PCGS# 3871
- 3817 1912-D MS65 PCGS.** A satiny Gem with light golden toning and well-defined relief elements. A small fleck behind Liberty's eye serves as a pedigree marker. The 1912-D is seldom available in finer condition. NGC ID# 277P, PCGS# 3874
- 3818 1912-D MS65 PCGS.** Along with its S-mint counterpart, the 1912-D was the first branch mint five cent nickel issue. The present Gem representative offers strong, pleasing luster beneath luminous green-gold and peach patina. Though the peripheral design elements are softly struck, the well-preserved central devices are comparatively sharp. PCGS has graded 46 finer examples (9/16). NGC ID# 277P, PCGS# 3874
- 3819 1912-D MS65 PCGS. CAC.** Particularly attractive satin luster and an above-average strike give this Gem 1912-D nickel pleasant eye appeal. Warm golden toning appears over each side. Finer representatives are scarce. NGC ID# 277P, PCGS# 3874

**1912-D Liberty Nickel, MS66  
The Only Denver Issue**

- 3820 1912-D MS66 PCGS.** The Denver and San Francisco Mints produced Liberty nickels in 1912, the only appearance of the design from either of those facilities. This splendid Premium Gem features a bold strike on all aspects with the exception of the lower left ear of corn. Light gold toning adds to the eye appeal of this splendid specimen. Population: 46 in 66 (4 in 66+), 0 finer (9/16). NGC ID# 277P, PCGS# 3874

- 3821 1912-S MS64 PCGS. CAC.** Satiny mint luster joins light-orange and lilac toning over the pleasing surfaces of this near-Gem 1912-S nickel. Two or three faint bands of Mint-related grease residue run from the tiara downward to the area of star 12. The ear of corn shows sharp definition on all of the kernels, but at the expense of Liberty's hair detail, which is incomplete. Nice eye appeal remains, confirmed by the CAC endorsement. NGC ID# 277R, PCGS# 3875
- 3822 1912-S MS65 PCGS.** As the sole S-Mint Liberty nickel and a low-mintage issue, the 1912-S attracted the attention of speculators, collectors, and souvenir hunters alike. This Gem survivor displays orange and lilac toning with sharp mint luster. The strike is less than sharp on the curls above Liberty's brow, yet the fabled ear of corn on the lower-left wreath shows more kernel definition than most coins. PCGS reports just 49 numerically finer examples (9/16). NGC ID# 277R, PCGS# 3875

**1912-S Nickel, MS65  
First Generation Holder**

- 3823 1912-S MS65 PCGS. CAC.** The final year of the Liberty nickel series (if the unauthorized 1913 is excluded) witnessed its first two branch issues, the 1912-D and 1912-S. The latter has the lowest mintage of the business series. This is a lustrous Gem draped in medium powder-blue and chestnut-gold shades. Carbon and contact are inconsequential for the given grade. Encapsulated in a first-generation holder. NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, MS66  
Tied for Finest Certified**

- 3824 1912-S MS66 PCGS.** Neither PCGS nor NGC recognize any examples numerically finer than the MS66 level, ranking this Premium Gem near the top of list of high-grade survivors. Just 238,000 pieces were struck — the lowest total of the entire Liberty Head nickel series. Gleaming, lilac-infused champagne-gold toning covers both sides. The obverse is sharply struck on Liberty's hair — meaning the reverse is weak at the always-troublesome left ear of corn (almost never are both areas of the coin well-struck). The eye appeal is strong. Population: 49 in 66 (2 in 66+), 0 finer (9/16). NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

- 3825 1883 No Cents PR67 PCGS. Breen-2532.** The 18 in the date is repunched north. Breen called the variety "very rare." A sharply struck and lustrous Superb Gem draped in light to medium wheat-gold toning. The surfaces are devoid of carbon and contact. NGC ID# 22PU, PCGS# 3878

**3826 1883 No Cents PR66+ Cameo PCGS. CAC.** The 1 in the date is noticeably repunched above its upper serif and base. This fully white Premium Gem boasts icy devices and glassy fields. The strike is precise and the surfaces are devoid of detractions. NGC ID# 22PU, PCGS# 83878

**3827 1883 With Cents PR66+ PCGS. CAC.** A conditionally scarce Premium Gem example of the third nickel type of 1883. This Plus-graded, CAC-approved coin displays a sharp strike and modest field-device contrast beneath a blanket of pastel toning. Population: 54 in 66 (4 in 66+), 9 finer. CAC: 16 in 66, 1 finer (9/16). NGC ID# 277S, PCGS# 3881

**3828 1885 PR65 NGC.** Fully struck and flashy with pastel ice-blue and straw-gold toning. Two small specks are noted below the Y in LIBERTY. Popular as the low mintage date of the series, although proofs are usually available for a price. Encapsulated in a former generation holder. NGC ID# 277T, PCGS# 3883

**3829 1885 PR66 Cameo PCGS. CAC.** Circulation strike 1885 nickels were generally ignored in high grades by early numismatists, who preferred proofs in any case. Today's collectors have few options other than a proof for a high-grade representative of the issue. This glittering and nicely contrasted proof is pinpoint-sharp and well-mirrored on the obverse. The reverse shows a bit of haziness at the center, yet it, too, is strongly mirrored over the majority of the fields. A CAC-endorsed example. Population: 54 in 66 (5 in 66+) Cameo, 14 finer. CAC: 24 in 66, 12 finer (9/16). NGC ID# 277T, PCGS# 83883

1896 Liberty Nickel, PR67 Cameo  
Tied for Finest at PCGS

**3830 1896 PR67 Cameo NGC.** A spectacular Superb Gem Liberty nickel, with sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields to create a dramatic Cameo effect. The surfaces are impeccably preserved and eye appeal is tremendous. From a limited proof mintage of 1,862 pieces. Census: 3 in 67 Cameo, 0 finer (9/16). NGC ID# 2786, PCGS# 83894

1897 Liberty Nickel, PR67 Cameo  
Dramatic Contrast

**3831 1897 PR67 Cameo PCGS. CAC.** The obverse boasts a distinctive swath of golden-tan toning, but the reverse is less intensely imbued with perceptible matching patina. Both sides show notable contrast between frosted devices and jet-black reflective fields amid excellent preservation — one small tick showing on Liberty's jaw notwithstanding. Quite attractive for the grade. Population: 20 in 67 (4 in 67+) Cameo, 3 finer. CAC: 16 in 67, 3 finer (9/16). NGC ID# 2787, PCGS# 83895

**3832 1900 PR67 Cameo PCGS.** A Registry Set-quality example, this well-preserved Superb Gem proof is boldly contrasted with silver mirrors and pale-gold, frosted centers. The 1900 is a lower-mintage proof date and becomes challenging in high grades such as the present high-quality MS67 coin. The strike and surfaces are exceptional. Population: 20 in 67 (5 in 67+) Cameo, 0 finer (9/16). NGC ID# 278A, PCGS# 83898

**3833 1909 PR67 NGC.** This razor-sharp proof showcases brilliant, seemingly flawless surfaces and outstanding eye appeal. The mirroring in the fields is not quite deep enough to achieve a Cameo grade, but the conditional scarcity of this piece is by itself enticing. Census: 91 in 67 (6 in 67 ★), 9 finer (9/16). NGC ID# 278K, PCGS# 3907

**3834 1909 PR67 Cameo PCGS. CAC.** A nearly imperceptible splash of gold toning appears at the left obverse border of this otherwise fully brilliant Superb Gem Cameo proof. The obverse nearly qualifies for a Deep Cameo designation, while the reverse shows lighter contrast. Population: 32 in 67 (3 in 67+) Cameo, 1 finer. CAC: 27 in 67, 2 finer (9/16). NGC ID# 278K, PCGS# 83907

## BUFFALO NICKELS

**3835 1913 Type One MS67+ PCGS. CAC.** As a group, the 1913 Type One Buffalo nickels rank extremely high for eye appeal as this Superb Gem illustrates. Both sides are boldly detailed with frosty gray luster and brilliant champagne toning. PCGS has only certified 18 finer examples (9/16). NGC ID# 22PW, PCGS# 3915

**3836 1913-S Type One MS66 PCGS. CAC.** Lovely champagne toning appears on the brilliant and fully lustrous surfaces of this frosty Premium Gem. The design motifs are bold with slight weakness along the right obverse and reverse borders. CAC: 40 in 66, 10 finer (9/16). NGC ID# 22PY, PCGS# 3917

**3837 1913-S Type Two MS64 PCGS.** Iridescent champagne toning graces the satin surfaces of this Type Two 1913-S nickel, a representative of the key date in the regular issue series. Significant die erosion is seen in the fields and recesses, although the devices are still moderately well-defined. NGC ID# 22R3, PCGS# 3923

**3838 1913-S Type Two MS64 NGC.** A lovely near-Gem representative with excellent design definition, this first-year Buffalo nickel exhibits light gold toning on both sides. The matte-like surfaces are free of significant marks. NGC ID# 22R3, PCGS# 3923

1913-S Buffalo Nickel, MS65  
Challenging Type Two Issue

**3839 1913-S Type Two MS65 PCGS.** The San Francisco issues are the scarcest of the 1913 Buffalo nickels from all Mints, Type One or Type Two. The Type Two S-Mint issue is the most challenging of all — in any grade. High-grade Uncirculated coins are particularly scarce, with coins finer than MS65 seldom seen and quite pricey. This Gem example is an optimal example for an advanced collection, with attractive, natural color and a reasonably sharp strike. There are no marks of consequence. PCGS has graded only 41 numerically finer pieces (10/16). NGC ID# 22R3, PCGS# 3923

**3840 1914-D MS65 PCGS.** A lovely Gem with brilliant nickel-gray luster and softly frosted surfaces, this piece features bold design motifs and wisps of peripheral gold toning. PCGS has only certified 63 finer pieces (9/16). NGC ID# 22R5, PCGS# 3925

**1914-D Nickel, MS66  
Exceptional Strike, Few Known Finer**

**3841 1914-D MS66 PCGS.** The strike on this sharp Premium Gem 1914-D approaches Full Details on both sides, with razor-sharp definition on the braid knot and the bison's musculature. The peripheral elements are sharper than often seen as well. The coin is brilliant with bits of amber-gold patina at the outer obverse borders for tremendous eye appeal. Perhaps an unimprovable example, with finer-graded pieces very rare and locked up in advanced collections. Population: 55 in 66 (4 in 66+), 8 finer (9/16). NGC ID# 22R5, PCGS# 3925

**3842 1915-D MS65 PCGS. CAC.** Iridescent sea-green, lilac-red, and sun-gold toning embraces this lustrous and mark-free Gem. The centers show softness, but peripheral elements, such as the tail, date, and mintmark, are sharp. An early and lower mintage branch mint issue. Certified in a green label holder. NGC ID# 22R8, PCGS# 3928

**3843 1917-S MS64 PCGS.** Light olive-green and almond-gold toning visits unmarked surfaces. A narrow diagonal strike-through (as made) resides in the Indian's hair. The strike is superior for this scarce early branch mint issue, although the hair above the braid shows incompleteness. Certified in a green label holder.  
*Ex: Calvin Collection (Heritage, 1/2009), lot 805, which realized \$1,725. NGC ID# 22RF, PCGS# 3936*

**3844 1918-D MS64+ PCGS. CAC.** This Plus-graded Choice example would be difficult to differentiate from a full Gem. The softly frosted surfaces yield warm golden toning along with metal flowlines from die wear. Slight softness of strike on the central high points is typical of the issue. NGC ID# 22RH, PCGS# 3938

**1918-D Buffalo Nickel, MS65  
Interesting Obverse Die Cracks**

**3845 1918-D MS65 PCGS. CAC.** The overdated issue from the Denver Mint in 1918 gets all the attention, but regular date nickels are scarce in high Uncirculated grades as well. This lustrous and pleasing Gem example shows several radial die cracks on the obverse including one with a retained cud near the first 1 in the date. The strike is sharp at the obverse center but less-so at the borders. A faint champagne-gold hue visits the lilac-gray surfaces, which are problem-free and attractive. CAC endorsed. Population: 73 in 65 (4 in 65+), 27 finer. CAC: 11 in 65, 6 finer (9/16). NGC ID# 22RH, PCGS# 3938

**3846 1919-S MS63 PCGS.** The centers are well-defined on this lustrous Select nickel. The borders show a bit of trivial incompleteness. Nickel-gray surfaces exhibit minimal impairments, and the overall appeal is strong. Scarcely found this fine. NGC ID# 22RN, PCGS# 3943

**3847 1919-S MS64 NGC.** A delightful Choice representative of this famously challenging San Francisco issue, well-defined with delicate gray-gold and tan accents across each side. Though this well struck piece shows significant die erosion in the fields, the luster remains pleasing, and the overall preservation is solid. NGC has graded just 21 numerically finer examples (9/16). NGC ID# 22RN, PCGS# 3943

**3848 1921 MS66 PCGS. CAC.** An impressive Premium Gem, this piece exhibits a bold strike and highly lustrous light gray surfaces with frosty mint brilliance. PCGS has only certified 28 finer examples (9/16). CAC: 34 in 66, 3 finer (9/16). NGC ID# 22RT, PCGS# 3947

**3849 1921-S MS62 PCGS.** Peripheral weakness is mostly evident on the reverse of this pleasing Mint State example, with pleasing gold and iridescent toning on the fully lustrous satin surfaces. NGC ID# 22RU, PCGS# 3948

**3850 1923-S MS64+ PCGS. CAC.** Particularly well-preserved for the grade with satin luster and pleasant eye appeal. Gold, sky-blue, and tan hues encompass each side. The devices show minor strike weakness, as is consistent with the extensive die erosion in the fields. NGC ID# 22RW, PCGS# 3950

**1924-D Nickel, Toned MS65  
Scarce in High Uncirculated Grades**

**3851 1924-D MS65 PCGS.** Finely granular surfaces display a combination of ice-blue and peach-gold toning with occasional violet accents over both sides of this Gem 1924-D. Frosty luster glows beneath the toning. Sharp definition attends all of the devices except the outermost feather tips and the tops of TY in LIBERTY. PCGS reports just eight numerically finer pieces (9/16). NGC ID# 22RY, PCGS# 3952

**1925-D Nickel, MS65  
Uncommonly Well-Struck**

**3852 1925-D MS65 PCGS.** This Gem 1925-D Buffalo nickel is exceptional for the issue, showing frosty, golden-toned luster and far above-average sharpness of strike. A few scattered, tiny specks appear on each side, but they are invisible to the unaided eye. As is characteristic of this issue, the peripheries show mild die erosion which accentuates the luster. PCGS has seen only a dozen numerically finer examples (9/16).  
*Ex: ANA Signature (Heritage, 8/2015), lot 3541. NGC ID# 22S3, PCGS# 3955*

**3853 1925-S MS63 PCGS.** A lovely Select Mint State example, this 1925-S Buffalo nickel exhibits splendid gold and iridescent toning on its satin surfaces. The typical strike shows peripheral weakness, likely resulting in the lower numerical grade. NGC ID# 22S4, PCGS# 3956

**3854 1926-S — Altered Surfaces — PCGS Genuine. Unc. Details.** The 1926-S is the lowest mintage regular issue Buffalo nickel. Unlike the 1931-S, few rolls were saved, and Uncirculated examples are desirable. This lustrous and unmarked example has delicate golden-gray toning. The fields have a slight orange-peel texture, as made from late dies, but any alteration is subtle. NGC ID# 22S7, PCGS# 3959

**1927-D Nickel, MS65  
Practically Unavailable Any Finer**

**3855 1927-D MS65 PCGS.** About twice as many high-grade 1927-D nickels are available compared to S-mint coins struck that same year. Gem representatives are very scarce, and finer examples are major condition rarities that seldom come to market. This MS65 nickel has powder-blue overtones and delicate streaks of champagne-gold patina. Typically struck. Population: 79 in 65 (8 in 65+), 7 finer (9/16). NGC ID# 22S9, PCGS# 3961

**1927-S Nickel, MS64+  
Extraordinary Quality and Eye Appeal**

**3856 1927-S MS64+ PCGS. CAC.** The San Francisco Mint manufactured more than 3.4 million Buffalo nickels in 1927. Most of them circulated extensively. Mint State examples are scarce but usually seen in MS63 or MS64 when found. Choice representatives with a Plus designation and CAC approval are nearly as rare as full Gems. This magnificent example shows pale lavender and orange iridescence over smooth, softly frosted surfaces. Strongly defined, save for a touch of softness over LIBERTY. NGC ID# 22SA, PCGS# 3962

**3857 1928-S MS65 PCGS.** This is a boldly struck Gem 1928-S Buffalo nickel, although significant die erosion affects the reverse fields. Tail dies were frequently overused during the 1920s — particularly at the branch mints — in an effort to keep production costs down, resulting in many coins that show a fresh obverse and an eroded reverse. This piece is toned light golden and is free of major abrasions. Population: 82 in 65 (5 in 65+), 11 finer (9/16). NGC ID# 22SD, PCGS# 3965

**3858 1929 MS66+ PCGS. CAC.** Frosty silver-white luster gives this high-end Premium Gem distinctive eye appeal, while bold design elements further complement the visual presentation. Only 10 coins are finer at PCGS. CAC: 44 in 66, 3 finer (9/16). NGC ID# 22SE, PCGS# 3966

**3859 1929-D MS66 PCGS.** A scarce Premium Gem example, this 1929-D Buffalo nickel displays an above-average strike and satiny, unabraded luster. Each side is cast in warm champagne toning. Prohibitively rare any finer. Population: 64 in 66 (5 in 66+), 1 finer (9/16). NGC ID# 22SF, PCGS# 3967

**1930 Buffalo Nickel, MS67  
Radiant Mint Luster, Sharply Struck**

**3860 1930 MS67 PCGS.** The 1930 is one of the best-produced of all Buffalo nickels. The mint luster is consistently bright and frosted. The only warning for collectors is not all coins are well struck — but this one is. Just the slightest hint of rose and lilac patina can be seen over each side, highlighted as one would expect by radiant mint luster. Population: 36 in 67 (1 in 67+), 0 finer (9/16). NGC ID# 22SH, PCGS# 3969

**3861 1931-S MS66+ PCGS.** Buffalo nickels were only produced at San Francisco in 1931, and none were struck at any mint during the next two years. These pieces are scarce in all grades. Although slight central weakness is evident, this highly appealing piece has brilliant surfaces and frosty gray luster. PCGS has only certified seven finer pieces (9/16). NGC ID# 22SK, PCGS# 3971

**3862 1935 MS67 PCGS. CAC.** A spectacular Superb Gem, this nickel displays a veritable rainbow of toning over a champagne base. Well-struck with pristine, satiny surfaces. CAC: 30 in 67, 0 finer (9/16). NGC ID# 22SN, PCGS# 3974

**3863 1935 MS67 PCGS. CAC.** A late series strike rarity, sharp 1935 Buffalo nickels are available in only small quantity despite a mintage of more than 58 million pieces. This Superb Gem example is sharp for the issue, showing slight blending of the braid detail above the knot but well-defined motifs in all other areas. Faint gold toning glows at the margins. One of the few nickels at the MS67 level to receive CAC endorsement. CAC: 30 in 67, 0 finer (9/16). NGC ID# 22SN, PCGS# 3974

**3864 1936-D MS67 PCGS. CAC.** Exquisite gold and iridescent toning appears on the obverse of this Superb Gem with splashes of gold on the lustrous light gray reverse. Population: 70 in 67 (1 in 67+), 2 finer. CAC: 16 in 67, 0 finer (9/16). NGC ID# 22ST, PCGS# 3978

**1936-D 3 1/2 Legs Nickel, XF40  
Rare Guide Book Variety**

**3865 1936-D 3 1/2 Legs, FS-901, XF40 PCGS.** Although the leftmost leg is not fully lapped away, the present variety is much rarer than the heralded 1937-D Three-Legged nickel. It is probably rarer than the most costly 1918/7-D nickel. The dusky silver-gray show moderate wear on the bison's hip, but no abrasions are readily apparent. Population: 17 in 40, 23 finer (9/16). NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978

- 3866** 1937-D Three-Legged, FS-901, AU58 PCGS. All the diagnostics are present on the reverse, and each side shows even, pale golden patina with a strong strike for the issue. A very shallow diagonal scratch is imperceptible without a magnifier. Always of interest in all grades to collectors of this very popular series. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1937-D Nickel, Iridescent MS62  
FS-901, Three-Legged Variety**

- 3867** 1937-D Three-Legged, FS-901, MS62 NGC. Perhaps the most famous 20th century variety, the 1937-D Three-Legged nickel results from excessive die polishing. All examples are highly sought-after but especially those in mint condition. A sufficient number of coins survive to satisfy much of that demand, though prices realized are consistently strong. This iridescent MS62 representative show lovely glints of rainbow color and bold strike characteristics throughout. Lightly marked. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**PROOF BUFFALO NICKELS**

**1913 Buffalo Nickel, PR65  
Type One, Single-Year Design**

- 3868** 1913 Type One PR65 NGC. Only 1,520 matte proof Type One Buffalo nickels were struck in 1913. Type collectors are extremely fond of this issue, as it represents the first year of the Buffalo design and the only year with the mound on the reverse. This impressive Gem is fully struck with slightly granular matte surfaces and few signs of contact.  
*Ex: Philadelphia Signature (Heritage, 8/2012), lot 3864. NGC ID# 278R, PCGS# 3988*

**1913 Type Two Nickel, PR66  
Wisps of Golden-Russet Toning**

- 3869** 1913 Type Two PR66 PCGS. Proof nickel production was nearly evenly split between Type One and Type Two coins in 1913 (1,520 and 1,514 proofs, respectively). Both issues remain equally available, though the initial coins with the raised ground are in slightly higher demand. This Type Two proof features wisps of golden-russet patina over brilliant surfaces. A highly attractive Premium Gem specimen. Very scarce in finer condition. NGC ID# 278S, PCGS# 3990
- 3870** 1914 PR65 PCGS. Needle-sharp detail and matte luster give this Gem proof 1914 nickel outstanding eye appeal. Iridescent toning complements the surfaces. This issue is among the best-struck matte proofs, ideal for type representation. NGC ID# 278T, PCGS# 3991

**1915 Buffalo Nickel, PR67  
Brilliant Matte Surfaces**

- 3871** 1915 PR67 PCGS. Both sides of this Superb Gem matte proof nickel exhibit brilliant light gray surfaces and exquisite design definition. Full cartwheel luster complements the subtle champagne tones of this remarkable nickel. Population: 72 in 67 (10 in 67+), 4 finer (9/16). NGC ID# 278U, PCGS# 3992

**1936 Type One Buffalo, PR67+  
Satin Finish**

- 3872** 1936 Type One — Satin Finish PR67+ PCGS. CAC. The initial proofs of 1936 exhibit a satin finish that is a hybrid of the earlier matte proofs and the later brilliant proofs. The differentiation key between satin proofs and Mint State pieces is the strike, that in this case is absolutely full. The surfaces exhibit splendid gold and iridescent toning. NGC ID# 278X, PCGS# 3994

- 3873 1936 Type Two — Brilliant Finish PR65 PCGS. CAC.** This bright and reflective Gem proof displays a hint of light champagne toning over almost unmarked surfaces. The later brilliant variety, this piece CAC-endorsed. The strike is sharp throughout. NGC ID# 278Y, PCGS# 3995
- 3874 1936 Type Two — Brilliant Finish PR65 PCGS. Gold CAC.** Iridescent and beautiful sea-green, olive-gold, and lilac-red patina endows this well struck and essentially immaculate proof type coin. Undoubtedly, the multicolor patina helped coax the prized Gold bean designation from CAC. Housed in a first generation holder. NGC ID# 278Y, PCGS# 3995
- 3875 1937 PR65 PCGS. CAC.** A CAC-approved Gem example of the final proof issue in the Buffalo nickel series. This piece is sharply struck and devoid of mentionable marks. A hint of light golden color is seen on each side. NGC ID# 278Z, PCGS# 3996
- 3876 1937 PR67 NGC. CAC.** A sensational proof Buffalo that is alive with glassy brilliance and displays a completely untuned appearance on both sides. The carbon-free surfaces are otherwise virtually as struck. NGC ID# 278Z, PCGS# 3996
- 3877 1937 PR67 NGC. CAC.** A trace of blue appears at the upper obverse of this beautiful gold-toned Superb Gem proof. Buffalo nickels appeared in brilliant proof format during part of 1936, and all of 1937, and the latter date is ideal for type collections. NGC has only examined 50 numerically finer examples (9/16). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3878 1939 Reverse of 1940 MS68 NGC.** A high-grade butter-gold and pearl-gray example. Lustrous and unmarked. The fields display an orange-peel texture, as coined from long-in-use dies. Census: 5 in 68, 0 finer (9/16). NGC ID# 22TA, PCGS# 94003
- 3879 1939-D Reverse of 1940 MS66 Full Steps PCGS.** 30th Anniversary Green Label Holder. Perfectly straight porch steps identify the Reverse of 1940, compared to the wavy steps of the 1938 reverse type. This Premium Gem offers smooth and lustrous lilac-red and honey-gold surfaces. Population: 47 in 66 Full Steps, 5 finer (9/16). NGC ID# 22TA, PCGS# 894005
- 3880 1941 MS68 NGC.** The immaculate surfaces are lustrous and show only a glimpse of honey-gold toning. A small area of die polish is present near 10 o'clock on the reverse. Census: 2 in 68, 1 in 68 Five Full Steps (9/16). NGC ID# 22TJ, PCGS# 4010
- 3881 1943-D MS68 NGC.** Exquisite lemon-gold, ice-blue, apple-green, and rose-red patina adorns this lustrous and pristine wartime nickel. Only a handful of 1943-D nickels have been certified at the MS68 level. NGC ID# 22TS, PCGS# 4020
- 3882 1944-D MS68 NGC.** Only a trace of green-gold toning accompanies this lustrous and splendidly preserved Superb Gem. A strong lens is required to locate the infrequent minuscule imperfections. Census: 4 in 68 (3 in 68★), 2 finer as 68 Six Full Steps (9/16). NGC ID# 22TV, PCGS# 4023
- 3883 1946-D/D D Over Inverted D, FS-501, MS66 Full Steps PCGS.** *Cherrypickers'* states that among the leading Jefferson nickel varieties, FS-501 is "second only to the 1942-D Over Horizontal D" in rarity. The curve of the errant upside-down D is west of the upright from the second and correctly entered mintmark punch. A peach-gold Premium Gem with gunmetal-blue high points. Population: 14 in 66 (4 in 66+) Full Steps, 0 finer (9/16). NGC ID# 22U3, PCGS# 38508 Base PCGS# 84029
- 3884 1948-D MS67 Full Steps PCGS.** Rich iridescent shades grace the satin-smooth surfaces of this Superb Gem 1948-D nickel. Champagne-gold, lilac, violet, and emerald green shades emerge when viewed in light. Sharply struck, the coin shows no evidence of die erosion that often compromises the margins of this Denver issue. PCGS reports no numerically finer pieces. Population: 18 in 67 (3 in 67+) Full Steps, 0 finer (9/16). NGC ID# 22U9, PCGS# 84035

- 3885 1949-D/S FS-501 MS67 NGC.** *Cherrypickers'* states, "this variety is quite rare in Mint State and highly sought after." Traces of an S undermintmark are apparent both north and west of the Denver mintmark. Lilac tints overlie smooth and lustrous wheat-gold surfaces. NGC has yet to designate an example as either Five or Six Full Steps. Census: 3 in 67, none finer (9/16). NGC ID# 22UC, PCGS# 38511 Base PCGS# 4039

## 1949-D/S Nickel, MS66 Full Steps FS-501, Overmintmark *Guide Book Variety*

- 3886 1949-D/S FS-501 MS66 Full Steps PCGS.** A popular *Guide Book* variety with the D mintmark punched over an errant S. This variety is rare on Full Steps coins. The example here offered is of great importance to the Registry Set collector. It is one of just three Full Steps examples certified at the MS66 grade level at PCGS, and only one other is finer (9/16). Iridescent golden-gray toning warms frosty luster on each side, while the strike is bold and the surfaces are beautifully preserved. PCGS# 38512 Base PCGS# 84039
- 3887 1950-D MS67 ★ Five Full Steps NGC.** While the key date 1950-D nickel does not command the premium it once had, it is highly doubtful that many specimens having the attributes of the coin in this lot are extant. Indeed, it is the single highest-grade example (as of 9/16) with both the Star and 5 Full Steps designations. Moreover, its intensely lustrous surfaces display iridescent sky-blue, lavender, golden-beige, and orange-gold toning. Ex: *Phoenix ANA Signature (Heritage, 3/2008)*, lot 351. NGC ID# 22UF, PCGS# 84042
- 3888 1951 MS66 Full Steps PCGS.** This satiny Premium Gem exhibits a bold strike and brilliant surfaces beneath attractive gold and iridescent toning. An excellent candidate for the Set Registry collector. Population: 25 in 66 (1 in 66+) Full Steps, 2 finer (9/16). NGC ID# 22UG, PCGS# 84043
- 3889 1951-D MS67 Five Full Steps NGC.** Cobalt-blue and plum-mauve toning embraces both sides. A magnificent Superb Gem with potent luster and pristine preservation. No 1951-D nickels have been designated as Six Full Steps by NGC. Census: 4 in 67 Full Steps, 0 finer (9/16). NGC ID# 22UH, PCGS# 84044
- 3890 1952 MS67 PCGS.** The rainbow toning patterns on this exquisite Superb Gem nickel are both flamboyant and complex, with intertwined bands of color surrounding stately iridescence at the centers. The 1952 issue is known for its lack of eye appeal and substandard strikes. This outstanding piece stands apart with sharp surfaces and exceptional visual allure. Tied for the numeric finest at either service, and second to none in eye appeal. PCGS population: 4 in 67 (1 in 67+), 0 finer (9/16). NGC ID# 22UK, PCGS# 4046
- 3891 1981-P MS66 Full Steps PCGS.** Full Steps examples of the 1981-P nickel are scarce, and Premium Gems are rarely seen. This piece displays an impressively sharp strike illuminated by golden-toned, satiny luster. A few small marks do not distract. Population: 7 in 66 Full Steps, 1 finer (9/16). NGC ID# 22WG, PCGS# 84106

## PROOF JEFFERSON NICKELS

- 3892** 1959 PR68 Deep Cameo PCGS. An amazing Superb Gem Deep Cameo proof, this piece has incredible field-to-device contrast. Deeply mirrored fields provide an outstanding back drop for the highly lustrous devices. Population: 23 in 68 (1 in 68+) Deep Cameo, 1 finer (9/16). NGC ID# 27A9, PCGS# 94191
- 3893** 1971 No S, FS-501, PR68 Cameo PCGS. This *Guide Book* variety is extremely popular among modern proof collectors. The present Cameo resides near the top of the population charts, showcasing stark field-device contrast and superb strike sharpness. A blush of champagne toning warms each side. Population: 81 in 68 Cameo, 15 finer (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204
- 3894** 1971 No S, FS-501, PR68 Cameo PCGS. Cameo examples of this popular *Guide Book* variety are occasionally seen in this grade but rarely finer. The present coin displays a hint of champagne color over starkly contrasted surfaces. A trace of milky patina is observed in the mirrored fields. Population: 81 in 68 Cameo, 15 finer (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 22YN, PCGS# 569931 Base PCGS# 84204

## EARLY HALF DIMES

- 3895** 1797 15 Stars, V-2, LM-1, R.3, VG10 NGC. Golden-brown toning enriches the obverse, as well as the reverse eagle and periphery. The remainder of the reverse is aquamarine. Well detailed for the designated grade, and the few brief hair-thin obverse marks do not distract. NGC ID# 2ZZZ, PCGS# 38597 Base PCGS# 4258

### 1800 Half Dime, Attractive VF30 Collectible V-1, LM-1 Variety

- 3896** 1800 V-1, LM-1, R.3, VF30 NGC. A somewhat thick 8 and a leaf joined to the second A in AMERICA identify this die marriage. The steel-toned fields contrast nicely against light gray devices. This well-centered example shows scattered marks throughout, but none of any significance. All of the denticles are fully defined, and there is strong detail on the reverse. A lovely example of this collectible variety.  
*Ex: ANA Signature (Heritage, 7-8/2008), lot 5; Beverly Hills Signature (Heritage, 11/2011), lot 3200.* NGC ID# 2326, PCGS# 38601 Base PCGS# 4264
- 3897** 1800 LIBEKTY, V-2, LM-3, R.4 — Damage — PCGS Genuine. XF Details. A diagonal scratch on the upper right obverse corresponds to the PCGS designation. The cream-gray surfaces are microgranular. A well defined example of the popular LIBEKTY variety, caused by a defective punch for the letter R.

### 1803 Half Dime, AU Details V-2, LM-3, Large 8

- 3898** 1803 Large 8, V-2, LM-3, R.3 — Damage — PCGS Genuine. AU Details. A disconnected, free-floating arrowhead above the two tallest arrows and an olive leaf joined to the diagonal of the final A in AMERICA identify the LM-3 variety. This example is cited for Damage by PCGS, perhaps in reference to a dishd surface at the field stars and a corresponding bulge at Liberty's neck and bustline on the obverse. Three or four short scrapes among the obverse stars and a dig on the neck are noted. Pleasing golden-gray patina remains, with devices that are well-defined except at the left-side obverse border dentils. NGC ID# 2329, PCGS# 38609 Base PCGS# 4269

## BUST HALF DIMES

- 3899** 1829 V-3, LM-2, R.1, MS64 PCGS. The vertical "Scarface" die crack on the portrait is an important identifier for Valentine-3, along with the three-line shield stripes. A fully struck Choice Capped Bust type coin. The flashy and unabraded surfaces display light straw-gold toning. Certified in an old green label holder. NGC ID# 232B, PCGS# 38613 Base PCGS# 4276
- 3900** 1830 V-6, LM-8, R.1, MS64 PCGS. A die dot left of the base of the 1, and a repunched upright on the 5 in 5C, are the pick-up points for this Capped Bust marriage. This sharply struck and coruscating near-Gem has an ocean-blue obverse. The reverse has a cherry-red center framed by aquamarine. NGC ID# 232C, PCGS# 38646 Base PCGS# 4277
- 3901** 1831 V-1, LM-6, R.1, MS65 PCGS. Sea-green and rose-red toning adorns this lustrous and sharply struck Bust type coin. Virtually void of contact. The borders display gunmetal-gray freckles, the largest near star 2.  
*Ex: Dallas Signature (Heritage, 10/2008), lot 484, which realized \$3,105.* NGC ID# 232D, PCGS# 38661 Base PCGS# 4278

### 1832 V-5, LM-8.4 Half Dime Frosty, Mark-Free Gem

- 3902** 1832 V-5, LM-8.4, R.3, MS65 PCGS. CAC. A frosty, lightly toned example of the LM-8 variety with brilliant-silver centers and golden-gray accents at the margins. Numerous die cracks traverse the reverse and die swelling above the eagle's head confirm the die stage. N in UNITED fills to the midpoint of the upright. There are no significant marks on this sharply struck and decidedly attractive half dime. CAC endorsed. Population (all 1832 varieties): 59 in 65, 53 finer. CAC: 20 in 65, 33 finer (9/16). PCGS# 38673 Base PCGS# 4279

**3903 1833 V-6, LM-9, R.2, MS65 PCGS.** Attractive light to medium sea-green, chestnut-gold, and plum-red toning adorns this coruscating and well preserved Gem. The strike shows incompleteness only on the curl near the cheek, and opposite on the left shield border. A minor mint error with a narrow edge at 7 o'clock, caused by a small flan clip, as made. NGC ID# 232F, PCGS# 38700 Base PCGS# 4280

**3904 1835 Large Date, Large 5C, V-3, LM-3, R.1, MS65 PCGS.** Lustrous and brilliant with a good strike and outstanding preservation. The die break at the C in AMERICA is perhaps the most interesting characteristic of LM-3, although it is nascent here. NGC ID# 232H, PCGS# 38709 Base PCGS# 4282

## SEATED HALF DIMES

**3905 1837 No Stars, Large Date (Curl Top 1) MS64 NGC. V-1, Flynn MPD-001 and RPD-001.** Designated as VP-001 by NGC, using their in-house attribution nomenclature for interesting varieties unlisted in *Cherrypickers'*. All four date digits are repunched south, and a partial 8 impression overlaps a dentil. Crisply struck and lustrous with peripheral chestnut toning. NGC ID# 232M, PCGS# 4311

**3906 1838 Large Stars, No Drapery, MS65 NGC.** An attractive Gem featuring champagne and gray toning on its brilliant silver surfaces, this half dime is an important type issue representing the first appearance of the Seated Liberty with Stars design on the diminutive half dime. NGC ID# 2TXX, PCGS# 4317

1838 No Drapery Half Dime, MS66  
Stars on Obverse, Colorfully Toned

**3907 1838 Large Stars, No Drapery, MS66 PCGS.** Large Stars designation. Unlike the 1838 No Drapery, With Stars dimes — where there is a demonstrable difference in the star size of the Small Stars versus Large Stars varieties — the 1838 No Drapery, Stars on Obverse half dimes owe their varying star sizes to die lapping rather than differently sized punches. This Premium Gem example displays stars to either side of Liberty's head that are more fully formed than those elsewhere on the obverse, which appear more spindly by comparison. Liberty's upraised arm is heavily corroded, often described as a characteristic of the Small Stars designation. Holdered as a Large Stars example by PCGS, this attractively toned example displays a speckling of olive-gray toning over shades of forest-green, rose-red, and azure-blue. Silver luster shines through for outstanding eye appeal. The corroded dies notwithstanding, all of the devices are sharp and the fields are essentially without fault. Population (Large Stars designation): 42 in 66 (6 in 66+), 8 finer (9/16). NGC ID# 2TXX, PCGS# 4317

**3908 1840 Drapery MS64 PCGS. CAC.** A boldly impressed strike complements satiny luster on this Choice With Drapery 1840 half dime. Both sides display gunmetal-gray and blue-green toning that masks any minor abrasions. Population: 20 in 64, 8 finer. CAC: 4 in 64, 6 finer (9/16). NGC ID# 232W, PCGS# 4326

**3909 1849/6 V-2, FS-302, MS64 PCGS. CAC.** Diagnostics of this popular variety include a defect on the upright of the 4 in the date, a die lump between stars 10 and 11, and several bold reverse die cracks. The overdate is apparent above the ball of the 9, and on the center of the right curve. Per Kevin Flynn, "on late die states, the metal outside the lower right side of the 9 is no longer seen." A well struck, smooth, and satiny silver-gray and chestnut-gold near-Gem. NGC ID# 233D, PCGS# 145432 Base PCGS# 4343

**3910 1850 MS66 PCGS. CAC. V-3.** Light straw-gold toning visits this lustrous and crisply struck Premium Gem. Only trivial contact emerges beneath a loupe. V-3 is identified by the die scratch after the D in UNITED, but die gouges from the upper right obverse dentils are also of interest. NGC ID# 233F, PCGS# 4345

**3911 1853 No Arrows MS65 PCGS.** This Gem No Arrows coin is razor-sharp with frosty luster and warm golden toning. A few tiny ticks on Liberty's figure are all that limit the grade. This issue is rarely seen so fine. Population: 8 in 65, 11 finer (9/16). NGC ID# 233M, PCGS# 4351

**3912 1861 MS66+ PCGS.** Lovely sun-gold, cherry-red, blue-green, and autumn-brown toning enriches this pristine and moderately prooflike Premium Gem. A virtually unimprovable representative from the freshman year of the Civil War. Population: 27 in 66 (2 in 66+), 3 finer (9/16). NGC ID# 2349, PCGS# 4379

**3913 1863-S MS64 PCGS. Flynn-MPD-001.** Splashes of russet-brown, forest-green, and lavender adorn this well struck and lustrous Choice Civil War half dime. Struck from boldly clashed dies. The mintage was only 100,000 pieces. Population: 23 in 64, 13 finer (9/16). NGC ID# 234D, PCGS# 4383

1864 Seated Liberty Dime, MS66  
Seldom Encountered Any Finer

**3914 1864 MS66 PCGS.** Mintages of precious-metal issues were generally quite small during the Civil War era and only 48,000 Seated Liberty half dimes were struck at the Philadelphia Mint in 1864. This remarkable Premium Gem exhibits sharply detailed design elements and impeccably preserved lustrous surfaces with attractive multicolor toning. Population: 9 in 66 (2 in 66+), 3 finer (9/16). NGC ID# 234E, PCGS# 4384

**3915 1869 MS66 PCGS.** A richly toned and well-preserved Premium Gem, with semireflective fields beneath attractive, multicolor iridescent hues on the obverse, coupled with a near-brilliant reverse. The strike is sharp except on the rock near U of UNITED, and a corresponding area on the reverse at the upper left wreath, where Mint-related roller marks and faint planchet striations are present. There are essentially no other marks on the coin. Population: 14 in 66 (3 in 66+), 6 finer (9/16). NGC ID# 234R, PCGS# 4394

**3916 1871-S MS65 PCGS. CAC.** A CAC-endorsed Gem example with frosty luster and a dusking of olive toning. There are no significant abrasions, although mild strike weakness occurs on the wreath bow. The 1871-S is rarely encountered this fine. Population: 6 in 65, 6 finer. CAC: 2 in 65, 4 finer (9/16). NGC ID# 234W, PCGS# 4399

**3917 1872-S Mintmark Below Bow MS67 PCGS.** The slightly more plentiful variety with the mintmark below the bow. This frosty Superb Gem is fully struck and devoid of abrasions. A hint of champagne toning adds to the already superb eye appeal. None are numerically finer at PCGS. Population: 11 in 67 (3 in 67+), 0 finer (9/16). NGC ID# 2352, PCGS# 4401

## PROOF SEATED HALF DIMES

- 3918 1858 PR63 Cameo PCGS. CAC.** Deeply reflective and boldly impressed with strong contrast between the silver-gray fields and the frosted ivory devices. Light, scattered hairlines in the fields account for the grade. An attractive example of this proof Seated half dime issue. Population: 1 in 63 Cameo, 5 finer. CAC: 1 in 63, 4 finer (9/16). NGC ID# 235N, PCGS# 84437
- 3919 1863 PR66 Cameo PCGS.** A conditionally rare Premium Gem Cameo example of this popular proof half dime issue. The coins shows bright, untoned surfaces with considerable field-device contrast. Die polishing lines in the fields are mint-made. Population: 6 in 66 Cameo, 2 finer (9/16). NGC ID# 235Y, PCGS# 84446
- 3920 1867 PR65+ Cameo PCGS. CAC.** Only 6,000 business strike half dimes were made of this issue as a complement to the reported 625 proofs. The ribbon ends touch the wreath on V-2, the usual variety as here. Beautiful silver-white surfaces show generous contrast and a full strike. Population: 10 in 65 (2 in 65+) Cameo, 11 finer. CAC: 7 in 65, 8 finer (9/16). NGC ID# 2364, PCGS# 84450

### 1869 Half Dime, Richly Toned PR67 Cameo

- 3921 1869 PR67 Cameo NGC.** The 1869 half dime saw a production of 600 proofs. This Superb Gem exhibits remarkable contrast between the frosted devices and the richly toned fields. On the obverse, golden patina graces the figure of Liberty, while deeper violet, blue, and green-gold toning covers the moderately reflective surfaces. On the reverse, the wreath is part silver-gray and part champagne-gold, while the remainder of that side has more opaque patina in similar colors. Both sides exhibit sharply struck devices and are impeccably preserved. Census: 9 in 67 Cameo (3 in 67★), 2 finer (9/16). NGC ID# 2366, PCGS# 84452
- 3922 1870 PR65+ PCGS.** Sharply struck with variegated layers of green, mauve, plum, and gray patina over both sides. A well-preserved Gem proof example with splendid eye appeal. Population: 21 in 65 (1 in 65+), 20 finer (9/16). NGC ID# 2367, PCGS# 4453
- 3923 1870 PR66 NGC.** This high-end proof is sharply struck and shows subtle contrast through deep shades of lavender, aquamarine, and tan-gold toning. The 1870 proof half dime is rarely seen finer. Census: 24 in 66 (1 in 66+), 9 finer (9/16). NGC ID# 2367, PCGS# 4453

## EARLY DIMES

### 1805 Draped Bust Dime, XF45 JR-1, Five Berries on the Branch

- 3924 1805 5 Berries, JR-1, R.3, XF45 NGC.** Of the two 1805 varieties that exist, the JR-1 die pair is considerably scarcer than the JR-2 and it is most readily identified by five berries on the olive branch (JR-2 has just four berries). This Choice XF example is lightly toned in silver-gray shades with some deep-gray color around the raised devices. Typical weakness at the centers reveals faint roller marks across the portrait. A few light pinscratches and marks are noted at the margins and within the eagle's shield. Census: 2 in 45, 15 finer (8/16). NGC ID# 236R, PCGS# 38768 Base PCGS# 4478

- 3925 1805 4 Berries, JR-2, R.2, VF25 PCGS. CAC.** A problem-free dove-gray type representative. All letters in E PLURIBUS UNUM are at least partly present, and considerable plumage and hair detail remains. There are no noticeable marks. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

### 1805 JR-2 Dime, Choice XF 4 Berries, Heraldic Eagle Type Coin

- 3926 1805 4 Berries, JR-2, R.2, XF45 NGC.** Both varieties of the 1805 are suitable to represent the Heraldic Eagle type, but JR-2 is probably the better option given its relative availability. This Choice XF dime showcases gunmetal and olive patina near the peripheries with splashes of brilliance in the central fields. Well-defined with merging over the curls and shield. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477
- 3927 1807 JR-1, R.2, Fine 15 PCGS.** Russet-brown and blue-green toning fills the borders of this collectible Choice Fine example. The shield lines are fully separated, while UNITED and the left-side stars are indistinct. The final Draped Bust dime variety. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

## BUST DIMES

- 3928 1821 Small Date, JR-9, R.2, AU58 PCGS. CAC.** The borders display glimpses of orange-gold toning. The rest of this Borderline Uncirculated Bust dime is pearl-gray. Luster dominates the margins and motifs. The fields are clashed but devoid of apparent abrasions. NGC ID# 236Y, PCGS# 38799 Base PCGS# 94496
- 3929 1829 Small 10C, JR-7, R.1, MS63 PCGS.** A prooflike example that boasts a precise strike and impressive golden-brown, lilac, and apple-green toning. Well preserved aside from a subtle mark on the cheek and a few hairlines below the shoulder curl. PCGS# 38832 Base PCGS# 4511

**3930** 1836 JR-3, R.3, MS63 PCGS. The Wide 10 C variety. The reverse margin exhibits mahogany-brown patina, but the remainder of this lustrous example is only lightly toned. The strike is good and there are relevant marks. The eye appeal is superior for the MS63 level. Struck from prominently clashed dies. NGC ID# 237G, PCGS# 38890 Base PCGS# 4528

## SEATED DIMES

**3931** 1837 No Stars, Large Date, F-101b, R.2, MS63 PCGS. Light wheat-gold toning graces this coruscating and intricately struck Select dime. Smooth except for a glossy area above Liberty's foot. The "prime" die state of F-101b, without a radial crack through the obverse shield. The popular No Stars type, coined only in 1837 aside from the very scarce 1838-O issue. NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

**3932** 1837 No Stars, Large Date, F-101b, R.2, MS64 NGC. A flashy and unblemished near-Gem bathed in rich forest-green and brick-red shades. The Fortin variety is intermediate between F-101a and F-101b. The reverse is rotated, and a radial crack is beneath Liberty's foot, but no radial crack is present through the shield. NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

1838 Seated Dime, Attractive MS66  
Fortin-104, No Drapery, Large Stars

**3933** 1838 No Drapery, Large Stars, F-104, R.3, MS66 NGC. A sharply struck and attractively toned Premium Gem example. Azure-blue and violet toning covers both sides of this remarkably well-preserved No Drapery, Large Stars dime. The fields are reflective beneath the omnipresent toning, and marks are limited to a tiny abrasion beneath the shield point. A prominent die crack runs from the rim through the rock and shield to B in LIBERTY, while other obverse cracks appear at the right-hand stars. Census: 30 in 66 (1 in 66+), 13 finer (9/16). NGC ID# 237U, PCGS# 537650 Base PCGS# 4568

1838 F-112 Dime, Bold MS66  
No Drapery, Large Stars Variety

**3934** 1838 No Drapery, Large Stars, F-112, R.3, MS66 NGC. Star 8 is repunched on Fortin-112. This amazing first-year Premium Gem dime has light silvery surfaces with blushes of gold and lavender patina. The level of preservation is extraordinary, devoid of singular imperfections to report. Nearly fully struck, save for the the lower reverse border. Census (all varieties): 30 in 66 (1 in 66+), 13 finer (9/16). PCGS# 537659 Base PCGS# 4568

**3935** 1839 No Drapery, Repunched Date, F-101, R.3, MS65 PCGS. CAC. The Stars, No Drapery subtype was coined during only two years, 1839 and 1840. Golden-brown, lavender, and cobalt-blue shades enrich this sharply struck and lustrous Gem. Population: 14 in 65, 20 finer. CAC: 7 in 65, 10 finer (9/16).  
*Ex: Phoenix ANA Signature (Heritage, 3/2008), lot 384, which realized \$2,530. PCGS# 537667 Base PCGS# 4571*

**3936** 1846 F-101, R.4, VF20 PCGS. CAC. The 1846 dime has long been recognized as a scarce, key issue in the With Stars series with a mintage of only 31,300 pieces. Even as far back as the turn of the 20th century collectors knew this was a scarce date. The original surfaces are two-toned, but the lighter elements contain a slight hint of magenta. This is the coin to go for if you are a Seated dime collector. NGC ID# 238D, PCGS# 537837 Base PCGS# 4588

**3937** 1853-O Arrows, F-102, R.4, MS61 NGC. The obverse is cream-gray and the reverse is gunmetal-gray. The strike is good except on Liberty's hair. The satiny surfaces show few marks. No die markers exist for Fortin-102 aside from the mintmark position and slight left tilt. The date and arrows are hubbed on this issue. Attribution is accomplished by elimination of other possibilities. PCGS# 537999 Base PCGS# 4604

1854 Arrows Dime, MS66+  
Few Seen Finer

**3938** 1854 Arrows MS66+ PCGS. CAC. The date has the Closed 54 and is positioned high. The 1 is centered above two dentils. The obverse is lightly clashed but uncracked; the reverse shows faint cracks around STATES. Some strike weakness is seen on the upper portion of the wreath, and the frosty surfaces display lovely champagne toning. Population: 14 in 66 (1 in 66+), 1 finer. CAC: 5 in 66, 0 finer (9/16). NGC ID# 239A, PCGS# 4605

**3939** 1858 F-106, R.3, MS66 NGC. The reverse is exquisitely toned ocean-blue, golden-brown, and rose-red. The obverse has a chestnut-gold border, a sea-green field, and a dove-gray seated Liberty. A fully struck pristine Premium Gem. Both sides exhibit a partial wire rim. PCGS# 538123 Base PCGS# 4616

**3940** 1873 Closed 3, No Arrows, F-107, R.4, MS64 NGC. An untuned and splendidly preserved near-Gem. The grade is limited solely by an area of incomplete strike on the upper left portion of the wreath. A popular two-year design subtype.

*Ex: Santa Clara Bullet (Heritage, 4/2000), lot 131; Glenwood Collection (Heritage, 7/2008), lot 86, which realized \$1,840. PCGS# 538294 Base PCGS# 4659*

**3941** 1873 Arrows, F-113, R.3, MS64 PCGS. A virtually brilliant example of this popular and briefly issued type. Lustrous with a good strike and a few faint abrasions on the left obverse field. Fortin-113 is best known for strike doubling on the left border of the wreath. PCGS# 538314 Base PCGS# 4665

**3942** 1873-CC Arrows, F-101, R.4, Fair 2 PCGS. CAC. A rare Carson City issue. From the mintage of 18,791 pieces, fewer than 200 pieces have survived. Most are well worn, and such is the case for the present silver-gray example. Most of the mintmark is apparent, and the date is clear aside from the lower loop of the 3. CAC: 3 in 2, 14 finer (9/16). NGC ID# 23BH, PCGS# 538326 Base PCGS# 4666

**1877-CC Seated Dime, MS66  
Type Two Reverse, Splendid Toning**

**3943 1877-CC MS66 PCGS. Fortin Unlisted.** Type Two Reverse. The Carson City mintage of 7.7 million pieces suggests far more than the 32 listed Fortin die varieties (both Type One and Type Two reverses) were needed for such a large production, a fact that is clearly stated in the research. This frosty dime is sharply struck with great eye appeal. Numerous obverse die cracks will attract the variety specialists, while reverse die erosion and rust provides other aspects for study. Amber-gold and cerulean-blue toning combines with radiant mint luster for dramatic visual allure. Population: 69 in 66 (19 in 66+), 7 finer (9/16). NGC ID# 23AM, PCGS# 4683

**3944 1877-CC Type Two Reverse, F-103, R.3, MS65 PCGS. CAC.** Light to medium caramel-gold toning enriches this lustrous Carson City Gem. The well struck surfaces appear devoid of contact. Delicate die cracks and bold clash marks invite specialist examination. NGC ID# 6T8H, PCGS# 538583 Base PCGS# 4683

**3945 1877-CC Type Two Reverse, F-110, R.3, MS66 PCGS.** Light golden-brown toning visits this well struck and lustrous Premium Gem. Abrasions are absent aside from a mark above the I in DIME. Both sides exhibit a wire rim. Clashed, but without any of the lengthy reverse cracks depicted in the Fortin online reference. PCGS# 538597 Base PCGS# 4683

**1879 Seated Dime, MS67  
Undesignated Prooflike Example**

**3946 1879 Repunched Date, F-104a, R.4, MS67 PCGS.** The Fortin-104a variety represents a later usage of dies previously used for proofs (Fortin-104), now polished with evidence of die clashing on both sides. The fields are prooflike, although undesignated as such, with frosted raised devices and strong contrast between the frosted devices and brilliant-mirrored fields. The date shows diagnostic repunching on the 1 and 8, with less-visible repunching on the 9. An attractive Superb Gem with discernible cameo contrast. Population: 0 in 67, 0 finer (9/16). NGC ID# 23AS, PCGS# 538642 Base PCGS# 4687

**3947 1882 F-105, R.2, MS66 PCGS. CAC.** The 2 in the date is obviously repunched within the upper loop. Brilliant and beautiful with potent luster and a few faint clash marks. A good strike despite the usual minor blending on the upper left portion of the wreath. Population: 37 in 66, 21 finer. CAC: 10 in 66, 11 finer (9/16). Ex: Cincinnati Central States (Heritage, 4/2009), lot 148; FUN Signature (Heritage, 7/2009), lot 362. NGC ID# 23AV, PCGS# 538651 Base PCGS# 4690

**1887 Dime, Gorgeous MS67  
Among the Three Finest at PCGS**

**3948 1887 MS67 PCGS. CAC. Fortin-Unlisted.** The tip of the left foot of the 1 is positioned over two dentils, and the obverse is free of die cracks or clash marks. The reverse shows clashing within DIME and die cracks around the wreath. Both sides are frosty and brilliant with pale gold and magenta toning near the borders, contributing to the marvelous eye appeal. Liberty's head and the corn kernels feature bold detail. A top-ranked survivor from a mintage of 11.2 million coins. Population: 6 in 67, 0 finer. CAC: 4 in 67, 0 finer (9/16). NGC ID# 23B5, PCGS# 4698

**3949 1887-S F-101, R.3, MS66 PCGS.** A horizontal die line within the lower loop of the mintmark attributes Fortin-101. A magnificent type representative bathed in medium dove-gray, jade-green, and autumn-brown toning. Satiny and unabraded with a crisp strike except on the usual portion of the wreath. PCGS# 538737 Base PCGS# 4699

**3950 1890-S Large S, F-116, R.3, MS65 PCGS.** Forest-green and golden-brown shades alternate across this lustrous and sharply struck Gem. A loupe reveals only delicate obverse field contact. Population: 12 in 65, 1 finer (9/16). PCGS# 538875 Base PCGS# 4705

**3951 1891 MS66+ PCGS. CAC.** Both peripheries exhibit numerous spindly die cracks, which do not match Gerry Fortin's listings. This high grade final-year Seated dime displays tobacco-brown, cream-gray, and apple-green toning. Lustrous and pristine. The strike is crisp except on Liberty's head and the knot of the bow. NGC ID# 23BD, PCGS# 4706

**3952 1891 F-121, R.3, MS67 NGC.** A hint of golden toning visits the borders of this otherwise brilliant Superb Gem. Close to immaculate from the technical perspective, although we note a couple of shallow, mint-made strike-throughs near the D and M in DIME. Census: 21 in 67 (3 in 67★), 1 finer (9/16). PCGS# 538900 Base PCGS# 4706

**PROOF SEATED DIMES**

**1860 Dime, PR66  
Rich Blue and Lavender Toning**

**3953 1860 Doubled Die Reverse, F-101, R.3, PR66 PCGS.** All proofs exhibit die doubling on ME in DIME. The reported mintage of 1,000 proofs may be misleading. Breen reports that more than half that total was melted. Rich toning envelops this Premium Gem dime. Cobalt-blue and lavender hues dominate, interspersed with hints of gold. Population: 15 in 66, 7 finer (9/16). NGC ID# 23CJ, PCGS# 539007 Base PCGS# 4753

- 3954 1864 PR65 Cameo NGC. F-102, R.5.** This Civil War dime is mostly brilliant, but the rims display green, violet, and gold shades, which extend into the obverse field near OF AMERICA. The proof 1864 dime mintage was only 470 pieces. Two die marriages are known, F-101 and F-102, with slightly different date placements. F-102 is the rarer variety. NGC ID# 23CM, PCGS# 84757

**1867 Seated Dime, PR66  
Visually Impressive Mirrored Proof**

- 3955 1867 Repunched Date, F-103, R.5, PR66 PCGS. CAC.** Although proofs are perhaps more obtainable in than the 1867 business strikes, they are rare in high grades as confirmed by the population data. This deeply mirrored example shows considerable field/device contrast, although slightly limited by the attractive coppery-gold and cerulean-blue patina that covers both sides. The strike is razor sharp throughout. The 18 and 7 in the date are repunched matching the Fortin diagnostics for the proof dies. Tied for finest at PCGS. Population: 5 in 66, 0 finer. CAC: 5 in 66, 0 finer (9/16). NGC ID# 23CR, PCGS# 539019 Base PCGS# 4760

- 3956 1870 F-101, R.3, PR66 PCGS.** Forest-green and plum-mauve borders encompass stone-gray and chestnut-gold centers. Sharply struck and satiny with exemplary preservation. Fortin identifies two proof varieties for 1870, distinguished by the date position. NGC ID# 23CU, PCGS# 539025 Base PCGS# 4763

- 3957 1873 Arrows PR64 Cameo NGC.** Iridescent golden-brown borders frame stone-white centers. A very scarce proof issue with white-on-black contrast. As of (9/16), NGC has certified only ten pieces as Cameo, and none as Ultra Cameo.  
*Ex: Houston Signature (Heritage, 11/2012), lot 3462; Long Beach Signature (Heritage, 6/2013), lot 3228. NGC ID# 23DH, PCGS# 84769*

**1882 Dime, PR67 Cameo  
Brilliant and Well Struck**

- 3958 1882 PR67 Cameo PCGS. CAC. F-101, R.3.** A snow-white Superb Gem that exhibits a bold strike and substantial white-on-black contrast. The sole proof marriage for the date. A late die state with extensive lapped areas on Liberty's drapery and shield. Population: 10 in 67 (2 in 67+) Cameo, 1 finer. CAC: 9 in 67, 1 finer (9/16). NGC ID# 23D7, PCGS# 84779

- 3959 1891 PR66 Cameo NGC. F-131, R.4.** A white-on-black specimen with exceptional eye appeal. A lens reveals only microscopic strike-throughs, as made. The strike is precise except on the upper left area of the wreath. Census: 15 in 66 Cameo (2 in 66★), 10 finer (9/16).  
*Ex: St. Louis Central States Signature (Heritage, 5/2007), lot 355; Dallas Signature (Heritage, 11/2007), lot 418. NGC ID# 23DG, PCGS# 84788*

**BARBER DIMES**

- 3960 1897 MS67 NGC.** Availability of 1897 Barber dimes begins a gradual decline in succeeding Gem grades with fewer than a dozen Superb Gems known. This beautifully preserved piece exhibits rich blue and lavender accents beneath overall golden-gray toning with satiny mint luster shining through. The strike is sharp, and the eye appeal is immense. NGC and PCGS combined have certified 12 examples in this grade and none numerically finer (9/16). NGC ID# 23E3, PCGS# 4812

**1898-S Barber Dime, MS65  
Very Rare in Mint State**

- 3961 1898-S MS65 PCGS.** The 1898-S had a mintage of 1.7 million pieces, and most were heavily circulated. Among S-mint dimes, the 1898-S ranks first in mint condition in the series and third among coins certified MS65 and finer. This piece displays variegated gray and blue toning with numerous patches of silver still evident over much of each side. Sharply detailed throughout. Population: 6 in 65, 15 finer (9/16).  
*From The Twelve Oaks Collection, Part III. NGC ID# 23E8, PCGS# 4817*

- 3962 1900-S MS65 PCGS. CAC.** Medium peach-gold, olive-green, and stone-gray toning embraces this precisely struck and lustrous century-straddling dime. Despite a bountiful mintage, the 1900-S is conditionally rare as a Gem. Encapsulated in a first generation holder. Population: 22 in 65 (1 in 65+), 15 finer. CAC: 12 in 65, 8 finer (9/16). NGC ID# 23EE, PCGS# 4823

- 3963 1902-S MS64 PCGS.** The 1902 is a better date in high grade. This near-Gem displays satiny luster and sharp design elements. A few stray marks appear throughout mottled olive-gray toning. Population: 18 in 64 (1 in 64+), 16 finer (9/16). NGC ID# 23EL, PCGS# 4829

- 3964 1909-D MS65 PCGS.** A conditionally rare Gem example of this otherwise plentiful Denver issue, showing deep original toning that sports aquamarine borders around lavender-gray interiors. There are no significant abrasions, and the devices are sharply rendered. Population: 19 in 65, 25 finer (9/16). NGC ID# 23FC, PCGS# 4851

- 3965 1909-S MS64 PCGS.** Both sides of this attractive Choice Mint State Barber dime exhibit vibrant blue, turquoise, and gold toning over brilliant, satin luster. Population: 26 in 64 (1 in 64+), 15 finer (9/16). NGC ID# 23FE, PCGS# 4853

- 3966 1910-S MS65 PCGS.** This stunning Gem has brilliant silver luster that shines through dappled gold, turquoise, and blue toning, with pristine surfaces and bold design motifs. Population: 22 in 65, 14 finer (9/16).  
*From The Twelve Oaks Collection, Part III. NGC ID# 23FH, PCGS# 4856*

- 3967 1912 MS66+ PCGS. CAC.** 30th Anniversary Green Label Holder. Pastel straw-gold and ice-blue patina visits this well struck and lustrous Premium Gem. A small area of prooflike surface, as made, resides above the E in ONE. Population: 54 in 66 (4 in 66+), 7 finer. CAC: 27 in 66, 6 finer (9/16). NGC ID# 23FM, PCGS# 4860

**1916 Barber Dime, MS67**  
**Rare This Fine, None Certified Higher**

- 3968 1916 Barber MS67 NGC.** The final-year issue for the Barber dime overlaps with Weinman's new "Mercury" design. This is a highly lustrous example that is mostly brilliant surfaces, augmented by slight evidence of golden-tan toning on each side. A fully struck and frosty Superb Gem. None are numerically finer at either service. Census: 8 in 67, 0 finer (9/16). NGC ID# 23FY, PCGS# 4870

## PROOF BARBER DIMES

- 3969 1892 PR66 Cameo PCGS.** Cameo examples of the debut Barber dime proof are rare in the lofty Premium Gem grade. This piece displays a full strike and deep mirroring with contrasted frost-white devices. Hints of gold toning appear around the borders. Population: 15 in 66 (1 in 66+) Cameo, 10 finer (9/16). NGC ID# 23G2, PCGS# 84875
- 3970 1898 PR66 Cameo PCGS.** The sharply detailed design elements of this spectacular Premium Gem have a frosty texture that contrasts boldly with the deeply mirrored fields. A few hints of khaki-gold toning enliven the well-preserved surfaces. Population: 25 in 66 (3 in 66+) Cameo, 14 finer (9/16). NGC ID# 26KV, PCGS# 84882
- 3971 1904 PR65 NGC.** Deep sea-green and violet toning adorns the surfaces of this Gem proof. Fully struck and free of hairlines, the piece shows a few tiny contact marks on Liberty's face and neck that are too trivial to limit the grade. Census: 41 in 65, 40 finer (9/16). NGC ID# 23GH, PCGS# 4888
- 3972 1906 PR65 Cameo PCGS.** A near-brilliant Gem example of this conditionally scarce proof issue, with frosted motifs and deeply mirrored fields, interrupted only by a hint of russet toning along the bottom obverse rim. A few bluish-gray freckles on the portrait serve as identifiers on the otherwise smooth and frost-white portrait. The strike is needle-sharp on both sides. Population: 9 in 65 (1 in 65+) Cameo, 10 finer (9/16). NGC ID# 23GK, PCGS# 84890
- 3973 1912 PR66 Cameo PCGS.** This outstanding 1912 proof displays a full strike and deep, watery fields. Vivid ocean-blue and pale lavender hues encompass much of each side, although appreciable cameo contrast emerges from the untuned regions. Population: 9 in 66 Cameo, 5 finer (9/16). NGC ID# 23GT, PCGS# 84896
- 3974 1912 PR66 Cameo PCGS.** Delightful champagne patina graces this wonderfully contrasting Premium Gem. Deeply mirrored and appealing. Population: 9 in 66 Cameo, 5 finer (9/16). NGC ID# 23GT, PCGS# 84896

## MERCURY DIMES

- 3975 1916-D VG8 PCGS.** An attractive gunmetal-gray key-date representative. All legends are distinct, and there are no distractions. VG8 is an above-average grade for the 1916-D, which was typically found by a collector after many years of circulation. *From The Twelve Oaks Collection, Part III.* NGC ID# 23GY, PCGS# 4906

- 3976 1916-D VG8 PCGS.** This key date dime has stone-white fields and high points, with deep gray toning in design crevices. All legends are clear, and the sole noticeable mark is a diagonal line in the sprig below the blade of the axe. *From The Twelve Oaks Collection, Part III.* NGC ID# 23GY, PCGS# 4906

- 3977 1916-D VG8 PCGS.** A stone-gray example with charcoal toning in protected regions. The legends are sharp except for slight fading at the tops of AMERICA. Marks are confined to a tick on the base of the U in UNITED. *From The Twelve Oaks Collection, Part III.* NGC ID# 23GY, PCGS# 4906

- 3978 1916-D VG8 PCGS.** Coveted in all grades, the 1916-D is the unchallenged key to the Mercury dime series. This cream-gray representative has bold legends and lacks any mentionable abrasions. *From The Twelve Oaks Collection, Part III.* NGC ID# 23GY, PCGS# 4906

- 3979 1916-D Fine 15 NGC.** Moderate, even wear defines the grade but leaves this mid-level circulated 1916-D Mercury dime with full rims and pleasing interior detail. Each side displays original steel-gray patina with smooth, problem-free surfaces. The mintmark is clear. *From The Walter Freeman Collection, Part II.* NGC ID# 23GY, PCGS# 4906

- 3980 1916-S MS66 Full Bands PCGS.** An impressive Premium Gem first-year Mercury dime, this brilliant silver example displays bold design motifs with lovely satin luster and brilliant surfaces. Dappled steel toning appears on both sides. PCGS has only certified 24 numerically finer examples (9/16). NGC ID# 23GZ, PCGS# 4909

- 3981 1917-D MS66 PCGS.** Russet and sea-green peripheral hues frame golden interiors on this Premium Gem 1917-D Mercury dime. The obverse is boldly rendered, the reverse slightly soft on the fasces bands. There are no major abrasions. Few examples of this issue are known so fine, with or without a Full Bands designation. Population: 4 in 66, 1 finer (9/16). NGC ID# 23H3, PCGS# 4912

### 1917-D Mercury Dime, MS65 Full Bands Condition Rarity in Finer Grades

- 3982 1917-D MS65 Full Bands NGC.** Although more than 9.4 million Mercury dimes were struck at the Denver Mint in 1917, the issue is rare in MS65 condition, and very rare any finer. This sharply detailed Gem exhibits fully split and rounded bands on the fasces and the well-preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 15 in 65 Full Bands, 5 finer (9/16). NGC ID# 23H3, PCGS# 4913

- 3983 1918-S MS66 PCGS.** CAC. Very few Full Bands coins exist for the 1918-S, which was struck from widely spaced and worn dies. This brilliant, frost-white Premium Gem shows a decent strike on the reverse, while the obverse displays slight central weakness and at the outermost peripheries. Vibrant mint luster, smooth surfaces, and terrific eye appeal remain. CAC endorsed. Population: 21 in 66 (3 in 66+), 1 finer. CAC: 10 in 66, 0 finer (9/16). NGC ID# 23H7, PCGS# 4920

**3984 1919-D MS65 PCGS. CAC.** The 1919-D is a rarity in Gem condition, and the present coin is attractively toned in blended gold, aquamarine, and lavender-gray hues. The satiny surfaces are devoid of abrasions. This piece is well-struck throughout except for on the central fasces, which lacks full separation of the horizontal bands. Population: 30 in 65 (2 in 65+), 6 finer. CAC: 6 in 65, 0 finer (9/16). NGC ID# 23H9, PCGS# 4924

**3985 1921 MS63 Full Bands NGC.** A well-defined Select example of this popular lower-mintage Mercury dime issue. Light silver-gray surfaces are satiny overall with areas of more granular texture. NGC ID# 23HE, PCGS# 4935

#### 1921-D Dime, MS64 Full Bands Sought-After Semikey

**3986 1921-D MS64 Full Bands PCGS.** An attractive, near-Gem example of this sought-after, low-mintage issue. There are a few small blemishes on the portrait that prevent a higher grade. Otherwise, each side is essentially untoned with the slightest trace of color (mostly on the reverse) and clean, virtually unmarked fields.

*Ex: Long Beach Signature (Heritage, 2/2002), lot 6349; Portland Signature (Heritage, 3/2004), lot 5567. NGC ID# 23HF, PCGS# 4937*

**3987 1924-S MS65+ PCGS. CAC.** With or without Full Bands definition, the 1924-S dime is scarce in Gem condition. This Plus-graded coin displays a sharp strike save for the horizontal fasces bands, which are slightly weak. Neither side exhibits mentionable toning. Population: 23 in 65 (1 in 65+), 4 finer. CAC: 1 in 65, 1 finer (9/16). NGC ID# 23HL, PCGS# 4946

#### 1927 Mercury Dime, MS67 Full Bands Exceptional Eye Appeal

**3988 1927 MS67 Full Bands PCGS.** Sharply defined throughout, this lustrous and satiny dime displays colorful rainbow iridescence amid pale mint-green and rose toning across both sides. The eye appeal alone merits a Superb Gem grade, yet the surface quality and strike are equally praiseworthy. Among the finest certified at PCGS. Population: 28 in 67 (1 in 67+) Full Bands, 0 finer (9/16). NGC ID# 5KLC, PCGS# 4961

**3989 1927-S MS64 Full Bands PCGS.** The San Francisco silver issues of 1927 are famous for their often weak strikes. This Choice Full Bands dime is conditionally scarce. The strike is boldly rendered, and satiny luster illuminates golden and russet toning on each side. Abrasions are minimal. NGC ID# 23HW, PCGS# 4965

**3990 1928-S MS65 Full Bands PCGS.** This satin Gem exhibits delicate peripheral gold and iridescent toning over brilliant silver surfaces, with an outstanding strike showing all details to the fullest advantage. PCGS has only certified 50 finer examples (9/16). NGC ID# 23HZ, PCGS# 4971

**3991 1929 MS67 Full Bands PCGS. CAC.** Extremely faint champagne toning appears on the obverse of this lovely Superb Gem, while the reverse is brilliant and untuned. This impressive piece will make a nice addition to an advanced Mercury dime collection. Population: 89 in 67 (6 in 67+) Full Bands, 1 finer. CAC: 20 in 67, 0 finer (9/16). NGC ID# 23J2, PCGS# 4973

**3992 1929-D MS67 Full Bands PCGS. CAC.** Frosty original luster and a razor-sharp strike give this Superb Gem 1929-D Full Bands dime outstanding eye appeal. The coin is devoid of toning and shows exceptional preservation. Finer pieces are prohibitively rare. Population: 61 in 67 (2 in 67+) Full Bands, 2 finer. CAC: 16 in 67, 1 finer (9/16). NGC ID# 5LXC, PCGS# 4975

**3993 1931 MS66 Full Bands PCGS. CAC.** An amazing Premium Gem with brilliant, untuned silver surfaces, this example exhibits bright and frosty luster and a bold strike. Population: 84 in 66 (4 in 66+) Full Bands, 20 finer. CAC: 22 in 66, 5 finer (9/16). NGC ID# 5BZ2, PCGS# 4983

#### 1942 Mercury Dime, MS68+ Delightful Multihued Toning The Sole Finest at PCGS

**3994 1942 MS68+ PCGS.** 30th Anniversary Green Label Holder. Remarkable cherry-red, lemon-gold, and forest-green toning bathe the obverse. The reverse is gold-tinted aquamarine with a narrow peripheral band of cherry-red. This top-grade Registry coin is immaculate save for a small tick on the fasces below the central bands. Population: 7 in 68 (1 in 68+), 0 finer (9/16). NGC ID# 23K3, PCGS# 5034

### PROOF MERCURY DIMES

#### 1940 Mercury Dime, PR68 Tied for Finest at PCGS

**3995 1940 PR68 PCGS.** A brilliant and fully reflective proof from rim to rim, without any contrast on the raised devices. A whisper of pale-gold toning graces the upper obverse rim. Essentially pristine, it seems unusual that despite the large proof mintage of 11,827 pieces, the PR68 level has not been exceeded at PCGS and only two numerically finer coins are reported by NGC. PCGS population: 26 in 68, 0 finer (9/16). NGC ID# 27DL, PCGS# 5075

## PROOF ROOSEVELT DIME

- 3996** 1970 No S PR69 PCGS. A trace of field-to-device contrast is evident on this nearly perfect Superb Gem Roosevelt dime. The fields are fully mirrored and the devices are boldly defined. Population: 12 in 69, 0 finer (9/16). NGC ID# 27F5, PCGS# 5248

## TWENTY CENT PIECES

- 3997** 1875 MS64 NGC. BF-1, R.1. A steel-gray Choice example. The strike is unusually crisp for a business issue of the series. The fields are smooth and semiprooflike. The mintage is only a tiny fraction of the 1875-S production. NGC ID# 23R5, PCGS# 5296

### 1875-CC Twenty Cent, MS64 Popular Carson City Type Coin

- 3998** 1875-CC MS64 PCGS. BF-2, R.1. Lightly toned aside from a freckled of charcoal patina near the W in TWENTY. The lustrous surfaces display only delicate field grazes. Minor incompleteness of strike is noted on the eagle's breast. The sole collectible Carson City issue of the short-lived denomination.

*From The Walter Freeman Collection, Part II.* NGC ID# 23R6, PCGS# 5297

- 3999** 1875-S MS64 NGC. BF-9, R.2. Cartwheel luster rolls across deeply patinated forest-green, lavender-red, and dove-gray surfaces. A loupe fails to locate any consequential contact. A few stars are incompletely brought up, but the strike is generally good. NGC ID# 23R7, PCGS# 5298

- 4000** 1876 MS63 PCGS. BF-1, R.4. Extravagant sea-green, lilac, autumn-brown, and powder-blue toning embraces this satiny and boldly struck representative. The semiprooflike surfaces show only inconsequential imperfections. From a low mintage of 14,750 pieces. NGC ID# 23R8, PCGS# 5299

## PROOF TWENTY CENT PIECES

- 4001** 1875 PR60 PCGS. BF-1, R.1. A collectible base-grade proof 1875 twenty cent piece, suitable to the budget-conscious enthusiast seeking a type or date representative. This coin is fully struck and reflective with light champagne color. Scattered hairlines determine the grade. NGC ID# 27GZ, PCGS# 5303

### 1875 Twenty Cent, PR63 First-Year Issue, Variegated Patina

- 4002** 1875 PR63 NGC. BF-1. The shield points to the middle of the 1. A first-year example of this short-lived odd type from a mintage of 2,790 proofs. Examples are eagerly pursued in all grades. This is a flashy and reflective example, evidence of which is abundantly clear even through the finely variegated deep blue and rose toning that covers each side.

*Ex: Philadelphia Signature (Heritage, 8/2012), lot 3242.* NGC ID# 27GZ, PCGS# 5303

## BUST QUARTERS

### 1815 B-1 Quarter, AU Sharpness 'E' Counterstamp, Eye Appeal Remains

- 4003** 1815 "E" Counterstamp, B-1, R.1 — Improperly Cleaned — NGC Details. AU. The puzzling "E" counterstamp above Liberty's cap has mystified numismatists for decades, and continues to do so to this day. Counterstamp collectors will view this quarter as an opportunity, since they are normally less concerned with the condition of the host coin than obtaining a sharp example of the countermark. They will have competition for the present example, however, since the noted cleaning is minor. The coin displays an overall glossiness rather than any overt hairlines or other distractions. Pleasing purplish-umber toning remains at the margins and surrounds the raised devices of this sharply defined, still-lustrous quarter.

*From The Hamilton Collection, Part IV.*

**1818/5 B-3 Quarter, AU58**  
**Guide Book Variety**

**4004 1818/5 B-3, R.3, AU58 NGC.** Tompkins Die State 2/2, with clash marks on each side and die cracks through the arrowheads and the U in UNITED. Remnants of the underdigit 5 are no longer visible. Daubs of pale gold patina drape this largely brilliant Capped Bust quarter. A bold impression lightens a touch over the curls and left wing feathers. Minimally abraded with a virtually indistinguishable degree of cabinet friction. NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

**4005 1824/2 B-1, R.3, Fine 15 PCGS.** The sole 1824-dated dies. This stone-gray representative displays wear on Liberty's curls, but the eagle retains pleasing plumage and shield definition. No marks are remotely worthy of comment, and the eye appeal is attractive for the Choice Fine level. NGC ID# 23RR, PCGS# 38972 Base PCGS# 5335

**1825/4 B-2 Quarter, MS61**  
**Enigmatic 'L' Counterstamp**

**4006 1825/4(2) "L" Counterstamp, B-2, R.2, MS61 NGC.** Tompkins Die State 1/1. Struck from an early state of the dies, with considerable prooflikeness in the fields. Attractive toning includes orange-gold centers yielding to forest-green, blue, and deep-amber shades at the margins. The devices display a sharp strike throughout both sides. 1825/4 quarters from the B-2 die pair are sometimes found with an "E" or "L" counterstamp above Liberty's cap — a curious anomaly seen also on the 1815 B-1 quarters. Where the E counterstamps are more numerous on the 1815 issue, the L is seen more frequently on the 1825/4. Theories abound about the origin of these countermarks, yet no definitive proof exists to identify the issuer. Circumstantial evidence suggests the Harmonist community of Economy, Pennsylvania may have stamped the coins as a voting device, but other proposed explanations are equally possible. The enigma of the counterstamps remains an unsolved numismatic mystery.

*From The Hamilton Collection, Part IV.* NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

**4007 1831 Small Letters, B-4, R.1, AU58 PCGS.** A sharply struck near-Mint Capped Bust quarter. A blush of orange-gold toning accompanies UNITED STATES, but the remainder of the coin is close to white. Marks are minor overall, though a hair-thin line above star 12 is mentioned as an identifier. NGC ID# 23RW, PCGS# 38983 Base PCGS# 5348

**4008 1832 B-1, R.1, MS62 PCGS.** A die crack connects the final three stars but does not extend below the curl. Light cream-gray toning visits this boldly struck and attractive representative. The upper obverse exhibits glimpses of charcoal patina. No marks are noticeable. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

**1832 B-2 Quarter Dollar, MS63**

**4009 1832 B-2, R.2, MS63 PCGS.** Both sides of this pleasing Select Mint State Capped Bust quarter exhibit soft luster beneath gray-gold toning, with considerable cobalt-blue added to the reverse. Minor marks in the left reverse field prevent a higher grade. Population: 19 in 63, 17 finer for both 1832 varieties (9/16). NGC ID# 23RX, PCGS# 38988 Base PCGS# 5351

**SEATED QUARTERS**

**1838 No Drapery Quarter, MS62**  
**Great Inaugural-Year Type**

**4010 1838 No Drapery MS62 NGC. Briggs 1-A.** The 1838 No Drapery quarter makes a perfect type coin as the first issue in the Seated Liberty series. While scarce, the 1838 is available in MS62 and MS63. This all-brilliant representative boasts frosty luster and crisp central detail. The stars and borders are a touch soft, but inconsequentially so. Census: 16 in 62, 55 finer (9/16). NGC ID# 23SE, PCGS# 5391

**4011 1840-O No Drapery MS62 PCGS. Briggs 2-B, Flynn RPD-002.** The 0 in the date is lightly recut on this variety. The 1840-O No Drapery quarter is the scarcest No Drapery issue in high grade. This Mint State coin displays satiny luster and a hint of golden-gray toning. The obverse border is poorly defined, but the central devices are sharp. Light, scattered abrasions limit the grade. Population: 7 in 62, 7 finer (9/16). NGC ID# 23SG, PCGS# 5393

**4012 1840-O No Drapery MS62 NGC. Briggs 2-B, Flynn RPD-002.** Per Briggs, " 'O' of date is triple punched; first slightly north from the upper right outside curve; second 0.2 mm south of main 'O' of date." The fine-grained matte surfaces are lightly toned and exhibit a typical New Orleans Mint strike. Uncommonly free from marks. No Drapery Census: 10 in 62, 10 finer (9/16). NGC ID# 23SG, PCGS# 5393

- 4013 1847-O XF40 PCGS. Briggs 1-A.** Deep cobalt-blue fields contrast with silver-white high points. A well defined and unmarked example. The 1847-O is available in well circulated grades, but is surprisingly rare in XF or finer. Many were presumably melted in the aftermath of the 1849 Gold Rush. NGC ID# 23SY, PCGS# 5411

**1852-O Quarter, Unc Details  
Louisiana Condition Rarity**

- 4014 1852-O — Cleaning — PCGS Genuine. Unc Details. Briggs 1-B.** The New Orleans Mint struck a rather small number of quarters in 1852 (96,000 coins), a time when the price of silver rose considerably relative to gold. That led to widespread hoarding, but it also meant the O-mint was spending more on the production of silver coins than the coins were actually worth. The 1852-O is scarce in all grades and extremely rare with Uncirculated details. Silvery-gray surfaces have been slightly muted by cleaning. Sharpness is typical for the facility, but the motifs fail to show any signs of friction. This lot is sure to draw the attention of series specialists. NGC ID# 23T9, PCGS# 5420

- 4015 1853 Arrows and Rays MS62 NGC.** Mostly brilliant and satiny silver surfaces host splashes of gold, rose, and blue toning. The design elements of this important single-year design type are sharply defined. NGC ID# 23U4, PCGS# 5426

- 4016 1857 MS65 NGC.** Delicate gold toning adorns this lustrous and beautifully preserved Gem. A good strike, although faint mint-caused roller marks are present on the seated Liberty. A worthy representative of the No Motto subtype.  
*Ex: Indiana Collection (Heritage, 5/2000), lot 7286; James Mossman Collection (Heritage, 1/2009), lot 2329, which realized \$2,300. NGC ID# 23TE, PCGS# 5442*

- 4017 1859 MS64 PCGS. Briggs 5-D.** Type One Obverse and Reverse. Brilliant, crisply struck, and lustrous. Well preserved save for a line above star 3 and a low relief area below the left (facing) knee. Population: 36 in 64 (1 in 64+), 13 finer (9/16). NGC ID# 23TL, PCGS# 5448

- 4018 1874-S Arrows MS64 PCGS. CAC.** Hints of golden-brown patina visit the reverse periphery, but most of this lustrous near-Gem is close to brilliant. A well preserved and boldly struck example of the short-lived Arrows, With Motto type.  
*Ex: New York Signature (Heritage, 12/2011), lot 3473, which realized \$1,955. NGC ID# 23VY, PCGS# 5495*

- 4019 1877 MS66 PCGS. CAC. Flynn-MPD-001.** Lightly toned and highly lustrous with a precise strike and exemplary preservation. A desirable Seated type coin. A minor yet interesting misplaced date variety, with two or three digits lurking in the dentils below the date. NGC ID# 23V5, PCGS# 5504

- 4020 1877/77-CC Briggs 2-B, FS-301, MS64 PCGS.** Large wide CC. The 7s in the date are obviously repunched south. The variety is undesignated on the holder. PCGS has certified only six pieces as FS-301, with the single finest as MS64 (9/16). Wisps of almond-gold toning visit lustrous, well struck, and refreshingly unabraded surfaces. PCGS# 395941 Base PCGS# 5505

- 4021 1879 MS66 PCGS. Briggs 1-A.** In 1879, large-scale silver dollar production led to token productions of the smaller silver denominations. Quarters were struck only at Philadelphia, with mintages limited to 13,600 commercial pieces along with 1,100 proofs. The present business Gem is smooth, nicely struck, and coruscating. Medium wheat-gold, ocean-blue, and cream-gray toning embraces both sides. NGC ID# 23VB, PCGS# 5511

- 4022 1879 MS66+ NGC. Briggs 1-A.** The only die pair for the business issue of 13,600 pieces. Despite the low mintage, a number of nice Uncirculated pieces were saved by Philadelphia dealers. The present sharply struck Premium Gem has light butter-gold and pearl-white toning. The lustrous surfaces display only minute contact. NGC ID# 23VB, PCGS# 5511

**1885 Quarter, Prooflike MS66  
Obverse Cameo Contrast**

- 4023 1885 MS66 PCGS. CAC. Briggs 2-A.** This sharp, prooflike Premium Gem 1885 quarter displays noticeable cameo contrast on the obverse, while the reverse is more deeply toned in lavender and aquamarine hues. There are no mentionable abrasions, only a few tiny ticks in the right obverse field. Prooflike circulation strikes of this period are not unusual given the low mintages. The 1885 had a production total of just 13,600 pieces. Population: 39 in 66 (8 in 66+), 5 finer. CAC: 5 in 66, 3 finer (9/16). NGC ID# 23VH, PCGS# 5517

- 4024 1888 MS66 PCGS. Briggs 1-A.** Rich aquamarine toning fills the fields, while the borders display peach-gold and rose-red shades. Satiny and unabraded with a typical strike on the stars. A scant 10,000 pieces were struck, due to ongoing large-scale silver dollar production. Population: 65 in 66 (15 in 66+), 11 finer (9/16). NGC ID# 23VL, PCGS# 5520

**PROOF SEATED QUARTERS**

- 4025 1857 PR62 PCGS. Briggs 7-G.** Medium butter-gold toning dominates, although the reverse margin shows hints of lavender and sea-green. The fields display wispy marks that correspond with the grade. The rims retain the planchet surface, and the reverse rim is irregular in width, all as made. The proof mintage for 1857 is unknown, but undoubtedly low. PCGS estimates 75 to 100 pieces are known. NGC ID# 23WJ, PCGS# 5553

- 4026 1863 PR64 NGC. Briggs 4-D.** A Civil War date with a mintage of only 460 proofs. An intricately struck near-Gem with an undisturbed appearance. Apple-green, lavender-red, and straw-gold toning further ensures the eye appeal. NGC ID# 23WR, PCGS# 5559

- 4027 1863 PR63 Cameo NGC. Briggs 4-D.** Icy motifs rise above glassy fields. A brilliant Civil War specimen that boasts exceptional white-on-black contrast. Desirable despite moderate inexactness of strike on the upper stars and fletchings. NGC ID# 23WR, PCGS# 85559

- 4028 1872 PR64+ Cameo PCGS. Briggs 3-C.** Icy devices rise in full detail above the mirrored fields. Brilliant and beautiful. The delicate die scratch (as made) on the left border of the reverse shield is diagnostic for Briggs 3-C. Population: 17 in 64 (3 in 64+) Cameo, 19 finer (9/16). NGC ID# 23X5, PCGS# 85571

**4029 1873 No Arrows PR63 Cameo NGC. CAC. Briggs 1-A.** Snow-white devices rise in full detail above the mirrored fields. Careful evaluation reveals unobtrusive obverse hairlines. The proof quarter mintage for 1873 consisted of 600 Closed 3, No Arrows pieces and 500 Open 3, Arrows pieces. Open 3, No Arrows quarters were struck for commerce only. NGC ID# 23X6, PCGS# 85572

**4030 1873 Arrows PR63 NGC. CAC. Briggs 5-D.** Although undesignated as Cameo, this proof Arrows quarter nonetheless contrasts frosty motifs with glassy fields. A brilliant and sharply struck specimen held back in grade by inoffensive obverse field hairlines. NGC ID# 23XR, PCGS# 5574

**4031 1873 Arrows PR64 PCGS. Briggs 5-D.** All With Arrows Seated quarters have the Open 3 logotype in the date. This Choice proof example displays a full strike and reflective fields. Deep gunmetal-blue and lavender-gray toning embraces the mirrored surfaces. Population: 35 in 64, 18 finer (9/16). NGC ID# 23XR, PCGS# 5574

**4032 1876 PR66 NGC. Briggs 9-L.** Type Two Reverse. This impressive Premium Gem exhibits razor-sharp definition on all design elements. The fields are flashy and the surfaces are unblemished by contact. Caramel-gold toning enriches the borders. Census: 17 in 66, 5 finer (9/16). NGC ID# 3TWJ, PCGS# 5577

**4033 1879 PR66 PCGS. Briggs 2-B.** Type Two Reverse. Jade-green, lilac-red, and straw-gold alternate across this pastel-toned specimen. Fully struck and void of contact. Breen and Briggs state proofs of this date exist with a Type One Reverse, but none have been seen by the cataloger. NGC ID# 23XB, PCGS# 5580

**4034 1879 PR64 Cameo PCGS. Briggs 2-B.** Type Two Reverse. Blue and violet peripheries blend to light golden interiors on this Choice Cameo proof 1879 Seated quarter. The strike is sharp, and the fields are deeply mirrored. Field-motif contrast is readily apparent. The 1879 proof is elusive in any Cameo grade. Population: 14 in 64 (1 in 64+) Cameo, 16 finer (9/16). NGC ID# 23XB, PCGS# 85580

**4035 1880 PR65 NGC. CAC. Briggs 2-B.** Type One Reverse. Splendid autumn-brown toning graces both borders. The dentils are cherry-red, and the rims are forest-green. The devices and open fields remain brilliant. The white-on-black contrast is undeniable, but the coin was housed in its older generation NGC holder before the Cameo designation was extended to the Seated quarter series. NGC ID# 23XC, PCGS# 5581

**4036 1885 PR65 NGC. CAC. Briggs 3-B.** Ex: Rev. Dr. James G.K. McClure. Vivid electric-blue, honey-gold, lavender-red, and forest-green toning encompass this well-preserved Gem proof. The strike is precise aside from blending on the right-side stars. A colorful specimen of a scarce proof date.  
Ex: *Long Beach Signature (Heritage, 6/2016)*, lot 3711. NGC ID# 23XH, PCGS# 5586

**4037 1886 PR65 Cameo PCGS. Briggs 2-B.** Dove-gray devices rise above the flashy golden-brown fields. The stars display glimpses of apple-green, and the reverse periphery exhibits lilac-red and cobalt-blue. Pristine aside from delicate contact on the upper half of the seated Liberty. NGC ID# 23XJ, PCGS# 85587

## BARBER QUARTERS

**4038 1894-S MS65 NGC.** The 1894-S is a challenging issue in Mint State. This Gem example displays satiny luster, a sharp strike, and subtly reflective fields. Near-brilliant interiors are surrounded by vivid multicolor hues that deliver strong visual appeal. A few small marks appear on the obverse portrait. Census: 11 in 65, 3 finer (9/16). NGC ID# 23Y3, PCGS# 5609

**4039 1895 MS65 NGC.** The vibrant, frosty luster and irregular sun-gold toning pattern of this Gem 1895 quarter deliver eye-catching visual appeal. The strike is razor-sharp, and Liberty's cheek is free of severe marks. Rarely encountered in finer condition. Census: 20 in 65, 16 finer (9/16). NGC ID# 23Y4, PCGS# 5610

### 1895 Barber Quarter, MS66+ Few Known Finer

**4040 1895 MS66+ PCGS. CAC.** The 1895 is an available date in the Barber quarter series, but seldom is a Premium Gem example encountered. This piece displays a bold strike, with light golden toning warming frosty, mint-fresh luster. A few insignificant ticks on the obverse portrait are not bothersome, and the eye appeal is outstanding. Population: 23 in 66 (2 in 66+), 3 finer. CAC: 7 in 66, 2 finer (9/16). NGC ID# 23Y4, PCGS# 5610

**4041 1895-O MS64 PCGS.** A wisp of honey-gold toning accompanies this lustrous and impressively unabraded New Orleans quarter. The strike is generally bold, though the fletchings and nearby claw are soft. Population: 47 in 64 (2 in 64+), 15 finer (9/16). NGC ID# 23Y5, PCGS# 5611

### 1895-S Barber Quarter, MS65 Seldom Seen This Fine

**4042 1895-S MS65 PCGS.** The 1895-S Barber quarter is elusive in Mint State and rare at the Gem grade level. This piece shows an impressively sharp strike and satiny luster. The champagne-color surfaces displays daubs of olive and amber toning near the borders. The mintmark is faintly repunched at the serifs, different than DL-101. A pleasing and interesting condition rarity. Population: 9 in 65, 4 finer (9/16). NGC ID# 23Y6, PCGS# 5612

### 1900-S Quarter, Fully Struck MS65

**4043 1900-S MS65 PCGS.** Mottled pinkish-gold and powder-gray tints appear on each side of this fully struck S-mint Barber quarter, one of 11 in MS65 with 13 finer at PCGS (9/16). Even under a loupe there is no mentionable sign of contact, and the problematic right shield corner on the reverse is complete. NGC ID# 23YM, PCGS# 5627

**4044 1911-S MS65 PCGS.** Both sides of this lovely Gem exhibit delicate gold toning with hints of blue. Sharp details add to the presentation of this appealing Barber quarter. Population: 36 in 65 (1 in 65+), 52 finer (9/16). NGC ID# 23ZR, PCGS# 5661

**4045 1913 MS65 PCGS.** Scarce in this grade and rarely seen finer. This Gem 1913 Barber quarter displays a bold strike and luminous mint luster that offers iridescent champagne-lavender toning. A few trivial marks are visible beneath a loupe. Population: 31 in 65 (1 in 65+), 10 finer (9/16). NGC ID# 23ZU, PCGS# 5664

**4046 1914-S AU58 PCGS.** The eagle's wingtips display minor wear, but this better-date Barber quarter displays cartwheel luster and is free from noticeable marks. Brilliant save for glimpses of tan-gold toning near the rims. The strike is good aside from softness on the claws and fletchings. NGC ID# 23ZZ, PCGS# 5669

#### 1914-S Barber Quarter, MS64 Low-Mintage, Late-Series Issue

**4047 1914-S MS64 PCGS.** The 1914-S Barber quarter claims a modest mintage of 264,000 pieces, making the issue quite rare in high grade. This impressive Choice example offers well-detailed design elements, with just a touch of the usual softness on the eagle's claw and arrow fletchings. The lustrous surfaces are well-preserved, with two small amber alloy spots on the obverse. Population: 22 in 64, 21 finer (9/16). NGC ID# 23ZZ, PCGS# 5669

#### 1915-S Plus-Graded Quarter Shimmering Premium Gem

**4048 1915-S MS66+ PCGS.** Intense mint luster glistens across the silky-smooth surfaces of this high-end Premium Gem 1915-S, while a faint patina of pale-violet and ice-blue hues add a translucent glow of color. A splash of brassy-gold toning at stars 4 to 6 provides an exclamation point to the exquisite visual impression. Only a bit of blending on the eagle's claw and arrow fletchings subtracts from the otherwise full strike. David Lawrence called this San Francisco issue "ticky-tacky" for the unavoidable marks that appear on even high-grade pieces, and this coin has a few, but they are exceedingly minor in light of the overwhelming eye appeal. Population: 25 in 66 (3 in 66+), 4 finer (9/16). NGC ID# 2424, PCGS# 5672

**4049 1916-D MS67 NGC.** Splashes of gold toning appear on both sides of this brilliant Superb Gem, with additional dabs of emerald on the obverse. Both sides exhibit reflective fields and brilliant silver luster. Census: 14 in 67 (2 in 67+, 1 in 67★), 2 finer (9/16). NGC ID# 2426, PCGS# 5674

### PROOF BARBER QUARTERS

**4050 1894 PR65 NGC.** This Gem proof displays a razor-sharp strike with brilliant, mirrored fields. The remarkably clean surfaces produce nice mirroring when tilted under a light, and exhibit the overall appearance of a higher-graded coin. NGC ID# 2429, PCGS# 5680

**4051 1906 PR66 PCGS. CAC.** An impressive Premium Gem proof, this 1906 Barber quarter exhibits hints of champagne toning on brilliant silver surfaces. Slight contrast is noted on both sides of this lovely piece that is housed in a green-label holder. Population: 41 in 66 (3 in 66+), 30 finer. CAC: 16 in 66, 16 finer (9/16). NGC ID# 242M, PCGS# 5692

**4052 1911 PR65+ PCGS.** Dappled gold and iridescent toning appear on both sides of this brilliant Gem proof. Although there is no designation, the fields and devices present nice contrast. Population: 28 in 65 (1 in 65+), 53 finer (9/16). NGC ID# 242T, PCGS# 5697

**4053 1911 PR65 Cameo NGC.** Moderate mirrors and surprisingly strong frost on the devices combine for remarkable contrast. Delicate silver-gray patina has settled over the well-preserved mirrors. Census: 12 in 65 Cameo, 40 finer (9/16). NGC ID# 242T, PCGS# 85697

**4054 1911 PR65 Cameo NGC. CAC.** With a limited proof montage of 543 pieces, the 1911 is a popular issue in the proof series. Stark field-motif contrast and bold design rendering are the chief attributes of this Gem Cameo proof, although warm champagne toning that deepens slightly around the borders is also appealing. Close study with a lens reveals trivial hairlines in the fields, in concert with the grade, but the eye appeal is palpable and dramatic. Census: 12 in 65 Cameo, 40 finer. CAC: 10 in 65, 33 finer (9/16). Ex: Numisma '95 (*Stack's*, 11/1995), lot 1239; *The Eugene H. Gardner Collection Part IV* (*Heritage*, 10/2015), lot 98620; *Long Beach Signature* (*Heritage*, 6/2016), lot 3763. NGC ID# 242T, PCGS# 85697

### STANDING LIBERTY QUARTERS

**4055 1917 Type One MS66 Full Head PCGS.** Ex: Cherny. A sharp strike and glistening, frosty luster deliver exceptional visual appeal on this high-end Type One representative. A few stray ticks do not reduce the grade, and traces of light champagne toning attest to the originality of the surfaces. Finer representatives are scarce. **From The Cherny Collection.** NGC ID# 242Z, PCGS# 5707

**4056 1917-D Type One MS65 Full Head PCGS.** Ex: Cherny. A bold strike combines with luminous cartwheel luster on this lightly toned Gem, showing wisps of lavender throughout otherwise light golden toning. There are no significant abrasions, and eye appeal is strong. **From The Cherny Collection.** NGC ID# 2432, PCGS# 5709

**4057 1917-S Type One MS65 Full Head PCGS. CAC.** A fully struck Type One example with vibrant, frosty mint luster that shows hints of champagne toning. There are no distracting abrasions, and visual appeal is strong throughout. Finer examples of the S-Mint Type One quarter will be elusive. **From The Cherny Collection.** NGC ID# 2433, PCGS# 5711

**4058 1917 Type Two MS66 Full Head PCGS.** Full Head examples of the Type Two 1917 quarter are scarce in Premium Gem condition and rarely seen finer. This sharp, lustrous example displays intricate head, shield, and feather detail amid warm golden toning. PCGS has seen 14 Superb Gems finer in Full Head (9/16). NGC ID# 2434, PCGS# 5715

**4059 1917 Type Two MS66 Full Head PCGS.** Olive-green, rose, and sun-gold border toning surrounds dusky champagne centers on this high-end Full Head example, while the surfaces are free of major abrasions. Liberty's head, the shield, and the eagle's feathers are sharply defined. NGC ID# 2434, PCGS# 5715

**1917-D Type Two Quarter, MS65 Full Head  
Lustrous and Lightly Toned**

- 4060 1917-D Type Two MS65 Full Head PCGS.** Ex: Cherny. With the change from the Type One to the Type Two Standing Liberty quarter design in 1917, the relief of the design elements also increased, revealing striking difficulties at the branch mints. The 1917-D Type Two is seldom seen with Full Head detail in high grade. This Gem example displays satiny golden luster without significant abrasions. Liberty's head shows adequate definition, but the figure and eagle exhibit more typical strike weakness. Population: 70 in 65 Full Head, 28 finer (9/16).  
*From The Cherny Collection.* NGC ID# 2435, PCGS# 5717

- 4061 1917-S Type Two MS66 PCGS.** Satiny luster displays an ivory-white "skin" that attests to the originality of the surfaces on this Premium Gem Type Two S-mint quarter. There are no significant abrasions, although the usual strike weakness is seen on Liberty's head and on the central portions of the figure and eagle. NGC ID# 3TEN, PCGS# 5718
- 4062 1917-S Type Two MS66 PCGS.** A well-struck example in all areas except on Liberty's head, which shows the usual shallow strike at the temple. The coin is lustrous and mostly unabraded with rich golden toning. Deep russet overtones appear around the borders. Population: 33 in 66 (3 in 66+), 1 finer (9/16). NGC ID# 3TEN, PCGS# 5718

**1917-S Type Two Quarter, MS65 Full Head  
Above-Average Strike**

- 4063 1917-S Type Two MS65 Full Head PCGS.** The 1917-S Type Two quarter is famous for weakness on Liberty's head and over the central high points of the figure and eagle. The present coin displays unusually sharp head detail, but central weakness is yet evident. Soft, satiny surfaces show light golden color without significant abrasions. Finer examples are scarce. Population: 62 in 65 (3 in 65+) Full Head, 32 finer (9/16).  
*From The Cherny Collection.* NGC ID# 2436, PCGS# 5719

**1918 Quarter, Frosty MS67  
Tied for Finest Non-Full Head at PCGS**

- 4064 1918 MS67 PCGS.** Tied with two others as the finest non-Full Head 1918 at PCGS. This Superb Gem-graded quarter displays frosty original luster with the barest trace of champagne color. The strike is weak on Liberty's temple, the date, and the right-hand reverse stars, but the eagle and shield are well-defined. Two small ticks on Liberty's leg are the only noticeable flaws. An ideal coin for the Registry Set collector. NGC ID# 3TWT, PCGS# 5720

- 4065 1918 MS65 Full Head PCGS.** A fully defined head and sharp shield and eagle give this Gem 1918 Standing Liberty quarter tremendous visual merit. The date is weak but clear. Each side exhibits frosty luster and warm golden toning. A couple of marks on the shield prevent a finer grade.  
*From The Cherny Collection.* NGC ID# 2437, PCGS# 5721

- 4066 1918 MS65 Full Head PCGS.** A well-struck piece with all of the shield rivets, Liberty's head, and the date sharp. Light toning appears on portions of the outer edge of the obverse in shades of khaki-green and golden-brown. Very faint almond-gold toning is present elsewhere. NGC ID# 2437, PCGS# 5721

- 4067 1918-D MS64 Full Head PCGS.** Ex: Michael F. Hayes. Hints of gold and iridescent toning appear on each side of this satiny and well-struck 1918-D quarter. Eye appeal is pleasing for the grade, and minimal finer coins are certified in Full Head. NGC ID# 3TWU, PCGS# 5723

**1918-D Quarter, MS65 Full Head  
Exceedingly Well-Struck**

- 4068 1918-D MS65 Full Head PCGS.** CAC. The 1918-D quarter is scarce in Gem Full Head condition and rare any finer. This piece displays an unusually sharp strike and impressive preservation for the grade. Slight incompleteness on the shield rivets is hardly noticed. Satiny surfaces are faintly textured, showing light champagne toning. A small mark on Liberty's shin and another in the right reverse field appear to be the only limits on the grade. Population: 59 in 65 (4 in 65+) Full Head, 31 finer. CAC: 6 in 65, 6 finer (9/16).  
*From The Cherny Collection.* NGC ID# 3TWU, PCGS# 5723

- 4069 1918-S MS66 PCGS.** CAC. This lustrous Premium Gem has a frosty original "skin" that yields subtle iridescence on each side. There are no bothersome abrasions. Liberty's head is weak, but the shield and the central eagle are well-defined. Population: 24 in 66 (1 in 66+), 3 finer. CAC: 8 in 66, 3 finer (9/16). NGC ID# 2439, PCGS# 5724

**4070 1919 MS65 Full Head PCGS. CAC.** Satiny luster shows light champagne color on each side of this Gem Full Head 1919 quarter. In keeping with the issue's reputation, the shield lines and rivets are well-defined, as are the date numerals. The leading edge of the eagle's left (facing) wing shows minor softness. There are no distracting abrasions.

*From The Cherny Collection.* NGC ID# 243B, PCGS# 5729

**4071 1920 MS65 Full Head PCGS. CAC.** This is a luminous, particularly well-preserved Gem example, as is affirmed by the CAC endorsement. Traces of golden toning complement frosty, unmarked surfaces, and the shield and head are well-defined. The date is flat, as is often seen on pre-1925 Type Two issues. Finer examples are elusive.

*From The Cherny Collection.* NGC ID# 243E, PCGS# 5735

#### 1920 Quarter, MS66+ Full Head Frosty Mint Luster

**4072 1920 MS66+ Full Head PCGS.** The 1920 Standing Liberty quarter frequently comes with sharp interiors, although predictable weakness at Liberty's temple almost always precludes a Full Head designation. Full Head coins are rare above the Gem grade level, and pieces finer than MS66 are out of reach for most collectors. This Plus-designated Premium Gem is slightly softer than usual on the shield lines and rivets, although Liberty's temple is bold. Faint flow lines in the recesses and fields denote a late die state and produce vibrant luster. Each side shows mottled amber and russet-gold toning. Population: 41 in 66 (4 in 66+) Full Head, 7 finer (9/16). NGC ID# 243E, PCGS# 5735

#### 1920 Quarter, MS66 Full Head Sharp and Lustrous

**4073 1920 MS66 Full Head PCGS. CAC.** This is a frosty, champagne-toned Premium Gem example with a sharp Full Head and the usual sharp shield rivets. The date is bold on the 920 but weak on the 1, as is typical. There are no major abrasions. The 1920 is remarkably scarce in high grade Full Head, considering the date's mintage of more than 27 million coins. Population: 41 in 66 (4 in 66+) Full Head, 7 finer. CAC: 18 in 66, 1 finer (9/16). NGC ID# 243E, PCGS# 5735

**4074 1921 MS63 NGC.** As well-defined as a collector is likely to see for a non-Full Head example, especially on Liberty's shield. Pearlescent gray surfaces are luminous with small splashes of gold and ruby, and an arcing scrape through the left-side wingtip contributes to the grade. NGC ID# 243H, PCGS# 5740

#### 1921 Quarter, Well-Struck MS65 Ex: Norweb

**4075 1921 MS65 PCGS. Ex: Norweb.** This Gem 1921 quarter was described as Full Head in the Norweb catalog, where it was offered raw. PCGS feels that the temple is a trifle too weak for the designation by modern grading standards, although the shield lines and rivets are sharp. The coin has appealing lavender-gold toning and original mint luster.

*Ex: The Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 1797, which realized \$1,980.* NGC ID# 243H, PCGS# 5740

#### 1921 Quarter, MS64 Full Head Low-Mintage Capstone Date

**4076 1921 MS64 Full Head PCGS. CAC.** The 1921 Standing Liberty quarter is a low-mintage key that was produced to a high standard of quality. This attractive Choice example features sharply detailed design elements with Full Head definition and vibrant mint luster. A few hints of champagne-gold toning add to the outstanding eye appeal. CAC: 6 in 64, 22 finer (9/16).

*Ex: Philadelphia Signature (Heritage, 8/2012), lot 3947.* NGC ID# 243H, PCGS# 5741

#### 1923 Quarter, MS65 Full Head Lustrous and Sharp

**4077 1923 MS65 Full Head PCGS.** A surprisingly small number of Full Head examples exist for the 1923 Philadelphia issue, a fact not always recognized by collectors since nearly 10 million pieces were struck. This Gem coin displays lightly toned lilac-silver surfaces with hints of gold across the frosty surfaces. Only slight weakness on three of the shield rivets is noted, while Liberty's head is full-featured. Marks are tiny and widely spaced. Population: 44 in 65 Full Head, 44 finer (9/16). NGC ID# 243J, PCGS# 5743

- 4078 1923-S AU58 PCGS.** This is an impressively well-struck 1923-S quarter that might have garnered a Full Head designation were it not for a brush of friction over the high point of the hair line. The shield rivets, date, and eagle's wing are sharp. This partially lustrous coin shows golden and russet toning over lightly marked, original surfaces. NGC ID# 243K, PCGS# 5744
- 4079 1924 MS65 Full Head PCGS. CAC.** This CAC-approved Gem displays sharp head and shield detail and impressively well-preserved, frosty luster. Hints of champagne toning appear on each side. The Full Head strike prevails despite significant die erosion that appears in the form of metal flowlines on each side, debunking old theories that the sharpness of Liberty's head was dictated by the state of the dies. The date is also sharp. Several die cracks are visible on each side.  
*From The Cherny Collection.* NGC ID# 243L, PCGS# 5747
- 4080 1924 MS66 Full Head NGC.** In addition to the full head details, the shield is virtually complete as well, and that is seldom the case on these scarce quarters. Both sides exhibit frosty luster and brilliant mint surfaces. Census: 23 in 66 (2 in 66+ Full Head, 1 in 66+★), 18 finer (9/16). NGC ID# 243L, PCGS# 5747
- 4081 1924-S MS64 PCGS. CAC.** Satiny luster shows dusky, original gray toning on this Choice 1924-S quarter. Although a few light marks limit the grade, this piece exhibits an above-average strike for the issue. Liberty's head is weak only in the vicinity of the ear, and the shield rivets show above-average definition. The date and eagle are well brought up. NGC ID# 243N, PCGS# 5750
- 4082 1926 MS65 Full Head PCGS. CAC.** The 1926 is elusive in Gem Full Head condition and exceedingly so any finer. This piece displays mostly untuned, frosty mint luster and well-defined head and shield details. A small hit of Liberty's shin appears to be all that limits the grade.  
*From The Cherny Collection.* NGC ID# 243R, PCGS# 5755
- 4083 1926-S MS64 PCGS.** This near-Gem 1926-S quarter shows minimal abrasions for the grade, although mint-made die polishing lines in the fields interrupt the flow of the satin luster. Each side is toned in pastel lavender, gold, and blue hues that deepen around the borders. Liberty's head is nearly full, although the shield rivets are typically weak. NGC ID# 4462, PCGS# 5758
- 4084 1927 MS66 Full Head PCGS.** Dappled chestnut-gold and stone-gray toning graces this lustrous and pristine Premium Gem. The strike is uncommonly sharp. Although an available issue, the 1927 is infrequently encountered in the present stellar quality. Population: 65 in 66 (7 in 66+) Full Head, 7 finer (9/16). NGC ID# 243U, PCGS# 5761
- 4085 1927-D MS65 Full Head PCGS. Ex: Cherny.** Like most D-mints from the 1920s, the '27-D is a strike scarcity that is most often seen with only partial head definition. This glowing, lustrous example is well-defined and shows no obvious surface distractions. A lovely representative and seldom found so fine. PCGS lists 19 finer Full Head coins (9/16).  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 6684.*  
*From The Cherny Collection.* NGC ID# 243V, PCGS# 5763
- 4086 1928 MS65 Full Head PCGS. Ex: Cherny.** Impressive sharpness prevails throughout the head, shield, eagle, and stars on this Gem Full Head example. Pale yellow-gold toning appears over the reverse, leaving the obverse with barely perceptible color. There are no bothersome abrasions.  
*From The Cherny Collection.* NGC ID# 243X, PCGS# 5767
- 4087 1928-S MS66 Full Head PCGS. CAC. Ex: Cherny.** Large S. Mint-fresh, frosty luster rolls over largely unmarked surfaces on this CAC-endorsed Premium Gem, illuminating hints of light golden toning. The strike is sharp throughout, and the visual appeal is correspondingly strong. PCGS lists 22 finer Full Head representatives (9/16).  
*From The Cherny Collection.* NGC ID# 243Z, PCGS# 5771
- 4088 1929-D MS64 Full Head PCGS.** In Gem Full Head, the 1929-D is a scarce issue. This near-Gem Full Head coin balances quality and affordability for the average collector. Liberty's head is bold, but the shield rivets and the lower obverse stars exhibit minor weakness, as usual. Satiny luster is cast in dusky lavender-gold toning without distracting abrasions.  
*From The Cherny Collection.* NGC ID# 2443, PCGS# 5775
- 4089 1929-S MS66 Full Head PCGS. Ex: Cherny.** Liberty's head is needle-sharp, although the shield rivets and the leading edge of the eagle's left (facing) wing show moderate softness. Pale lavender, sky-blue, and light golden hues appear over each side, while the surfaces are devoid of bothersome abrasions. Frosty luster prevails. PCGS lists only 17 numerically finer Full Head coins (9/16).  
*From The Cherny Collection.* NGC ID# 2444, PCGS# 5777
- 4090 1929-S MS66 Full Head PCGS.** Frosty, glowing luster displays hints of delicate toning on this Premium Gem Full Head 1929-S quarter. The shield rivets are slightly weak, but the head and other central areas are far better struck than usual for this date. PCGS reports 17 numerically finer Full Head coins (9/16). NGC ID# 2444, PCGS# 5777
- 4091 1930-S MS67 PCGS. CAC.** This frosty Superb Gem 1930-S quarter is almost flawlessly preserved save for a couple of small ticks on Liberty's knee. For the grade, the quality is still first-rate, as the CAC endorsement confirms. Liberty's head is nearly full, and the inner design elements are also well-defined. Pastel lavender and champagne hues grace much of each side, but bluish and olive-color patches on Liberty's abdomen and at the Y in LIBERTY are distinctive pedigree markers. Population: 25 in 67 (2 in 67+), 0 finer. CAC: 13 in 67, 0 finer (9/16). NGC ID# 2446, PCGS# 5780

## WASHINGTON QUARTERS

- 4092 1932 MS66+ PCGS. CAC.** The 1932 is key to a year collection of Washington quarters. This virtually unabraded Premium Gem offers booming luster and lightly dappled butter-gold and russet toning. PCGS has only certified seven finer examples (9/16).  
*Ex: Chicago Central States (Heritage, 4/2014), lot 3506, which realized \$2,820.* NGC ID# 2447, PCGS# 5790
- 4093 1932-D MS63 NGC.** Dappled gold and charcoal toning appear on the champagne-toned obverse of this Select Mint State Washington key. The lovely reverse is fully brilliant and untuned with satiny silver luster. NGC ID# 2448, PCGS# 5791
- 4094 1932-D MS63 PCGS.** A pleasing and satiny Select Mint State piece, this key-date Washington quarter exhibits delicate champagne toning at the centers, within a frame of peripheral gold and blue-steel. NGC ID# 2448, PCGS# 5791
- 4095 1934-D Medium Motto MS66 PCGS.** From a relatively low mintage of 3.5 million pieces, the 1934-D Washington quarter is not readily available in high grade, and Premium Gem examples are very scarce. This well-detailed Premium Gem displays vibrant mint luster across smooth stone-gray, plum-mauve, and jade-green surfaces. NGC ID# 244C, PCGS# 5796
- 4096 1934-D Medium Motto MS66 PCGS.** Plum-red and apple-green margins encroach into the pearl-gray fields. Lustrous and crisply struck. Pristine aside from minor marks near Washington's forehead. PCGS has certified only a handful of pieces finer. NGC ID# 244C, PCGS# 5796
- 4097 1935 MS67+ NGC.** Pastel straw-gold and powder-blue toning adorns this well struck and highly lustrous Superb Gem. As of (9/16), NGC has certified 2 pieces as MS67+ with only one example finer. NGC ID# 244D, PCGS# 5797

- 4098 1935-S MS67 PCGS. CAC.** Virtually top-of-the-line for condition, this Superb Gem 1935-S Washington quarter is a must-have Registry Set acquisition. The strike and satiny surfaces thoroughly impress, and hints of green and crimson appear throughout warm golden toning. Population: 85 in 67 (4 in 67+), 0 finer. CAC: 17 in 67, 0 finer (9/16). NGC ID# 244F, PCGS# 5799

**1936-D Quarter, MS67  
Tied for Finest Certified**

- 4099 1936-D MS67 NGC.** This overtly original Superb Gem is ideal for the collector who desires nothing but the finest example available. Magenta, crimson, and orange-gold patina colors the obverse periphery, leaving the centers on that side and virtually the entire reverse brilliant. Satiny and fully struck. Census: 12 in 67, 0 finer (9/16). NGC ID# 244H, PCGS# 5801

- 4100 1937-D MS67 PCGS.** The 1937-D mintage was a generous 7.1 million coins, but surviving representatives are very scarce in this top grade. Arcs of rainbow iridescence provide wonderful eye appeal. The strike is complete, and there are no singular marks to report. A great Registry candidate. Population: 77 in 67 (1 in 67+), 0 finer (9/16). NGC ID# 244L, PCGS# 5804

**1938-S Washington Quarter, MS67+  
Virtually Unimprovable Quality**

- 4101 1938-S MS67+ PCGS. CAC.** A thin speckling of coffee-brown toning on the obverse is secondary to the primarily frosty-silver luster that prevails over the balance of the Superb Gem surfaces of this high-end 1938-S. The strike is sharp, coupling with outstanding eye appeal that imbues this CAC-endorsed Registry Set candidate. Population: 7 in 67+, 0 finer. CAC: 13 in 67, 0 finer (9/16). NGC ID# 244P, PCGS# 5807

**1938-S Quarter, MS67+  
Top-Grade Coin at PCGS**

- 4102 1938-S MS67+ PCGS.** For Registry purposes, this Plus-graded 1938-S Washington quarter is unsurpassed in a PCGS holder. The strike is sharp, and the satiny surfaces yield a hint of pale champagne toning. The obverse appears pristine, while two small ticks on the reverse eagle are apparently the only grade-limiting factors. Population: 86 in 67 (7 in 67+), 0 finer. CAC: 13 in 67, 0 finer (9/16). NGC ID# 244P, PCGS# 5807
- 4103 1943 MS67+ PCGS. CAC.** A snow-white Superb Gem that exhibits a bold strike and exceptionally unabraded surfaces. This World War II quarter is a desirable addition to the competitive Registry entry. Population: 141 in 67 (12 in 67+), 3 finer. CAC: 50 in 67, 3 finer (9/16). NGC ID# 2455, PCGS# 5820
- 4104 1943-S Doubled Die Obverse, FS-101, MS65 PCGS.** IN GOD WE TRUST, the date, and the LI in LIBERTY are strongly die doubled. Lustrous and magnificently preserved. Light golden-gray toning embraces the obverse. The reverse is brilliant save for a peripheral glimpse of caramel patina. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823
- 4105 1948-S MS67 NGC.** The finest of four 1948-S quarters designated Prooflike by NGC (10/16). This Superb Gem is brilliant and displays a sharp strike. Die polishing lines in the fields deliver satiny luster. NGC ID# 245N, PCGS# 5838
- 4106 1949-D MS68 NGC.** Rich fire-red and orange-gold toning fills the margins. The fields and motifs display dappled russet, lavender, and forest-green patina. Lustrous and pristine. Census: 5 in 68 (2 in 68★), 0 finer (9/16). NGC ID# 245R, PCGS# 5840
- 4107 1950 Doubled Die Reverse, FS-801, MS67+ PCGS.** The eagle's beak is the pick-up point for this popular *Cherry-pickers'* variety. An immaculate Superb Gem that boasts sweeping luster and light honey-gold toning. Worthy of the finest specialized collection. Population: 5 in 67 (2 in 67+), 0 finer (9/16). NGC ID# 245S, PCGS# 145633 Base PCGS# 5841
- 4108 1950-D MS67+ NGC. CAC.** Easily among the finest-known 1950-D quarters, this frosty and pinpoint-sharp Registry Set contender displays a faint speckling of slate-gray toning that does not diminish the silver luster one whit. CAC endorsed, NGC reports just one numerically finer piece, with none finer at PCGS. Census: 6 in 67+, 7 in 67★, 1 finer. CAC: 20 in 67, 0 finer (9/16). NGC ID# 245T, PCGS# 5842

**1956-D Washington Quarter, MS67+  
Awesome Toning, Exceptional Quality**

- 4109 1956-D MS67+ PCGS. CAC.** Exquisite mango-orange toning thins to pale yellow-gold, while an exclamation of rainbow colors occupies the territory below the motto, the neck truncation, and across the date — extending into a crescent of border toning on the reverse. Truly a spectacular and lustrous 1956-D quarter, the finest at PCGS as the sole Plus-designated example, and a certain Registry Set winner. Population: 30 in 67 (1 in 67+), 0 finer. CAC: 21 in 67, 0 finer (9/16). NGC ID# 246C, PCGS# 5861

- 4110 1983-D MS67 PCGS.** No mint sets were issued during 1982 and 1983, and Uncirculated quarters of these dates are scarce. The present lustrous Superb Gem further benefits from splashes of lemon-gold, ocean-blue, and lilac-red patina. Population: 13 in 67, 0 finer (9/16). NGC ID# 247X, PCGS# 5915

## PROOF WASHINGTON QUARTERS

- 4111 1936 PR65 PCGS. CAC.** Freckles of light chestnut toning adorn the reverse of this unabraded Gem proof. The obverse displays dappled butter-gold and ice-blue shades. Well struck and satiny. Key to the proof series, since most collectors chased commemorative halves during 1936. NGC ID# 27HN, PCGS# 5975
- 4112 1937 PR67+ PCGS. CAC.** Glittering silver surfaces display traces of light golden toning that grace the borders. Importantly, no 1937 proof Washington quarters have received Cameo grades, making high-end Superb Gems the finest obtainable. This Plus-graded PR67 PCGS coin displays CAC endorsement on its resume as well. The strike is bold and the mirroring deep. PCGS reports only three superiors in PR68. Population: 11 in 67+, 3 finer. CAC: 56 in 67, 1 finer (9/16). NGC ID# 27HP, PCGS# 5976
- 4113 1940 PR67+ PCGS.** PCGS lists only three finer non-Cameo proofs (10/16), making this Plus-designated Superb Gem a Registry Set candidate. The strike is full, and the fields are highly reflective. A blush of light golden toning graces each side. NGC ID# 27HT, PCGS# 5979
- 4114 1940 PR67+ PCGS. CAC.** This glimmering Superb Gem proof displays brilliant surfaces and deeply reflective fields. The strike is full throughout. This Plus-designated CAC coin earns high marks as a Registry Set candidate, as only three pieces are finer at PCGS (9/16). NGC ID# 27HT, PCGS# 5979
- 4115 1952 PR68 Cameo PCGS.** The brilliant and untuned silver surfaces of this lovely Superb Gem Cameo proof are exquisite with no spots or contact marks on either side. The devices exhibit satin luster over a fully and deeply mirrored background. Population: 9 in 68 Cameo, 0 finer (9/16). NGC ID# 248X, PCGS# 85984

## EARLY HALF DOLLARS

**1795 O-110 Flowing Hair Half, Fine 15  
Appealing Collector-Grade Coin**

- 4116 1795 2 Leaves, O-110, T-21, R.3, Fine 15 NGC.** Tompkins Die State 1/1. Plated in its previous auction appearance in 1989, where it was described as "strictly Fine and choice" — a description that is still apt today. Lovely golden-gray surfaces are smooth and appealing. Plentiful hair detail and some wing feather definition remains. Struck from perfect dies, before the crescent-shaped obverse die cracks develop that define later die stages of O-110.  
*Ex: Public Auction Sale (Stack's, 6/1989), lot 1749.*  
**From The Hamilton Collection, Part IV.** NGC ID# 24E7, PCGS# 39228 Base PCGS# 6052

- 4117 1795 2 Leaves, O-131, T-9, High R.4, VG10 NGC.** Tompkins Die State 1/3. The O-131 (T-9) variety is somewhat scarcer than other 1795 die marriages, struck from the third use of the obverse die (now lapped) and from a single-use reverse die employed only on O-131. This is a smoothly worn light-gray example with decent rims and only a scattering of hair-thin lines across both sides. Well-defined for the assigned grade, formerly with an ANACS grade F12/F12 dated 5-9-86.  
*Ex: December Dallas Auction (Heritage, 12/1986), lot 501.*  
**From The Hamilton Collection, Part IV.** NGC ID# 24E7, PCGS# 39243 Base PCGS# 6052
- 4118 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF45 NGC. CAC.** O-103 is the most prevalent of the four 1803 die marriages, but is also the only Overton variety that pairs a large 3 obverse and a large stars reverse. O-101 and O-102 have small reverse stars, and O-104 has a small 3. This is a cream-gray half dollar with glimpses of tan-gold luster in protected areas. There are no noticeable abrasions. The dies are lightly clashed.  
*Ex: FUN Signature (Heritage, 1/2012), lot 3445.* NGC ID# 24EE, PCGS# 39273 Base PCGS# 6066

- 4119 1805 O-111, T-3, R.2, XF40 PCGS.** A Draped Bust type coin with cream-gray high points and fields. Design recesses display charcoal toning. The unmarked surfaces are nicely defined and free from distractions.  
*Ex: Baltimore ANA Signature (Heritage, 7/2008), lot 1114, which realized \$1,955.* NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069
- 4120 1806 Pointed 6, No Stem, O-109a, T-15, R.3, XF45 PCGS. CAC.** Tompkins Die State 6/3. A diagnostic die crack from the inside point of star 12 toward Liberty's neck with die chipping along the crack confirms the late die state. Silver-gray toning with blue and lilac-gray accents covers both sides. Pleasing orange-gold color glows from protected areas along Liberty's head and ribbon on this Choice XF example, CAC endorsed. A *Guide Book* variety with the stem missing from the eagle's claw. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073
- 4121 1806 6 Over Inverted 6, O-111a, T-11, R.4, VF20 PCGS.** Tompkins Die State 4/4. A popular and relatively available variety, perhaps outnumbering its R.4 rating in terms of survivors but still scarce from strong collector demand. Obvious overpunching of the 6 over two previous inverted 6 digits and a bisecting obverse die break, rim to rim, from 8 through the serif of E to the edge join a full cud above E of UNITED. Natural, silver-gray toning deepens to umber-gray in the fields around light-gray raised devices. Nice for the grade.  
**From The Hamilton Collection, Part IV.** NGC ID# 24EL, PCGS# 39337 Base PCGS# 6078

**4122 1807 Draped Bust, O-102, T-8, R.2, XF45 NGC.** Tompkins Die State 2/2. Die clashing on both sides suggests a middle stage of the dies. Intense iridescence covers both sides of the coin with olive-green, blue, and grayish-rose shades combining for a deep, original patina. A few scattered, thin abrasions and nicks are noted including a rim mark above O in OF, as well as some deep-gray build-up that exists in sheltered areas of the sharply defined motifs. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079

**4123 1807 Draped Bust, O-105, T-4, R.1, XF45 PCGS. CAC.** Dusky walnut-brown toning encompasses this richly detailed and minimally abraded Draped Bust type coin. Numerous cracks and clashes further increase interest for the variety specialist. Scarce with a CAC seal. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

#### 1807 O-105 Draped Bust Half Uncirculated Details

**4124 1807 Draped Bust, O-105, T-4, R.1 — Improperly Cleaned — NGC Details. Unc.** Deep navy-blue and plum-red toning occupy the obverse. The reverse center is autumn-brown, and is framed by peripheral aquamarine patina. This satiny and intricately detailed half dollar displays bold clash marks but is only minimally abraded. Liberty's neck has a slender vertical flan flaw. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

**4125 1807 Draped Bust, O-110a, T-3, R.2, XF45 PCGS. CAC.** Tompkins Die State 3/3. Original golden-gray toning covers both sides of this Choice XF Draped Bust half. A descending die crack through the final S in STATES indicates the late die state in Overton, although the Tompkins reference indicates an even later state. Solid definition remains on the devices the natural eye appeal earns CAC endorsement. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

### BUST HALF DOLLARS

#### 1808 Half, O-102a, Toned AU55 Gold CAC

**4126 1808 O-102a, R.2, AU55 PCGS. Gold CAC.** The late die state of O-102 is identified by the prominent obverse die crack from top to bottom. The reverse exhibits a small die break from the top left corner of the scroll. This lovely Choice AU example has nearly full luster with intermingled ivory, gold, and steel-blue toning on both sides. Unabraded save for a single thin mark beneath the beak. NGC ID# 24EP, PCGS# 39363 Base PCGS# 6090

**4127 1810 O-102, R.1, AU55 PCGS.** A crescent of aquamarine, rose, and gold toning covers the right obverse field and encircles the margins of this still-lustrous, Choice About Uncirculated half. Both the obverse and reverse centers are only lightly toned. The strike is sharp on the obverse elements and elsewhere on the coin except for the eagle's left (facing) wing at the shoulder. An extra line on star 12 and recutting of the T in UNITED confirm the O-102 variety. NGC ID# 24ET, PCGS# 39406 Base PCGS# 6095

**4128 1811/10 O-101, R.1, AU53 PCGS.** A minimally toned representative. Luster illuminates the borders, curls, and eagle. Consequential contact is confined to a brief line near star 3. Light repunching on the flag of the 5 in 50 C distinguishes O-101 from O-102, the other 1811/10 die pairing. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

#### 1811 Capped Bust Half, AU58 Large 8, O-104a

**4129 1811 Large 8, O-104a, R.1, AU58 PCGS. CAC.** The O-104 variety is rare without the die cracks that define the late die state O-104a (the obverse must have cracked almost immediately when minting the variety). This example does not show the crack that curves up through stars 3 to 5 and to the forecurl, but all other cracks are present and accounted for. Richly toned in golden-gray shades that cede to deep grayish-blue borders, this near-Mint example is sharply struck with crisp definition remaining on the motifs. The dentils remain sharp throughout both sides of the coin. CAC endorsed for the original appeal and surface quality. NGC ID# 24EU, PCGS# 39426 Base PCGS# 6096

**4130 1814/3 O-101a, R.2, XF45 PCGS. Gold CAC.** The caramel-gold and stone-gray centers are bounded by sea-green and lilac margins. Ample luster emerges from design elements. Smooth save for faint marks on the portrait. Struck from heavily clashed dies. This Choice coin received the CAC gold seal for understated quality. NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

**4131 1815/2 O-101, R.2 — Stained — NGC Details. VF.** Purchased out of a 1988 Superior Galleries auction, this 1815/2 half was described as "Very early Die State with no clash marks visible. ANACS graded Very Fine 20/Very Fine 20 in 1987." It was recently encapsulated by NGC as "Stained" with VF sharpness. The coin remains the same as it was almost 30 years ago when it last appeared at auction. Soft gold undertones complement pleasing rose-gray and blue toning (a patina that NGC suggests might not be wholly natural). A small obverse rim bump at 2 o'clock is noted. Ex: *The A. Bernard Shore Collection (Superior Galleries, 2/1988), lot 1756.*  
*From The Hamilton Collection, Part IV.*

**4132 1818 O-109a, R.1, MS61 NGC.** This satiny and well struck Bust half dollar is lightly toned in chestnut and steel-gray tints. Struck from clashed dies, but abrasions are few and unimportant for the grade. Ex: *Long Beach Signature (Heritage, 6/2006), lot 1618.* NGC ID# 24F9, PCGS# 39526 Base PCGS# 6113

**4133 1818 O-114a, R.3, AU55 PCGS.** Attractively toned ocean-blue, apricot-gold, and lavender-red. Well struck and minimally abraded. Luster dominates the borders. The high E in STATES helps attribute the Overton variety. Die cracks through the right-side stars confirm the late die state. NGC ID# 24F9, PCGS# 39533 Base PCGS# 6113

- 4134** 1820/19 Curl Base 2, O-102, R.1, AU53 PCGS. CAC. Overton-102 is the sole 1820/19 Curl 2 die variety. This lightly circulated representative exhibits dusky cream-gray and gunmetal toning. No marks are noticeable, and luster illuminates design elements. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

**1820 O-103 Small Date Half Dollar, AU58  
Curl Base 2, Guide Book Variety**

- 4135** 1820 Curl Base 2, Small Date, O-103, R.1, AU58 PCGS. Only two Curl Base 2 varieties exist for the 1820 issue, and each is a *Guide Book* listing. The other variety (O-102) is easily identified as an 1820/19 overdate. All other 1820 Overton die pairs show a Square Base 2 in the date. This O-103 example displays light, cream-gray and speckled blue patina on the obverse with an even, rose-gray color on the reverse. Soft luster exists beneath the toning. A sharp strike remains across both sides, with a tiny pinprick mark near star 10 the only mentionable mark. Population (for the variety): 28 in 58, 21 finer (9/16). NGC ID# 24FD, PCGS# 39563 Base PCGS# 6121

- 4136** 1821 O-102, R.2, MS61 NGC. A die line between the ME in AMERICA attributes Overton-102. Field die lumps below the I in UNITED provide another pick-up point. This lustrous and well struck representative shows only a wisp of golden toning. No marks are consequential, and the eye appeal is exceptional for the MS61 grade. NGC ID# 24FF, PCGS# 39577 Base PCGS# 6128

- 4137** 1823 Broken 3, O-101, R.3, AU50 PCGS. Mint difficulties with the 3 punch for 1823 half dollars resulted in Broken 3, Patched 3, and Ugly 3 *Guide Book* varieties. All are in demand from collectors. This lightly circulated example has smooth surfaces and dusky steel-gray and tan-brown toning. NGC ID# 24FJ, PCGS# 39620 Base PCGS# 6132

- 4138** 1824 O-111, R.2, MS64 NGC. The large center dot with a circle around it readily identifies the obverse of this variety. The reverse is distinctive for its die line from the upper fletching, per the Dr. Glenn Peterson reference. A colorful Gem with vibrant luster throughout the deep forest-green, wheat-gold, and lilac patina. *From The Hamilton Collection, Part IV.* NGC ID# 24FK, PCGS# 39631 Base PCGS# 6137

**1827 O-127 Bust Half, XF40  
Very Scarce 'Ear Bars' Variety**

- 4139** 1827 Square Base 2, O-127, R.5, XF40 PCGS. Clash marks through the ear of Liberty distinguish the O-127 variety, making it a popular and sought-after 1827 die pair (one of 49 varieties for the issue). Richly toned with thick and attractive, golden-gray patina, this smooth example retains hints of luster with blue overtones. Sharp definition remains on the central elements, although most of the stars are flat. A problem-free and original example of this scarce variety. NGC ID# 24FN, PCGS# 39726 Base PCGS# 6144

**1827 Half Dollar, XF Details  
Very Rare O-137, Important Overton Variety**

- 4140** 1827 Square Base 2, O-137, Low R.6 — Environmental Damage — PCGS Genuine. XF Details. The O-137 is a low R.6 variety that is prized by Overton collectors in all grades. Stars 12 and 13 are closely spaced, and the right (facing) wing shows numerous “extra feathers” beneath RI in AMERICA — the result of a series of broad, parallel die anomalies that confirm the variety. The I of PLURIBUS is far left of the stand of the second T in STATES. Although the right obverse field and Liberty's hair display some granularity and porosity to account for the PCGS Genuine designation, overall the coin is attractively toned in warm-gray and gold shades. The surfaces are otherwise unaffected by the environmental factors, and only light wear exists on the high points of the central motifs. NGC ID# 24FN, PCGS# 39736 Base PCGS# 6144

- 4141** 1830 Small O, O-101, R.1, MS61 PCGS. Medium caramel-gold toning is consistent aside from a blush of deeper golden-brown on the lower reverse and a dab of steel-blue near the eagle's left (facing) wing. Smooth and lustrous. A late die state example with the stars and UNITED drawn toward the rims. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

**1830 Half Dollar, O-101, MS64  
Great Eye Appeal**

- 4142** 1830 Small O, O-101, R.1, MS64 NGC. CAC. Housed in a pre-hologram, “fatty” NGC holder, this delightful near-Gem half is sharply struck with frosty-bright silver luster shining through areas of steel-blue, rose, gold, and lilac-gray toning. The obverse stars are sharp at their centers and Liberty's drapery folds, hair curls, and cap are crisply defined. The top of A in STATES is vertically filled at the left edge, while the outside left is recut. Line 3 of stripe 3 extends below the shield border. A Condition Census example, tied at the lower end for the variety (67, 65, 64, 64, 64). CAC endorsed. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

- 4143** 1830 Small O, O-111, R.2, MS61 NGC. Light straw-gold toning adorns the borders of this lustrous and minimally marked half dollar. Just outside the Condition Census for the variety, which is common in circulated grades but surprisingly scarce in Mint State. NGC ID# 8Z4Y, PCGS# 39822 Base PCGS# 6156

- 4144** 1830 Medium O, O-119, R.1, MS62 PCGS. The Overton reference recognizes Small, Medium, and Large O varieties for the 1830. The *Guide Book* and PCGS classify the sole Medium O variety (O-119) as a Small O. Unmarked and dusky golden-brown fields contrast with gunmetal-gray devices. NGC ID# 24FU, PCGS# 39830 Base PCGS# 6157

- 4145** 1833 O-106, R.2, MS62 NGC. Light butter-gold and powder-blue toning visits this lustrous Bust type coin. Marks are limited to from faint clusters near Liberty's neck and below the eagle's beak. The centers are well struck, although the borders show incompleteness. A late die state with the stars and peripheral letters drawn toward the rim. NGC ID# 24FX, PCGS# 39894 Base PCGS# 6163

**1833 Capped Bust Half Dollar  
O-108, Toned Near-Gem Example**

- 4146** 1833 O-108, R.1, MS64 PCGS. CAC. The date sits low near the dentils and the stars are well-formed and not drawn to the edge, suggesting an early strike from the O-108 dies. Splashes of cerulean-blue interrupt the natural, tan-gray toning. A sharply struck coin with soft mint luster glowing beneath the comprehensive patina, with no mentionable marks to dispute the assigned near-Gem grade with CAC endorsement. NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

- 4147** 1834 Small Date, Small Letters, O-112, R.3, MS63 PCGS. Liberty portrays a sneering expression with the upper lip twisted into an unusual curl. Numerous shield lines extend into the azure on the reverse, and STATES shows up-and-down alignment with A and E higher than the surrounding letters. This near-Gem example is lustrous and original. Areas of storm-gray toning intersperse with lustrous, silver surfaces enlivened by ruby-red accents and iridescent highlights. The strike is razor-sharp. NGC ID# 8S2S, PCGS# 39916 Base PCGS# 6166

**1836 O-116a Bust Half, XF45  
Rare Late Die State**

- 4148** 1836 Lettered Edge, 50/00, O-116a, R.6, XF45 PCGS. The late die state of Overton-116 is very rare, rated R.5 in the Parsley reference but R.6 in the current Steve Herrman Condition Census. Recutting of 0 under the 5 in 50 C is no longer visible due to lapping of the dies, which diminishes detail on the lowest arrow fletchings, the olive branch, and disconnects the leaves and berries so they float as if suspended in the reverse field. This example is Choice for the assigned grade, with old-time silver patina showing traces of gold and slate-blue toning that deepen at the borders. Faint mint luster remains beneath the smooth, problem-free fields. A tiny mark on Liberty's jawline below the ear is noted. The Condition Census for the late die state (58-58-45-45-45-45) suggests this coin ranks in a tie for third place among known examples. NGC ID# 24G2, PCGS# 39951 Base PCGS# 6169

**REEDDED EDGE HALF DOLLARS**

- 4149** 1837 GR-14, R.1, MS61 PCGS. Delicate tan-gold toning graces the borders of this coruscating and crisply struck example. Refreshingly free from distracting abrasions. A prominent die crack across the obverse border from 5 to 10 o'clock attributes GR-14. The reverse is extensively cracked, confirming the terminal die state. NGC ID# 24G4, PCGS# 531060 Base PCGS# 6176

- 4150** 1837 GR-18, R.1, MS61 PCGS. Several die cracks and a small break in the eagle's shield allow quick attribution. Attractive golden-brown patina adorns the margins of this lustrous and lightly abraded example. Sharply struck, given the late die state of the variety. NGC ID# 24G4, PCGS# 531065 Base PCGS# 6176

**1837 Reedded Edge Half Dollar, GR-24, MS63  
Minimally Toned, Lustrous**

- 4151** 1837 GR-24, R.2, MS63 PCGS. Die lines near the left wing confirm the variety. The Capped Bust, Reedded Edge half dollar design was adopted in 1836. The reverse design was modified in 1838 to express the denomination as HALF DOL., making the half dollars of 1836 and 1837 a two-year type design. This Select half dollar is well-struck and highly lustrous with an attractive, satiny sheen across both sides. The surfaces are minimally toned with silver-gray fields and centers and hints of golden color at the peripheries. A handful of mild marks are consistent with the grade.  
Ex: Joseph C. Thomas Collection / Central States Signature (Heritage, 4-5/2009), lot 744. NGC ID# 24G4, PCGS# 531078 Base PCGS# 6176

**SEATED HALF DOLLARS**

**1839 Seated Liberty Half Dollar, AU58  
Phenomenal No Drapery Type**

- 4152** 1839 No Drapery, WB-101, AU58 NGC. Both sides are impressively lustrous beneath peach and blue patina that is more intense on the reverse. A delightful No Drapery piece, just a touch of rub away from a much more expensive Mint State designation. Census: 30 in 58, 26 finer (9/16).  
Ex: Long Beach Signature (Heritage, 2/2007), lot 3472; ANA Signature (Heritage, 8/2010), lot 4945. NGC ID# 24GK, PCGS# 572000 Base PCGS# 6230

- 4153 1846 Medium Date, WB-101, MS63 NGC.** Although the reverse is brilliant, the obverse displays russet-gold toning along the border. Crisply struck and nearly unabraded with good luster and minor mint-made roller marks on the left obverse field. Interesting rim die breaks are noted at 2:30 on the obverse and at 2 and 11 o'clock on the reverse.  
Ex: *Beverly Hills Signature* (Heritage, 11/2011), lot 3411. PCGS# 572041 Base PCGS# 6251

**1846 6 Over Horizontal 6 Half Dollar  
Choice AU, WB-104, FS-301**

- 4154 1846 6 Over Horizontal 6, WB-104, FS-301, AU55 PCGS.** A practically untoned Choice AU example. Well struck and only moderately marked. Among the most dramatic die varieties in the Seated half series, the 6 Over Horizontal 6 has been listed in the *Guide Book* since the very first edition. A late die state with rim breaks below the date and over the U in UNITED. Population: 10 in 55, 9 finer (9/16). NGC ID# 24H6, PCGS# 409888 Base PCGS# 6254
- 4155 1852-O WB-101, Die Pair 2, R.4, AU53 NGC.** Rich peach-gold toning outlines the rims and encroaches upon the lightly patinated centers. This pleasing Seated half briefly entered Southern commerce prior to the Civil War, but no marks require mention, and the eye appeal and originality are undeniable. The mintage was limited to 144,000 pieces.  
Ex: *Jules Reiver Collection* (Heritage, 1/2006), lot 21320. PCGS# 572084 Base PCGS# 6269
- 4156 1853 Arrows and Rays, WB-101, MS61 NGC. CAC.** Apricot-gold and ice-blue shades enrich this lustrous and unblemished single-year type coin. Specialists may take an interest in the heavy cracks through the UNIT in UNITED, which threaten the integrity of the reverse die. NGC ID# 24JJ, PCGS# 572085 Base PCGS# 6275
- 4157 1854 Arrows MS63 PCGS. WB-101.** An attractive and lightly toned example of the high-mintage 1854 Arrows half, with more than 2.9 million pieces struck. The Uncirculated certified population is amazingly low given the huge Mint output. This Select example displays strong silver luster beneath a speckling of olive-gray and pale-gold toning. The strike is sharp throughout. Population: 26 in 63, 45 finer (9/16). NGC ID# 24JL, PCGS# 6279 Base PCGS# 6279

**1855-S Arrows Half Dollar, Scarce VF35  
Debut San Francisco Half Dollar**

- 4158 1855-S Arrows, WB-101, VF35 PCGS.** The 1855-S is scarce-to-rare in all grades. Just 129,500 pieces were struck when, in the second year of San Francisco Mint operations, coinage slowly transitioned from gold to silver in 1855. Both half dollars and quarters were produced in smallish quantities. The denominations circulated heavily in Gold Rush economy, where small change was in great demand. This is a Choice VF half dollar with somewhat subdued, stone-gray surfaces but only small marks and lines across the generally smooth surfaces. Sharp definition remains for the assigned grade. Population: 7 in 35, 33 finer (9/16). NGC ID# 24JR, PCGS# 572091 Base PCGS# 6284
- 4159 1869 WB-101 MS63 PCGS. CAC.** This Select half dollar could easily be mistaken for a proof at first glance, with fully struck relief elements and broad rims. Each side displays light golden-orange patina over brilliant underlying surfaces. Lovely aesthetic quality. Population (all varieties): 15 in 63, 19 finer. CAC: 3 in 63, 7 finer (9/16). NGC ID# 6463, PCGS# 572185 Base PCGS# 6325
- 4160 1871 WB-101 MS64 PCGS.** The fields are satin-smooth and semireflective, but they provide little contrast with the central motifs thanks to an overall pale-gold toning that covers both sides. Liberty's top hair strands and star 8 show minor incompleteness, but the remainder of the strike is sharp and the eagle's lower extremities are fully defined. Strike doubling is easily observed on DOL. and OF AMERICA. Population: 25 in 64, 8 finer (9/16). NGC ID# 6469, PCGS# 572193 Base PCGS# 6330
- 4161 1873 Large Arrows, WB-106, MS62 NGC. CAC.** Cherry-red toning graces the date and right-side stars, but most of this lustrous Arrows type coin is close to brilliant. The strike is sharp and the reverse is well preserved. The obverse field exhibits moderate grazes.  
Ex: *Baltimore Signature* (Heritage, 3/2009), lot 2076, which realized \$1,495. NGC ID# 24L7, PCGS# 572211 Base PCGS# 6343
- 4162 1873 Small Arrows, Doubled Die Obverse, WB-109, FS-101, MS63 NGC.** Although undesignated as such on the NGC insert, this is the well-known "Quad Stripes" variety, named after the strong die doubling on Liberty's shield. Her drapery and lower hand also show doubling. As of (9/16), neither NGC nor PCGS have certified any Mint State examples as FS-101 or FS-1101. A lustrous representative with peripheral forest-green and autumn-brown toning. NGC ID# 24L7, PCGS# 400136 Base PCGS# 6343

**1879 Half Dollar, MS66  
Low-Mintage Date**

**4163 1879 Closed Bud, WB-102, MS66 PCGS.** Lustrous and essentially pristine with a crisp strike. The reverse displays light wheat-gold toning. The advent of the Morgan dollar tied up Mint resources, and Seated half coinage was reduced to token levels until 1891. The 1879 business mintage was only 4,800 pieces, though dealers with connections to the Philadelphia Mint secured a few hundred Uncirculated examples. Population: 48 in 66 (2 in 66+), 20 finer (9/16). NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**4164 1880 Closed Bud, WB-102, MS64 NGC. CAC.** Both sides are brilliant with a hint of peripheral gold toning. The devices are boldly defined with reflective fields and trivial grade-consistent marks. Census: 20 in 64 (1 in 64★), 28 finer. CAC: 4 in 64, 11 finer (9/16). NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

**PROOF SEATED HALF DOLLARS**

**4165 1862 PR63 PCGS. CAC. WB-101.** A deeply reflective example of this low-mintage Civil War proof. The centers are either pale tan (on the obverse) or brilliant (on the reverse) and the margins are translucent blue around the peripheries on each side. Fully struck with a few light hairlines, CAC endorsed. Population: 53 in 63, 68 finer. CAC: 5 in 63, 14 finer (9/16). NGC ID# 27TN, PCGS# 6416

**1866 Motto Half Dollar, Multicolor PR65  
First-Year Issue With Motto**

**4166 1866 Motto PR65 PCGS. CAC.** A chipped dentil over the R in AMERICA suggests this reverse was prepared from the existing No Motto master die with the Motto added, rather than from a new master die. This proof was carefully preserved for decades, acquiring colorful rim-to-rim multicolor toning over the mirrored fields. The sharply struck, lightly frosted devices display a similar patina, reducing the visible contrast but still showing excellent eye appeal. CAC endorsed. Population: 13 in 65, 5 finer. CAC: 7 in 65, 1 finer (9/16). NGC ID# 27TZ, PCGS# 6424

**1867 Seated Liberty Half Dollar, PR65  
Rare Cameo Specimen**

**4167 1867 PR65 Cameo PCGS.** Only 625 proof Seated Liberty half dollars were struck in 1867, and the business-strike mintage was a modest 449,300 pieces, as well. This impressive Gem exhibits sharply detailed, frosty design elements and deeply mirrored fields, with strong field/device contrast. The surfaces are well-preserved and lightly toned. Population: 10 in 65 Cameo, 6 finer (9/16). NGC ID# 27U2, PCGS# 86425

**4168 1870 PR63 NGC. WB-101.** Rich iridescent toning forms a deep patina on the obverse that does not reveal the underlying colors until viewed at an advantageous angle. The reverse is less guarded and even more colorful, with vibrant rainbow shades that combine for a spectacular toning display. The proof strike is sharp throughout. Census: 31 in 63, 55 finer (9/16). NGC ID# 27U5, PCGS# 6428

**4169 1881 PR64 PCGS. CAC. WB-101.** Type One Reverse. This Choice proof undeniably exhibits cameo contrast, but is undesignated as such by PCGS due to its first generation holder. Moderate lavender and ocean-blue toning adorns the borders, but the flashy fields and frosty motifs remain brilliant. NGC ID# 27UG, PCGS# 6442

**1882 Seated Liberty Half, PR65 Cameo  
Well-Preserved, Nicely Contrasted**

**4170 1882 PR65 Cameo PCGS.** Only 4,400 business-strike Seated Liberty half dollars were struck in 1882, putting extreme pressure from date collectors on the limited supply of proofs that year. This impressive Gem displays sharply detailed design elements with a frosty texture that contrasts boldly with the deeply reflective fields. No mentionable distractions are evident. Population: 19 in 65 (2 in 65+) Cameo, 11 finer (9/16). NGC ID# 27UH, PCGS# 86443

**4171 1886 PR63 Cameo PCGS.** A full strike complements the mirrored fields of this Select Cameo proof, producing modest contrast. Dusky golden toning appears slightly deeper over the reverse. This is an affordable Cameo proof Seated half dollar for the budget-conscious collector. Population: 15 in 63 Cameo, 40 finer (9/16). NGC ID# 27UM, PCGS# 86447

**4172 1886 PR64+ Cameo PCGS. CAC.** Vivid blue and violet border toning surrounds warm golden interiors on this striking high-end near-Gem proof Cameo. The strike is sharp, and the mirrored fields show only trivial marks. Population: 25 in 64 (1 in 64+) Cameo, 16 finer. CAC: 5 in 64, 12 finer (9/16). NGC ID# 27UM, PCGS# 86447

- 4173 1890 PR63 Cameo PCGS. CAC. WB-101.** Fully struck with bold cameo contrast between the frosted devices and deeply mirrored fields, this Select proof is essentially untoned save for a fleeting pale-orange hue in the right obverse field and a thin band of orange and blue toning at the reverse edge. A small cloudy area is noted beneath the eagle's right (facing) wing. Population: 8 in 63 Cameo, 31 finer. CAC: 4 in 63, 10 finer (9/16). NGC ID# 27US, PCGS# 86451

## BARBER HALF DOLLARS

- 4174 1892 MS65 NGC.** This satiny Gem is cast in original toning that shows dusky champagne-gray and pale blue hues. The strike is sharp throughout. The 1892 is an available type-coin issue, popular in Gem and finer condition. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461
- 4175 1893-S XF45 PCGS.** Aside from a few brief areas of golden-gray toning at the borders, this San Francisco half is almost entirely silver-gray in appearance. The devices retain sharp definition, while abrasions are tiny, joining some faint hair-thin lines that appear on both sides. Just 740,000 pieces were struck. NGC ID# 24LM, PCGS# 6467

### 1894-O Half Dollar, MS65 Conditionally Rare New Orleans Issue

- 4176 1894-O MS65 PCGS.** Uncirculated 1894-O half dollars are scarce, and most reside in the MS62-MS64 grade range. This Gem example is conditionally rare, and finer coins are exceedingly so. The strike is above average for a New Orleans issue of this period, although the right wing junction and the eagle's right (facing) talons are a trifle soft. Each side displays satiny luster with amber-gold toning that lightens over the interiors. Population: 9 in 65, 7 finer (9/16). NGC ID# 24LP, PCGS# 6469

### 1895-O Half Dollar, Bold MS64

- 4177 1895-O MS64 PCGS.** Intermixed shades of gunmetal-blue and olive-green patina provide color to this Choice New Orleans half dollar, one of 1.7 million coins struck. The stars are fully raised, and incredibly the right shield-wing juncture and tailfeathers show complete definition. The 1895-O is very scarce in Uncirculated condition. Near-Gems are rare. Population: 20 in 64, 12 finer (9/16). NGC ID# 24LT, PCGS# 6472
- 4178 1895-S MS64 PCGS.** This is a well-struck example with lustrous fields and only minor signs of abrasions. The champagne-toned surfaces exhibit scattered flecks of lavender color. Finer 1895-S half dollars are rarely seen. Population: 37 in 64, 17 finer (9/16). NGC ID# 24LU, PCGS# 6473

- 4179 1896 MS64 NGC.** The lustrous, well-preserved surfaces of this impressive Choice specimen are blanketed in shades of lavender-gray toning, with sharply detailed design elements and no mentionable distractions. Census: 17 in 64 (1 in 64+), 13 finer (9/16). NGC ID# 39RH, PCGS# 6474
- 4180 1898 MS64+ NGC. CAC.** This coin is well-preserved and frosty with golden toning over each side. A few light abrasions on the cheek prevent a full Gem grade. Few examples are CAC-approved in this grade. Census: 31 in 64 (3 in 64+), 18 finer. CAC: 5 in 64, 17 finer (9/16). NGC ID# 24M3, PCGS# 6480
- 4181 1899 MS64+ PCGS.** A prooflike near-Gem with delicate almond-gold toning and a bold strike. The moderately mirrored surfaces display only minimal marks. A tiny spot is noted on the center of the right (facing) wing. Population: 49 in 64 (1 in 64+), 39 finer (9/16). NGC ID# 24M6, PCGS# 6483

### 1900-S Barber Half Dollar, MS64 Very Rare Any Finer

- 4182 1900-S MS64 NGC.** Despite a mintage of 2.5 million pieces, the 1900-S Barber half dollar is a challenging issue in high grade. This attractive MS64 specimen is sharply detailed in most areas, with just a touch of the usual softness on the shield point and adjacent wing. The well-preserved surfaces are lustrous and pleasingly toned. Census: 13 in 64 (2 in 64+), 7 finer (9/16). NGC ID# 57PC, PCGS# 6488
- 4183 1901-S XF45 NGC.** A trace of rub and a few scattered handling marks appear on both sides of this Choice XF key-date Barber half dollar. Delicate champagne toning subdues hints of satin luster. Census: 5 in 45, 28 finer (9/16). NGC ID# 5EPB, PCGS# 6491
- 4184 1902-O MS63 PCGS.** An above average strike is featured on this Select Mint State New Orleans half dollar, exhibiting frosty silver luster and peripheral blue toning. An important condition rarity in the Barber half dollar series. Population: 14 in 63, 23 finer (9/16). NGC ID# 24MG, PCGS# 6493
- 4185 1903-S MS62 PCGS.** Glimpses of forest-green toning cling to the borders, but this coruscating half dollar is mostly white. The portrait and right obverse field display minor contact. The strike is sharp and the reverse is well preserved. NGC ID# 24ML, PCGS# 6497
- 4186 1907-D MS64 PCGS.** Design detail is bold throughout this richly toned Barber quarter, the only notable exceptions being stars 3 and 11. Olive-green and gunmetal-blue hues merge over well-preserved surfaces, ensuring the originality of this Choice example. From a mintage of 3.8 million coins, the 1907-D is very scarce in MS64 and rare any finer. NGC ID# 24MZ, PCGS# 6509
- 4187 1907-O MS64 PCGS. CAC.** This Choice 1907-O representative is uncommonly well-struck, and displays original, softly frosted luster. An overlay of dusky lavender-gray toning is pleasant on the eyes, and effectively masks a few trivial grazes which limit the grade. Population: 44 in 64 (1 in 64+), 24 finer. CAC: 8 in 64, 15 finer (9/16). NGC ID# 24N2, PCGS# 6510
- 4188 1908-O MS64+ PCGS.** The 1908-O is an available type-coin issue, although the present piece stands out for its better-than-average strike on the eagle and shield. This Plus-graded coin displays light golden toning and pleasant eye appeal. NGC ID# 24N6, PCGS# 6514

- 4189 1909-S MS64 PCGS.** A blush of light golden toning warms softly frosted surfaces on this Choice 1909-S Barber half dollar. The eagle's right (facing) talons are a trifle soft, but the strike is sharp elsewhere. Only a few small ticks appear on the portrait. Finer 1909-S half dollars are rarely seen. Population: 18 in 64, 31 finer (9/16). NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518
- 4190 1911 MS65 PCGS.** Ex: Shireman, but not from our sale of the Shireman Collection. This Gem exhibits light gold and iridescent toning over brilliant and fully lustrous silver surfaces. A sharply struck and highly appealing example. Population: 46 in 65 (1 in 65+), 14 finer (9/16). NGC ID# 24ND, PCGS# 6521
- 4191 1915-D MS65 NGC.** Ex: Highland Collection. This boldly defined final-year Gem displays satin luster that beams through its light champagne and gold toning. Census: 53 in 65 (1 in 65+), 12 finer (9/16). NGC ID# 24NS, PCGS# 6533
- 4192 1915-S MS65 PCGS.** Moderately available in this grade, the 1915-S half dollar becomes a rarity any finer. The present coin displays well-struck design elements and satiny luster. Mottled multicolor toning appears over each side. Population: 53 in 65 (2 in 65+), 12 finer (9/16). NGC ID# 24NT, PCGS# 6534

## PROOF BARBER HALF DOLLARS

- 4193 1907 PR64 PCGS.** From a mintage of 575 pieces, this near-Gem proof boasts razor-sharp design definition and bright mirroring in the fields, while a light golden hue adds just a touch of warmth to each side. NGC ID# 24PB, PCGS# 6554
- 4194 1909 PR65 PCGS Secure.** This sharp Gem proof displays deep reflectivity in the fields with frosty luster on the devices. Mottled olive-gray, lavender, and gold toning appears on the obverse, while the reverse exhibits soft lavender hues beneath an olive-green patina. Population: 23 in 65, 45 finer (9/16). NGC ID# 24PD, PCGS# 6556

## WALKING LIBERTY HALF DOLLARS

### 1916-D Walking Liberty Half, MS66 Bright Mint Luster

- 4195 1916-D MS66 PCGS.** Satiny mint luster illuminates a blush of light golden toning on each side of this well-struck Gem 1916-D Walking Liberty half dollar. There are no abrasions observed, and the eye appeal is pleasing. Finer representatives are virtually non-existent of this first year of issue. Population: 69 in 66 (1 in 66+), 3 finer (9/16). NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567
- 4196 1916-S AU58 PCGS.** The 1916-S has the fifth-lowest mintage of the series, and a majority of survivors are well circulated. The present Borderline Uncirculated example displays a hint of wear on the eagle's breast, but the essentially untoned surfaces exhibit considerable luster. Free from any noticeable marks. NGC ID# 24PN, PCGS# 6568
- 4197 1916-S MS62 PCGS.** Brilliant, nicely struck, lustrous, and impressively free from contact. We note a couple of minor laminations (as made) on the reverse. Among the lowest mintage issues in the popular Greatest Generation series. NGC ID# 24PN, PCGS# 6568

- 4198 1917-D Obverse MS63 PCGS.** Early branch mint Walker issues are known for their conditional rarity, and no exception is made for the obverse mintmark 1917-D. This lustrous example has light golden toning and is surprisingly void of abrasions. The eye appeal is excellent for the designated grade. NGC ID# 24PR, PCGS# 6570
- 4199 1917-D Obverse MS64 PCGS.** This Choice example is deeply toned in russet, ebony, and golden-brown hues, which mask any minor grade-limiting abrasions. The strike is sharply executed, and luster prevails through the toning. Finer obverse mintmark coins are elusive. NGC ID# 24PR, PCGS# 6570
- 4200 1917-D Reverse MS62 NGC.** A well-struck coin with luminous luster and a dusting of champagne toning. The Reverse Mintmark variety of the 1917-D half dollar is a challenging acquisition in Uncirculated condition. NGC ID# 24PS, PCGS# 6571

### 1917-D Half Dollar, Brilliant MS63 Reverse Mintmark

- 4201 1917-D Reverse MS63 PCGS.** This issue ranks in the top third of challenging dates across all grade levels, but it becomes even more elusive in mint condition. Select coins are scarce and highly sought-after. This brilliant early Walker is awash in satiny luster. Traces of pale russet patina adorn portions of the borders. Generally well-struck with moderate softness over the centers. NGC ID# 24PS, PCGS# 6571

### 1917-D Half Dollar, Toned MS64 Reverse Mintmark

- 4202 1917-D Reverse MS64 PCGS.** This is a well-struck, thoroughly lustrous near-Gem with original olive-gold toning cast over each side. Grade-limiting abrasions are minor and well-hidden by the patina. The 1917-D Reverse Mintmark issue is occasionally seen in this grade but becomes scarce any finer, where PCGS has graded 55 submissions (9/16). NGC ID# 24PS, PCGS# 6571

**1917-S Half Dollar, AU58**  
**Obverse Mintmark, Pleasing Semikey**

**4203 1917-S Obverse AU58 PCGS.** Two major factors contribute to the popularity of this issue: the obverse mintmark placement and the relatively low mintage of 952,000 coins, one of the few sub-million productions in the series. This near-Mint Walker is virtually all-brilliant, save for translucent blushes of champagne-gold patina. Well-detailed with slight rubbing over the highest points of the design. A pleasing semikey example. NGC ID# 26G7, PCGS# 6572

**4204 1917-S Reverse MS63 PCGS.** Vibrant mint luster shines through shades of golden-brown and lavender-gray toning, enhancing the outstanding eye appeal of this well-detailed Select example. The surfaces show a few minor contact marks on both sides. NGC ID# 24PU, PCGS# 6573

**1917-S Walking Liberty Half, MS64**  
**Guide Book Reverse Mintmark Variety**

**4205 1917-S Reverse MS64 PCGS. CAC.** As noted in the *Guide Book*, the mintmark was moved to the reverse on the Walking Liberty half dollar in 1917. This impressive Choice specimen exhibits well-detailed design elements, with a touch of the usual softness on the head and wreath hand. The well-preserved surfaces are brightly lustrous and pleasingly toned. PCGS has graded 62 numerically finer examples (9/16). NGC ID# 24PU, PCGS# 6573

**4206 1919-D — Cleaning — PCGS Genuine. AU Details.** Branch mint issues from 1919 rank among the greatest conditional rarities of the Walking Liberty series. This example has few marks, and little if any actual wear, but the surfaces are lackluster and dipped white. NGC ID# 24PZ, PCGS# 6578

**4207 1920 MS64+ PCGS. CAC.** Strong definition on Liberty's head and branch hand complements frosty original luster on this high-end near-Gem. Both sides have warm golden toning with occasional accents of amber-orange in the protected areas. Challenging in finer grades. NGC ID# 24R3, PCGS# 6580

**1920 Half Dollar, MS65**  
**Underrated P-Mint Issue**

**4208 1920 MS65 PCGS.** An elusive issue among the early Walking Liberty half dollars, this piece displays brilliant silver luster and excellent eye appeal with strong skirt lines and an outlined thumb on Liberty's branch hand. Wisps of champagne toning are barely noticeable on this lovely Gem. NGC ID# 24R3, PCGS# 6580

**4209 1920-D — Cleaning — PCGS Genuine. Unc. Details.** A lustrous and nearly unabraded stone-white representative. The central strike is typical for the issue, and the eagle's front leg has a shallow depression, as made. No hairlines are present, and the eye appeal is superior given the PCGS disclaimer. NGC ID# 24R4, PCGS# 6581

**1920-S Walking Liberty Half Dollar, MS63**

**4210 1920-S MS63 NGC.** Despite the mintage of more than 4.6 million pieces, the 1920-S Walking Liberty half dollar is a better date in the series. This attractive Select specimen exhibits a better-than-average strike, with some separation between Liberty's thumb and fingers on the wreath hand. The lustrous surfaces are pleasantly toned, with a few scattered, minor contact marks on both sides. NGC ID# 24R5, PCGS# 6582

**4211 1921-D — Cleaning — PCGS Genuine. AU Details.** The lowest mintage issue of the series, due to a large silver dollar production at Denver that year. The present half dollar is unabraded and shows only a trace of wear on the eagle's breast, but the stone-gray surfaces are subdued and microgranular. NGC ID# 24R7, PCGS# 6584

**1921-S Half Dollar, XF40**  
Seldom Available in This Grade

- 4212 1921-S XF40 PCGS.** Sharp definition remains despite moderate circulation on this medium-toned 1921-S half. An overall skin of olive-gray patina allows glimpses of silver luster to show through. Only tiny marks exist in sparse distribution across the pleasing surfaces on both sides. The date is full and the rims are wholly unmarked. An ideal coin for a mid- to high-grade circulated set. NGC ID# 24R8, PCGS# 6585

- 4213 1923-S MS62 NGC.** The 1923-S is a slightly better date in Uncirculated condition. This piece displays well-struck devices and satiny luster with a blush of light lavender-gold toning. Abrasions are less than expected for the grade. NGC ID# 24R9, PCGS# 6586

**1923-S Half Dollar, MS63**  
In-Demand Issue

- 4214 1923-S MS63 PCGS.** The 1923-S is the only issue available from that year, sustaining strong demand from collectors of this always-popular series. An unremarkable run of 2.1 million coins was accomplished in California, yet Select coins are scarce. The strike is typically soft over the centers. Mostly brilliant surfaces offer glimpses of mottled russet patina at the upper obverse border and near the L in LIBERTY. Marks are well-concealed. NGC ID# 24R9, PCGS# 6586

- 4215 1928-S MS63 PCGS.** A satiny, minimally toned Select Mint State example of this slightly better San Francisco issue, showing minimal abrasions. The strike is soft on the branch hand and the eagle's trailing leg, as usual, but the overall visual appeal is excellent for the grade. NGC ID# 24RB, PCGS# 6588

**1929-D Half Dollar, MS65**  
Elusive in Finer Grades

- 4216 1929-D MS65 PCGS.** A well-struck 1929-D half, showing original, frosty luster and a hint of champagne toning. A few trivial marks are not out of line for the grade. Only the branch mints struck half dollars in 1929, and no halves at all would be struck again until 1933. This denomination was sporadically produced throughout the 1920s, and by 1929, the Great Depression was having an effect on demand for new coinage. Finer 1929-D halves are elusive. NGC ID# 24RC, PCGS# 6589

**1929-D Half Dollar, MS65**  
Light Golden Patina

- 4217 1929-D MS65 PCGS. CAC.** Walking Liberty half dollars were coined exclusively at the branch mints in 1929. This lovely Gem is housed in a green-label PCGS holder and exhibits satiny luster with minimal marks on each side. Mostly brilliant surfaces host light gold toning with a few faint splashes of deeper golden hues on each side. PCGS has certified 72 finer examples of this conditionally scarce issue (9/16). NGC ID# 24RC, PCGS# 6589

**1929-S Half Dollar, MS65+**  
Radiant Silver Luster, Few Marks

- 4218 1929-S MS65+ PCGS.** Perhaps the coin was once purchased at face value from the Treasury Department, a commonplace occurrence into the early 1930s. Today, it is conditionally scarce in high-end Gem condition. This is a vibrantly lustrous and sharp example, with dramatic silver centers visited by lilac and amber-gold shades at the margins. The strike is impressive for the San Francisco issue. Population: 5 in 65+, 54 finer (9/16). NGC ID# 24RD, PCGS# 6590

**1929-S Half Dollar, MS65  
Conditionally Scarce Issue**

**4219 1929-S MS65 PCGS. CAC.** Light silver-gray and caramel-gold toning visit this lustrous and minimally marked Gem. The strike is above average, despite moderate blending on the skirt lines and branch hand. A desirable souvenir from the first year of the Great Depression. The 1929-S is common in VF and lower grades, but scarce by the standards of the series in Mint State. CAC endorsed. PCGS shows just 54 pieces in a finer numeric grade (9/16). NGC ID# 24RD, PCGS# 6590

**4220 1934 MS67 PCGS. CAC.** Liberty's branch hand shows full separation between the thumb and fingers, and the upper skirt lines are well-delineated. This Superb Gem half dollar is virtually without flaw and lighted draped in a veil of eye-catching golden patina. PCGS lists merely eight finer representatives (9/16). NGC ID# 24RF, PCGS# 6592

**4221 1934-D MS66 PCGS. CAC.** Glowing, frosty luster rolls over both sides of this Premium Gem 1934-D half dollar, revealing excellent preservation and sharp design elements. Both sides display warm sun-gold toning. PCGS has seen four Superb Gems finer (9/16). NGC ID# 24RG, PCGS# 6593

**1934-S Half Dollar, MS65  
Sought-After Branch Mint Issue**

**4222 1934-S MS65 PCGS.** The 1934-S is a scarce and highly regarded issue from the middle series of Walkers, particularly when found in Gem condition. This is a fully struck piece with frosted mint luster beneath a light layer of gray-rose patina. Three microscopic reeding marks in the right field behind the branch are the only visible imperfections, and they are of virtually no consequence. *Ex: Central States Signature (Heritage, 4/2012), lot 4744; New York Signature (Heritage, 10/2014), lot 3599.* NGC ID# 24RH, PCGS# 6594

**4223 1935-D MS65 PCGS.** Champagne-toned, satiny mint luster shows tinges of russet in the peripheral recesses, while the high points of Liberty's figure showcase violet and lavender highlights. The central strike is slightly soft, as expected for the issue, but abrasions are trivial. Finer 1935-D Walkers are infrequently seen. NGC ID# 24RK, PCGS# 6596

**4224 1935-D MS65 PCGS.** Light honey-gold toning graces this lustrous and attractive Gem. Liberty's head shows softness, but the surfaces show only incidental marks. A conditionally scarce Great Depression issue. NGC ID# 24RK, PCGS# 6596

**4225 1935-S MS65 PCGS.** A whisper of golden patina visits this thoroughly lustrous better-date half dollar. Liberty's head is nicely struck, though the branch hand is softly brought up. A lens reveals occasional unobtrusive abrasions. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66  
Brilliant and Frosty**

**4226 1935-S MS66 PCGS.** A frost-white coin with outstanding surface quality and a sharp strike for the issue. While the 1935-S is neither scarce as an issue nor challenging in lesser grades, it is nothing short of rare in Superb Gem condition, making this outstanding Premium Gem a logical candidate for the perceptive bidder. Only three coins are certified numerically finer at PCGS. Population: 140 in 66 (7 in 66+), 3 finer (9/16). NGC ID# 24RL, PCGS# 6597

**4227 1936-D MS66+ PCGS. CAC.** An impressive Premium Gem, this boldly defined Walking Liberty half dollar exhibits frosty and untuned silver surfaces. PCGS has only certified 38 finer examples (9/16). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

**4228 1936-S MS66+ PCGS. CAC.** This fully brilliant Premium Gem has frosty mint luster and bold design motifs including a fully rounded thumb holding the branch. An extremely important opportunity as PCGS has only certified 17 in MS66+, and just 11 finer (9/16). CAC: 70 in 66, 4 finer (9/16). NGC ID# 24RP, PCGS# 6600

**4229 1937 MS67+ PCGS. CAC.** An above-average strike at the centers on both sides includes a bold branch hand with thumb separation and nearly complete feathering on the eagle's trailing leg. As expected for a Superb Gem with the Plus designation, the surfaces are smooth and attractive with a slight hint of gold toning amid bountiful satin luster. Very few examples of the 1937 are finer. Population: 19 in 67+, 5 finer. CAC: 73 in 67, 3 finer (9/16). NGC ID# 256A, PCGS# 6601

**4230 1938-D MS65 PCGS.** The key-date among the "Short Set" Walking Liberty half dollars from a smallish mintage of 491,600 coins, this Gem exhibits brilliant silver luster and frosty surfaces with a bold strike. NGC ID# 24RV, PCGS# 6605

**4231 1938-D MS66 PCGS.** A thoroughly lustrous and high grade example of this popular low mintage issue. The virtually brilliant surfaces team with luster, and the strike is pleasing on Liberty's head and skirt lines. NGC ID# 24RV, PCGS# 6605

**4232 1938-D MS66+ PCGS.** The 1938-D has a famously low mintage, but enough were saved that Mint State examples can be found without great difficulty. At the MS66+ level, though, the issue becomes very scarce. The present straw-gold Premium Gem has a good strike and pleasing preservation. NGC ID# 24RV, PCGS# 6605

**4233 1939-D MS67 PCGS.** The frosty nickel-gray luster of this CAC-endorsed Superb Gem is original, as are the wisps of rainbow toning that appear along the upper obverse rim and arc through the right obverse field. This 1939-D half is well-struck and conditionally scarce. Population: 89 in 67 (5 in 67+), 2 finer (9/16). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

- 4234 1940-S MS66+ PCGS. CAC.** Sharply detailed in most areas, this delightful Premium Gem shows just a touch of the usual softness on Liberty's wreath hand. The immaculate, brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. PCGS has graded 13 numerically finer examples (9/16). NGC ID# 24S2, PCGS# 6610

#### 1941 Half Dollar, Golden-Toned MS68

- 4235 1941 MS68 NGC.** This high-end Superb Gem has the distinction of being among the finest 1941 half dollars certified, and it is conditionally rare as such. The strike is sharply executed, and the frosty surfaces yield warm yellow-gold toning. There are no mentionable abrasions, and the reverse is particularly pristine. Census: 28 in 68 (3 in 68★), 0 finer (9/16). NGC ID# 24S3, PCGS# 6611

- 4236 1942 MS67+ PCGS. CAC.** This CAC-endorsed, Plus-graded Superb Gem is a showcase Registry coin in every sense. The strike is razor-sharp, and the vibrant, frosty luster is without blemish. The obverse is nearly brilliant, while the reverse exhibits vivid sun-orange and gold border toning. PCGS reports only six MS68 coins finer (9/16). NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

#### 1945-D Half Dollar, MS67+ Sharp Strike, Attractively Toned

- 4237 1945-D MS67+ PCGS. CAC.** A combination of russet and gunmetal-blue toning adds natural appeal to the borders, and a translucent tinge of reddish-gold hovers across the frosty and sharply defined surfaces of this high-end Superb Gem half. Mint luster shimmers over the smooth surfaces to reveal only microscopic ticks. The head and branch hand show above-average definition for this often indifferently struck Denver issue, with the eagle's leg also sharper than expected. The present coin is tied for finest at PCGS, where a mere 18 pieces have achieved the Plus designation at the MS67 level, with none finer. CAC: 111 in 67, 0 finer (9/16). NGC ID# 24SG, PCGS# 6625

- 4238 1946-S MS67 PCGS. CAC.** Trumpet tail S. Arcs of jade-green and tobacco-brown endow the borders of this lustrous and magnificently preserved Superb Gem. The strike is uncommonly sharp for a 1940s S-mint issue though the cheek and branch hand show slight incompleteness. Population: 76 in 67 (4 in 67+), 0 finer. CAC: 32 in 67, 0 finer (9/16). Ex: Houston Signature (Heritage, 11/2012), lot 4086. NGC ID# 24SL, PCGS# 6629

## PROOF WALKING LIBERTY HALF DOLLARS

- 4239 1936 PR64 PCGS.** The first and scarcest of the seven proof dates. A A whisper of almond-gold toning graces this fully struck and undisturbed near-Gem. A small flan flake is noted above the first U in PLURIBUS. Housed in a first generation holder. NGC ID# 27V4, PCGS# 6636

#### 1936 Walking Liberty Half, PR65 First Proof Issue

- 4240 1936 PR65 PCGS. CAC.** Housed in a first generation PCGS holder, this Gem proof 1936 Walking Liberty half dollar mottled champagne toning on its brilliant silver surfaces with fully mirrored fields and sharp design motifs. An exceptional example, this Gem will appeal to proof set collectors, type collectors, and series specialists. NGC ID# 27V4, PCGS# 6636

#### 1937 Walking Liberty Half Dollar, PR67+ Lightly Toned in Iridescent Hues

- 4241 1937 PR67+ PCGS. CAC.** Iridescent toning is most prominent at the borders, gradually diminishing into the centers of this gleaming and attractive high-end, superb proof Walker. Both the PCGS Plus designation and CAC endorsement speak to the quality of the present coin, which offers both technical and visual superiority. Population: 21 in 67+, 10 finer. CAC: 100 in 67, 6 finer (9/16). NGC ID# 5ESS, PCGS# 6637

## FRANKLIN HALF DOLLARS

- 4242 1952-D MS66+ Full Bell Lines PCGS. CAC.** Frosty and original with a golden reverse tagged to a lighter obverse that shows golden-russet border toning. The reverse also has a scattering of russet pepper specks. PCGS lists only three finer coins (9/16), making this high-end 1952-D half dollar an excellent Registry Set acquisition. NGC ID# 24T4, PCGS# 86662

- 4243 1952-S MS67 PCGS. CAC.** A beautifully preserved, frosty example that ranks among the finest non-Full Bands coins certified. This CAC-endorsed Superb Gem is originally toned in mottled russet and amber-gold on the obverse with dusky mint-green and gold on the reverse. Population: 22 in 67 (3 in 67+), 0 finer. CAC: 14 in 67, 0 finer (9/16). NGC ID# 24T5, PCGS# 6663

**1956 Half Dollar, MS67 Full Bell Lines  
Spectacular Iridescent Toning, None Finer**

- 4244 1956 MS67 Full Bell Lines PCGS. CAC.** Spectacular iridescent toning on the reverse was cause enough for PCGS to showcase it in the front of the holder. The patina occurs in amazing shades of plum-purple, crimson, cobalt-blue, and orange. The other side offers speckled orange, crimson, and powder-blue coloration. This splendid Superb Gem is as well-preserved and strongly struck as it is attractive. Population: 28 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 20 in 67, 0 finer (9/16). NGC ID# 24TD, PCGS# 86671

- 4245 1957 MS67 Full Bell Lines PCGS.** Dusted lavender-gray, olive, and gold toning appears over both sides of this Superb Gem Full Bell Lines 1957 half dollar. The strike is sharp, and there are no bothersome abrasions. This piece is among the finest known for Registry Set collectors. Population: 26 in 67 (1 in 67+) Full Bell Lines, 0 finer (9/16). NGC ID# 24TW, PCGS# 86672

**1961-D Half Dollar, MS66 Full Bell Lines  
Untoned, Top-Graded Example**

- 4246 1961-D MS66 Full Bell Lines PCGS.** The 1961-D becomes conditionally rare in MS66 Full Bell Lines, with PCGS having seen merely 29 such submissions (one in MS66+) and none finer (9/16). This untoned Gem features pinpoint detail and apparently pristine fields. Vibrant luster radiates over each side. An incredible representative, one of the few top-graded coins from a mintage of 20.2 million half dollars. NGC ID# 24TP, PCGS# 86681

- 4247 1962 MS65 Full Bell Lines PCGS.** Occasionally seen in this grade, the 1962 Franklin half dollar is rarely encountered finer. This example displays satiny luster with a blush of amber-gold toning over the left-hand side of the obverse. A couple of tiny ticks on the cheek are all that limit the grade. PCGS has seen 14 numerically finer Full Bell Lines examples (9/16). NGC ID# 24TR, PCGS# 86682

- 4248 1962 MS65 Full Bell Lines PCGS. CAC.** A brilliant and vibrantly lustrous Gem with CAC-approval. This 1962 Franklin half dollar is sharply struck and shows no mentionable abrasions. PCGS has seen only 14 finer Full Bell Lines examples (10/16). NGC ID# 24TR, PCGS# 86682

**PROOF FRANKLIN HALF DOLLARS**

- 4249 1950 PR67 PCGS.** Only a single non-Cameo is finer at PCGS (10/16), making this Superb Gem proof 1950 half dollar important for Registry collectors. It is fully struck and reflective with brilliant surfaces save for a few wisps of lavender-gold toning on the obverse. Population: 75 in 67 (2 in 67+), 1 finer (9/16). NGC ID# 27VA, PCGS# 6691

- 4250 1950 PR65 Cameo PCGS.** Glimmering fields set off the frost-white devices of this Gem Cameo proof 1950 Franklin half dollar. The strike is sharp, and neither side displays mentionable toning. Finer Cameo examples are elusive. NGC ID# 27VA, PCGS# 86691

- 4251 1951 PR66 Cameo PCGS.** Appreciable field-device contrast adorns this Premium Gem proof 1951 Franklin half dollar. The strike is full, and neither side is hindered by toning. Finer Cameos are rarely encountered. Population: 78 in 66 (3 in 66+) Cameo, 22 finer (9/16). NGC ID# 27VB, PCGS# 86692

- 4252 1954 PR68 Cameo PCGS.** Impeccably mirrored silver surfaces surround frost-white raised elements of this stunning proof Franklin. There are those who would argue the contrast of the present sharply struck piece approaches Deep Cameo given its notable white-on-black appearance. Population: 74 in 68 Cameo, 1 finer (9/16). NGC ID# 27VE, PCGS# 86695

- 4253 1957 PR68 Deep Cameo PCGS. CAC.** The 1957 proof in Deep or Ultra Cameo is considerably scarcer than the 1956 Type Two proofs. This brilliant and deeply contrasted coin is free of even the faintest lines or cloudiness — a finer example is hard to imagine, although a handful do exist according to the population data. Population: 80 in 68 Deep Cameo, 3 finer. CAC: 23 in 68, 0 finer (9/16). NGC ID# 24TX, PCGS# 96698

**KENNEDY HALF DOLLAR**

- 4254 1966 MS67+ PCGS.** The Kennedy half dollars struck in 1966 are usually found no higher than MS64 or MS65 with scattered bagmarks from indiscriminate handling. Premium Gems are scarcely encountered, and Superb Gems are major condition rarities in high demand from Registry Set collectors. Impressively clean surfaces show a mix of powder-blue and lilac patina with iridescent accents near the right obverse border. Population: 11 in 67 (2 in 67+), 1 finer (9/16). NGC ID# 24WH, PCGS# 6709

**EARLY DOLLARS**

- 4255 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Struck on a Defective Blank, Scratched — ANACS. VF25 Details.** Bowers Die State III. An edge flaw is apparent at 7:30, the obverse has a few delicate hair-thin marks, and adjustment marks (as made) are noted on the reverse, near the ribbon and OF AMERICA. Nonetheless, this chocolate-brown and stone-gray early dollar would please many collectors. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

- 4256 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2 — Graffiti — PCGS Genuine. VF Details.** Bowers Die State III. Thin lines near the outer points of stars 5 to 8, and a V-shaped cluster of tiny field marks near the hair ribbon, correspond to the PCGS designation. Otherwise, abrasions are surprisingly absent. A nicely defined gunmetal-blue and walnut-brown Small Eagle silver dollar. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1798 Large Eagle Bust Dollar, AU Details  
B-27, BB-113, Late Die State**

**4257** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Whizzed — NGC Details. AU. Bowers Die State II. The surfaces appear smooth and attractive in-hand, but a glass reveals the whizzed surfaces to simulate a finer grade. Colorful rainbow toning is, in our opinion, not of natural origin. Sharp definition remains on the central motifs despite the handiwork, with a pleasing “first glance” appearance, yet properly net-graded by NGC. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**4258** 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF20 NGC. Bowers Die State IV. A pearl-gray and straw-gold Heraldic Eagle dollar. Nearly all of E PLURIBUS UNUM is bold. We note a thin diagonal field mark below the chin and a small dig on the eagle's shield. NGC ID# 24X6, PCGS# 40039 Base PCGS# 40018

**4259** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2 — Improperly Cleaned — NGC Details. VF. Bowers Die State III. A trio of file marks to the right of the date help differentiate the BB-124 variety from BB-122, which has a similar (but not identical) obverse. The BB-124 obverse is unique to the variety, here paired with the “Blundered Stars” reverse that appears on two 1798 varieties and a 1799 dollar as well. Some of the field stars overlap the clouds on the reverse, an engraver's error. This example displays somewhat foggy-gray toning from a past cleaning with the resultant swirling hairlines. Weakness at the clouds and the right half of the field stars is typical of the intermediate state of the reverse die, which was relapped. *From The Hamilton Collection, Part IV.*

**4260** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF25 PCGS. Bowers Die State I. Both the obverse and reverse dies are unique to BB-125, and both dies show unusual star configurations. The obverse stars crowd the Y of LIBERTY as well as the bust drapery on the right side. On the reverse, the field star beneath the rightmost cloud is misoriented, rotated so that two rays point toward the top of the coin, rather than a single ray as normally seen. Struck from an early die state, with no weakness of the left obverse stars typical of the later die stages. Planchet streaks and roughness exist in the left obverse field, and a small rim void above the T in UNITED is noted. *From The Hamilton Collection, Part IV.* NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

**1799 B-4, BB-153 Dollar, XF40  
15 Stars Reverse, Late Die State**

**4261** 1799 Irregular Date, 15 Stars Reverse, B-4, BB-153, R.4, XF40 NGC. Bowers Die State II. The BB-153 variety displays the famous blundered 15-Star reverse, paired with the equally interesting Irregular Date obverse. The late die state shows boldly clashed denticles near the left-side obverse stars. Deep slate-gray patina alternates with light, silver-gray toning on the high points of the motifs. Traces of mint luster reveal purplish hues across the well-detailed surfaces. Extensive die cracks exist on both sides of the coin. NGC ID# 24X7, PCGS# 40062 Base PCGS# 6879

**4262** 1799 7x6 Stars, B-5, BB-157, R.2, Fine 15 NGC. Bowers Die State III. Powder-blue, gunmetal-gray, and golden-brown shades alternate across this lightly abraded Choice Fine early dollar. The eagle's head and neck are unevenly worn, but the shield lines are fully separated, and the eagle's wings display surprising definition. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

**4263** 1799 7x6 Stars, B-5, BB-157, R.2, VF30 PCGS. Bowers Die State IV. A midgrade gunmetal-gray and golden-brown early dollar with the deepest toning on the reverse. Both sides are refreshingly unmarked, aside from a small obverse rim bump at 3 o'clock. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

**4264** 1799 7x6 Stars, B-5, BB-157, R.2, VF30 NGC. Bowers Die State IV. The scarce terminal state with a vertical crack through the first T in STATES. This stone-white early dollar retains glimmers of luster in design recesses, though Liberty's cheek and shoulder exhibit wear. Void of noticeable abrasions. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

**4265** 1799 8x5 Stars, B-23, BB-159, R.3, VF30 PCGS. Bowers Die State II with a crack through the B in LIBERTY. The sole die pairing with an 8x5 obverse star arrangement. Medium chestnut-brown and steel-gray toning encompasses this nicely defined and typically abraded example. Housed in a green label holder. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

**4266** 1799 7x6 Stars, B-21, BB-169, R.3, Fine 15 PCGS. CAC. Bowers Die State IV. Gunmetal-gray fields contrast with powder-blue and wheat-gold high points. Lightly abraded overall, though we note thin lines through the eagle's neck and the final A in AMERICA. It appears that an unlisted die break is present through several dentils above the F in OF, but it is also possible that the PCGS holder conceals a rim bump in that area. *From The Walter Freeman Collection, Part II.* NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**4267** 1799 7x6 Stars, B-21, BB-169, R.3 — Filed Rims — PCGS Genuine. XF Details. Bowers Die State IV. The reverse rim is filed between the right (facing) wingtip and the R in AMERICA. Both sides exhibit occasional minor rim knocks. A nicely defined cream-gray example. The fields and devices are surprisingly unabraded. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**1800 Draped Bust Dollar, XF Details  
Scarce B-12, BB-184 Variety**

- 4268** 1800 B-12, BB-184, R.3 — Improperly Cleaned — NGC Details. XF. Bowers Die State II. The obverse appears first on BB-182, then on BB-183 and BB-184, making this scarce BB-184 example the third and final use of the obverse die. The reverse is in its sole use on BB-184. Plentiful mint luster remains across the lilac-gray surfaces with pleasing gold overtones. Minimal wear exists on the sharply struck motifs, with scattered small abrasions and marks but few signs of the designated cleaning.  
Ex: ANA Mid-Winter Auction (Heritage, 2/1987 as raw XF45/AU50), lot 799.  
From The Hamilton Collection, Part IV.

**1800 10 Arrows Dollar, VF30  
B-15, BB-195, Pleasing Surfaces**

- 4269** 1800 10 Arrows, B-15, BB-195, R.4, VF30 PCGS. Bowers Die State I. Only 10 arrows exist on the reverse, with three unattached arrowheads floating above and among the 10 fully formed shafts. Both star 13 and the serif of 1 in the date are very close to the bust, but do not touch, while star 1 is far distant from the hair. Steely silver-gray toning shows faint golden highlights over the smooth and well-defined surfaces, despite 30 points of wear. This is an attractive BB-195, a scarce variety with perhaps 250 to 450 survivors — most of which grade VF or less. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891
- 4270** 1802/1 Narrow Date, B-1, BB-231, R.4 — Scratch — PCGS Genuine. VF Details. Bowers Die State II. A relatively minor scratch between obverse stars 8 and 9 is strictly assessed by PCGS. A few delicate slide marks cross Liberty's ear. Otherwise, this is a pleasing example of the scarce B-1 Narrow Date overdate. Richly toned forest-green, golden-brown, and stone-white. NGC ID# 24XC, PCGS# 40091 Base PCGS# 40090
- 4271** 1802/1 Wide Date, B-2, BB-233, R.4, Fine 12 PCGS. A predominantly pearl-gray Heraldic Eagle dollar with hints of almond-gold toning on the high points. This example served early American commerce but is free from any objectionable marks. PLUR is worn but the remainder of the legends are bold. NGC ID# 24XC, PCGS# 40093 Base PCGS# 40090

**1802/1 Silver Dollar, XF40  
B-2, BB-233, Bold Overdate**

- 4272** 1802/1 Wide Date, B-2, BB-233, R.4, XF40 NGC. Bowers Die State I. The top serif of an underdigit 1 extends boldly beyond the curve of the primary 2 to distinguish the overdate variety. The numerals of the date are wide, with more space between the 1 and 8 than between the other digits. BB-233 is the scarcest of the three 1802/1 overdate varieties, with an estimated 100 to 175 survivors. This example displays glossy-gray surfaces with smooth wear and only tiny marks. Faint russet hues surround a bit of deeper toning that lingers around the obverse stars and reverse legend. NGC ID# 24XC, PCGS# 40093 Base PCGS# 40090
- 4273** 1802 Narrow Date, B-6, BB-241, R.1 — Tooled — PCGS Genuine. XF Details. The most plentiful variety for 1802, this sharply defined Draped Bust dollar displays pleasing golden-gray and tan toning over both sides. A series of toned-over shallow scratches in the right obverse field account for the PCGS net grade. Otherwise, this early dollar is pleasing to the eye and wholesomely original. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087
- 4274** 1803 Small 3, B-4, BB-254, R.3, Good 6 PCGS. Deep walnut-brown fields contrast with cream-gray legends and devices. Although this Heraldic Eagle dollar performed its duty in Early American commerce, the peripheral legends are bold, and the shield lines are fully separated. The surfaces are surprisingly free from abrasions. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

**1803 Dollar, Pleasing VF35  
Large 3, B-6, BB-255**

- 4275** 1803 Large 3, B-6, BB-255, R.2, VF35 PCGS. Bowers Die State I, without any trace of the crack between stars 10 and 11 that forms in later states. The available BB-255 variety has a Large 3 in the date, the E in STATES is centered over the clouds, and the T in LIBERTY is not repunched. This Choice VF Early dollar is well-detailed with fully raised right-hand stars and sharp detail on the eagle, save for the neck feathers and upper shield. Mostly silver-gray with faint lavender and gold highlights. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

**SEATED DOLLARS**

- 4276** 1840 AU55 NGC. OC-2, High R.4. Osburn and Cushing designate OC-2 as a Top 30 Variety, due to doubling on the upper obverse stars. It is much scarcer than OC-1, the usual 1840 commercial die marriage. Dusky-brown and ocean-blue toning accompany this moderately marked and semiprooflike first-year Seated dollar. NGC ID# 24YA, PCGS# 6926

**4277 1841 AU55+ PCGS. OC-1, R.2.** The 4 is lightly repunched north. This briefly circulated second-year No Motto silver dollar displays peripheral golden-brown patina. Luster dominates the devices. The fields show infrequent moderate marks. NGC ID# 24YB, PCGS# 6927

**4278 1846-O AU55 NGC. OC-1, R.2.** OC die state b/d. The first New Orleans silver dollar issue is scarce, since only 59,000 pieces were struck. This partly lustrous representative exhibits medium to deep autumn-gold and navy-blue toning. The obverse is minimally marked and the reverse displays small abrasions, none of which merit individual description.

Ex: *FUN Signature* (Heritage, 7/2012), lot 3848. NGC ID# 26GG, PCGS# 6933

**4279 1846-O AU55 PCGS. OC-1, R.2.** Osburn-Cushing Die State b/d. Luster illuminates the legends and motifs of this lightly circulated and low mintage New Orleans dollar. Brilliant aside from a hint of straw-gold toning on the lower reverse margin. NGC ID# 26GG, PCGS# 6933

**4280 1850 XF40 PCGS. OC-1, R.3.** The sole die pair for business strikes, although two additional marriages struck proofs. Light to medium golden-brown toning adorns the borders, aside from forest-green patina near ONE DOLLAR. Mentionable marks are limited to a minor rim ding below the E in ONE, and a thin field line below the ST in STATES. NGC ID# 24YM, PCGS# 6937

**4281 1853 AU55 NGC. OC-1, R.2.** Osburn/Cushing die state c/b. "Whiskers" beneath the chin, and parallel die lines within the eagle's shield, serve to identify the die pairing. An untuned and well struck No Motto dollar with luster throughout the borders and motifs. The fields are moderately marked, and the rim has a lamination above the M in AMERICA. NGC ID# 24YS, PCGS# 6941

**4282 1853 AU58 NGC. OC-1, R.2.** Osburn and Cushing list this as a Top 30 Variety, though all 1853 business strikes are OC-1. The "Chin Whiskers" variety with bold vertical die lines beneath the chin. The obverse displays only a glimpse of lemon toning near the date. Most of the reverse is brilliant, but the upper margin shows dusky blue-green. A briefly circulated piece with slight obverse rim nicks at 9 o'clock. NGC ID# 24YS, PCGS# 6941

**4283 1860-O MS62 NGC. OC-2.** Booming cartwheel luster ensures the eye appeal of this virtually brilliant New Orleans type coin. The strike is good except on Liberty's hair. The reverse field is moderately bagmarked, but the obverse has relatively few abrasions. NGC ID# 24Z3, PCGS# 6950

#### 1861 Seated Dollar, AU58 High Attrition Rate

**4284 1861 AU58 NGC. OC-2.** The date placement and a tiny lump above the stem of the branch left of the eagle's left claw aid in attributing this near-Mint Seated dollar. Most 1861 dollars were melted stateside, as the coins' silver content was about 3% or 4% higher than face value. This minimally toned, steel-gray example showcases a bold strike on the stars, feathers, olive leaves, and talons. Abrasions in the right obverse field and under the eagle's beak act as pedigree markers. Census: 9 in 58, 44 finer (9/16). NGC ID# 24Z4, PCGS# 6951

#### 1864 Seated Dollar, AU53 Lovely Multicolor Patina

**4285 1864 AU53 PCGS Secure. OC-1.** Roughly 2% of the 30,700 Seated Liberty dollars struck in 1864 are believed extant. Most certified examples range from VF through the lower AU grades. That might seem at odds with the fact that silver coins did not circulate domestically during the Civil War. Instead, the 1864 and its contemporaries likely circulated primarily in Latin America before being repatriated in the late 1870s after the passage of the Specie Resumption Act. This lavender-gray dollar showcases vivid rainbow hues within the protected areas. Deep abrasions over each side probably result from careless transport. Strongly defined. Population: 10 in 53, 56 finer (9/16). NGC ID# 24Z7, PCGS# 6954

#### 1866 Motto Dollar, MS61 Important Condition Rarity

**4286 1866 Motto MS61 NGC.** The first year of the With Motto Seated Liberty dollar is elusive in Mint State grades. While the head details are flat, the balance of the obverse and reverse design elements are sharply defined. The fields are reflective with brilliant luster beneath lovely violet toning on the obverse and champagne toning on the reverse. Census: 6 in 61, 31 finer (9/16). NGC ID# 24Z9, PCGS# 6959

**4287 1870-CC VF30 PCGS Secure. OC-9, High R.3.** A gunmetal-gray and tan-brown midgrade Carson City type coin. Noticeable marks are confined to a moderate obverse rim nick at 12 o'clock. Despite a meager mintage of 12,462 pieces, the first-year 1870-CC dollar was struck from four obverse and six reverse dies, and nine die marriages are confirmed. NGC ID# 24ZE, PCGS# 6964

**4288 1872 MS61 NGC. OC-3.** A lightly abraded stone-white Motto type coin. Luster fills and outlines design elements. Osburn and Cushing regard OC-3 as a Top 30 Variety, due to misplaced date digits in the Liberty's rock, and minor die doubling on IN GOD WE TRUST. NGC ID# 24ZJ, PCGS# 6968

#### PROOF SEATED DOLLAR

**4289 1873 PR55 PCGS. OC-P1, R.3.** A silver-gray specimen with glimpses of autumn-brown toning in protected areas of the reverse. The lower obverse is moderately granular near the shield point. The motto is die doubled, as seen on all 1872 and 1873 proofs. NGC ID# 252V, PCGS# 7021

## TRADE DOLLARS

- 4290 1873 MS63 NGC.** A collectible Mint State example of the inaugural Trade dollar production, showing satiny luster that is mostly untuned. A few minor abrasions account for the grade. Some expected strike weakness is seen on several peripheral elements of the obverse and on the eagle's right (facing) leg. Census: 34 in 63 (2 in 63+), 42 finer (9/16). NGC ID# 252W, PCGS# 7031
- 4291 1874-CC AU58 NGC.** Micro CC. No period after FINE. This partially lustrous Carson City example is mostly brilliant but displays peach freckles on the reverse legends. Smooth except for faint horizontal hairlines on the left obverse field.  
*Ex: FUN Signature (Heritage, 7/2014), lot 4121.* NGC ID# 2532, PCGS# 7035
- 4292 1875-CC Type One Reverse MS62 PCGS.** Light wheat-gold toning visits the margins of this Carson City type coin. The strike is crisp except on Liberty's hair. Abrasions are surprisingly minimal for the designated third-party grade. A strong bid will be requisite to secure the present lot. NGC ID# 2535, PCGS# 40108 Base PCGS# 7038
- 4293 1875-S Type One Reverse MS63 NGC.** Large S. Only a hint of gold toning accompanies this lustrous Trade dollar. Marks are confined to the left obverse field. The strike is good save for the usual softness on Liberty's curls and the eagle's right (facing) leg. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

### 1875-S/CC Trade Dollar, MS60 FS-501 Guide Book Variety

- 4294 1875-S/CC FS-501 MS60 NGC.** Despite the fact that numerous pieces are now known since the discovery coin in 1963, the S/CC Trade dollar retains its scarcity in Mint State. Two varieties are known of the overmintmark, with the FS-501 being the more common variant, yet preferred because it displays the most obvious overpunching. A faint sheen of golden-gray toning resides across the satin-smooth and brilliantly silver surfaces of this example. A few scattered marks — each small and of little consequence — contribute to the assigned grade. Census (all overmintmark varieties): 3 in 60, 25 finer (8/16). NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

### 1876 Trade Dollar, MS64 Type One Obverse and Reverse Uncommonly Void of Marks

- 4295 1876 Type One Obverse, Type One Reverse, MS64 PCGS.** Narrow bands of autumn-brown and forest-green toning enrich the borders of this lustrous Centennial-year Trade dollar. The fields display hints of ice-blue patina. The eagle's right leg is lightly brought up, but the surfaces are refreshingly free from abrasions. NGC ID# 2539, PCGS# 40110 Base PCGS# 7041

### 1876-CC Trade Dollar, AU58 Multiply Chop Marked Example

- 4296 1876-CC Chop Mark AU58 PCGS.** Type One Obverse. Type Two Reverse. Tall CC. The still-lustrous, near-Mint obverse of this attractive Carson City Trade dollar had its ticket punched to many destinations according to the large number of chop marks that congregate at the coin's center. A few standalone marks are spaced farther apart from the rest, where they are more easily viewed for their distinctive style of punch. A faint golden hue deepens at the border of this sharp and interesting, well-traveled dollar. PCGS# 87042 Base PCGS# 7042
- 4297 1877-S MS61 NGC. Breen-5814.** Minute S, the scarcer of the two mintmark sizes for the issue. Light golden-brown and sea-green toning enriches the borders of this well struck Uncirculated type coin. Surprisingly free from marks, and all that limits the grade is diminished luster across the reverse field. NGC ID# 253E, PCGS# 7046

### 1877-S Trade Dollar, MS64+ Scarce Minute S Mintmark

- 4298 1877-S MS64+ PCGS.** Minute S mintmark, much scarcer than its Large S counterpart. Blushes of apple-green, fire-red, and golden-brown embrace the peripheries of this lustrous and well struck near-Gem. Careful inspection is required to locate the minor field marks near the left (facing) wing. Despite a generous mintage, the 1877-S is surprisingly rare any finer. NGC ID# 253E, PCGS# 7046

### 1878-S Trade Dollar, MS64+ Final Business-Strike Issue

- 4299 1878-S MS64+ NGC.** The 1878-S is the final business-strike Trade dollar. The lustrous, well-preserved surfaces of this Plus-graded Choice example are visited by shades of dappled amber, sea-green, and violet-gray toning. The design elements are sharply detailed throughout and overall eye appeal is quite impressive. Census: 70 in 64 (2 in 64+, 1 in 64★), 39 finer (9/16). NGC ID# 253G, PCGS# 7048

## PROOF TRADE DOLLARS

- 4300 1878 PR63 PCGS.** A mintage of 900 proofs was the total Trade dollar production at Philadelphia in 1878, although the branch mints issued circulation strikes into the first part of the year. This Select proof 1878 Trade dollar is fully struck and reflective with attractive original toning. Lavender-gold interiors cede to blue, violet, and mint-green peripheral hues. NGC ID# 27YP, PCGS# 7058

### 1878 Trade Dollar, Outstanding PR64 Popular Proof-Only Issue

- 4301 1878 PR64 PCGS. CAC.** The Philadelphia Mint restricted Trade dollar production to just 900 proofs in 1878. Treasury Secretary Sherman mandated that production of Trade dollars cease on February 22, 1878, before the Mint had struck any coins for circulation. A total of 300 proofs were manufactured in January followed by 200 coins each in February, March, and May. Lavender-orange centers transition to deeper shades of purple-gray at the margins of this Choice example. The strike is razor-sharp, as expected, and small contact marks are unobtrusive. This is a lovely near-Gem proof with watery fields and excellent eye appeal, as confirmed by the CAC endorsement.

*Ex: James A. Stack, Sr. Collection (Stack's, 3/1995), lot 235; Eugene H. Gardner Collection (Heritage, 10/2015 as PR64 NGC), lot 98797. NGC ID# 27YP, PCGS# 7058*

### 1880 Trade Dollar, PR64 Variegated Patina

- 4302 1880 PR64 PCGS. CAC.** Variegated cobalt-blue, purple, and gold patina enriches this splendid near-Gem proof Trade dollar, one of only 1,987 coins manufactured for this proof-only issue. The reverse is fully struck, as expected, while the obverse displays incompleteness on the right-hand stars, Liberty's head, and the date. An exceedingly elusive low-mintage date. CAC: 19 in 64, 36 finer (9/16). NGC ID# 27YS, PCGS# 7060

- 4303 1881 PR20 PCGS. CAC.** What a cool coin. Proof-only, of course, with 960 pieces struck. Someone must have carried this in their pocket for 20 years, and then it slipped into circulation. Smooth, evenly worn surfaces with no mentionable abrasions. And it's even CAC-certified. NGC ID# 27YT, PCGS# 7061

- 4304 1881 PR60 PCGS.** A fully struck and untuned specimen with delicate field hairlines and an absence of contact marks. Cameo contrast is apparent, particularly on the reverse, although the old green label holder precedes the extension of the Cameo designation to proof Trade dollars. NGC ID# 27YT, PCGS# 7061

### 1882 Trade Dollar, PR64 Low Mintage of Only 960 Proofs

- 4305 1882 PR64 PCGS.** If one considers the total production of proofs and circulation strikes for every issue in the Trade dollar series, then the 1882 has the lowest absolute mintage: only 960 proofs. (The 1884 and 1885 are not regular Mint issues.) Multicolor patina over each side includes shades of blue, green, gold, and magenta. The fields maintain noticeable reflectivity despite the toning. An eye-appealing proof-only representative. NGC ID# 27YU, PCGS# 7062

- 4306 1883 — Cleaning — PCGS Genuine. Proof, Unc. Details.** Untoned and well struck. The obverse is microgranular and lackluster. The reverse has a more attractive appearance, though the field displays patches of hairlines. A scarce proof-only date. NGC ID# 5DP8, PCGS# 7063

## End of Session One

## SESSION TWO

### PATTERNS

1862 GOD OUR TRUST Half in Silver  
Judd-295, PR63

- 4307** 1862 Half Dollar, Judd-295, Pollock-353, R.5, PR63 PCGS. CAC. The obverse is the regular-issue Seated Liberty half dollar, while the reverse, left over from 1861 pattern strikes, has GOD OUR TRUST in the field above the eagle's head. The motto is set directly into the field with no scroll. Struck in silver with a reeded edge. According to USPatterns.com, about two dozen of these pieces are known. W. Elliot Woodward stated in his May 1863 catalog that 25 sets were struck. This example is deeply reflective with noticeable (but unacknowledged) contrast on each side. A few light hairlines account for the grade. Light rose toning is seen over each side. NGC ID# 29E6, PCGS# 60445

1869 Three Cent Nickel Pattern, PR66 Cameo  
Judd-676, Pollock-753, Long Dentils Variant

- 4308** 1869 Three Cent Nickel, Judd-676, Pollock-753, R.4, PR66 Cameo PCGS. CAC. Similar to the adopted dies, except the Roman numeral on the reverse lacks ribbing. Two variants are known of this pattern, this is the more available one with normal dentils on the reverse and the wreath slightly low of center. Struck in nickel with a plain edge. The fields are deeply mirrored and establish deep contrast against the frosted devices. Exceptionally well-preserved. Population: 5 in 66 Cameo, 0 finer. CAC: 4 in 66, 0 finer (9/16). NGC ID# 29PV, PCGS# 388660

1869 Standard Silver Half in Silver  
Judd-748, PR62

- 4309** 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR62 PCGS. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty is wearing a diadem inscribed LIBERTY, the legend is around the border, and the motto IN GOD WE TRUST is on a scroll at the bottom. The reverse exhibits the denomination 50 CENTS within a wreath of oak and laurel. STANDARD SILVER is at the periphery, the date 1869 is below the wreath. Struck in silver with a reeded edge. This is a fairly common Standard Silver half. Examples were struck in silver, copper, and aluminum — with both reeded and plain edges. Light rose-colored toning is seen across each side and the fields are deeply mirrored. NGC ID# 26VS, PCGS# 60977

1869 Standard Silver Half Dollar  
Gem Proof, Judd-748  
Silver, Reeded Edge

- 4310** 1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR65 PCGS. Liberty, wearing a plain tiara, faces right. A headband behind the tiara features LIBERTY in raised letters. UNITED STATES OF AMERICA dominates the upper periphery, with IN GOD WE TRUST in a ribbon below. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper rim and the date below. Two six-pointed stars in the lower field — one to the left and one to the right — complete the design. Struck in silver with a reeded edge. Golden-brown and ocean-blue toning invigorates the margins of this undisturbed and attractive Gem. The centers show slight inexactness, caused by the relatively high relief of the portrait. NGC ID# 26VS, PCGS# 60977

**1873 Bailly Trade Dollar, PR62  
Judd-1281, Silver, Reeded Edge**

- 4311** 1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR62 NGC. The obverse, designed by J. A. Bailly, features a coiled hair bust of Liberty facing left. The reverse resembles the Amazonian pattern silver dollar, except for a reduction in the size of the eagle and the addition of the motto E PLURIBUS UNUM above and the weight and fineness below. Struck in silver with a reeded edge. Deep original cobalt-blue and wheat-gold toning alternates across attractive surfaces. Portions of the eagle are incompletely brought up, due to metal flow into the portrait of Liberty. NGC ID# 2A8B, PCGS# 61566

**'1759' Martha Washington Dollar, MS62  
Judd-2185, Struck Circa-1999**

- 4312** (1999) Martha Washington Dollar, Judd-2185, Pollock-Unlisted, Low R.7, MS62 NGC. The 1759-dated obverse has a portrait of Martha Washington facing right, while the reverse shows a view of Mount Vernon. These dies, which omit a denomination and the UNITED STATES OF AMERICA, have been used by the Mint to test coinage alloys since 1965. Struck with a plain edge in manganese-brass-coated copper-clad metal. The brassy color is similar to that of a Sacagawea dollar. A nicely struck green-gold specimen with good eye appeal and minimal handling marks. NGC ID# 2ANM, PCGS# 511836

**GOLD DOLLARS**

- 4313** 1849-O Open Wreath MS61 NGC. **Variety 1.** A crisply struck butter-gold representative. The surfaces are only lightly abraded, and luster illuminates design elements. The sole Open Wreath New Orleans issue. Repunched letters include the ME in AMERICA and the R in DOLLAR.  
*From The Walter Freeman Collection, Part II.* NGC ID# 25BE, PCGS# 7508
- 4314** 1851-C AU55 NGC. **Variety 3.** The High Date variant of this scarce Charlotte issue. Pleasing peach-gold and olive-green toning graces this briefly circulated example. Marks are inconsequential aside from a few thin vertical field lines near Liberty's forehead. NGC ID# 25BL, PCGS# 7514

**1853-O Gold Dollar, MS64  
High Date Variant**

- 4315** 1853-O MS64 NGC. **Variety 1.** The High Date variant of this New Orleans Type One issue. A lustrous canary-gold near-Gem with a sharp strike save for softness on the 3 in the date and prominent 1 of the denomination. Marks are absent aside from a slender line behind the neck curls.  
*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4657.* NGC ID# 25BX, PCGS# 7524

**1853-O Dollar, Pleasing MS64+  
Always Elusive in This Grade**

- 4316** 1853-O MS64+ PCGS. **CAC. Variety 2.** This borderline Gem gold dollar was struck from the scarcer of two die marriages known for the issue. The date is positioned lower than the more commonly seen variety, with the base of the 1 and 3 in the date lightly repunched. Overall, the strike is nearly full with razor-sharp definition on Liberty's hair and a sharply defined wreath. Die rust is minimal on this example, a frequent characteristic for the 1853-O. Glowing apricot-gold color covers both sides for terrific eye appeal. Population: 36 in 64 (3 in 64+), 10 finer. CAC: 7 in 64, 4 finer (9/16). NGC ID# 25BX, PCGS# 7524
- 4317** 1854 Type Two MS62 PCGS. Satiny yellow-gold luster appears on each side of this Mint State Type Two gold dollar. Light handling marks limit the grade, but none are individually bothersome. Metal flowlines in the fields attest to worn dies. NGC ID# 32EH, PCGS# 7531
- 4318** 1855 Type Two MS61 NGC. A well-struck Mint State example of the Type Two gold dollar, showing satiny yellow-gold luster with minimal abrasions for the grade. The strike is sharp, and visual appeal surpasses expectations. NGC ID# 25C4, PCGS# 7532
- 4319** 1855 Type Two MS61 NGC. **CAC.** The popular and briefly struck Type Two design, noteworthy for its small bust of Liberty. This yellow-gold example is well-struck aside from the top of the 8 in the date. Only a few wispy field marks are present, and luster dominates the legends and devices. NGC ID# 25C4, PCGS# 7532
- 4320** 1855-O AU50 PCGS. **Variety 2.** A problem-free example with rich and original peach-gold toning. The sole New Orleans Type Two issue. Two die marriages are known, and they are readily distinguished, since Variety 2 was struck from a lapped reverse die. NGC ID# 25C7, PCGS# 7535

**1856-S Type Two Gold Dollar, AU55  
FS-501, Repunched Mintmark**

- 4321 1856-S/S FS-501 AU55 NGC.** The mintmark was initially entered tilted, and placed too far northeast. It was repunched in the proper position. The 1856-S is the final Type Two issue, and the sole issue of that design from the San Francisco Mint. This apricot-gold example shows only inconsequential contact. Moderate wear on the forehead curls confirms a stint in Old West commerce. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

**1857-D Gold Dollar, AU53  
Radiant, Unmarked Fields**

- 4322 1857-D AU53 PCGS. Variety 9-L.** A wheat-gold representative of this very low mintage Dahlonga issue. Luster fills the legends and wreath, and marks are essentially absent aside from an obverse rim nick at 10:30. Portions of the portrait and wreath show softness characteristic of the remote Georgian facility. NGC ID# 25CF, PCGS# 7546

**1874 Gold Dollar, Vibrant MS67  
Undesignated Prooflike Fields**

- 4323 1874 MS67 PCGS.** While the 1874 is readily available as an issue from the large mintage of 198,800 pieces, Superb Gem examples are rare. Prooflike examples are also rare (as are the true proofs). The Bowers reference gives a brief comment in the Auction Information section, "A small percentage of listings note a prooflike surface." The fields of this example are blatantly prooflike on both sides. Variegated toning ranges from deep-orange to lemon-yellow, with frosted raised motifs and a razor-sharp strike. Population: 36 in 67 (2 in 67+), 2 finer (9/16). NGC ID# 25DC, PCGS# 7575

- 4324 1887 MS63 Prooflike NGC. CAC.** A scarce Prooflike example from NGC, this piece in the collectible grade of MS63. The coin shows a full strike and significant reflectivity. Yellow-gold surfaces exhibit minimal abrasions. Census: 8 in 63 Prooflike, 21 finer (9/16). NGC ID# 25DS, PCGS# 77588

- 4325 1888 MS66 NGC. CAC.** The reverse exhibits a slight counter-clockwise rotation on this Premium Gem representative. Rich yellow-gold color, with hints of peach and green, along with matte luster provide this piece with a pleasing appearance. A tiny alloy spot is present near the bridge of Liberty's nose. CAC: 19 in 66, 23 finer (9/16). NGC ID# 25DT, PCGS# 7589

- 4326 1889 MS65 NGC.** Soft, satiny wheat-gold luster illuminates well-preserved surfaces on this Gem 1889 gold dollar, complementing bold relief elements. There are no significant abrasions. The availability of the 1889 in high grade makes it a popular choice among type collectors.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25DU, PCGS# 7590

- 4327 1889 MS65 PCGS. CAC.** An apple-green and orange-gold Gem. The coruscating surfaces are sharply struck and free from distractions. The final year the denomination was struck for commerce, although the early 20th century witnessed several commemorative gold dollar issues. Certified in an old green label holder. NGC ID# 25DU, PCGS# 7590

- 4328 1889 MS65 PCGS. CAC.** Splendid peach-gold and apple-green toning endows this lustrous and intricately struck final-year Gem. Minor field grazes deny an even finer grade. Encapsulated in an old green label holder.

*From The Walter Freeman Collection, Part II.* NGC ID# 25DU, PCGS# 7590

- 4329 1889 MS66+ PCGS.** The final-year 1889 was widely saved and can be acquired with minimal difficulty in high grades. This high-end, Plus-designated Premium Gem has the look of an even finer coin. Lilac and rose-gold hues dominate each side with reddish accents near the borders. The fields are seemingly pristine. Razor-sharp strike. NGC ID# 25DU, PCGS# 7590

**CLASSIC QUARTER EAGLES**

- 4330 1834 AU55 PCGS. Breen-6138, Variety 1, R.1.** A semiprooflike peach-gold Choice AU example. Attractive and only lightly abraded. A linear field bulge between stars 7 and 9 is likely caused by a retained lamination, as made. Housed in a green label holder. NGC ID# 25FS, PCGS# 7692

- 4331 1834 AU58 NGC. Variety 1.** The Small Head variety, believed to be the first Classic quarter eagle marriage since the other three 1834 marriages have the same portrait style as the 1835. The present straw-gold representative has a good strike and lacks relevant abrasions. Ex: FUN Signature (Heritage, 7/2013), lot 3544. NGC ID# 25FS, PCGS# 7692

**1835 Two and a Half, MS60  
Scarce in Mint State**

- 4332 1835 MS60 NGC. Breen-6141, Variety 6, R.2.** The 1835 is a sleeper date among the Classic Head No Motto quarter eagles despite an adequate mintage of 131,402 pieces. Population reports show low numbers in most grades, and auction appearances in Mint State grades are limited. This Uncirculated example displays pleasing orange-gold color and a crisp strike. Light abrasions occupy the surfaces to account for the assigned grade. Census: 15 in 60, 78 finer (9/16). NGC ID# 25FT, PCGS# 7693

- 4333** 1836 Script 8 AU55 NGC. CAC. Breen-6143, Variety 11, R.2. Head of 1835. The obverse die crack through star 6 into Liberty's head is well-advanced on this Choice AU example, and a thinner crack appears across the jawline. The coin is well-detailed with pleasing straw-gold patina. Hints of luster are present despite mild field chatter. NGC ID# 25FU, PCGS# 7694

**1836 Classic Head Quarter Eagle, MS61  
Script 8, Uncirculated Type Coin**

- 4334** 1836 Script 8 MS61 PCGS. Breen-6143, Variety 11, R.2. Head of 1835. The branch has no berry and star 6 is very close to Liberty's curl on this collectible Classic Head quarter eagle variety. Design definition is strong with full star centers and good detail on the eagle's talons and olive leaves. Strike softness occurs primarily on Liberty's hair and the eagle's shield and upper wing feathers. Reddish-gold accents complement luminous, yellow-gold surfaces. NGC ID# 25FU, PCGS# 7694

**1839-D Two and a Half  
XF Sharpness**

- 4335** 1839-D — Cleaning — PCGS Genuine. XF Details. Winter 1-A, Variety 26, R.3. No hairlines are noticeable, but the butter-gold surfaces are subdued. No marks are remotely worthy of description. The eagle's plumage near the shield shows moderate wear, as does Liberty's forehead and the hair above the ear. Just 13,674 pieces were struck for this issue, the first of the denomination from the Dahlonega Mint. NGC ID# 4UKS, PCGS# 7700

**LIBERTY QUARTER EAGLES**

- 4336** 1840 AU55 PCGS. Only about 100 1840 quarter eagles are believed to survive, being the first issue of the Liberty Head design on this denomination. The present Choice AU representative is conditionally rare. Bright yellow-gold surfaces show lightly marked fields but little wear. Weakness on the eagle's left (facing) leg is from strike deficiency, as is often seen on this date. Population: 3 in 55, 8 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GA, PCGS# 7717

**1840-C Two and a Half, AU53  
Elusive in About Uncirculated Condition**

- 4337** 1840-C AU53 NGC. Variety 1. Only 12,822 pieces were struck at the Charlotte Mint for the first year of the Liberty Head design from a single pair of dies. The issue was saved to a greater extent than might be expected for such a low mintage, possibly in response to the new design. This example retains a healthy amount of mint luster despite brief circulation. Natural greenish-gold coloration shows orange accents at the borders. Marks are generally light and unobtrusive, although some light lines are noted beneath the eagle's right (facing) wing. Well-struck at the centers, slight weakness is noted at the peripheries. Census: 22 in 53, 80 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GB, PCGS# 7718

**1840-O Quarter Eagle, Choice AU  
About 125 Examples Extant**

- 4338** 1840-O AU55 PCGS. Variety 1. The Large Mintmark variety is, in our experience, more available than the Small Mintmark variant, though Breen and Winter have both suggested otherwise. Inarguably, all examples are scarce with 100 to 125 or so pieces extant. Most show heavy abrasions, but this bright yellow-gold Choice AU representative has only lightly scattered wispy marks that do not detract. The peripheries are remarkably sharp throughout, while the centers display the usual softness. Population: 10 in 55, 22 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 54TU, PCGS# 7720

**1841-C Quarter Eagle, AU55  
Rare Charlotte Product**

- 4339 1841-C AU55 PCGS. Variety 1.** The only die pair used to strike 10,281 quarter eagles at the Charlotte Mint in 1841. All examples are very scarce. In fact, a survival estimate of 110 coins makes this one of the rarest North Carolina quarter eagles. The 1841-C is notorious for its poor production quality. This Choice AU representative is far stronger than expected with crisp detail on the upper stars but most notably on the eagle's leg, neck, and wingtips. A single noteworthy abrasion occurs in the right reverse field below the wing. Population: 12 in 55, 7 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 54TU, PCGS# 7721

- 4340 1841-D — Mount Removed — PCGS Genuine. AU Details. Variety 2-C.** We suspect that the mount is on the edge near 12 o'clock, but the PCGS holder obscures that area. This low mintage Dahlonega quarter eagle has a strike-through that affects the first S in STATES, but the apricot-gold surfaces are well defined and only lightly abraded.  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 54TW, PCGS# 7722

- 4341 1842 VF35 PCGS.** A lightly abraded yellow-gold example with moderate wear and good eye appeal. The 1842 quarter eagle has a meager mintage of 2,823 pieces. According to grading service populations, the Philadelphia issue is rarer than any of its branch mint cousins, including the costly 1842-D. PCGS has certified a total of 31 examples, an average of one per year at the third party service.  
*Ex: Boston Signature (Heritage, 8/2010), lot 5784, which realized \$2,875.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GG, PCGS# 7723

- 4342 1842-O AU53 NGC. Variety 1.** Just a single die marriage is known. A lemon-gold representative of this low mintage New Orleans issue. The strike is typical, but the surfaces are only lightly abraded.  
*Ex: FUN Signature (Heritage, 7/2009), lot 1302, which realized \$1,495.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GK, PCGS# 7726

**1843-C Quarter Eagle, AU50  
Large Date, Plain 4, Recut Mintmark**

- 4343 1843-C Large Date, Plain 4, AU50 NGC. Variety 1,** the only known Large Date die marriage, as expected given the scant mintage of 23,076 pieces. This is a typically struck example with weakness at the central portrait on the obverse and incompleteness of the plumage on the eagle, yet attractive dusky yellow-gold surfaces with olive-gold overtones give the coin nice eye appeal. The borders retain noticeable luster while abrasions are light and bagmarks are minimal. The mintmark shows recutting along the left-side outer curve. Census: 22 in 50, 98 finer (9/16).  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 2599; Los Angeles Signature (Heritage, 8/2009), lot 2347.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 7HLG, PCGS# 7728

**1843-D Quarter Eagle, AU55  
Small D Mintmark, Nice for Type**

- 4344 1843-D Small D AU55 NGC. Variety 4-H.** The Small D mintmark is punched low (close to the fraction bar) and a die crack through the first S in STATES is diagnostic of a late state of the dies. With a mintage of 36,209 pieces, 1843-D is the most-available quarter eagle from the Dahlonega Mint. Bright yellow-gold patina covers the surfaces of this Choice About Uncirculated coin. The strike is a little weak in the centers, but the outer details are sharply defined. An appealing example with light abrasions but no overly significant marks. Census: 57 in 55 (1 in 55+★), 64 finer (9/16).  
*Ex: ANA Signature (Heritage, 8/2008), lot 2820.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GP, PCGS# 7730

**1843-O Quarter Eagle, AU55  
Large Date, Plain 4**

- 4345 1843-O Large Date, Plain 4 AU55 PCGS. Variety 1.** According to specialist Doug Winter: "The 1843-O Large Date is the second rarest New Orleans quarter in terms of its overall rarity and the third rarest in high grades. A greater percentage of survivors are known in high grades than for other issues of this era but this is still a rare coin in About Uncirculated and a very rare one in Uncirculated." The border areas on the Choice AU example are boldly rendered, while central softness occurs over the forecurls and the eagle's left leg. Partial luster emanates from the recesses, illuminating appealing olive-gold surfaces. Population: 10 in 55, 23 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GS, PCGS# 7732

- 4346 1844 AU53 PCGS.** Only 6,784 quarter eagles were struck at Philadelphia in 1844, quite a drop from the more than 90,000 pieces struck in both 1843 and 1845. This straw-gold example has noticeable luster and only a single consequential mark, in the field above the eagle's beak. Population: 8 in 53, 10 finer (9/16).  
*Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4613.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GT, PCGS# 7734

**1844-D Quarter Eagle, Choice AU  
Very Scarce Variety**

- 4347 1844-D AU55 PCGS. Variety 5-J.** This variety is distinguished by the bottom serif of the D being joined to the top of the 1 in the fraction, and there are no feathers inside the mintmark. Winter estimates the 5-J is twice as scarce as the usually seen 5-I variety. The surfaces display bright yellow-gold color, and the strike is generally bold with only localized softness on the hair curls over Liberty's ear and the eagle's left (facing) leg. Otherwise, each side is problem-free. Population: 25 in 55, 29 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GV, PCGS# 7736

- 4348 1845-O Fine 15 PCGS. Variety 1.** This storied quarter eagle issue was once thought to be a major rarity, primarily because it was unlisted in the Mint report for the year. B. Max Mehl claimed discovery of the 1845-O in the early 20th century. Today, survivors are scarce in all grades. Although considerably worn, this example is attractive with natural honey-gold surfaces and faint hairlines only visible under close inspection. Population: 2 in 15, 46 finer (9/16).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4302.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GR, PCGS# 7739

- 4349 1846 AU55 NGC.** Peach-gold surfaces exhibit apricot accents, along with a good amount of luster. The design elements are well impressed, save for minor softness on the eagle's neck and legs. A few minute circulation marks are not disturbing. Scarce in Choice About Uncirculated and finer grades. Census: 31 in 55, 73 finer (9/16).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 2467.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GZ, PCGS# 7740

- 4350 1846-C VF35 PCGS. Variety 1.** A radiant sun-gold example with glimmers of rose-red toning in protected areas. Nicely defined, and marks are trivial aside from a few small depressions on the obverse rim. A single die marriage is responsible for the scant production of 4,808 pieces. Struck from rusted dies.  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25H2, PCGS# 7741

**1846-D Quarter Eagle, AU53  
Scarce Die Pair**

- 4351 1846-D AU53 PCGS. Variety 7-I.** The mintmark placement with an arrow fletching showing through the opening of D is a scarce variety — a feather in the cap for this Dahlonega issue, that was struck from at least five die pairs to accomplish the moderate mintage of 19,303 pieces. The current About Uncirculated example is semireflective with appealing greenish-gold color. Mint luster remains to illuminate light field chatter and a few small marks. Population: 11 in 53, 49 finer (9/16). NGC ID# 25H3, PCGS# 7742

- 4352 1847-D VF35 PCGS. Variety 9-N.** Rich peach-gold toning accompanies the fields. The eagle is gunmetal-gray. An originally toned and problem-free example of this scarce Dahlonega issue. Just 15,784 pieces were produced, all from the same pair of dies.  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25H7, PCGS# 7746

- 4353 1848 AU50 NGC.** Considerable luster remains on each side of this pleasing piece — a surprisingly scarce Philadelphia date with a mintage of a mere 6,500 coins. The pleasing olive-gold surfaces show a few minor blemishes that are consistent with the grade. The 1848 regular issue has always been overshadowed by the ultra-popular CAL. variety, although it is notably challenging in its own right. Census: 7 in 50, 43 finer (9/16).  
*Ex: ANA Signature (Heritage, 3/2010), lot 2086.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25H9, PCGS# 7748

- 4354 1848-C XF45 PCGS. Variety 1.** The usually seen variety of 1848-C quarter eagles. The date has an obvious downward slant from left to right. This lovely Choice XF example has light green-gold surfaces with considerable remaining luster for the grade. Population: 27 in 45, 47 finer (9/16).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4305.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HB, PCGS# 7750

**1848-C Two and a Half, AU50  
Rare Variety 2 Dies, Buckled Obverse**

- 4355 1848-C AU50 NGC. Variety 2.** The date is high and level with heavy numerals. A glass reveals repunching of the left bases on 1 and 4. The obverse of this scarce variety is noticeably buckled with resultant weakness at the centers — both on the high points of the portrait and on eagle's head and other central features. Lightly abraded with accompany die striations, this example displays rich orange-gold color reddish-gold accents. Doug Winter suggests 200 to 250 pieces survive, most of which are of the more-available Variety 1 die marriage. Census: 19 in 50, 84 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HB, PCGS# 7750

**1848-C Two and a Half, AU55  
Rare Variety 2, Buckled Obverse**

- 4356 1848-C AU55 NGC. Variety 2.** The 1848-C has a meager mintage of 16,788 pieces, yet two die marriages are known. At least 80% of survivors are Variety 1. The present example is the rare Variety 2, identifiable at a glance by the wavy, buckled obverse field. Presumably, the obverse die was improperly annealed prior to use. The minimally marked straw-gold surfaces show blending of impression on Liberty's neck curl and the eagle's head and neck. NGC ID# 25HB, PCGS# 7750

- 4357 1849 AU58 PCGS.** The 1849 quarter eagle is challenging in AU condition and rare in Mint State. This near-Mint coin displays well-defined motifs and bright yellow-gold surfaces. Some luster and reflectivity remain in the fields. Eye appeal is excellent for the grade. Population: 6 in 58, 15 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HD, PCGS# 7752

**1849-D Two and a Half, AU50  
Crisp Strike, Scarce D-Mint Issue**

- 4358 1849-D AU50 PCGS. Variety 11-N.** The 1 in the date is close to the bust, with the base repunched at the lower right. Just 10,945 pieces of this scarce Dahlonega issue were struck, and perhaps as few as 150 to 200 pieces survive (Doug Winter, 2013). This example displays bright, yellow-gold color with a pleasing greenish hue. The generally smooth surfaces retain soft mint luster and sharply defined motifs. Population: 22 in 50, 60 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HE, PCGS# 7754

- 4359 1850 MS62 PCGS. CAC.** The 1850 is decidedly uncommon in MS60 and above. The pleasing apricot-gold surfaces of this MS62 representative display soft luster and sharply struck devices. Some wispy handling marks are noted over each side. Population: 25 in 62, 22 finer. CAC: 6 in 62, 2 finer (9/16).  
*Ex: Central States Signature (Heritage, 5/2005), lot 8445; Long Beach Signature (Heritage, 2/2009), lot 2501.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HG, PCGS# 7755

**1850-D Quarter Eagle, AU55  
Smooth, Appealing Surfaces**

- 4360 1850-D AU55 NGC. Variety 14-N.** Plentiful mint luster remains and illuminates the design recesses of this nearly unmarked straw-gold Dahlonega two and a half. The coin is sharply impressed by the standards of the legendary Georgian facility, although the eagle's neck feathers and right (facing) claw lack full details. A scarce and somewhat underrated branch mint issue, with just 12,148 pieces struck. Census: 30 in 55, 46 finer (9/16).  
*Ex: ANA Signature (Heritage, 8/2010), lot 5798.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HJ, PCGS# 7757

- 4361 1850-O AU58 PCGS. Variety 4.** A smooth and luminous yellow-gold near-Mint New Orleans representative. Struck at a time when silver coins were hoarded, the 1850-O nonetheless has a mintage of only 84,000 pieces, and survivors are usually encountered in XF and AU grades. Population: 9 in 58, 19 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25HK, PCGS# 7758

- 4362 1851 MS64 PCGS.** The 1.3 million quarter eagles minted in 1851 were struck from gold mined from the California Gold Rush, carrying significant numismatic and historical interest. Although rare in MS64, the issue is underappreciated. This highly lustrous rose-gold example is sharp around the borders, softening slightly over the centers. Population: 45 in 64 (1 in 64+), 6 finer (9/16). NGC ID# 25HL, PCGS# 7759

- 4363 1851-C XF45 PCGS. Variety 1.** A pumpkin-gold Charlotte two and a half. The strike is incomplete, but marks are confined to the field above star 1. The high points of the devices display parallel roller marks, as made and on the planchet prior to the strike.  
*Ex: Long Beach Signature (Heritage, 2/2006), lot 2631; Sacramento ANA Signature (Heritage, 3/2011), lot 4638.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25HM, PCGS# 7760

- 4364 1851-D XF45 PCGS. Variety 15-N.** The only known variety for the date. Light yellow and orange-gold surfaces retain traces of luster in the protected areas, visible through dusky toning. Rather sharply defined for the date and the grade, and a desirable representative from a low mintage of 11,264 coins. Population: 25 in 45, 40 finer (9/16).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4312.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25HN, PCGS# 7761

- 4365 1853 MS64 PCGS.** Choice examples of the 1853 Philadelphia issue are surprisingly scarce given the substantial 1.4 million-piece mintage. This is a boldly lustrous and frosty example, minimally marked with attractive, straw-gold coloration. The obverse strike is tack-sharp, with some incompleteness at the eagle's head and right (facing) wing junction. Population: 77 in 64 (1 in 64+), 9 finer (9/16). NGC ID# 25HV, PCGS# 7767

- 4366 1853 MS64+ PCGS.** Although one of the most plentiful type-coin issues of the period, the 1853 quarter eagle is a rarity above MS64. This Plus-graded near-Gem displays mint-fresh, frosty luster with original orange and peach-gold hues. Other than some minor weakness on the eagle's left (facing) leg, the design elements are well-defined. Grade-limiting luster grazes only appear at certain angles beneath a loupe. Population: 77 in 64 (1 in 64+), 9 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25HV, PCGS# 7767

**1854-C Quarter Eagle, XF45  
Reddish-Gold Color**

- 4367 1854-C XF45 PCGS. Variety 1.** A single variety is known for the issue. The average 1854-C (7,295 coins struck) grades between XF and AU with incomplete strike characteristics. This Choice XF shows above-average detail on the stars, and the legends are bold on each side. The central motifs are typically rendered. Lightly abraded reddish-gold surfaces display glints of green and an unsurprising degree of friction. Population: 26 in 45, 45 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 7J2P, PCGS# 7770

**1854-C Quarter Eagle, XF45  
Extremely Rare With Original Color**

- 4368 1854-C XF45 PCGS. CAC. Variety 1.** Branch mint gold enthusiasts will recognize the importance of this CAC-endorsed 1854-C quarter eagle, one of only 13 examples that enjoy approval from that service. Most survivors from a mintage of 7,295 pieces have had their surfaces altered in any one of a number of ways over the years. Fully original coins are extremely rare. This Choice XF piece features olive and orange-gold color and strong detail throughout the obverse. The reverse shows a slightly soft impression. Highly attractive. Population: 26 in 45, 45 finer. CAC: 3 in 45, 9 finer (9/16). NGC ID# 7J2P, PCGS# 7770

**1856-C Quarter Eagle, AU55  
Above Average for the Issue**

- 4369 1856-C AU55 NGC. Variety 1.** Struck from a single die pair, the low mintage of 7,913 pieces makes the 1856-C among the rarest Charlotte quarter eagles. Doug Winter (2008) notes that the 1856-C quarter eagle is typically seen with rough surfaces that have extensive micro-granularity, with all examples weakly struck in the centers. The yellow-gold surfaces of this About Uncirculated coin display a pleasing orange tinge and a relatively smooth reverse. The obverse shows limited graininess, especially on the portrait, where the usual strike weakness is noted — especially in some of the letters of LIBERTY, Liberty's temple area, and on the star centers. It is Choice for the issue, though, and challenging to find any finer. Census: 16 in 55, 34 finer (9/16).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 3011.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25J8, PCGS# 7778

**1856-S Two and a Half, MS61  
Rare in Mint State**

- 4370 1856-S MS61 NGC.** Frosty yellow-gold luster illuminates a sharp portrait on this Mint State 1856-S quarter eagle, although the eagle's left (facing) leg shows minor softness on its feathers. Light, scattered marks account for the grade. The 1856-S is rarely seen in any Mint State level. Census: 10 in 61, 9 finer (9/16). NGC ID# 25KL, PCGS# 7781

- 4371 1857 MS63 PCGS.** Rich original peach toning graces this satiny and unmarked Select quarter eagle. The coin shows an above-average strike with only trivial blending on the B in LIBERTY and opposite on the eagle's left (facing) leg. The 1857 is rarely seen finer. Population: 20 in 63, 23 finer (9/16).

Ex: FUN Signature (Heritage, 1/2010), lot 3842.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JC, PCGS# 7782

- 4372 1857-O AU58 PCGS. Variety 1.** Some luster remains in the fields amid bright yellow-gold coloration. The eagle's left (facing) leg shows the only mentionable strike weakness. Scattered marks appear in the fields. The 1857-O quarter eagle is seldom seen finer. Population: 31 in 58, 22 finer (9/16).

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JE, PCGS# 7784

- 4373 1857-S AU58 NGC.** Few 1857-S quarter eagles survived the heady days of Gold Rush commerce on the West Coast, especially when in near-Mint condition such as this still-lustrous and frosty example. The eye appeal and surface quality suggest a fully Uncirculated coin, but a touch of high point rub suggests the AU58 grade. Still, the Mint-fresh glow of this coin and the absence of any significant marks are undeniable. Census: 64 in 58, 21 finer (9/16).

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JF, PCGS# 7785

**1858 Quarter Eagle, MS63  
Underrated Philadelphia Date**

- 4374 1858 MS63 PCGS.** A mintage of 47,377 coins does not necessarily stand out in a series with so many ultra-low-mintage issues, but the 1858 is an underrated rarity. Select coins are exceedingly difficult to find, and only a handful of finer coins are reported at the leading certification services. The obverse of this partly reflective offering is honey-gold, while the reverse is a shade lighter with rose accents. A strong strike defines each side, and minor wispy marks account for the grade. Population: 15 in 63, 7 finer (9/16).

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JG, PCGS# 7786

- 4375 1858-C XF45 PCGS. Variety 1.** In spite of the low mintage of 9,056 pieces, the 1858-C is actually one of the more available C-mint quarter eagles. In all grades, there are an estimated 225-325+ pieces known today. This is an attractive coin. Even high-point wear is seen on each side, and there is slight strike softness, more on the reverse than the obverse. A clean, problem-free example for the grade.

Ex: ANA Signature (Heritage, 4/2006), lot 1650; Dallas Signature (Heritage, 10/2009), lot 1318.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JH, PCGS# 7787

- 4376 1859 Old Reverse, Type One, MS60 NGC.** The top two arrowheads touch, the pick-up point for the Type One Reverse. This well struck sun-gold example lacks any mentionable marks. Luster dominates the margins and motifs.

Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 2849, which realized \$2,242.50. NGC ID# 25JK, PCGS# 97788

- 4377 1859 Old Reverse, Type One, MS61 PCGS.** The Old Reverse (arrowheads touching) 1859 quarter eagle is scarcer in Mint State than its New Reverse counterpart. The present coin displays a bold strike and luminous orange-gold coloration. Light chatter in the fields is all that limits the grade. Population: 4 in 61, 14 finer (9/16).

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JK, PCGS# 97788

- 4378 1859-S XF45 PCGS.** An attractive San Francisco Mint quarter eagle surviving from a mintage of only 15,200 coins. Most pieces entered circulation and stayed in commerce for a long time, receiving considerable wear. This example is better than most, with considerable luster for the grade and excellent orange-gold surfaces. Population: 6 in 45, 40 finer (9/16).

Ex: Houston Signature (Heritage, 12/2009), lot 1546; FUN Signature (Heritage, 1/2011), lot 12376.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JN, PCGS# 7790

**1859-S Quarter Eagle, AU58  
Estimated Population of 85 Survivors**

- 4379 1859-S AU58 PCGS.** Just 85 coins from a mintage of 15,200 1859-S quarter eagles are believed to have survived the past 157 years. The certified population is evenly spread across all grade levels from VG to AU condition, but it drops off in higher grades. Uncirculated coins are very rare. This near-Mint two and a half dollar gold piece features partly lustrous, peach-gold peripheries and green-gold color near the centers. The stars are bold, as are the talons and olive leaves. Population: 11 in 58, 11 finer (9/16).

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JN, PCGS# 7790

- 4380 1860-C XF40 PCGS. Variety 1.** The butter-gold surfaces are well defined for the designated grade, and neither side shows any distracting marks. Small strike-throughs, as coined, are below Liberty's hairbun and west of the eagle's legs. The final Charlotte issue of the denomination. A mere 7,469 pieces were issued, and most are long-lost.

Ex: Dallas Signature (Heritage, 10/2009), lot 1320.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JT, PCGS# 7792

1861 Quarter Eagle, MS61  
Elusive Old Reverse Variant

- 4381 1861 Old Reverse, Type One, MS61 PCGS.** Coinage dies were converted from the fat arrowheads of Type One to the slender arrowheads of Type Two in 1859, although some of the old reverse dies remained unhand. Such was the case when this coin was struck in 1861. Apparently no one noticed at the time that the incorrect reverse die was placed in the press. This is a splendid peach-gold example with strong design definition, brilliant luster, and pleasing surfaces for the grade. Population: 7 in 61, 22 finer (9/16).  
Ex: Long Beach Signature (Heritage, 2/2010), lot 1475.  
From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JX, PCGS# 97794

- 4382 1861 New Reverse, Type Two, MS64 PCGS.** The plentiful Type Two Reverse, popular among type collectors. This Choice example displays a full strike and frosty orange and rose-gold luster. There are only a few light grazes on the cheek that limit the grade. Finer representatives are seldom available.  
From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JX, PCGS# 7794

1861-S Quarter Eagle, AU50  
Desirable California Issue

- 4383 1861-S AU50 PCGS.** The 1861-S today is elusive in all grades and borderline rare in XF or above, despite the recorded mintage of 24,000 pieces. This appealing AU coin displays deep amber-gold coloration on both sides. The strike is soft over the center reverse, but there are few relevant abrasions. Strong eye appeal for this Civil War date. Population: 9 in 50, 30 finer (9/16).  
Ex: Long Beach Signature (Heritage, 2/2008), lot 2376; Los Angeles Signature (Heritage, 8/2009), lot 2406.  
From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JY, PCGS# 7795

1862/1 Quarter Eagle, AU50  
FS-301, Rare Guide Book Variety

- 4384 1862/1 AU50 PCGS. FS-301.** This important quarter eagle overdate is listed in both the *Cherrypickers' Guide* and the annual *Guide Book*, subjecting it to ever-strong collector demand. All 1862 two and a half dollar gold pieces are exceedingly difficult to find, the but overdate coins are rare in any grade and command significant premiums. This pleasing example features glimpses of satiny luster over orange-gold surfaces. Traces of high-point rub are expected for the grade. Housed in a green label holder that has turned blue. Population: 6 in 50, 18 finer (9/16).  
Ex: Houston Signature (Heritage, 12/2009), lot 1550.  
From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JZ, PCGS# 7797

1864 Quarter Eagle, Good Details  
Very Rare Civil War Date

- 4385 1864 — Mount Removed — PCGS Genuine. Good Details.** The PCGS website states "18 to 22 known" for the very rare business strike 1864 quarter eagle. Only 2,824 pieces were struck, and few if any were set aside by numismatists, since the few gold collectors of the era purchased proofs. This well circulated example is glossy and a bit bright from cleaning. A horizontal pinscratch crosses the eagle. The edge is damaged near 12 o'clock, where a mount was removed.  
From The Wasatch Collection of Liberty Quarter Eagles.

**1867 Quarter Eagle  
Near-Mint State, Partially Prooflike**

- 4386 1867 AU58 NGC.** A bright and flashy coin, with considerable prooflikeness evident in the fields. This piece is well-struck with mere traces of high point wear on either side. It is one of just 3,250 pieces produced, and unquestionably very scarce at all grade levels. Garrett and Guth suggest that the issue is underrated because it hails from the Philadelphia Mint, and therefore less-popular with collectors than its Southern counterparts. Census: 9 in 58, 9 finer (9/16).  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 2647.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25K9, PCGS# 7805

- 4387 1868 AU58 PCGS.** Coming from a mintage of only 3,600 pieces, the 1868 quarter eagle is rare in Mint State and infrequently seen in AU. This near-Mint coin displays sharp detail and partially lustrous fields. Scattered abrasions are in tune with the grade. Population: 25 in 58, 12 finer (10/16). NGC ID# 25KB, PCGS# 7807
- 4388 1868 MS60 NGC.** Coming from a small 3,600-coin mintage, the 1868 quarter eagle is elusive in all grades and an underrated rarity in Mint State. This piece displays sharp detail and partially reflective fields. Rich honey-gold coloration joins scattered surface chatter that limits the grade. Census: 8 in 60, 16 finer (9/16). NGC ID# 25KB, PCGS# 7807
- 4389 1868-S AU58 NGC.** This piece is boldly struck, save for typical minor weakness on the eagle's leg feathers and right (facing) talons. There is still quite a bit of luster on the coin, and the surfaces display variegated greenish-gold and coral-pink toning. Wispy marks exist on each side, along with traces of highpoint wear. Census: 82 in 58 (1 in 58+), 18 finer (9/16).  
*Ex: ANA Signature (Heritage, 3/2008), lot 1395; Long Beach Signature (Heritage, 2/2009), lot 2556.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KC, PCGS# 7808

**1869 Quarter Eagle, MS61  
Among the Few Uncirculated Survivors**

- 4390 1869 MS61 PCGS.** This sharply struck pumpkin-gold quarter eagle derives from a mintage of 4,320 coins. The vast majority have been lost through attrition over the years, and only 150 or so pieces are believed to have survived. A few minute marks in the field above the eagle are of little importance. Cartwheel luster occupies the borders and devices. Population: 5 in 61, 9 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KD, PCGS# 7809

- 4391 1869-S AU58 PCGS.** The rarity of Uncirculated 1869-S quarter eagles makes this near-Mint coin particularly appealing. The strike is bold, and the yellow-gold surfaces display moderate luster in the protected regions of the fields. There are no bothersome abrasions. Population: 35 in 58, 17 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KE, PCGS# 7810

- 4392 1870 AU58 PCGS.** Semiprooflike fields add to the eye appeal of this near-Mint 1870 quarter eagle, complementing sharp design elements. Coming from a mintage of only 4,520 pieces, this issue is scarce in the present grade and rarely seen finer. Population: 19 in 58, 11 finer (10/16). NGC ID# 25KF, PCGS# 7811

- 4393 1870 AU58 PCGS.** Lustrous and apparently original, with rich apricot-gold coloration and few marks on either the obverse or the reverse. The fields remain partially reflective. The 1870 is an elusive, low-mintage issue of just 4,520 pieces. Population: 18 in 58, 11 finer (9/16).  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 2558.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KF, PCGS# 7811

**1872 Two and a Half, AU58  
Underrated Issue, Low Survivorship**

- 4394 1872 AU58 PCGS. CAC.** With just 3,000 business strikes produced, the 1872 quarter eagle is part of a string of underrated post-Civil War dates. PCGS estimates that merely 70 coins survive in all. This nearly Uncirculated yellow-gold example has effusive luster and partially reflective surfaces with few significant marks. Population: 10 in 58, 4 finer. CAC: 2 in 58, 3 finer (9/16).  
*Ex: Dallas Signature (Heritage, 10/2008), lot 1954; Long Beach Signature (Heritage, 2/2009), lot 2560; Fort Worth Signature (Heritage, 3/2010), lot 2126.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KK, PCGS# 7815

- 4395 1872-S AU58 PCGS.** Coming from a mostly lost mintage of 18,000 pieces, the 1872-S quarter eagle is scarce in AU condition and rare in Mint State. This piece displays moderately lustrous fields with satiny bronze-gold color. The central devices are deficiently struck, as is sometimes seen on this issue. Population: 13 in 58, 9 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KL, PCGS# 7816

- 4396 1873 Closed 3 MS64 PCGS.** An excellent survivor with the earlier Closed 3 logotype. Satiny luster graces generally khaki-gold surfaces that show occasional mustard and tan elements. Minimally flawed for the grade with solid overall eye appeal. A rarity in Gem. Population: 58 in 64 (3 in 64+), 12 finer (9/16).  
*Ex: Houston Signature (Heritage, 12/2008), lot 1870; Baltimore Signature (Heritage, 3/2009), lot 2654.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25KN, PCGS# 7818

- 4397 1876 AU55 PCGS.** Ample luster resides on the yellow-gold surfaces of this Choice AU quarter eagle. Sharply struck and without individually mentionable abrasions. Finer examples of the 1876 issue are seldom seen. Population: 10 in 55, 25 finer (9/16).  
*Ex: FUN Signature (Heritage, 1/2010), lot 3854; FUN Signature (Heritage, 1/2011), lot 6730.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 7JS6, PCGS# 7824

**1876-S Two and a Half, MS61**  
Only 5,000 Coins Struck

- 4398 1876-S MS61 PCGS.** In 1876, the San Francisco Mint saw quarter eagle output drop to its lowest point since 1854. The facility struck 5,000 coins, and fewer than 10% survive. Mint condition examples are important rarities, and this is a great opportunity to acquire one. This frosty, peach-gold representative features a strong strike with minor softness over the ear, lower-right stars, and talons. Small marks fail to diminish the appeal. Population: 7 in 61, 14 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 7JS6, PCGS# 7825

- 4399 1877 AU58 PCGS.** With an enticingly low mintage of 1,632 pieces, the 1877 quarter eagle is scarce in the upper AU levels and rare in Mint State. This near-Mint coin displays bold detail and partially reflective orange-gold fields. Surface chatter is minimal. Population: 13 in 58, 21 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25KW, PCGS# 7826

- 4400 1877-S MS63 PCGS. CAC.** This impressive Select Mint State quarter eagle exhibits a bold strike with full obverse and reverse details. The surfaces are nicely preserved. This is a highly appealing example of a condition rarity from a circulation-strike mintage of just 35,400 coins. Population: 21 in 63, 11 finer. CAC: 3 in 63, 5 finer (9/16). NGC ID# 25KX, PCGS# 7827

- 4401 1878-S MS63 PCGS.** Pleasing and lustrous apricot-gold color gleams from the surfaces of this smooth and attractive San Francisco quarter eagle. Scarce in Select Uncirculated and finer grades, the 1878-S saw a mintage of 178,000 pieces that was soon dispersed into commerce. A few light marks in the left obverse field account for the assigned grade, since otherwise this coin is pinpoint sharp throughout. Population: 38 in 63, 20 finer (9/16). NGC ID# 25KZ, PCGS# 7829

- 4402 1879 MS64+ PCGS.** A splendid pumpkin-gold example. The strike is precise, and the lustrous surfaces are minimally abraded. Mintages of quarter eagles were much higher during 1878 and 1879 than surrounding years, perhaps due to a Treasury belief that gold coins would return to Eastern commerce. Population: 72 in 64 (7 in 64+), 30 finer (9/16).  
*Ex: Houston Signature (Heritage, 12/2010), lot 4333.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25L2, PCGS# 7830

- 4403 1879 MS61 Prooflike NGC.** Mint State examples of the 1879 are scarce enough, but the issue is rare with designated Prooflike surfaces. Gleaming medium-gold color abounds on this crisply struck example. Faint field chatter is the sole inhibiting factor, since the eye appeal suggests an even finer grade. Census: 4 in 61 Prooflike, 5 finer (9/16).  
*Ex: Long Beach Online Session (Heritage, 9/2005), lot 9738.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25L2, PCGS# 77830

**1880 Two and a Half, Reflective MS63**

- 4404 1880 MS63 PCGS.** Two and a half dollar gold production dropped by a staggering 97% from 1879 to 1880, when merely 2,960 pieces were struck at the Philadelphia Mint. Prooflike reflectivity in the fields characterizes this yellow-gold Select offering. Fully struck relief elements and minimally marked surfaces add to the appeal. Population: 9 in 63, 13 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25L4, PCGS# 7832

- 4405 1882 MS62 PCGS.** A fully struck and mildly prooflike lemon-gold example. Smooth for the designated grade despite minor marks on the portrait. Excluding proofs, a mere 4,000 pieces were struck. Population: 20 in 62, 38 finer (9/16).  
*Ex: FUN Signature (Heritage, 7/2009), lot 1332.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 7JTR, PCGS# 7834

**1883 Two and a Half, AU55**  
One of 1,920 Coins Produced

- 4406 1883 AU55 PCGS.** Flashy luster remains near the reddish-gold borders of this eye-appealing quarter eagle. The devices are well-struck and show minimal wear. A few small field marks are noted near the mouth and the TA in STATES. Just 1,920 pieces were struck in 1883, one of the lowest mintages in the series. Population: 26 in 55, 41 finer (9/16).  
*Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4652.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25L7, PCGS# 7835

- 4407 1884 MS62 PCGS.** Gleaming straw-gold fields dominate the eye appeal of this sharply struck piece, one of just 1,950 business strikes produced for the year. Wispy abrasions and scattered ticks account for the grade. Finer coins are rarely seen. Population: 9 in 62, 18 finer (9/16).  
*Ex: Summer FUN Signature (Heritage, 7/2009), lot 1333.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25L8, PCGS# 7836

**1886 Quarter Eagle, MS63**  
**Tiny 4,000-Coin Mintage**

- 4408 1886 MS63 PCGS.** The 1886 Liberty Head quarter eagle had a tiny mintage of only 4,000 circulation strikes. Most survivors are either lightly circulated or in the lower reaches of Mint State, usually MS60 or MS61. This Select piece boasts excellent eye appeal through its attractive orange-gold color, bold devices, and relative paucity of contact marks. Population: 13 in 63, 6 finer (9/16).  
*Ex: Dallas Signature (Heritage, 10/2009), lot 1330.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LA, PCGS# 7838

- 4409 1887 MS63 PCGS.** Mint State 1887 quarter eagles are scarce overall and rare above MS63. This Select example displays sharp motifs and luminous orange-gold luster. Light, scattered abrasions contribute to the grade. Population: 32 in 63, 21 finer (9/16). NGC ID# 25LB, PCGS# 7839

- 4410 1887 MS63 PCGS.** Mint State examples of the 1887 quarter eagle are scarce in all grades and rare above MS63. This Select example displays a sharp strike and bright yellow-gold luster. A few trivial marks define the grade. Population: 32 in 63, 21 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LB, PCGS# 7839

- 4411 1888 MS64 PCGS.** Surprisingly, even in Choice Uncirculated condition the 1888 trades for little more than the most common dates of the series, yet the issue is many times scarcer. This crisply struck, rich-gold example is unusually prooflike for an 1888, which is usually seen with frosty surfaces. Small bagmarks on the reflective surfaces account for the near-Gem designation. Population: 61 in 64 (2 in 64+), 27 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LC, PCGS# 7840

- 4412 1889 MS64 PCGS.** This peach-gold, low-mintage near-Gem provides scintillating luster and lacks obvious abrasions. A good strike prevails save for softness on the eagle's left (facing) leg and the opposite forehead curls. Finer 1889 quarter eagles are rarely seen. Population: 61 in 64 (2 in 64+), 11 finer (9/16).  
*Ex: Houston Signature (Heritage, 12/2009), lot 1561.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LD, PCGS# 7841

- 4413 1892 MS63 PCGS.** Rich orange-gold color adorns both sides of this lovely Select quarter eagle, and a well-executed strike imparts strong definition to the design features. Partially prooflike fields yield modest contrast with the devices at various angles. Scattered marks limit the grade. Housed in a green label holder. Population: 24 in 63, 32 finer (9/16).  
*Ex: ANA Signature (Heritage, 3/2010), lot 2136.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LG, PCGS# 7844

**1893 Quarter Eagle, MS66**  
**Scarce in This Grade, Rare Any Finer**

- 4414 1893 MS66 NGC.** Quarter eagles of 1893 saw a mintage of 30,000 business strikes, a relatively high total for the 1880s and early 1890s. Examples are readily available through near-Gem, after which the population falls dramatically. Attractive orange-gold and mint-green patina runs over the lustrous, well-preserved surfaces of this sharply struck Premium Gem. Census: 31 in 66 (1 in 66+), 4 finer (9/16).  
*Ex: FUN Signature (Heritage, 1/2011), lot 6739.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LH, PCGS# 7845

**1894 Quarter Eagle, High-End MS64**  
**Small Mintage of 4,000 Coins**

- 4415 1894 MS64 PCGS.** This wonderful Choice quarter eagle appears finer than the numerical assessment suggests. The devices are fully struck and coruscating luster rolls over each side. Mostly rose-gold surfaces show hints of greenish coloration, and the reverse is noticeably semiprooflike, adding considerably to the visual quality. Minuscule marks above the date, below star 13, and on Liberty's neck determine the grade. Population: 28 in 64 (4 in 64+), 22 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LJ, PCGS# 7846

- 4416 1895 MS64 PCGS.** A conditionally elusive near-Gem example of this 19th century type-coin issue, showing satiny yellow-gold luster and sharp design elements. A few light marks limit the grade, but none are individually noteworthy. Population: 35 in 64, 28 finer (9/16). NGC ID# 25LK, PCGS# 7847

**1896 Quarter Eagle, MS63 Prooflike  
Great Visual Quality and Contrast**

**4417 1896 MS63 Prooflike NGC. CAC.** The 1896 is extremely rare with Prooflike surfaces. When found, examples are apt to show numerous contact marks. This is one of only four MS63 Prooflike examples at NGC with none finer (9/16). Clearly an early impression from the dies, this Select CAC-approved offering features complete detail on the devices and marked reflectivity in the fields. Scattered abrasions are undistracting over light yellow-gold surfaces. Great visual quality. NGC ID# 4UDS, PCGS# 77848

**4418 1898 MS65 PCGS. CAC.** The Liberty Head type is certainly pretty when it appears in the Gem condition such as this piece. Whether one likes pristine surfaces, blazing luster, full strike, superb eye appeal; it is all on this singular jewel. Perfect for type or date purposes with a low mintage (24,000 pieces) to boot. Population: 83 in 65, 54 finer. CAC: 12 in 65, 27 finer (9/16).

Ex: *Heritage* (1/2000), lot 7639; *FUN Signature* (*Heritage*, 1/2005), lot 8630.

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LN, PCGS# 7850

**4419 1899 MS65 NGC.** Luminous, khaki-gold color with frosty mint luster covers both sides of this sharply struck Gem. Only a few tiny ticks are seen anywhere on the attractive surfaces. Like other issues from the low-mintage 1890s, the date is somewhat underrated in high grades. 27,200 pieces were struck. Census: 74 in 65, 42 finer (9/16).

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LP, PCGS# 7851

**1899 Quarter Eagle, Vibrant MS66  
Exceptional Luster and Smooth Surfaces**

**4420 1899 MS66 PCGS.** The high-grade population numbers are virtually unchanged over the past three years to indicate few new discoveries or upgrades for the 1899 issue during that time. This dazzling Premium Gem claims its place near the top echelon with virtually unmarked surfaces, radiant gold toning with reddish-orange highlights, and vibrant mint luster. The strike is pinpoint sharp. Population: 25 in 66 (3 in 66+), 7 finer (9/16). NGC ID# 25LP, PCGS# 7851

**1900 Two and a Half, MS67  
Among the Finest Certified**

**4421 1900 MS67 PCGS. CAC.** The 1900 Liberty quarter eagle, always popular because of its turn-of-the-century date, is conditionally rare at the MS67 level. This spectacular Superb Gem exhibits sharply detailed design elements and vibrant mint luster with pristine yellow and rose-gold surfaces. Population: 14 in 67, 0 finer. CAC: 9 in 67, 0 finer (9/16).

Ex: *Dallas ANA Signature* (*Heritage*, 10/2012), lot 5626; *FUN Signature* (*Heritage*, 1/2014), lot 6474.

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LR, PCGS# 7852

**1901 Quarter Eagle, MS67  
Notable Condition Rarity**

**4422 1901 MS67 NGC.** The 1901 quarter eagle is a condition rarity in Superb Gem, the grade of the present offering. Ebullient luster emanates from the brass-gold surfaces of this magnificent piece, and a well executed strike emboldens the design elements. Impeccably preserved throughout. We mention a minor rim bruise between stars 6 and 7, the sole mark of any note on the coin. Census: 25 in 67, 1 finer (9/16).

Ex: *FUN Signature* (*Heritage*, 1/2011), lot 6744.

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LS, PCGS# 7853

**4423 1902 MS66 NGC.** A sharp strike prevails on this Premium Gem 1902 quarter eagle, complementing frosty yellow-gold luster. The surfaces are beautifully preserved and appealing. Finer examples of this popular type-coin issue are elusive.

**From The Twelve Oaks Collection, Part III.** NGC ID# 25LT, PCGS# 7854

**1902 Quarter Eagle, MS67  
Exceptional Aesthetic Appeal**

- 4424 1902 MS67 PCGS. CAC.** Following decades of low mintages, quarter eagle coinage increased dramatically at the start of the 20th century. This stunning Superb Gem is boldly defined with effulgent luster and exceptional aesthetic appeal. Marvelous honey-gold surfaces are nearly without fault. Population: 47 in 67 (1 in 67+), 1 finer. CAC: 17 in 67, 0 finer (9/16).  
*Ex: FUN Signature (Heritage, 1/2010), lot 6746.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LV, PCGS# 7854

- 4425 1903 MS66 PCGS.** Beautifully preserved, frosty yellow-gold luster adorns the sharp design elements and shimmering fields of this Premium Gem 1903 Liberty quarter eagle. Eye appeal is superb, ideal for type representation.  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 2688, PCGS# 7855

**1903 Two and a Half, MS67  
Frosty Type Coin**

- 4426 1903 MS67 PCGS.** A well-struck Superb Gem, among the finest seen by PCGS. This 20th century type coin displays frosty yellow-gold luster and shows no distractions. The 1903 is among the most popular issues in the series for type representation. Population: 86 in 67 (3 in 67+), 0 finer (9/16). NGC ID# 2688, PCGS# 7855

**1903 Quarter Eagle, Fully Struck MS67  
Tied for Finest at PCGS**

- 4427 1903 MS67 PCGS.** A frosty and coruscated Superb Gem, immersed in bright mint luster over vivid wheat-gold coloration with Full Details on the devices. Perfect for a high-end type collection, the 1903 is readily available in all Uncirculated grades up to (and including) MS67. Numerically finer coins are unknown at PCGS, with five such examples at NGC. PCGS population: 86 in 67 (3 in 67+), 0 finer (9/16). NGC ID# 2688, PCGS# 7855

- 4428 1904 MS66 NGC.** Although plentiful in MS66, the 1904 quarter eagle becomes scarce at the Superb Gem level. This accessible 20th century type coin displays sharp design elements amid satiny yellow-gold luster. A few truly faint grazes on Liberty's cheek are hardly discernible.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 25LV, PCGS# 7856

**1904 Quarter Eagle, MS67  
Seemingly Pristine**

- 4429 1904 MS67 PCGS.** This magnificent honey-gold Liberty quarter eagle features razor-sharp definition on the central and peripheral devices. The surfaces are immaculate with vibrant, scintillating original luster. Seemingly pristine with fantastic eye appeal. Population: 59 in 67 (4 in 67+), 1 finer (9/16).  
*Ex: New York Signature (Heritage, 6/2005), lot 6358; FUN Signature (Heritage, 1/2014), lot 6476.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25LV, PCGS# 7856

- 4430 1905 MS66 NGC.** From a substantial mintage of 217,800 pieces, the 1905 Liberty quarter eagle is a popular issue with type collectors. This delightful Premium Gem exhibits sharply detailed design elements throughout and the impeccably preserved orange-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 267S, PCGS# 7857

- 4431 1905 MS66 NGC.** Original, frosty green-gold mint luster shimmers around boldly rendered design elements on this Premium Gem 1905 quarter eagle. A few small alloy discolorations are seen, the most obvious being at 6 o'clock on the reverse border. A pleasing Liberty Head type coin.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 267S, PCGS# 7857

- 4432 1905 MS66 NGC.** Original, frosty green-gold luster illuminates the sharp design elements of this Premium Gem 20th century type coin. There are no significant abrasions, and the eye appeal is strong. The budget-conscious collector may find a finer example to be unnecessary when this piece is viewed in person.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 267S, PCGS# 7857

- 4433 1905 MS66 NGC.** Shimmering, frosty yellow-gold luster shows hints of peach-orange color in the peripheries as it illuminates beautifully unabraded surfaces. This Premium Gem 1905 quarter eagle showcases tremendous type coin appeal without breaking the bank.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 267S, PCGS# 7857

- 4434 1905 MS66 NGC.** A particularly well-preserved original "skin" gives this Premium Gem 1905 quarter eagle glowing green-gold and pale yellow hues, while complementing the sharply rendered design elements. Higher-grade examples are known, although the present coin is clearly among the finest within the MS66 level.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 267S, PCGS# 7857

- 4435 1905 MS66+ PCGS.** Frosty yellow-gold luster and a sharp strike characterize this high-end Premium Gem 1905 quarter eagle. There are no significant abrasions, and eye appeal is strong. Finer examples of this 20th century type-coin issue are infrequently available and may be out of reach for the budget-conscious collector. NGC ID# 267S, PCGS# 7857

**1905 Quarter Eagle, MS67  
Eye-Catching Representative**

- 4436 1905 MS67 PCGS. CAC.** An eye-catching beauty, this orange-gold Superb Gem boasts frosty luster and bold design definition. Pristine surfaces display only a few microscopic marks on the reverse. The Liberty quarter eagles of the early 20th century are plentiful in lower grades but are rarely seen as fine as this piece. Population: 88 in 67 (6 in 67+), 4 finer. CAC: 23 in 67, 0 finer (9/16).  
*Ex: Central States Signature (Heritage, 4/2011), lot 6372; FUN Signature (Heritage, 1/2014), 6478.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 267S, PCGS# 7857

- 4437 1906 MS66 NGC.** There is very little visible difference in quality between this Premium Gem 1906 quarter eagle and many of the pieces graded a point higher. The strike is sharp, and each side shows softly frosted yellow-gold luster. A suitable type coin for the budget-restricted gold enthusiast.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 7JW8, PCGS# 7858
- 4438 1906 MS66 NGC.** The shimmering, frosty surfaces of this Premium Gem type coin displays deepening shades of orange-gold toning from the centers toward the peripheries. There are no significant abrasions, and finer pieces are infrequently seen.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 7JW8, PCGS# 7858
- 4439 1906 MS66 NGC.** Softly frosted yellow-gold luster produces a shimmering cartwheel effect on this Premium Gem 1906 quarter eagle. The devices are sharply defined, and abrasions are almost nonexistent. The type coin appeal of this piece is strong.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 7JW8, PCGS# 7858
- 4440 1906 MS66 NGC.** Razor-sharp devices reside amid yellow-gold luster that leans toward satiny rather than deeply frosted. This 20th century Liberty Head type coin is free of obvious abrasions and showcases strong visual appeal. Finer coins are infrequently offered and may be out of reach for many collectors.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 7JW8, PCGS# 7858
- 4441 1906 MS66 NGC.** One of the late-series issues that are infinitely popular among 20th century type collectors. This Premium Gem 1906 quarter eagle displays frosty yellow-gold luster and sharp devices without distracting abrasions. A tiny allow spot appears above the eagle's head on the reverse.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 7JW8, PCGS# 7858
- 4442 1906 MS66 NGC.** The MS66 level is the highest grade in which the 1906 quarter eagle is usually available, and it is here highly sought-after by budget-conscious collectors. This frosty yellow-gold example displays a sharp strike and no significant surface flaws.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 7JW8, PCGS# 7858

**1906 Quarter Eagle  
Captivating Premium Gem**

- 4443 1906 MS67 PCGS.** Frosty mint luster coruscates across the attractive and essentially mark-free surfaces of this exceptional Premium Gem. A razor-sharp strike joins the list of accolades. Vibrant sun-gold base toning shows radiant, reddish-gold accents around the portrait for remarkable eye appeal. Population: 66 in 67 (4 in 67+), 2 finer (9/16).  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 7JW8, PCGS# 7858
- 4444 1907 MS66 NGC.** The end of the Liberty quarter eagle era is marked with a wonderful Premium Gem that exhibits brilliant yellow surfaces and frosty mint luster. Myriad die polishing lines are evident on the obverse. NGC ID# 2688, PCGS# 7859
- 4445 1907 MS66 NGC.** This vibrantly lustrous Premium Gem 1907 Liberty quarter eagle displays frosty yellow-gold luster with considerable reddish alloy discoloration on the central obverse. The strike is sharp, and there are no distracting abrasions. An unusually colored type coin.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 2688, PCGS# 7859
- 4446 1907 MS66 NGC.** As the final issue of the Liberty Head design, the 1907 quarter eagle is widely popular among type collectors. This Premium Gem example is sharply struck with mostly unabraded yellow-gold luster. The devices are frosty and contrast modestly with the satiny fields.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 2688, PCGS# 7859
- 4447 1907 MS66 NGC.** A beautifully preserved example with yellow-gold luster and sharp design elements. The satiny fields exhibit faint die polishing lines, although no mentionable abrasions are present. An ideal Liberty Head type coin.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 2688, PCGS# 7859
- 4448 1907 MS66 NGC.** It would be difficult to imagine a finer Liberty Head type coin below the Superb Gem grade level than this frosty 1907 quarter eagle. The strike is sharp, and the softly frosted surfaces are devoid of mentionable flaws. Eye appeal is outstanding.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 2688, PCGS# 7859

**1907 Quarter Eagle, MS67  
Incredible Color and Luster**

- 4449 1907 MS67 PCGS.** Fire-orange hues glow in the tangerine fields of this frosty Superb Gem 1907 quarter eagle, delivering a remarkable degree of eye appeal. The strike is sharp, and neither side exhibits noticeable flaws. As the final issue of the design, this exceptional Liberty quarter eagle represents a nearly unimprovable type acquisition. Population: 94 in 67 (5 in 67+), 1 finer (9/16). NGC ID# 2688, PCGS# 7859

**1907 Quarter Eagle, MS67  
Beautiful Final-Year Type**

- 4450 1907 MS67 NGC.** The final-year 1907 Liberty quarter eagle had the highest mintage of any issue coined after 1861. In fact, only six issues in the entire series had higher mintages than the 1907. The result is an excellent candidate for a high quality type collection. This beautiful, pinpoint-sharp example is nearly perfect with intense olive-green, rose-gold, and light yellow color over highly lustrous surfaces. NGC reports five finer submissions (9/16).  
*Ex: ANA Signature (Heritage, 8/2010), lot 5834.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 2688, PCGS# 7859

**INDIAN QUARTER EAGLES**

- 4451 1908 MS64 NGC. CAC.** Although readily available in MS64 for type purposes, the 1908 Indian quarter eagle is seldom seen in this or finer condition with a CAC endorsement. The present coin displays excellent preservation for the grade and satiny orange-gold luster. NGC ID# 288Y, PCGS# 7939
- 4452 1908 MS64 NGC. CAC.** This Choice first-year type coin is well-struck and satiny with straw-gold luster. Light field marks are all that limit the grade. The CAC green label confirms the quality.  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 9480; Central States Signature (Heritage, 4-5/2009), lot 9322.* NGC ID# 288Y, PCGS# 7939

**1908 Indian Quarter Eagle, MS65+  
Stand-Out Type Coin**

- 4453 1908 MS65+ PCGS Secure. CAC.** This sharp first-year Indian Head type coins yields frosty yellow-gold luster without any bothersome abrasions in the fields. The Plus designation and CAC endorsement confirm the outstanding quality, which rivals that of some Premium Gems on the market. The 1908 is more available in this grade than most dates due to it being well-saved at the time of issue as the first of its kind, but the present piece is a stand-out example. NGC ID# 288Y, PCGS# 7939

**1908 Indian Quarter Eagle, MS66  
Attractive First-Year Type Coin**

- 4454 1908 MS66 NGC.** Delightful khaki-gold color allows bright mint luster to gleam through the frosty surfaces. The strike on this Premium Gem 1908 is sharp throughout despite some incompleteness on the eagle's shoulder — a well-known result of the die preparation process that was encountered on the first-year Bela Lyon Pratt design — a flaw that was corrected on subsequent issues. The 1908 is challenging to locate with good eye appeal, but this sharp and attractive example has it. PCGS and NGC combined report just five numerically finer pieces (9/16). NGC ID# 288Y, PCGS# 7939

- 4455 1909 MS64 PCGS.** Satiny, deep orange-gold luster gives this Choice 1909 quarter eagle pleasing eye appeal. The strike is sharp, and abrasions are minimal. Finer examples of this early Philadelphia type coin may be out of reach for budget-conscious collectors. NGC ID# 288Z, PCGS# 7940

- 4456 1909 MS64 NGC.** The availability of the 1909 Indian Head quarter eagle in MS64 makes such pieces collectible as type coins. This satiny yellow-gold example displays a sharp strike and no major abrasions — only a few stray lines in the fields prevent a Gem designation.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 288Z, PCGS# 7940

- 4457 1909 MS64 NGC.** The surface quality of this near-Gem 1909 Indian quarter eagle surpasses expectations for the grade, although a few stray lines in the reverse field prevent a Gem designation from NGC. This piece displays a sharp strike and rich, frosty wheat-gold luster.  
**From The Twelve Oaks Collection, Part III.** NGC ID# 288Z, PCGS# 7940

- 4458 1909 MS64 PCGS.** This is a richly colored orange and olive-gold representative with no unsightly blemishes and excellent sharpness in all areas. The availability of the 1909 quarter eagle in this grade makes it highly popular as a type coin. Housed in a green label holder.  
*Ex: Long Beach Bullet Sale (Heritage, 6/2000), lot 417.* NGC ID# 288Z, PCGS# 7940

**4459 1909 MS64 PCGS.** Softly frosted yellow-gold luster gives this near-Gem 1909 quarter eagle pleasing eye appeal, while the fields show minimal abrasions. This piece is in the optimal collecting grade for the budget-conscious enthusiast. NGC ID# 288Z, PCGS# 7940

**4460 1909 MS64 PCGS.** The frosty and attractive surfaces of this Choice 1909 quarter eagle emit olive-gold highlights over the lustrous-yet-mellow, flax-gold coloration. The strike is suitably sharp for the issue, which is renowned for its above-average depiction of the Indian Head design. The fields and devices are essentially mark-free, with only a few faint lines that could possibly limit the grade. NGC ID# 288Z, PCGS# 7940

**4461 1909 MS64 PCGS. CAC.** The die deficiencies that plagued the previous year's issue were corrected in 1909. The eagle's wingtip is bold, as is the central obverse. Rich orange-gold color and frosty luster deliver terrific eye appeal, as affirmed by the CAC approval sticker. NGC ID# 288Z, PCGS# 7940

**4462 1910 MS64 NGC.** A well-struck, lightly marked near-Gem example of this popular type-coin issue, showing satiny yellow-gold mint luster. The 1910 in MS64 offers an ideal balance of quality and affordability for most collecting pursuits.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2892, PCGS# 7941

**4463 1910 MS64 NGC.** Satiny golden luster delivers rich visual appeal on this near-Gem 1910 Indian quarter eagle. A few trivial marks limit the grade but hardly distract. Finer examples are known, although this piece is ideally suited to the budget-conscious collector.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2892, PCGS# 7941

**4464 1910 MS64 NGC.** The 1910 Indian quarter eagle is a popular type-coin issue, usually available through MS64. This near-Gem displays well-struck motifs and satiny yellow-gold luster. Light marks in the reverse fields prevent a finer grade.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2892, PCGS# 7941

**4465 1910 MS64+ NGC. CAC.** A splendid example that displays straw-gold surfaces, brilliant and frosty luster, and bold design motifs. This issue is readily available in all Mint State grades through MS65, ideal for a type collection. NGC ID# 2892, PCGS# 7941

**4466 1911-D — Improperly Cleaned — NGC Details. AU.** The Denver mintmark is sharp on this olive-green and caramel-gold representative. The briefly circulated surfaces are moderately glossy, and a loupe reveals occasional unobtrusive abrasions. NGC ID# 7KR7, PCGS# 7943

**4467 1911-D PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The devices are well-detailed. The coin is labeled by PCGS as a Strong D, but it is a Weak D with only the inner opening of the mintmark faintly visible. The diagnostic wire rim along the upper-right obverse is completely hidden by the older-generation blue label holder.

**4468 1911-D — Improperly Cleaned — NGC Details. AU.** Strong D. The strike is sharp throughout, although scattered hairlines in the fields prevent a numeric grade. This satiny 1911-D quarter eagle shows bright yellow-gold coloration and satiny luster. The coin is graded AU Details, although there is almost no visible evidence of wear.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

### 1911-D Indian Quarter Eagle, AU58 Sought-After, Low-Mintage Key

**4469 1911-D AU58 NGC.** Strong D. An impressive near-Mint specimen of this low-mintage key, with sharply detailed design elements that show just the slightest trace of softness on the high points, and lightly abraded orange-gold surfaces that retain much of their original mint luster. The overall presentation is quite attractive. NGC ID# 7KR7, PCGS# 7943

### 1911-D Quarter Eagle Strong D, Near-Mint Condition

**4470 1911-D AU58 NGC.** Strong D. The elevated fields surrounding the sunken design encourages the exposed surfaces to absorb most of the marks and abrasions of brief circulation, accounting for the near-Mint grade of this example. The marks are widely scattered and minor, while plentiful luster remains in the protected areas. Some blending on the eagle's shoulder feathers confirms the assigned grade, although the eye appeal suggests a finer designation.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

### 1911-D Quarter Eagle Uncirculated Sharpness

**4471 1911-D — Improperly Cleaned — NGC Details. Unc.** A slightly subdued olive-green and chestnut-gold example. The strike is good and marks are few. The mintmark is bold. The 1911-D has less than one-fourth the mintage of any other Indian quarter eagle issue, and is universally acknowledged as the key to the series.

**1911-D Quarter Eagle, Unc Details  
Sharpness and Luster Remain**

**4472 1911-D Strong D — Improperly Cleaned — NGC Details. Unc.** This medium-gold example of the key Indian quarter eagle issue is a bit bright, yet it retains mint luster in spite of the noted light cleaning. Hairlines are few and differ little from the normal abrasions often seen on Uncirculated examples. A bold strike remains, as does the Strong D mintmark. An opportunity for the sharp-eyed bidder.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

**4473 1912 MS64 PCGS.** A sharp strike and soft, satiny wheat-gold luster give this near-Gem 1912 quarter eagle excellent appeal for the grade. No significant abrasions are seen, and a loupe reveals only a few minor grazes in the fields. Finer examples are infrequently seen and may be out of reach for most collectors. NGC ID# 7KR8, PCGS# 7944

**4474 1912 MS64 PCGS.** Beautiful tangerine, rose, lavender, and olive-gold hues give this near-Gem 1912 quarter eagle outstanding eye appeal, complementing a lack of significant abrasions. The well-struck devices further add to the attractive qualities of this type coin. Finer examples are scarce. NGC ID# 7KR8, PCGS# 7944

**4475 1912 MS64 NGC.** Bright yellow-gold luster adorns the satiny surfaces of this Choice example, while a lack of serious abrasions promotes strong eye appeal. The strike is well-impressed throughout. The 1912 is seldom available finer.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR8, PCGS# 7944

**4476 1914 MS63 NGC.** This satiny Select 1914 quarter eagle shows almost no obvious abrasions, although a loupe reveals scattered hairlines that prevent a finer grade. The design elements are well-defined, and each side exhibits pleasing yellow-gold color. This is a better date in the series and a key date in higher grades.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRA, PCGS# 7946

**4477 1914 MS63 NGC.** The visual appeal of this Select 1914 coin exceeds expectations for the grade, showing frosty rose-gold luster with greenish tints and boldly struck design elements. Light surface grazes account for the grade, although there are no individual abrasions.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRA, PCGS# 7946

**4478 1914 MS63 NGC.** Frosty rose-gold luster illuminates minimally marked surfaces on this Select 1914 Indian quarter eagle, while the design elements exhibit excellent definition. The 1914 is a key date in high grade, promoting strong demand also for more affordable examples such as the present piece.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRA, PCGS# 7946

**1914 Two and a Half, MS64  
Scarce but Collectible at This Grade**

**4479 1914 MS64 NGC.** Behind the key-date 1911-D, the 1914 Indian quarter eagle is the next issue in the series to pose a challenge for the date collector. In Gem condition, it is very nearly as scarce as the 1911-D, but enough Choice examples are certified that the date can still be acquired in pleasing condition without emptying the pocket book. This piece shows luminous bronze-gold luster and well-struck design elements. A few light, scattered marks limit the grade, but do not inhibit the overall appeal. Only 49 coins are numerically finer at NGC (9/16).  
*Ex: Houston Money Show Signature (Heritage, 12/2014), lot 3739.* NGC ID# 7KRA, PCGS# 7946

**1914 Two and a Half, MS64  
Smooth, Attractive Surfaces**

**4480 1914 MS64 NGC.** A semikey date in the series, just 240,000 pieces were struck at the Philadelphia Mint in 1914. Although near-Gem pieces are moderately available, finer coins are quite scarce. This example displays medium-gold coloration with a greenish tinge. The high fields are smooth and attractive, while the incuse design is sharply rendered. Only a few light lines are visible with a loupe. NGC reports just 49 numerically finer examples (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRA, PCGS# 7946

**4481 1914-D MS63 PCGS.** The second of just three Denver Mint issues of the Indian quarter eagle, this example displays good detail with lovely rose gold and blue toning on its light yellow surfaces. An elusive date in high grade. NGC ID# 2899, PCGS# 7947

**4482 1914-D MS64 PCGS.** Luminous prairie-gold luster glows in the fields of this Choice 1914-D quarter eagle, representative of an issue that is a major key-date rarity just one grade point finer. This piece is well-struck and shows minimal abrasions. Eye appeal is pleasing for the grade. NGC ID# 2899, PCGS# 7947

**4483 1914-D MS64 PCGS.** Just one grade point finer and this Denver issue is a major series rarity. The present near-Gem is an eye-appealing alternative for the budget-conscious collector. Frosty tan-gold surfaces are free of major abrasions and display well-struck motifs. PCGS has seen 51 numerically finer submissions (9/16). NGC ID# 2899, PCGS# 7947

**4484 1914-D MS64 PCGS.** Bright, satiny yellow-gold luster gives this Choice 1914-D quarter eagle pleasant visual appeal. A few minor ticks are not obtrusive but do limit the grade. This is a key date any finer, where PCGS has seen just 51 submissions (9/16). NGC ID# 2899, PCGS# 7947

**4485 1914-D MS64 PCGS.** Frosty luster on this Choice 1914-D quarter eagle shows hints of rose and green coloration. The strike is well-executed, and no severe abrasions are observed. This issue is seldom seen finer and is a major series key in such grades.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2899, PCGS# 7947

**1914-D Two and a Half, MS64+  
Bright Mint Frost**

**4486 1914-D MS64+ PCGS. CAC.** The 1914-D is a very scarce issue in high grades, only rivaled by the 1914 Philadelphia issue. This is a radiant example with bright mint frost that has taken on light reddish patina over each side. There are no obvious or mentionable abrasions on either side of this high-end piece. NGC ID# 2899, PCGS# 7947

**4487 1915 MS64 PCGS. CAC.** Frosty luster gives this yellow-gold 1915 quarter eagle excellent eye appeal for the grade, and the strike is sharp throughout. A small tick on the Indian's cheek contributes to the sub-Gem grade, although it is hardly bothersome. A high-end coin for the MS64 level. NGC ID# 7KRC, PCGS# 7948

**4488 1925-D MS65 PCGS.** An extraordinary Gem Indian quarter eagle representing the third and final Denver Mint issue, this piece has frosty mint luster and bold design motifs with lovely intermingled orange and blue toning. PCGS has only certified 36 finer examples (9/16). NGC ID# 7KRD, PCGS# 7949

**4489 1925-D MS65 NGC.** The availability of the '25-D quarter eagle in Gem condition makes the date highly desirable among budget-conscious type collectors. This piece displays frosty wheat-gold luster and well-defined motifs. A lack of bothersome abrasions promotes superb eye appeal. NGC lists 54 finer submissions (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4490 1925-D MS65 NGC.** Arguably the most popular type coin in the series, the 1925-D Indian quarter eagle is readily available through MS65 to suit most collecting budgets. This Gem coin displays a frosty wheat-gold obverse that appears finer than the assigned grade, paired to a similarly lustrous reverse that has a few grade-defining marks in the fields. Eye appeal is outstanding. Finer pieces are scarce.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4491 1925-D MS65 NGC.** A lustrous green-gold Gem. Impressively unabraded, and the strike is good despite slight blending within the headdress feathers. The borders exhibit a circular line from die erosion, characteristic of the series.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4492 1925-D MS65 NGC.** A pleasing Gem whose lustrous apricot-gold and lime-green surfaces lack any remotely noticeable marks. The strike is good and the eye appeal is imposing. The Indian quarter eagle series can be completed by the intermediate collector, unlike any other classic gold series.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4493 1925-D MS65 NGC.** A coruscating sea-green and butter-gold Gem. Apparent abrasions are limited to a slender line through the R in PLURIBUS. The bottom two headdress feathers are incomplete, but the remainder of the strike is sharp.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4494 1925-D MS65 NGC.** A well struck wheat-gold representative with exemplary preservation and a nice strike. This lustrous Gem will satisfy the most demanding gold type collector. A costly acquisition any finer.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4495 1925-D MS65 PCGS.** A sharply struck and coruscating Gem with attractive pumpkin-gold surfaces. The strike is sharp aside from unimportant incompleteness within the lower headdress feathers.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRD, PCGS# 7949

**4496 1926 MS65 NGC.** The availability of this issue in Gem condition makes it a popular type candidate, and the rarity of finer coins further strengthens demand. This piece displays frosty yellow-gold luster and well-struck devices. No major abrasions are present. NGC records 22 higher-grade submissions (9/16).  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRE, PCGS# 7950

**4497 1926 MS65 NGC.** Splendid surface preservation combines with frosty straw-gold luster to deliver powerful eye appeal on this Gem type coin. The devices are well-struck. NGC has seen 22 numerically finer representatives (9/16), coins which are far out of reach for the average collector.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRE, PCGS# 7950

**4498 1926 MS65 NGC.** Dusky caramel-gold shades encompass this lustrous Indian Gem. Minor field contact east of the M in UNUM precludes a finer grade. The lowest headdress feathers show only inconsequential incompleteness.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KRE, PCGS# 7950

**4499 1927 MS65 NGC.** An olive-gold Gem that boasts unmarked fields and an intricate strike. Although the 1927 is regarded as a type issue, it is surprisingly rare any finer than the present piece.  
*From The Twelve Oaks Collection, Part III.* NGC ID# BUTL, PCGS# 7951

**4500 1927 MS65 NGC.** A beautiful peach-gold Indian quarter eagle type coin. Nicely struck and lustrous with above average appeal for the MS65 level, which may provide the optimal balance between cost and quality.  
*From The Twelve Oaks Collection, Part III.* NGC ID# BUTL, PCGS# 7951

**4501 1927 MS65 NGC.** A charming apricot-gold Gem. The well struck and coruscating surfaces display minimal imperfections. Within wealthy families, Uncirculated Indian quarter eagles were popular Christmas presents during the 1920s.  
*From The Twelve Oaks Collection, Part III.* NGC ID# BUTL, PCGS# 7951

**4502 1928 MS65 NGC.** A khaki-gold example. Lustrous and nicely struck with minimally marked fields and moderate contact on the Indian's jaw and cheekbone. The borders display a few tiny gray flecks.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 289E, PCGS# 7952

**4503 1929 MS65+ PCGS. CAC.** This is the final issue of the Indian quarter eagle design, and an exquisite Gem with outstanding eye appeal. Both sides display frosty yellow-gold luster and excellent design definition. PCGS has only certified four finer examples (9/16). NGC ID# 289F, PCGS# 7953

## THREE DOLLAR GOLD PIECES

- 4504 1854 MS62 NGC.** Radiant yellow-gold luster is the chief visual attribute of this Uncirculated first-year type coin, illuminating well-defined motifs and showing few abrasions. Only light handling marks in the fields and on Liberty's cheek prevent an even finer grade.  
*From The Walter Freeman Collection, Part II.* NGC ID# 25M3, PCGS# 7969

### 1854-O Three Dollar Gold, AU53 Only New Orleans Three

- 4505 1854-O AU53 PCGS.** This famous issue is the only New Orleans three dollar gold piece, struck in the debut year for the denomination. Just 24,000 of these pieces were minted, and only a few hundred survive today. This example has matte-like yellow surfaces with traces of mirrored luster in the protected areas. Trivial circulation marks on each side limit the grade. NGC ID# 25M5, PCGS# 7971

### 1854-O Three Dollar, AU53 Low-Mintage Southern Gold Type

- 4506 1854-O AU53 NGC. Variety 2.** The lapped die state of this desirable issue, the only New Orleans emission of the three dollar denomination. Just 24,000 pieces were struck, though a number appear to have been saved despite the high face value. Most survivors are in XF and AU grades. The present wheat-gold example is generally smooth with a few wispy marks near the date and the occasional mint-made obverse strike-through on the obverse margin.  
*From The Fenn Family Collection, Part II.* NGC ID# 25M5, PCGS# 7971

### 1860 Three Dollar Gold, MS61 Low 7,036-Coin Mintage

- 4507 1860 MS61 PCGS.** The Philadelphia Mint coined a mere 7,036 three dollar gold pieces in 1860, and survivors are elusive, especially in Mint State grades. This attractive piece has brilliant yellow surfaces with satin luster and slight field-to-device contrast. Population: 16 in 61, 70 finer (9/16). NGC ID# 25ME, PCGS# 7980

### 1862 Three Dollar Gold Piece, AU53 Deep, Even Reddish Patina

- 4508 1862 AU53 PCGS.** The entire mintage of 5,750 strikes for circulation were delivered by the Coiner on February 6, 1862. This piece displays even reddish patina over each side. There is slight striking softness noted on the high points of Liberty's hair as well as the leaves in the wreath on the reverse. None of the abrasions present are large or distracting. NGC ID# 7K5P, PCGS# 7983

- 4509 1869 AU55 PCGS.** The 1869 is a better date in the three dollar gold series, struck to the limited extent of only 2,500 pieces without a significant high-grade survival. This Choice AU representative displays bold motifs and deep orange-gold color. Remnants of prooflike mirroring appear in the protected regions of the fields. Population: 31 in 55, 59 finer (9/16). NGC ID# 25MR, PCGS# 7990

- 4510 1878 AU58 NGC.** A lovely straw-gold example that displays substantial luster across smooth surfaces. The often-seen variety with minor die doubling on the upper right portion of the wreath. The upper loops of the 8s in the date are lightly repunched.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

- 4511 1878 AU58 PCGS.** An attractive orange-gold type coin with a hint of wear on the hair over the ear. No marks merit comment, but a small, interesting strike-through is on the right obverse field. A minor doubled die reverse variety, with the pick-up point along the right edges of the right-side cotton leaves.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

- 4512 1878 AU58 PCGS.** Slight wear on Liberty's eyebrow confirms brief use in circulation, but this peach-gold example is only lightly abraded, and the legends and wreath teem with luster. A minor doubled die reverse variety, apparent on the right-side cotton leaves.  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 4482, which realized \$1,725.* NGC ID# 25MZ, PCGS# 8000

**4513 1878 MS61 NGC.** This lovely Mint State 1878 three dollar gold piece is an excellent type candidate, with satiny yellow surfaces and brilliant luster. A few faint hairlines and scattered marks pose no concern to the prospective buyer.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

**4514 1878 MS62 NGC.** The mintage of 82,304 circulation strike three dollar gold pieces in 1878 was the second highest mintage of any issue. More than 5,000 of these coins have been certified, with an average grade just below MS60. This above-average example has brilliant luster and frosty yellow surfaces with excellent eye appeal.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

**4515 1878 MS62 NGC.** A beautiful type coin that offers a bold strike and original olive-gold toning. The lustrous fields are virtually unabraded, and the cheek displays only delicate contact.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

**4516 1878 MS62 NGC.** A well-struck type coin. The sun-gold obverse is semiprooflike, while the green-gold reverse exhibits cartwheel sheen. The obverse border has a few rose-red alloy spots. The reverse periphery displays delicate marks.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

### 1878 Three Dollar Gold, MS63

#### Ideal Type Coin

**4517 1878 MS63 NGC.** Nice quality for the grade, where the minimally marked surfaces brim with mint luster. Liberty's headdress and hair strands are sharply defined, while the reverse bowknot and leaves display above-average definition. Pleasing yellow-gold color deepens slightly around the raised elements.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

### 1878 Three Dollar Gold, MS63

#### Strong Eye Appeal for the Grade

**4518 1878 MS63 NGC.** The reverse is die doubled, most apparent on the RS in DOLLARS and at the right-side wreath on the outer edges of the cotton leaves. This is a gleaming and lustrous Select Uncirculated example of the quintessential date for three-dollar type. The obverse strike is sharp, while the reverse shows slight weakness at the bowknot along with a few field marks. Appealing wheat-gold color includes some deeper orange accents in sheltered areas.

*From The Twelve Oaks Collection, Part III.* NGC ID# 25MZ, PCGS# 8000

### 1878 Three Dollar Gold, MS64

#### Attractive Luster

**4519 1878 MS64 NGC.** Yellow-gold luster delivers a familiar shimmering cartwheel effect on this Choice 1878 three dollar gold piece. The wreath bow is weakly struck as always, but the obverse is well brought up. A few minor abrasions are not obtrusive. The 1878 is a favorite type-coin issue, boasting a plentiful Mint State population. NGC ID# 25MZ, PCGS# 8000

**4520 1883 — Improperly Cleaned — NGC Details. Unc.** The 1883 has a tiny mintage of 900 business strikes and 89 pieces. This nicely struck and unworn representative lacks any noticeable abrasions, but the olive-gold surfaces are slightly subdued. NGC ID# 25N6, PCGS# 8005

**4521 1888 AU53 NGC.** Moderate luster remains in the fields of this About Uncirculated 1888 three dollar gold piece, illuminating well-detailed motifs. The bright yellow-gold surfaces offer smooth patina with slight high-point friction as is consistent with the grade. NGC ID# 25NB, PCGS# 8010

## EARLY HALF EAGLES

### 1808 Five Dollar, AU Details

#### BD-4, Wide Date

**4522 1808 Wide 5D, BD-4, High R.3 — Tooled — PCGS Genuine. AU Details.** Bass-Dannreuther Die State c/a, clashed near the ear. This sun-gold example is hairlined but shows relevant marks only on the field near star 6, and on Liberty's neck below the ear. No tooling is readily apparent. Wear is minimal, but detectable on the margins of the wings. The strike is intricate except on the dentils near star 9. NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

1808 Half Eagle, AU Details  
BD-4, Wide 5D Variety

- 4523** 1808 Wide 5D, BD-4, High R.3 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State c/a. The surfaces are somewhat muted from the cleaning, with a few scattered hairlines and minor marks particularly on the obverse. Nice in-hand appeal remains, bolstered by attractive greenish-gold coloration and sharply defined motifs. The obverse die was lapped, although shield stripes remain clearly visible beneath the ear. The reverse die was later used on the 1809/8, raising suspicion that the 1808 BD-4 variety was actually struck in 1809. NGC ID# 25PA, PCGS# 507605 Base PCGS# 8102

CLASSIC HALF EAGLES

- 4524** 1834 Plain 4 AU58 NGC. Breen-6502, McCloskey 2-A, R.1. A sun-gold Borderline Uncirculated Classic type coin. The strike is bold except on the forehead curls, and luster dominates the borders and devices. Minor marks are distributed but none merit individual mention.  
*From The Walter Freeman Collection, Part II.* NGC ID# 25RR, PCGS# 8171

1835 Half Eagle, McCloskey 1-B  
Uncirculated Details

- 4525** 1835 — Improperly Cleaned — NGC Details. Unc. Breen-6504, McCloskey 1-B, R.3. The semiprooflike butter-gold fields are mildly bright, but this unworn and fully struck Classic type coin will nonetheless impress the veteran collector. No marks are noticeable, and luster accompanies design elements. The shield is clashed on the portrait, most apparent near the ear and LIBERTY. NGC ID# 25RV, PCGS# 8173
- 4526** 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. A sharply struck representative of the final year Classic five type. The honey-gold surfaces are smooth aside from a thin bright mark near the E in UNITED. Clashed below the eagle's beak, usual for the die variety.  
*Ex: FUN Signature (Heritage, 1/2008), lot 4170.* NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

1839-D Five Dollar, VF35  
Remarkable Quality for the Grade

- 4527** 1839-D VF35 PCGS. Variety 2-A. The 1839-D is a distinctive one-year type coin. Both the figure of Liberty and the obverse mintmark set it apart from the five dollar Liberty issues that follow. The mintage was 18,939 pieces with an estimated survivorship of 220-225 coins in all grades. This is quite a remarkable coin that appears to have completely original surfaces. Each side is primarily yellow-gold with a significant presence of reddish patina noted in the fields and over the high points of the devices. The surfaces are also remarkably free from the usual abrasions, the only exception is a long, shallow mark above the eagle's head. Exceptional quality for the grade.  
*From The Walter Freeman Collection, Part II.* NGC ID# 25S9, PCGS# 8193

- 4528** 1840 Narrow Mill AU55 PCGS. Mint State examples of the 1840 half eagle are rare, thus increasing demand for high-end AU coins. This Choice About Uncirculated representative displays sharp detail with slight chatter in the fields. Some luster remains around the peripheries. Population: 30 in 55, 28 finer (9/16). NGC ID# 25SA, PCGS# 8194

1840-C Half Eagle, XF40  
First Year With Reverse Mintmark

- 4529** 1840-C XF40 NGC. Variety 1. A bold die crack travels from the rim through the I in AMERICA and the arrowheads. This North Carolina branch mint issue represents the first year of the modified portrait design and the first time the mintmark was placed on the reverse. Examples are very scarce in XF condition or better. Red-gold colors this typically struck 1840-C half eagle. Surfaces marks are numerous, though not overly distracting as is often the case. Census: 12 in 40, 64 finer (9/16). NGC ID# 25SD, PCGS# 8196

---

1840-D Five Dollar, Choice XF

- 4530** 1840-D Tall D XF45 PCGS. **Variety 3-B.** A charming and original green-gold Choice XF Dahlonega half eagle. The strike is excellent for the remote branch facility, and mentionable marks are confined to a nick on the reverse rim near the D in UNITED. An early, scarce issue with a production of only 22,896 pieces. Population: 17 in 45, 35 finer (9/16). NGC ID# 25SG, PCGS# 8198

---

1840-O Half Eagle, Near-Mint  
Small O, Pleasing Surfaces

- 4531** 1840-O Narrow Mill AU58 PCGS. **Variety 3.** Small O. A charming caramel-gold near-Mint New Orleans five. The strike shows moderate blending at the centers, as usual for the Southern facility, but the surfaces exhibit only incidental contact. Rare in the present quality. Population: 6 in 58, 8 finer (9/16). NGC ID# 25SK, PCGS# 8200

- 4532** 1852 MS62 NGC. With more than a half million pieces struck, the 1852 is one of the more frequently encountered dates in high grades among No Motto half eagles. That being said, there are still not all that many pieces available if even a fraction of the collectors who now collect silver dollars were to turn their attention to this series. This coin appears finer than its stated grade, even though it is a bit deficient in luster. Both sides are remarkably clean except for a couple of marks over the eagle's head, and the devices are well struck on both obverse and reverse. Census: 32 in 62, 27 finer (9/16). NGC ID# 2Y7R, PCGS# 8250

---

1859-D Half Eagle, XF45  
Rare Medium D Variant

- 4533** 1859-D Medium D XF45 PCGS. **Variety 45-EE.** This is a very rare variety, easily distinguished by the closeness of the the top-left of the D mintmark to the branch tip above. Only 175-225 pieces are estimated extant today out of the mintage of 10,366 pieces. This example displays rich reddish-tinted surfaces with a noticeable outline of mint luster around the devices. A number of small abrasions are seen as well as a few medium-sized marks here and there. NGC ID# 25VD, PCGS# 8282

- 4534** 1859-D Medium D — Obverse Damage — NGC Details. **AU. Variety 44-HH.** A rare Dahlonega issue with a low production of 10,366 pieces. This peach-gold example displays plentiful pockets of luster. A bright scrape between star 2 and Liberty's nose accounts for the NGC disclaimer, but there are no other remotely mentionable abrasions. NGC ID# 25VD, PCGS# 8282

- 4535** 1861 AU58 PCGS. Always a favorite issue for No Motto type, the 1861 is readily available in all but the highest grades. Examples with overt eye appeal and natural surfaces are less common but more desired. This still-lustrous example displays near-Mint quality and olive highlights over brassy-gold surfaces. A sharp and vibrant coin, with mostly small marks including a minor dig between stars 12 and 13 but with great eye appeal. NGC ID# 25VK, PCGS# 8288

---

1873-CC Five Dollar, VG10  
Only 55-65 Pieces Believed Extant

- 4536** 1873-CC VG10 PCGS. **Variety 2-B.** Only 7,416 pieces were produced of the 1873-CC five dollar, and Doug Winter has estimated that somewhere in the range of 55-65 coins may be extant in all grades. More than half of the survivors grade VF or lower. Heavy, but even wear shows over each side of this VG piece and there are no mentionable marks. Light reddish patina is also present. *From The Walter Freeman Collection, Part II.* NGC ID# 25WL, PCGS# 8331

- 4537** 1878-S MS62 PCGS. A rare issue in Mint State, the 1878-S half eagle is particularly elusive with fully original color. This MS62 coin displays softly frosted luster and deep orange-gold and amber-peach surfaces that exhibit only minimal chatter. The strike is appreciably sharp. Population: 28 in 62 (2 in 62+), 16 finer (9/16). NGC ID# 25X6, PCGS# 8347

- 4538** 1881-S MS65 NGC. The 1881-S five is rarely seen in Gem condition and is almost unknown finer. This piece displays frosty yellow-gold luster and sharp design elements. No significant abrasions are seen. A curved die line within the loops of the mintmark gives the illusion of a recut S. Census: 23 in 65, 1 finer (9/16). NGC ID# 25XE, PCGS# 8357

**1882-S Five Dollar, MS65+  
Seldom Available So Fine**

**4539 1882-S MS65+ NGC.** The 1882-S is a plentiful issue overall, but Gem examples are conditionally scarce. This Plus-graded coin displays a sharp strike and frosty rose-gold luster. The luminous surfaces are devoid of mentionable abrasions, and the eye appeal is outstanding. Census: 32 in 65 (3 in 65+), 3 finer (9/16). NGC ID# 25XJ, PCGS# 8360

**4540 1891-CC MS60 PCGS. CAC. Variety 2-A.** Rich orange-gold toning confirms the originality of this sharply struck Carson City half eagle. The lustrous surfaces display marks consistent with the designated grade. Certified in a green label holder.  
*From The Walter Freeman Collection, Part II.* NGC ID# 25Y5, PCGS# 8378

**4541 1891-CC MS61 NGC. Variety 1-A.** A sharply struck Carson City half eagle with original apricot-gold toning and vibrant cartwheel luster. Marks are relatively few for the third party grade. A late die state with several delicate cracks across the margins. NGC ID# 25Y5, PCGS# 8378

**4542 1901-S MS65+ NGC.** A plentiful issue among Liberty half eagles and ideal for a type collection. This Gem exhibits brilliant lemon-yellow surfaces and frosty luster with a few trivial, grade-consistent marks. NGC ID# 25YX, PCGS# 8404

**1902-S Half Eagle, MS66  
Well-Preserved Fields**

**4543 1902-S MS66 PCGS. CAC.** A lovely green-gold Liberty five type coin. The strike is precise, and dynamic luster sweeps unabraded fields. The portrait displays delicate marks. A small alloy spot is centered above the eagle's head. Population: 34 in 66 (2 in 66+), 7 finer. CAC: 12 in 66, 4 finer (10/16). NGC ID# 25YZ, PCGS# 8406

**4544 1903 MS64 PCGS.** The brassy, yellow-gold surfaces display a pleasing greenish tint throughout this attractive, Choice Uncirculated 1903 half eagle. Cartwheel mint luster shines brightly across the lightly abraded fields and sharply struck devices. A small, solitary gray spot above the neck truncation is noted, the only evidence of a copper alloy staining that most 1903 half eagles possess. The strike is sharp on both sides. Population: 75 in 64 (1 in 64+), 40 finer (9/16). NGC ID# 25Z2, PCGS# 8407

**4545 1906-S MS64+ PCGS.** This sharp, lustrous yellow-gold half eagle displays only a few minor grazes, and thus the Plus-designation. The 1906-S is seldom available in MS64 and rarely is it seen finer. Population: 41 in 64 (3 in 64+), 17 finer (10/16). NGC ID# 25ZB, PCGS# 8415

**4546 1908 MS64+ PCGS. CAC.** Frosty yellow-gold luster appears on each side of this high-end Choice 1908 half eagle. The strike is sharp, and grade-limiting marks on the obverse are minimal. Ideal for type representation. NGC ID# 25ZE, PCGS# 8418

**INDIAN HALF EAGLES**

**4547 1908-D MS63 NGC.** Original, satiny luster delivers warm antique-gold color on this lightly marked 1908-D half eagle. Slight strike softness is seen on the lower headdress feathers, as is typical of this Denver issue. NGC ID# 93KW, PCGS# 8511

**4548 1908-D MS63 NGC.** Sea-green shades visit the obverse border, but the remainder of this satiny Select example is orange-gold. Minor field marks are distributed. A lower mintage Denver issue, nonetheless collectible in nice Uncirculated grades.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4549 1908-D MS63 NGC.** A lemon-gold example with glimpses of apple-green on the reverse field. Abrasions are refreshingly minimal for the Select level. The lower headdress shows incompleteness customary for this somewhat scarcer issue.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4550 1908-D MS63 NGC.** This lower mintage Indian five has a well preserved obverse and minor scattered marks across the reverse field. The margins display traces of dark debris, but the lustrous surfaces are predominantly apricot-gold.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4551 1908-D MS63 NGC.** Traces of dark patina on the borders confirm the originality of this inoffensively abraded half eagle. The strike is good except on portions of the headdress. The 1908-D mintage is only a small fraction of its 1909-D successor.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4552 1908-D MS63 NGC.** The survival rate for any issue is an important consideration, and is determined by dividing the certified population by the mintage. For the 1908-D, the mintage was the fourth lowest, but the certified population is the third highest of any Indian half eagle. The centers of this Select Mint State piece are light yellow, with deeper yellow near the borders.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4553 1908-D MS63 NGC.** This rose-gold 1908-D Indian half eagle exhibits frosty luster and excellent eye appeal, with dusky peripheral toning. A splendid example for a first-year type collector, or an advanced half eagle specialist.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4554 1908-D MS63 NGC.** Dusky copper toning frames the brilliant yellow surfaces of this Select Mint State 1908-D Indian half eagle, while scattered marks limit the grade.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4555 1908-D MS63 NGC.** As a rule, first-year 1908-D Indian eagles are sharply struck, and this example is certainly no exception. The surfaces are brilliant yellow with satin luster.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

**4556 1908-D MS63 NGC.** Bela Lyon Pratt's distinctive Indian design was introduced on quarter eagles and half eagles in 1908, and the first-year coins are highly popular. This Select Mint State piece has frosty yellow luster with a trace of orange toning along the front of the neck.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511

- 4557 1908-D MS63 NGC.** With production halted after just 148,000 half eagles were struck, the 1908-D Indian five is a scarce issue. This pleasing Select Mint State example has brilliant yellow luster and excellent eye appeal.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 93KW, PCGS# 8511
- 4558 1908-D MS64 PCGS. CAC.** Sharp peripheral elements contrast with slight weakness on the lower headdress feathers of this Choice 1908-D half eagle, while the satiny surfaces yield original green-gold toning. Abrasions are minimal for the grade. PCGS has seen only a dozen numerically finer coins, NGC just five. CAC: 51 in 64, 1 finer (9/16). NGC ID# 93KW, PCGS# 8511
- 4559 1908-S MS61 NGC.** This Mint State 1908-S is well-struck and satiny with medium yellow-gold color. Abrasions are minimal, consisting of mainly handling marks in the fields. The 1908-S is a challenging issue in Uncirculated condition, coming from a mintage of only 82,000 pieces.  
*From The Walter Freeman Collection, Part II.* NGC ID# 65K3, PCGS# 8512
- 4560 1909-D MS64 NGC.** A lovely Choice Mint State Indian half eagle, this 1909-D exhibits satiny luster and brilliant yellow-gold surfaces. An excellent candidate for a date or type collection.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4561 1909-D MS64 NGC.** This issue is a great candidate for a type collection, having a mintage of 3.4 million coins. This Choice Mint State piece has subdued luster with deep orange-gold surfaces.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4562 1909-D MS64 NGC.** Almost one-fourth of the entire Indian half eagle production were struck at Denver in 1909. This Choice Mint State survivor exhibits satiny yellow surfaces and delicate rose overtones.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4563 1909-D MS64 NGC.** A well struck green-gold near-Gem. The lustrous surfaces are smooth aside from minor field marks below the chin. The right obverse has a raised rim, likely caused by a slight collar die misalignment.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4564 1909-D MS64 NGC.** Blended caramel-gold and lime-green toning adorns this lustrous and precisely struck Choice Indian five. Marks are absent aside from minor contact below the eagle's beak.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4565 1909-D MS64 NGC.** A lustrous and beautiful caramel-gold near-Gem. The strike is precise except on the eagle's front shoulder. The dies are moderately rotated, unusual for this popular type issue.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4566 1909-D MS64 NGC.** A crisply struck and lustrous peach-gold representative. We note a beveled area on the obverse rim near star 6, but the remainder of the surfaces are attractive.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4567 1909-D MS64 NGC.** A lustrous caramel-gold near-Gem. The strike is bold and both sides are well preserved. The 1909-D has more than double the mintage of any other Indian half eagle issue, but high-end examples are prized by type collectors.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4568 1909-D MS64 NGC.** The peripheries display a few areas of light gunmetal toning, but the fields and motifs are peach-gold. This lustrous and well struck half eagle is uncommonly free from contact for its third party grade.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4569 1909-D MS64 NGC.** A beautiful olive-green and pumpkin-gold near-Gem. The lustrous surfaces are well struck and impressively devoid of any apparent abrasions. The 1909-D will never be rare, but examples of the present quality are always in demand.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4570 1909-D MS64 NGC.** A lovely orange-gold Choice Indian type coin. Well struck and coruscating with marks mostly limited to minor contact on the field near the profile.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4571 1909-D MS64 NGC.** This peach-gold near-Gem has a crisp strike and radiant luster. Minor marks near the L in PLURIBUS provide the sole mentionable contact. Despite a bountiful mintage, the 1909-D is surprisingly scarce any finer.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DJ, PCGS# 8514
- 4572 1909-D MS64+ PCGS.** This greenish-gold near-Gem Indian half eagle will prove popular with specialists and type collectors alike. Both sides have strong design details and frosty mint luster with great eye appeal. NGC ID# 28DJ, PCGS# 8514
- 4573 1909-D MS64 NGC. CAC.** A plentiful issue in the Indian half eagle series, and therefore an ideal type coin. This near-Gem has light yellow surfaces and frosty mint luster with excellent eye appeal. NGC ID# 28DJ, PCGS# 8514
- 4574 1909-D MS64 PCGS. CAC.** Light blue toning resides on the brilliant yellow surfaces of this impressive near-Gem. Satiny cartwheel luster accompanies the sharp strike of this lovely half eagle. NGC ID# 28DJ, PCGS# 8514
- 4575 1909-D MS64 NGC. CAC.** The 1909-D is a favorite type-coin issue. This CAC-approved near-Gem displays a bold strike and satiny orange-gold luster. Light, scattered marks in the fields determine the grade. NGC ID# 28DJ, PCGS# 8514
- 4576 1909-S MS61 NGC.** Rich sun-yellow color with elements of peach in parts of the fields appears on each side of this Mint State 1909-S five. The coin is faintly abraded overall but still attractively lustrous and appealing.  
*Ex: Summer FUN Signature (Heritage, 7/2009), lot 1672.* NGC ID# 25ZL, PCGS# 8516
- 4577 1910-D MS63 PCGS.** Frosty, original orange-gold luster bathes this Select 1910-D five in luminous hues that highlight fully struck design elements. A lack of serious abrasions gives this piece above-average eye appeal for the grade. PCGS and NGC combined list fewer than 100 numerically finer submissions (9/16). NGC ID# 28DL, PCGS# 8518
- 4578 1910-S MS62 NGC.** The 1910-S is a better date in Uncirculated condition and a rarity above MS62. This collectible example displays a sharp strike and original olive-gold luster. Scattered abrasions determine the grade. NGC has seen 34 numerically finer examples (9/16). NGC ID# 28DN, PCGS# 8519
- 4579 1910-S MS62 NGC.** The 1910-S Indian half eagle had a fairly substantial mintage of more than 770,000 pieces, but Mint State survivors are disproportionately scarce, and are rarely seen above the MS62 grade level. This sharply struck coin is lightly abraded, but is nonetheless appealing for its undeniably original patina that includes shades of olive, honey, and russet. NGC has graded 34 numerically finer examples (9/16). NGC ID# 28DN, PCGS# 8519
- 4580 1910-S MS62 PCGS.** Despite a mintage of more than 770,000 pieces, the 1910-S half eagle is a better date in Uncirculated condition. This collectible MS62 coin displays a sharp strike and satiny wheat-gold luster. Light, scattered abrasions account for the grade, but none pose individual distraction. PCGS has seen 53 finer submissions (10/16), coins which will be out of reach for many collectors. NGC ID# 28DN, PCGS# 8519

**4581 1911-D AU50 PCGS.** The mintmark is worn but clear on this AU 1911-D half eagle. The bright olive-gold surfaces show scattered abrasions, but the design elements are well-defined. This is a challenging issue in high grade due to its small mintage of 72,500 pieces. NGC ID# 28DR, PCGS# 8521

**4582 1914 MS63 NGC.** A lovely Select Mint State Indian half eagle, this piece exhibits frosty yellow-gold luster with faint greenish tendencies, and a splash of coppery-orange toning at the upper reverse.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DU, PCGS# 8527

**4583 1914 MS63 NGC.** An exceptional example with brilliant yellow surfaces and minimal handling marks. The 1914 had the eighth lowest mintage of any Indian half eagle, and this issue is quite popular with collectors. Seemingly undervalued at current levels.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 28DU, PCGS# 8527

**4584 1914-D MS63 PCGS.** Bright luster radiates from both sides of this Select half eagle. Yellow-gold surfaces are tinged with wisps of light tan color and exhibit crisply defined design features, including the Indian's hair and bonnet and the eagle's shoulder and mintmark. Small marks on the Indian's cheek and in the fields preclude a higher grade.  
*Ex: Baltimore Signature (Heritage, 3/2009), lot 3046.* NGC ID# 28DV, PCGS# 8528

#### 1914-D Indian Half Eagle, MS64 Lustrous and Appealing

**4585 1914-D MS64 NGC.** Bright mint luster shines beneath attractive khaki-gold coloration, with fleeting orange accents in the deep recesses of the incuse design. While the 1914-D is moderately available among the mintmarked half eagles at the near-Gem level, it is very scarce any finer. This example is sharply struck and free of any serious marks, with a few light ticks that define the grade. NGC reports just 15 numerically finer coins (9/16). NGC ID# 28DV, PCGS# 8528

#### 1914-S Half Eagle, Pleasing MS62 Seldom Available Finer

**4586 1914-S MS62 PCGS.** The San Francisco Mint issued 263,000 circulation strike half eagles in 1914, struck from bullion with either a greenish-gold color or with orange-gold shades. This example is the latter, with gleaming luster and deep-orange accents. Three horizontal, shallow scrapes in the left obverse field exist between the bridge of the nose and the headdress band, yet the overall strike and surface quality suggest an even finer grade. A scarce issue whenever it approaches the Select Uncirculated level, with PCGS reporting just 63 coins at the MS63 grade or finer (10/16). NGC ID# 28DW, PCGS# 8529

**4587 1915 MS64 PCGS.** A lovely wheat-gold Choice Indian type coin. The strike is precise, and marks are confined to the second U in PLURIBUS. The final Philadelphia issue until 1929, the 1915 is collectible in the present grade but Gems approach a five figure cost. NGC ID# 28DX, PCGS# 8530

#### 1915-S Five Dollar, MS61 Better Issue in Mint State

**4588 1915-S MS61 PCGS.** The 1915-S is scarce in any Uncirculated grade, even at the current MS61 level. The usual culprits are bagmarks — of which the present coin has its share — but the satiny, orange-gold luster gives this example nice eye appeal. Lilac overtones add to the strong visual allure. Some deep-gray build up confirms the originality of the well-struck surfaces. NGC ID# 25ZR, PCGS# 8531

#### 1915-S Five Dollar, MS61 Challenging in Any Mint State

**4589 1915-S MS61 PCGS.** The grading services are understandably conservative in their rating of 1915-S half eagles, given the rarity of the issue in Mint State grades. This example shows a few light lines and surface chatter, but the luster is strong across the medium orange-gold fields and devices. The strike is sharp everywhere except on the lower headdress feathers. Nice eye appeal for the MS61 level. NGC ID# 25ZR, PCGS# 8531

**4590 1916-S MS61 NGC.** The penultimate issue in the Indian five series, the 1916-S has a reasonable mintage of 240,000 pieces, but is surprisingly scarce in better Mint State grades. This peach-gold example shimmers with luster and is less abraded than anticipated. NGC ID# 28DY, PCGS# 8532

### LIBERTY EAGLES

**4591 1842 Small Date XF40 PCGS.** A well-defined orange-gold example. Moderate marks are noted on the reverse field and on the portrait above the shoulder. The Small Date *Guide Book* mintage is only 18,623 pieces, and third-party census data suggests the variety is scarcer than its higher mintage (but similarly priced) Large Date counterpart. NGC ID# 262M, PCGS# 8585

**4592 1842 Small Date AU55 NGC.** A small mark in the right obverse field and another above the eagle's head are the only distracting marks on this lustrous orange-gold eagle. Census: 17 in 55 (1 in 55+★), 16 finer (9/16). NGC ID# 262M, PCGS# 8585

**4593 1845 AU53 NGC.** Vibrant green-gold surfaces exhibit scattered, trivial handling marks on both sides of this pleasing AU example. The 1845 is a scarce issue among Liberty eagles, having a mintage of only 26,153 coins. NGC ID# 262U, PCGS# 8592

**4594 1849 AU55 NGC. Breen-6888.** All four date digits are widely repunched southwest, readily apparent within the upper loops of the 8 and 9. An early die state with only a nascent vertical crack through the crosslet of the 4. The green-gold surfaces retain plentiful pockets of luster. We note a rim mark above the STA in STATES. NGC ID# 2635, PCGS# 8601

**4595 1850 Small Date AU50 PCGS. CAC.** The scarcer Small Date 1850 eagle variety, this piece showing bold detail and original olive-gold patina. Luster remains in the fields, while an old scrape on the eagle's neck is the only notable abrasion. Finer examples of the date are elusive. Population: 18 in 50, 25 finer. CAC: 1 in 50, 5 finer (9/16). NGC ID# 2638, PCGS# 8604

**1852-O Ten Dollar, AU50  
Notably Scarce New Orleans Issue**

**4596 1852-O AU50 PCGS. CAC. Variety 1.** Housed in a green label holder with CAC endorsement, this AU50 example is original and attractive for the grade. Brassy-gold color is tinged with green and only lightly abraded for a New Orleans issue that saw 10 points of wear. Mint luster and traces of prooflike surface remain around the stars and reverse legend. A prominent "shield ring" is seen on the reverse. Just 18,000 pieces were struck, although the 1852-O does not become truly scarce until it crosses into the About Uncirculated level. Population: 14 in 50, 30 finer. CAC: 2 in 50, 4 finer (9/16). NGC ID# 263D, PCGS# 8609

**4597 1853 AU58 NGC.** The 1853 eagle is scarce in Mint State, making this AU58 coin appealing to the budget-conscious collector. The strike is sharp, and each side displays original orange-gold patina with lustrous fields. Close examination of the reverse reveals what appears to be an old pencil drawing that outlines the eagle. NGC ID# C82G, PCGS# 8610

**4598 1857-O — Cleaning — PCGS Genuine. XF Details. Variety 1.** A much better New Orleans No Motto issue with a scant production of 5,500 pieces. PCGS has certified only 67 pieces in all grades (as of 9/16) with many duplicate submissions over the past three decades. This is a well-defined and lightly abraded lemon-gold example with a glossy appearance from an untoward wipe. NGC ID# 263U, PCGS# 8623

**4599 1858-O — Improperly Cleaned — NCS. AU Details. Variety 1.** A much better No Motto New Orleans issue with a mintage of just 20,000 pieces. This lemon-gold example is slightly glossy, but mentionable marks are limited to a reverse edge nick at 5 o'clock, and a field cluster in front of the eagle's beak. NGC ID# 55GX, PCGS# 8626

**1860 Ten Dollar, AU58  
Very Scarce at This Grade**

**4600 1860 AU58 PCGS. Bulging Bun subtype.** With the exception of the 1861 issue, all No Motto eagles struck between 1855 and 1866 are scarce-to-rare in any condition, but especially so at the About Uncirculated or finer level. This near-Mint 1860 ten is a very scarce coin, even though a few pieces (nine coins to be exact) were recovered from the *S.S. Republic*. The present coin does not appear to be a seawater survivor given its attractive, orange-gold coloration. The surfaces are lightly abraded but retain nearly full mint luster. An exceptionally sharp strike remains. Population: 5 in 58, 9 finer (9/16). NGC ID# 2644, PCGS# 8631

**1860-O Ten Dollar, AU53  
Bright Semireflective Fields**

**4601 1860-O AU53 NGC. Variety 2.** The 1860-O ten is moderately available in AU grades, even though only 11,100 pieces were struck. But in overall rarity only 115-135 examples are estimated extant in all grades. This piece is typical of many 1860-O tens as it displays bright semiprooflike fields. The lemon-yellow surfaces are lightly abraded and there is no notable softness of details in the centers, just light high-point friction. NGC ID# 2645, PCGS# 98631

**4602 1868-S VF20 PCGS.** An apricot-gold representative of this rare Old West issue. The surfaces display hairlines but are void of mentionable marks. A mere 13,500 pieces were struck, and PCGS has certified only 55 examples in all grades. Certified in a green label holder. **From The Walter Freeman Collection, Part II.** NGC ID# 264P, PCGS# 8654

**4603 1869-S VF30 PCGS.** A scarce Reconstruction-period San Francisco issue with a small mintage of 6,430 pieces. This coin is sharply detailed for the grade and displays satiny antique-gold coloration. Minor surface chatter is consistent with the grade. Population: 3 in 30, 37 finer (9/16). **From The Walter Freeman Collection, Part II.** NGC ID# 264S, PCGS# 8656

**4604 1873-S VF20 NGC. CAC.** With one exception, San Francisco struck eagles every year through 1889. But mintages remained very low until 1879. The 1873-S production was just 12,000 pieces, and practically none were saved by collectors. This apricot-gold example is minimally abraded and shows substantial plumage, especially on the left (facing) wing. NGC ID# 53M7, PCGS# 8668

**4605 1878-S AU55 PCGS.** The 1878-S ten is elusive in AU condition and rare in Mint State. This Choice About Uncirculated coin displays original olive-gold coloration and well-detailed motifs. Scattered surface chatter is typical of the issue and grade. Population: 16 in 55 (1 in 55+), 12 finer (10/16). NGC ID# 265L, PCGS# 8682

**4606 1881-CC XF45 NGC. Variety 1-A.** The smooth butter-gold surfaces display noticeable luster. A charming Choice XF Carson City eagle. The 1881-CC has a mintage of only 24,015 pieces, and unlike the post-1889 issues from the facility, few have survived in Uncirculated grades. NGC ID# 265X, PCGS# 8692

### 1881-O Eagle, AU55 Only 8,350 Coins Struck

**4607 1881-O AU55 PCGS. Variety 1.** The 1881-O has the lowest mintage among the three elusive New Orleans issues between 1880 and 1882. Of the 8,350 coins struck, perhaps 200 examples survive. This orange-gold eagle displays accents of lavender color. The fields show the usual number of abrasions for the issue. Merging over the high-points also characteristic, though detail is remarkably strong over the eagle's feathers, talons, and fletchings, and all stars have visible centers. Population: 21 in 55, 16 finer (9/16). NGC ID# 265Y, PCGS# 8693

**4608 1883-S AU58 PCGS.** The scarcity of the 1883-S ten in Mint State puts added pressure on AU58 coins, such as the present piece. This example displays sharp detail and wheat-gold coloration with moderate luster in the fields. Light surface chatter accompanies the grade. Population: 17 in 58, 58 finer (9/16). NGC ID# 2669, PCGS# 8702

**4609 1884 MS62 NGC.** Coming from a mintage of only 76,860 pieces, the 1884 eagle is a scarce date in Uncirculated condition. This collectible MS62 example displays a sharp strike and radiant yellow-gold luster. Light, scattered abrasions on the obverse determine the grade. Census: 22 in 62, 13 finer (9/16). NGC ID# 554S, PCGS# 8703

**4610 1886 MS62 Prooflike NGC.** Tied with four others as the finest of 11 Prooflike coins at NGC (10/16). This piece is sharply struck and displays outstanding eye appeal. Yellow-gold surfaces exhibit the usual scattering of small abrasions that define the MS62 grade level. NGC ID# 266F, PCGS# 78708

## LIBERTY EAGLES

**4611 1887 MS62 PCGS.** Uncirculated 1887 ten dollar gold pieces are scarce, and coins grading finer than the present MS62 piece are extremely rare. This piece displays well-struck motifs and frosty wheat-gold luster. Light, scattered abrasions limit the grade. Population: 29 in 62, 8 finer (9/16). NGC ID# 266H, PCGS# 8710

**4612 1887-S MS63 PCGS. CAC.** Cartwheeling yellow-gold luster has a blush of rose-gold in the centers of this Select 1887-S eagle. The devices are sharp, and light, scattered abrasions do not overly detract. The 1887-S is scarce in this grade, and PCGS records only five finer representatives (10/16). NGC ID# 5552, PCGS# 8711

**4613 1888 MS62 PCGS.** The Philadelphia Mint struck millions of ten dollar pieces between 1880 and 1882, but mintages of the denomination were comparatively low for the remainder of that decade. A sharply struck honey-gold example with one mentionable mark noted above the hairbun. Population: 47 in 62, 8 finer (9/16). NGC ID# 266V, PCGS# 8712

**4614 1888-S MS63 PCGS.** Usually available in MS63, the 1888-S eagle becomes extremely rare any finer, where PCGS records only five submissions (9/16). This collectible Select example displays sharp devices and frosty orange-gold luster. Light surface grazes do not overly detract. NGC ID# 266M, PCGS# 8714

**4615 1888-S MS63 PCGS. CAC.** This Select 1888-S ten stands apart from its peers with a CAC endorsement, and only five numerically finer coins are reported at PCGS (9/16). The strike is sharp, and luminous rose-gold luster adorns the surfaces. Light chatter on the obverse contributes to the grade. NGC ID# 266M, PCGS# 8714

### 1890-CC Eagle, AU58 Pleasing Carson City Ten

**4616 1890-CC AU58 NGC. CAC.** It was several years between Carson City eagle mintages — no ten-dollar gold pieces were struck from 1885 to 1889. Resumption of eagle coinage in 1890 resulted in just 17,500 pieces struck, many of them destined for European holdings. This example perhaps saw brief circulation and shows light chatter across the surfaces from transport and handling. There are no major marks to cite, with plentiful mint luster remaining and well-struck devices. CAC endorsed based on quality and eye appeal. NGC ID# 266S, PCGS# 8718

### 1890-CC Liberty Eagle Appealing Near-Mint Example

**4617 1890-CC AU58 NGC. CAC. Variety 1-A.** Slight die doubling on IN GOD WE TRUST is diagnostic of this variety, the only known die pair for the issue. As a date, the 1890-CC is fairly scarce in AU and finer grades, having a mintage of only 17,500 pieces. This AU58 coin exhibits substantial luster in the recesses, with sharp motifs and only slight wear over the high points. A few faint grease stains in the lower obverse dentils (as struck), attest to the originality of the surfaces. NGC ID# 266S, PCGS# 8718

**4618 1891-CC AU58 PCGS. Variety 1-A.** A charming Carson-City type coin. The apricot-gold surfaces are well struck and display considerable luster. Marks are minor for the grade, aside from an unobtrusive diagonal line on the cheek.  
*From The Walter Freeman Collection, Part II.* NGC ID# 266U, PCGS# 8720

**1891-CC Eagle, MS61  
Sharp Mint State Type Coin**

- 4619 1891-CC MS61 NGC.** Always the first choice for Carson City ten-dollar type, the 1891-CC boasts a mintage of 103,732 pieces and it is readily available in all grades up to the Select Uncirculated level. This gleaming MS61 coin displays a sharp strike and fulsome cartwheel luster. Minor field chatter dictates the grade, yet the coin has a Mint-fresh allure and the eye appeal is terrific. Natural sun-gold coloration beams from every angle. NGC ID# 266U, PCGS# 8720

**1892-CC Ten Dollar, AU58  
FS-501, Tripled Motto**

- 4620 1892-CC Tripled Die Reverse, FS-501, AU58 NGC. Variety 1-A.** Substantial bright mint luster illuminates the borders of this briefly circulated yellow-gold example that shows light accents of reddish patina around the margin on the obverse. Significantly scarcer than its 1891-CC predecessor. The 9 in the date is lightly repunched. As on all 1892-CC tens, IN GOD WE TRUST is die tripled. NGC ID# 266W, PCGS# 8722

**1892-CC Ten Dollar, AU58 Prooflike  
Only Example Certified as Prooflike**

- 4621 1892-CC Tripled Die Reverse, FS-801, AU58 Prooflike NGC. Variety 1-A.** The 1892-CC is considerably scarcer than its 1891-CC predecessor, especially with prooflike surfaces. While NGC has certified 16 1891-CC tens as Prooflike, only the present 1892-CC has been designated Prooflike by NGC (9/16). The butter-gold surfaces retain substantial flash, and are minimally abraded aside from minor clusters of marks on the lower left obverse field. NGC ID# 266W, PCGS# 78722

- 4622 1892-O MS62 PCGS. CAC. Variety 1.** A well struck caramel-gold example. The borders and devices are lustrous, and none of the many small abrasions merit individual description. A low mintage New Orleans issue rarely encountered any finer. CAC: 27 in 62, 0 finer (9/16). NGC ID# 266X, PCGS# 8723

- 4623 1893-O MS62 PCGS. Variety 1.** A lemon-gold representative of this low mintage and conditionally challenging Motto New Orleans issue. Cartwheel luster dominates both sides, and the crisply struck surfaces display marks commensurate with the grade. NGC ID# 2673, PCGS# 8727

- 4624 1893-S MS63 PCGS.** The caramel-gold surfaces are well struck, and marks are moderate aside from a cluster below the hairbun. The 1893-S is a better, low mintage issue that is virtually unobtainable above the MS63 level. NGC ID# 2674, PCGS# 8728

- 4625 1895-O MS62 PCGS. CAC. Variety 2.** A relatively low mintage New Orleans issue. Most Uncirculated examples are bagmarked, and none have been certified finer than MS63 by PCGS. The present MS62 1895-O is well struck and displays luster across the stars and devices. The fields exhibit distributed small marks. NGC ID# 2679, PCGS# 8733

- 4626 1897-S MS62 PCGS. Ex: Rive d'Or Collection.** Original greenish-gold luster rolls over satiny surfaces on this example, illuminating sharp design elements. Light surface chatter determines the grade. The 1897-S ten is a better date in Uncirculated condition and is rarely seen finer than MS62. Population: 31 in 62, 22 finer (9/16). NGC ID# 267F, PCGS# 8739

- 4627 1901-O MS62 PCGS. Variety 1.** A beautiful sun-gold representative of this low mintage and popular New Orleans issue. Dynamic luster and smooth surfaces combine with an exemplary strike to create uncommon eye appeal.

*Ex: FUN Signature (Heritage, 7/2012), lot 5034, which realized \$1,955.*

**From The Fenn Family Collection, Part II.** NGC ID# 267R, PCGS# 8748

- 4628 1902-S MS64+ NGC.** Mint-fresh, glittering luster makes this high-end near-Gem example a visual treat. There are no singular abrasions, although a few slight grazes in the fields prevent the full MS65 designation. The strike is razor-sharp. This is a coin that will blend almost seamlessly into an otherwise Gem-graded collection. NGC ID# 267U, PCGS# 8751

- 4629 1903 MS63 PCGS.** An active cartwheel effect and lightly abraded yellow-gold surfaces offer pleasing visual appeal on this Select 1903 eagle. This date comes from a limited mintage of slightly more than 125,000 pieces and is scarce in this middle Uncirculated grade. Finer examples are particularly elusive. NGC ID# 267V, PCGS# 8752

**1903 Eagle, Conditionally Rare MS64+  
Exceptional Borderline Gem**

- 4630 1903 MS64+ PCGS. CAC.** Twin honors of the PCGS Plus designation and CAC endorsement move this coin up in prestige given the scarcity of 1903 eagles in Gem or finer condition. The surfaces are extremely frosty and Choice, radiating mint luster from the smooth and pinpoint-sharp, rich-gold surfaces. Only a handful of tiny, ticklike marks prevent a higher grade. Population: 47 in 64 (2 in 64+), 8 finer. CAC: 4 in 64, 1 finer (9/16). NGC ID# 267V, PCGS# 8752

- 4631 1903-O MS62 PCGS. CAC. Variety 2.** Rich orange toning aids the eye appeal of this Motto New Orleans type coin. The strike is sharp, and luster rolls across the borders and devices. Moderate marks are confined to the vicinity of Liberty's chin. NGC ID# 267W, PCGS# 8753

- 4632 1907 MS64 PCGS. CAC.** This fully struck yellow-gold Liberty Head type coin displays semiprooflike fields and radiant cartwheel luster. A few trivial abrasions determine the grade. PCGS has seen only 32 numerically finer submissions (10/16). NGC ID# 2688, PCGS# 8763

**1907-S Eagle, MS63  
Conditionally Scarce This Fine**

- 4633 1907-S MS63 NGC.** The 1907-S eagle is a rare bird in Select Uncirculated and finer conditions — a somewhat inexplicable circumstance, since 210,500 pieces were struck. Garrett and Guth consider the 1907-S ten “one of the most underrated of all U.S. coins (of any denomination),” quite a statement for a 20th century issue. The population figures support the scarcity. This example is lustrous and sharp except for incompleteness of the hair curls framing Liberty’s face. Pleasing rich-gold color covers both sides. Census: 15 in 63, 7 finer (9/16). NGC ID# 38EP, PCGS# 8765

**INDIAN EAGLES**

- 4634 1907 No Motto MS62 PCGS. Ex: Ayers Collection.** Satiny orange-gold luster gives this Mint State No Motto type coin distinctive eye appeal. A sharp strike and minimal abrasions for the grade further contribute to its positive characteristics. *From The Walter Freeman Collection, Part II.* NGC ID# 28GF, PCGS# 8852

**1908 Indian Ten, MS64  
First Year With Motto Issue**

- 4635 1908 Motto MS64 PCGS.** The IN GOD WE TRUST motto was left off the initial Saint-Gaudens design for the Indian eagles, but was restored in 1908, a date that exists in both styles. Representing the first year of the design for type collectors, this Choice Mint State piece has pleasing surfaces and frosty orange-gold luster. NGC ID# 28GJ, PCGS# 8859
- 4636 1909 MS63 PCGS.** Greenish-gold color, seen on each side of this Select Philadelphia ten dollar gold piece, is typical for the issue. Well-struck devices and softly shimmering luster are additional attributes. The 1909 is exceedingly elusive in MS64 and above. NGC ID# 28GM, PCGS# 8862
- 4637 1909 MS63 PCGS.** Only some light chatter in the fields limits the grade on this Select 1909 Indian ten, showing vibrant yellow-gold luster and well-defined motifs. Finer examples of this date are elusive. NGC ID# 28GM, PCGS# 8862

- 4638 1909-D MS61 NGC.** The 1909-D Indian eagle is a better date in Uncirculated condition and is genuinely rare above MS63. This collectible MS61 coin displays a bold strike and original orange-gold luster. Scattered abrasions account for the grade. NGC ID# 28GN, PCGS# 8863

- 4639 1909-S MS60 PCGS.** The 1909-S is a better date in Uncirculated condition. This collectible lower-end example displays a sharp strike and lustrous olive-gold surfaces. Heavy abrasions are consistent with the grade. NGC ID# 28GP, PCGS# 8864

- 4640 1910 MS64 PCGS.** The 1910 eagle is elusive in Gem condition. This accessible near-Gem displays boldly struck motifs and frosty wheat-gold luster. A few trivial marks determine the grade but are not obtrusive. NGC ID# 28GR, PCGS# 8865

**1910 Eagle, MS64+  
Strongly Defined Type Coin**

- 4641 1910 MS64+ PCGS.** The 1910-P claims a significantly smaller mintage than the 1910-S, but it is far more accessible in high grades. This issue ranks among the most collectible emissions in the series through MS64. Examples are even available in MS65, and this Plus-designated representative very nearly qualifies for that grade. Glimmering frost and yellow-gold color blend over each side. The fields are generally clean with a small mark near ST in TRUST and another on the eagle’s shoulder. A strongly defined type coin. NGC ID# 28GR, PCGS# 8865

**1911-D Indian Ten, AU53  
Scarce Low-Mintage Issue**

- 4642 1911-D AU53 PCGS.** A minimally marked caramel-gold representative that displays moderate wear on the left border of the eagle’s front wing. The 1911-D has the lowest mintage of the Indian series. Just 30,100 pieces were issued, and most certified examples are in circulated grades. The issue commands a large premium relative to the 1911-S, which has a moderately higher production but lower third party populations. NGC ID# 28GU, PCGS# 8869
- 4643 1911-S AU55 PCGS.** With a mintage of only 51,000 pieces, the 1911-S ten is scarce in Mint State. This collectible Choice AU coin balances grade and affordability. The devices are sharp and show slight high-point friction. The fields remain partially lustrous despite scattered abrasions. Original olive-gold and peach-orange color offers pleasant eye appeal. NGC ID# 28GV, PCGS# 8870
- 4644 1914 MS63 PCGS.** This piece is fully struck and lustrous with original orange-gold coloration. Light, scattered abrasions limit the grade, but none are individually significant. The 1914 is a better date in high grade, infrequently available finer than the present coin. NGC ID# 28H2, PCGS# 8875

**4645 1914 MS63 PCGS.** Splendid orange-gold toning is augmented by occasional hints of ocean-blue. Booming luster and a precise strike further confirm the quality. Minor marks are present, but inconsequential for the designated grade. Certified in a green label holder. NGC ID# 28H2, PCGS# 8875

**4646 1914-D MS63 PCGS.** Satiny golden luster illuminates well-detailed motifs on this Select 1914-D Indian ten. Each side is lightly abraded, but there are no severe distractions. The 1914-D is a slightly better date in the finer Mint State grades, but examples in MS63 and lower levels are obtainable for the budget-conscious collector. NGC ID# 28H3, PCGS# 8876

---

**1914-S Ten Dollar, MS62  
Popular Mintmarked Eagle**

**4647 1914-S MS62 PCGS.** Most 1914-S Mint State survivors are attractive and well-produced, traits shared by this pleasing example that displays green-gold color with rose-gold highlights. The surfaces are frosty with microgranular texture and strongly lustrous as a result. A bit of blending at the eagle's shoulder to its trailing leg is noted, but the strike is otherwise sharp. NGC ID# 28H4, PCGS# 8877

---

**1915-S Indian Eagle, Appealing AU58  
Low-Mintage, Better Date**

**4648 1915-S AU58 NGC.** The low mintage of just 59,000 pieces makes the 1915-S more challenging than any of the surrounding S-Mint dates in near-Mint or full Mint State condition. This example retains a large amount of mint luster across both sides, where abrasions are remarkably few. Sharp definition remains on the headdress, with evidence of brief circulation on the eagle's shoulder and trailing leg. An appealing borderline Uncirculated Indian ten with attractive natural, orange-gold patina. NGC ID# 28H6, PCGS# 8879

---

**1915-S Ten Dollar, AU58  
Low Mintage, Conditionally Rare**

**4649 1915-S AU58 NGC.** A low mintage of 59,000 pieces ensures the scarcity of the 1915-S ten. A majority of survivors are in circulated grades, which suggests that issue was released into the West Coast economy, instead of exported to foreign bank vaults. The present near-Mint example displays vibrant cartwheel luster and offers smooth olive-gold surfaces. A trace of wear on the forehead curls limits the grade, but not the eye appeal. NGC ID# 28H6, PCGS# 8879

---

**1916-S Ten Dollar, MS62+  
Pleasing Mint Luster**

**4650 1916-S MS62+ PCGS.** Finely granular surfaces display lustrous, light-to-medium gold color across both sides. A moderate mintage of 138,500 pieces puts the 1916-S midway on the rarity scale of Indian tens (neither plentiful nor rare), especially at the present grade level. This borderline Select coin shows Mint-fresh appeal, yet the strike is incomplete on the eagle's shoulder and surrounding feathers. NGC ID# 28H7, PCGS# 8880

**4651 1932 MS64+ PCGS. CAC.** Thick, frosty yellow-gold luster delivers a vibrant and appealing cartwheel effect on this high-end Indian Head type coin. The fields are almost flawless, although a few tiny marks on the eagle's wing and Liberty's cheek prevent the full Gem grade. The strike is sharp. This is a coin that will please many collectors. NGC ID# 28HB, PCGS# 8884

---

**LIBERTY DOUBLE EAGLES**

**1850 Double Eagle, Choice XF**

**4652 1850 XF45 NGC. CAC.** A charming green-gold representative of the first collectible double eagle date. Refreshingly devoid of objectionable abrasions, and high point wear is moderate. Luster emerges from protected areas. The twenty dollar and gold dollar denominations were direct results of the 1849 California Gold Rush. NGC ID# 268F, PCGS# 8902

**1852 Twenty Dollar, AU55**  
**Lustrous and Appealing**

**4653 1852 AU55 NGC.** Liberty's cheek is relatively smooth and only minor abrasions visit the fields of this frosty, Choice About Uncirculated double eagle. Mint luster remains in protected areas on both sides. Always in demand as an obtainable Type One Liberty twenty, the 1852 attracts the attention of date and type collectors in equal measure. This is a pleasing, briefly circulated yellow-gold example with nice in-hand appeal. NGC ID# 268K, PCGS# 8906

**4654 1852-O — Improperly Cleaned — NGC Details. XF. Variety 1.** New Orleans double eagles are elusive relative to demand, since only the first four O-mint issues appear regularly at auction. This caramel-gold representative is well defined and displays glimmers of luster. The surfaces are mildly glossy, and a small rim bump is noted near the 1 in the date. NGC ID# 268L, PCGS# 8907

**1853/2' Twenty Dollar, Choice XF**  
**Scarce FS-301 Variety**

**4655 1853/2' FS-301 XF45 NGC.** Recutting within the lower loop of the 3 in the date is traditionally regarded as a remnant of an underdigit 2, although the variety's status as an overdate has been contested in recent years. The die lump below the R in LIBERTY provides confirmation of FS-301, which is often confused with repunched date varieties Breen-7160 and Breen-7161. This yellow-gold example has microgranular surfaces that show only one mentionable mark, a minor edge knock at 9 o'clock on the reverse. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**4656 1854 Small Date AU53 NGC.** The usually encountered variety of 1854 double eagle, this pleasing AU example exhibits light yellow surfaces with scattered handling marks that are expected for the grade. NGC ID# 268R, PCGS# 8911

**1855 Twenty Dollar, AU53**

**4657 1855 AU53 NGC.** The wingtips and shoulder curl show slight wear, but luster dominates the reverse margin, and individually outlines the obverse stars. This apricot-gold Type One twenty is well struck and displays moderate marks on the left obverse field. The remainder of the coin is nicer than anticipated for the designated grade. NGC ID# 268V, PCGS# 8914

**4658 1856-S XF45 PCGS. Variety 17O.** Struck from a die pair associated with the S.S. *Central America* shipwreck, though the provenance of the present lot is unknown. The caramel-gold surfaces have a slight matte texture and retain noticeable luster. Minor marks are scattered and inoffensive. NGC ID# 2692, PCGS# 8919

**1857 Double Eagle, Choice AU**  
**Underappreciated Type One Issue**

**4659 1857 AU55 NGC.** One might understandably assume that a mintage of 439,375 coins makes the 1857 double eagle an available issue. However, only about 1,300 pieces are believed to have survived. Winter calls this one of the most underappreciated Type One double eagles. Green and yellow-gold surfaces emit glints of soft mint luster. Stars 5 through 13 exhibit full centers, while the high points of the central devices show moderate friction, as expected. Lightly marked. NGC ID# 2693, PCGS# 8920

**1857-S Double Eagle, AU55**  
**Strongly Struck No Motto Representative**

**4660 1857-S AU55 NGC.** This light green and yellow-gold No Motto twenty retains glints of original mint luster within the design recesses. The motifs are razor-sharp with a bit of friction over the hair bun. The 1857-S was famously discovered in vast quantities on board the wreckage of the S.S. *Central America*. Nearly all coins were in Uncirculated condition. We can neither confirm nor deny the nautical origin of this Choice AU representative. NGC ID# 2696, PCGS# 8922

**1858-S Twenty Dollar, AU53  
Original Khaki-Gold Surfaces**

- 4661 1858-S AU53 PCGS. CAC.** This khaki-gold double eagle maintains glints of luster in the hidden areas and offers strong detail despite a trace of high-point rub. Each side is lightly peppered with small abrasions, including two linear depressions below the eagle's left wing. Attractive, CAC-approved examples of the 1858-S No Motto twenty are exceedingly difficult to find. Most coins circulated heavily and shows signs of cleaning, damage, or other impairments. We expect this lot to generate excitement among knowledgeable specialists. CAC: 37 in 53, 36 finer (9/16). NGC ID# 2699, PCGS# 8925

**1858-S Twenty Dollar, AU55  
Strongly Struck**

- 4662 1858-S AU55 NGC.** Unlike the 1857-S, this San Francisco issue has not benefited greatly from the recovery of shipwreck contents. Its population has remained static in the face of hoard discoveries, save for 60 pieces salvaged from the wreckage of the S.S. *Republic*. The 1858-S is scarce in all grades, but particularly so in in Choice AU. Uncirculated examples are exceedingly rare. This luminous Type One twenty boasts a bold strike. Abrasions are small and undistracting, lightly scattered over medium yellow-gold surfaces. NGC ID# 2699, PCGS# 8925

**1861 Twenty Dollar, AU58  
Perfect No Motto Type Candidate**

- 4663 1861 AU58 NGC. CAC.** This mass-produced No Motto double eagle was struck to the extent of nearly 3 million coins, converted from a large influx of California gold. Consequently, the 1861 is a favorite among type enthusiasts. Razor-sharp motifs display a trace of friction that prevents a fully Uncirculated assessment, but this partly lustrous near-Mint example is no less appealing for it. A prominent mark appears next to the U in UNITED. NGC ID# 269G, PCGS# 8932

**1862-S Double Eagle, AU50  
Repunched Date**

- 4664 1862-S AU50 NGC. Breen-7214.** The 86 in the date is repunched. Winter writes: "Less than 10% show repunching on the 86 in the date. This variety is still not widely connected but it stands a good chance of being accepted by specialists due to its ease of recognition." This About Uncirculated No Motto double eagle is reddish-gold with small abrasions over each side, consistent with short-lived circulation on the West Coast. Detail is good for the Type One design with light high-point merging. NGC ID# 269N, PCGS# 8938

- 4665 1865-S AU53 NGC.** Small S mintmark. A lightly circulated Civil War double eagle. Peach-tinged luster outlines design elements. The surfaces are only moderately abraded, despite a small hit beneath the right (facing) wingtip. NGC ID# 269V, PCGS# 8944

**1869-S Twenty Dollar, AU58  
Rarely Offered in Higher Grades**

- 4666 1869-S AU58 NGC.** From a mintage of 686,750 coins, the 1869-S is moderately available through AU55. Near-mint examples are scarce, and truly Uncirculated survivors are rarely offered. This yellow-gold Type Two representative is surprisingly lustrous with a faint greenish tinge. Wispy marks appears over each side. Well-defined. NGC ID# 26A6, PCGS# 8956

**1870-S Double Eagle, AU58  
Scarce and Pleasing Type Two**

- 4667 1870-S AU58 PCGS.** A rarity in full Mint State, the 1870-S shows few survivors at any level despite a mintage approaching 1 million pieces. This example retains a generous amount of radiant mint luster over lightly abraded surfaces. The strike is bold despite a short time in circulation. There are no serious marks, although clusters of tiny scrapes exist on either side of the date. PCGS reports a mere 80 Uncirculated coins in all grades combined (9/16). NGC ID# 26A9, PCGS# 8959

**1870-S Double Eagle, AU58  
High Quality Circulated Example**

- 4668 1870-S AU58 NGC.** This is a lovely example with satiny luster and exceptional surfaces. A few faint abrasions and a trace of rub on the high points are all that prevent a full Mint State grade assessment. Nearly every one of those coins minted, almost a million in San Francisco, were either exported or placed in circulation, and few survived in any grade. NGC ID# 26A9, PCGS# 8959

**1871-S Double Eagle, AU58  
Type Two Design**

- 4669 1871-S AU58 PCGS.** Exceptional eye appeal is created through nearly full luster, excellent design definition, and minimal surface marks. Heavy marks are expected on the open surfaces of these large gold coin, but they are conspicuously absent on this lovely piece. A great opportunity for the specialist or type collector. NGC ID# 26ND, PCGS# 8962

**1872-CC Double Eagle, AU Details**

- 4670 1872-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** Portions of the obverse are glossy from a wipe, but the reverse appears original. This apricot-gold representative is only lightly abraded given its brief stint in Old West circulation. An early and lower mintage issue. Three die marriages are known from the production of 26,900 pieces. Variety 1-A is somewhat more available than Variety 1-B and Variety 2-A. NGC ID# 26AE, PCGS# 8964
- 4671 1872-S AU58 NGC.** Due to the scarcity of Uncirculated pieces, the 1872-S double eagle is highly sought-after in the finer AU grades. The present near-Mint coin displays well-defined motifs and lustrous fields. Yellow-gold patina exhibits expected abrasions. NGC ID# 26AF, PCGS# 8965

- 4672 1873 Closed 3 AU58 NGC.** As expected on these large gold coins, myriad grade-consistent surface marks are evident on both sides, but none stand out from the crowd. This lovely yellow-gold twenty has brilliant luster and no appreciable wear. NGC ID# 26AL, PCGS# 8966

- 4673 1873 Open 3, Doubled Die Obverse, FS-101, MS62 NGC. CAC.** The die doubled Open 3 obverse, showing a noticeable spread on LIBERTY. This sharp, dramatically lustrous MS62 example might have garnered a higher grade were it not for a moderate graze on Liberty's jaw. Nonetheless, the aesthetic appeal is superb for the grade. PCGS# 148749 Base PCGS# 8967

- 4674 1873 Open 3, Doubled Die Obverse, FS-101, MS62 NGC. CAC.** Mint-fresh, frosty yellow-gold luster ensures eye-catching visual appeal on this CAC-approved Open 3 twenty, making it stand out from its peers. The strike is sharp, and light, scattered abrasions are limited to the obverse. LIBERTY is die doubled on this die pairing. PCGS# 148749 Base PCGS# 8967

- 4675 1873 Open 3, Doubled Die Obverse, FS-101, MS62 NGC. CAC.** Boasting frosty, radiant, original mint luster, this sharply struck 1873 Open 3 twenty packs a high degree of eye appeal into a numeric grade that typically comes unsightly. Scattered abrasions are quite minor and unobtrusive. The obverse is noticeably die doubled on LIBERTY. PCGS# 148749 Base PCGS# 8967

- 4676 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. CAC.** LIBERTY is die doubled on this variety. The Open 3 logotype was used for most 1873 double eagles, although lower-end Mint State pieces with original luster and decent eye appeal are scarce. This Plus-graded, CAC-endorsed coin showcases vibrant, frosty luster and a sharp strike. Scattered abrasions are minimal for the grade. PCGS# 148749 Base PCGS# 8967

- 4677 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. CAC.** Die doubling is most obvious on LIBERTY but is also discernible along the top of the coronet. This Plus-graded Open 3 double eagle shows radiant, frosty yellow-gold luster and a sharp strike. Light marks in the left obverse field are the primary obstacle preventing a finer grade but pose minimal distraction for the current designation. PCGS# 148749 Base PCGS# 8967

- 4678 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. CAC.** CAC-endorsed with a Plus designation, this Open 3 1873 double eagle showcases a sharp strike and frosty original mint luster that offers strong eye appeal for the grade. The obverse shows light, scattered abrasions, and the reverse has a grease streak (as struck) on the eagle's right (facing) wing. LIBERTY is die doubled on the obverse. PCGS# 148749 Base PCGS# 8967

- 4679 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. CAC.** LIBERTY is die doubled on this Open 3 obverse. The combination of the Plus designation and the CAC green label separate this piece from the majority of lower-end Mint State examples, and the eye appeal generated by the frosty, vibrant luster is exceptional. Light, scattered abrasions account for the grade. PCGS# 148749 Base PCGS# 8967

- 4680 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ NGC. CAC.** A well-struck example of this double die obverse, Open 3 variety, showing vibrant mint-fresh luster and a dazzling cartwheel effect. Light, scattered abrasions are not enough to severely limit the grade, as the Plus designation and CAC green label affirm. Eye appeal surpasses expectations for the grade. PCGS# 148749 Base PCGS# 8967

- 4681 1873-S Open 3 AU55 NGC.** Small S. The Open 3 is the scarcer of the two 1873-S varieties, due to the duration in die delivery between Philadelphia and San Francisco. This lightly circulated honey-gold example exhibits the expected number of small field abrasions. NGC ID# 26AM, PCGS# 8979

**1874-CC Twenty Dollar, XF45**  
**An Affordable Type Two Issue**

- 4682 1874-CC XF45 PCGS. Variety 5-A.** Ex: Rainy Day Collection. With a mintage of 115,085 pieces, the 1874-CC twenty is an available CC twenty to locate from VF through AU grades. This Choice XF shows even wear over the high points of the design and subtle, variegated rose and lilac patina on each side. The only marks of note are a couple above the eagle on the reverse.  
**From The Walter Freeman Collection, Part II.** NGC ID# 26AP, PCGS# 8971

**1874-S Liberty Double Eagle, MS61**  
**Branch Mint Type Two Issue**

- 4683 1874-S MS61 PCGS.** Scattered marks and grazes on both sides of this Mint State 1874-S twenty determine the grade but do not defeat the eye appeal occasioned by great luster and no trace of high-point wear. These Type Two twenties, particularly from the Carson City and San Francisco branch mints, are extremely popular among collectors. NGC ID# 26AR, PCGS# 8972

**1875 Liberty Double Eagle, MS62**  
**Popular Type Two Issue**

- 4684 1875 MS62 PCGS.** With a reported mintage of 295,740 pieces, the 1875 Liberty double eagle is the only gold denomination of the date that was produced in anything like normal numbers. This impressive MS62 example offers well-detailed design elements and lustrous orange-gold surfaces that are lightly marked, aside from two obverse scrapes, one on the neck, and another in the right obverse field. PCGS has graded 81 numerically finer examples (9/16). NGC ID# 2547, PCGS# 8973

**1875-CC Twenty Dollar, VF30**  
**Original, CAC-Approved Example**

- 4685 1875-CC VF30 PCGS. CAC. Variety 5-A.** This midgrade twenty dollar gold piece would stand in well as a representative from the Carson City Mint. The 1875-CC had a smaller mintage than several other issues from that facility, including the 1874-CC, but it is more available across the board. Impressively, the star radials are completely delineated with full centers. Liberty's portrait and the central portion of the eagle show a predictable degree of blending. Orange-gold surfaces are fairly smooth and undeniably original — a rare quality among branch mint gold coins from this period. NGC ID# 26AT, PCGS# 8974

**1875-CC Double Eagle, XF45**  
**Widely Available CC Type Coin**

- 4686 1875-CC XF45 PCGS. CAC. Variety 4-A.** One of the secondary characteristics is plainly evident: the die line above the E in AMERICA. Like the 1874-CC, the '75-CC is also widely available. This example displays rich, reddish patina over each side and numerous small abrasions scattered across both obverse and reverse. Slight, even wear is seen over the devices.  
**From The Walter Freeman Collection, Part II.** NGC ID# 26AT, PCGS# 8974

**1876-CC Twenty Dollar, XF45**  
**Still Faintly Reflective**

- 4687 1876-CC XF45 PCGS. Variety 3-A.** Ex: Rainy Day Collection. The secondary diagnostic for this variety is the "worm" in Liberty's hair, still plainly evident even after 15 points of wear. The fields on each side are bright and retain glimpses of semireflectivity, suggestive of what a brightly prooflike coin this must have been when Uncirculated. Even reddish patina covers each side with the expected numerous but small abrasions.  
**From The Walter Freeman Collection, Part II.** NGC ID# 26AW, PCGS# 8977

---

**1876-CC Liberty Double Eagle, XF45**  
**Original and Pleasing Surfaces**

- 4688 1876-CC XF45 NGC. Variety 2-C.** Always in demand for Carson City type, the 1876-CC twenty is moderately available in both circulated and Mint State grades to represent the Type Two design. This Choice XF example is both smooth and attractive, with far fewer marks than expected for a CC double eagle. The appealing orange-gold surfaces retain glimpses of luster and sharp definition on the motifs. There are no serious marks or abrasions for the assigned grade. NGC ID# 26AW, PCGS# 8977

---

**1876-CC Liberty Twenty, XF45**  
**Attractive Orange-Gold Color**

- 4689 1876-CC XF45 NGC.** Traces of prooflike surface remain around the raised elements of this Choice XF Carson City twenty. Mint luster lingers in protected areas as well, with high point wear accounting for the grade. Light abrasions do not inhibit the eye appeal of the pleasing orange-gold surfaces. Series collectors prefer the 1876-CC as the final-year Type Two twenty. NGC ID# 26AW, PCGS# 8977

---

**1876-CC Twenty Dollar, XF45**  
**Popular Centennial Issue**

- 4690 1876-CC XF45 PCGS. CAC. Variety 1-A.** Orange and green-gold toning confirms the originality of this Choice XF Carson City type coin. A trio of faint thin marks are noted near obverse star 4, and a small field dig is behind the shoulder curl, but the surfaces are otherwise pleasing for the grade. Importers paid for goods with double eagles, and foreign bankers retained the coins as reserves, the source for the majority of survivors. NGC ID# 26AW, PCGS# 8977

---

**1876-CC Twenty Dollar, AU50**  
**Traces of Mint Luster Still Evident**

- 4691 1876-CC AU50 NGC. Variety 7-C.** The secondary diagnostic is evident with magnification — a die lump located on the raised hair strand above the bead which is directly above the upper-left serif of the E in LIBERTY. Traces of mint luster can still be seen around the devices and each side displays even, light reddish patina. Minimal abrasions.  
*From The Walter Freeman Collection, Part II.* NGC ID# 26AW, PCGS# 8977

- 4692 1876-S MS61 NGC.** Block S mintmark, centered over the T. This is an appealing lower-end Mint State example of this popular Type Two issue, showing vibrant yellow-gold luster and bold design elements. Scattered abrasions limit the grade but none are individually significant. NGC ID# 26AX, PCGS# 8978

---

**1876-S Double Eagle, MS62**  
**S-Mint Type Two Representative**

- 4693 1876-S MS62 PCGS.** The 1876-S is a good choice for type purposes in grades as high as MS62, but the number of certified coins drops precipitously in MS63 and above. This lustrous Uncirculated example displays pleasing orange-gold color. The surfaces show fewer marks than expected, though abrasions can still be found over each side. The stars and eagle feathers are strongly brought-up. A very scarce San Francisco issue any finer. NGC ID# 26AX, PCGS# 8978

- 4694 1877 MS60 NGC.** A Mint State example of this debut Type Three Philadelphia issue, showing deeply reflective fields and a razor-sharp strike. The rich orange-gold surfaces show scattered abrasions, as is expected for the grade. NGC ID# 2547, PCGS# 8982

**1877-CC Double Eagle, XF40  
Scarce Carson City Issue**

- 4695 1877-CC XF40 PCGS. CAC. Variety 3-A.** Despite a mintage of only 42,565 pieces, five die marriages are confirmed for the 1877-CC. The present original peach-gold Carson City double eagle is only lightly abraded given its service in the Old West economy. The strike is good and the eye appeal is impressive for the XF level. NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty Dollar, Choice XF**

- 4696 1877-CC XF45 PCGS. Variety 1-B.** A well-defined apricot-gold Carson City representative. Abrasions are minor save for a slender vertical mark through the N in IN. Five die marriages are known, despite a low mintage of 42,565 pieces. For Variety 1-B, the mintmark is level and close to the D in DOLLAR. A middle die state example with clash marks from the shield above the ear, but only an incipient die crack through the Y in TWENTY.  
*From The Walter Freeman Collection, Part II.* NGC ID# 26AZ, PCGS# 8983

**1877-CC Double Eagle, XF45  
First-Year Type Three Design**

- 4697 1877-CC XF45 NGC. Variety 3-A.** Rough handling in bags took a toll on many 1877-CC twenties during domestic and foreign transit. This example shows numerous small marks on both sides with bright, yellow-gold surfaces. There are no heavy hits or large marks, and traces of mint luster remain at the margins. Choice XF definition remains on the motifs, the first Type Three issue from the Carson City Mint. NGC ID# 26AZ, PCGS# 8983

- 4698 1878 MS61 PCGS. Breen-7270.** Two different doubled die reverse varieties are known for the 1878. The present variety is noticeably doubled near STATES. The other variety shows strong doubling on DOLLARS. This lustrous pumpkin-gold twenty has a sharp strike and a typically abraded obverse. NGC ID# 26B3, PCGS# 8985

**1879-S Double Eagle, MS61**

- 4699 1879-S MS61 NGC.** A narrow band of lime-green accompanies both borders, but the fields and devices are caramel-gold. Marks are scattered, but none are singularly obtrusive. The strike is good, although portions of the eagle's shield were lightly hubbed into the reverse die. Most Uncirculated 1879-S twenties spent years indifferently stored in bank vaults. The issue is very rare above the MS62 level. NGC ID# 26B9, PCGS# 8991

**1880 Twenty Dollar, Choice AU  
Low-Mintage Philadelphia Issue**

- 4700 1880 AU55 NGC.** At one time fully prooflike in the fields, this pleasing 1880 twenty now shows field friction and tiny marks from a short stay in circulation. Traces of prooflikeness survive around the well-defined stars, legends, and central motifs. Most circulated coins are European repatriates, yet the 1880 is still a scarce coin in Choice About Uncirculated or finer condition. This orange-gold coin will make a nice addition to a circulated date set. NGC ID# 26BA, PCGS# 8992

- 4701 1880-S MS60 PCGS. Small Squat S.** The reverse border displays lime-green, but most of this coruscating double eagle is apricot-gold. The obverse exhibits bagmarks consistent with the grade. The reverse is also abraded, though to a lesser degree. NGC ID# 26BB, PCGS# 8993

**1882-S Liberty Twenty, MS62  
Nice Branch-Mint Type Coin**

- 4702 1882-S MS62 PCGS.** Frosty original luster yields primarily green-gold hues but is occasionally enlivened by tinges of rose-red in the protected regions. Bold design elements are illuminated by a vibrant cartwheel effect, and grade-limiting abrasions are light and evenly distributed over each side. Finer examples are rarely seen. PCGS has graded 47 numerically finer examples (9/16). NGC ID# 26BG, PCGS# 8998

**1882-S Double Eagle, MS62  
CAC Endorsed, Seldom Finer**

- 4703 1882-S MS62 PCGS. CAC.** Tall S mintmark. Shipped to foreign holdings around the world in bags, the 1882-S double eagles join other S-Mint twenties that are known for grade-limiting bagmarks. This example has a few, but they are less-frequent and not as severe as often seen on similarly graded pieces. Bold cartwheel luster beams from both sides across the radiant, sun-gold surfaces. The strike and eye appeal exceed the numeric grade, earning CAC endorsement. PCGS reports just 47 numerically finer pieces. CAC: 15 in 62, 1 finer (9/16). NGC ID# 26BG, PCGS# 8998

**1882-S Liberty Double Eagle, MS62  
Seldom Available Any Finer**

- 4704 1882-S MS62 PCGS. CAC.** One of the few examples at the MS62 level to earn CAC endorsement, this attractive and minimally marked 1882-S twenty is at the optimal collecting grade. Finer coins are scarce and expensive, while this example is near the top of its peers in terms of eye appeal and surface quality. Gleaming cartwheel luster augments the honey-gold color. PCGS reports just 47 numerically finer coins (9/16). NGC ID# 26BG, PCGS# 8998
- 4705 1882-S MS62 Prooflike NGC.** Overall, the 1882-S double eagle is available in MS62 and rare finer. However, the present coin is the finer of only two Prooflike pieces at NGC (9/16). The strike is sharp, and the reflective fields show minimal abrasions. Rich orange-gold color blankets each side. NGC ID# 26BG, PCGS# 78998

**1883-CC Twenty Dollar, XF**

- 4706 1883-CC XF40 NGC. Variety 2-A.** Rich peach toning embraces this Carson City twenty dollar piece. The cheek displays wear, but the only consequential mark is on the upper left obverse field. The mintage was less than 60,000 pieces, about 5% of the San Francisco production that year. Most surviving examples appear to have circulated for several years, then were exported to foreign bank holdings where they lingered until the second half of the 20th century.  
*From The Walter Freeman Collection, Part II.* NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, Choice XF**

- 4707 1883-CC XF45 NGC. Variety 2-A.** Peach-tinged luster is prominent across the legends of this attractive Carson City double eagle. Less abraded than expected, though we note a reed impression west of the mintmark. The usually encountered die marriage, identified by a die chip atop obverse star 9 and a diagonal spur from a dentil above the E in STATES.  
*From The Walter Freeman Collection, Part II.* NGC ID# 26BH, PCGS# 8999

**1883-CC Twenty, XF45  
Some Luster Remains**

- 4708 1883-CC XF45 NGC. Variety 2-A.** The 1883-CC twenty represents an ideal opportunity to add a Type Three Carson City double eagle to a type or series collection. It is reasonably available in Choice XF and finer grades, although some examples show extensive bagmarks. This coin is only lightly abraded for the issue with pinpoint marks and lines on Liberty's cheek and in the surrounding fields. Attractive orange-gold color deepens at the borders and surrounding the well-defined peripheral stars and legends. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, XF45  
Choice Eye Appeal

4709 1883-CC XF45 NGC. **Variety 2-A.** The mintage of 59,962 pieces seems small at first glance, but it is generous compared to other Carson City twenties. Many examples survived in foreign holdings and did not see domestic circulation. This example may have circulated in the West for a brief time before being set aside. Abrasions and bagmarks are frequent but small-to-tiny and inconspicuous — some smoothed by wear, with others minor by good fortune. Sharp details remain on the motifs and mint luster survives at the margins. Attractive orange-gold color covers both sides. NGC ID# 26BH, PCGS# 8999

4710 1883-S MS62 PCGS. **CAC.** Tall S. The orange-gold surfaces are lustrous and display fewer than the expected number of small abrasions. A well struck example of an issue regularly seen in bagmarked Uncirculated grades, but seldom found above the MS62 level. NGC ID# 26BJ, PCGS# 9000

1884-CC Double Eagle, XF45

4711 1884-CC XF45 PCGS. **Variety 1-A.** Ex: Rainy Day Collection. The 1884-CC eagle and double eagle have something in common: die lines on the portrait. They are more prominent on the ten, but the twenty dollar piece displays two intersecting die lines above the J.B.L. initials. Perhaps both obverse dies were injured during their long journey from Philadelphia to Carson City. The present example has pleasing orange-gold color and refreshingly few abrasions for its designated grade. Luster is especially prominent on the reverse. *From The Walter Freeman Collection, Part II.* NGC ID# 26BK, PCGS# 9001

1889-CC Double Eagle, XF40

4712 1889-CC XF40 PCGS. **Variety 1-A.** Ex: Rainy Day Collection. Liberty's curls exhibit moderate wear, but the apricot-gold surfaces are minimally abraded save for clusters of small marks on the field near the eagle's right (facing) wing. The Rainy Day Collection was a hoard of gold coins, predominantly Carson City twenties, housed in PCGS holders and distributed from the Collectors Universe website circa-2000. *From The Walter Freeman Collection, Part II.* NGC ID# 26BV, PCGS# 9011

1890-CC Double Eagle, XF40  
Rare Variety 2-B

4713 1890-CC XF40 PCGS. **CAC. Variety 2-B.** Rich orange toning ensures the eye appeal of this nicely defined Carson City type coin. Marks are minor except near the D in UNITED. Variety 2-B is a rare die marriage that places most of the second C in the mintmark above the D in DOLLAR. Encapsulated in a green label holder. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, Choice XF

4714 1890-CC XF45 PCGS. **Variety 1-A.** Ex: Rainy Day Collection. A charming Carson City twenty. The pumpkin-gold surfaces show surprisingly few marks given the coin's service in Old West commerce. Luster outlines the stars, and fills the legends, curls, rays, and plumage. A late die state with lapped right-side tail feathers. *From The Walter Freeman Collection, Part II.* NGC ID# 26BY, PCGS# 9014

---

### 1890-CC Double Eagle, Choice XF

- 4715 1890-CC XF45 PCGS. CAC. Variety 1-A.** This Choice XF Carson City type coin exhibits the “dirty gold” look popular with collectors in search of original surfaces. Pumpkin-gold luster outlines design elements, while the fields and high points are olive-green. Marks are fewer than anticipated for the grade. A late die state example with lapped right-side tail feathers. NGC ID# 26BY, PCGS# 9014

---

### 1893-S Liberty Twenty, MS63+ Close to a Finer Grade

- 4716 1893-S MS63+ PCGS. CAC.** While readily available in grades up to MS63, the 1893-S hits a wall at either service and finer grades are very scarce. The twin honors of the PCGS Plus designation and CAC endorsement suggest this coin is far above most of the Select Uncirculated pieces. Attractive and frosty wheat-gold surfaces show only minor grazes and tiny marks. Strong cartwheel luster and a sharp strike add to the appeal. Population: 14 in 63+, 60 finer. CAC: 20 in 63, 10 finer (9/16). NGC ID# 26CA, PCGS# 9024

- 4717 1895 MS63 NGC.** The pleasing peach-gold surfaces of this attractive Select specimen radiate vibrant mint luster and show a scattering of minor contact marks on both sides. The design elements are sharply detailed throughout and eye appeal is quite strong. NGC ID# 26CD, PCGS# 9027

---

### 1895 Twenty Dollar, MS64 Only Five Coins Finer at PCGS

- 4718 1895 MS64 PCGS.** A 97% decrease in the population of 1895 double eagles at PCGS between MS64 and MS65 says a lot. The issue is scarce but obtainable in Choice condition, while finer examples are reserved for best-funded specialists. A delightful peach-gold representative, this near-Gem presents frosty luster and strong strike detail, particularly on the stars and the eagle's feathers. Smooth fields exhibit a dark grease spot behind the hair bun. There are five finer submissions at PCGS (9/16). NGC ID# 26CD, PCGS# 9027

---

### 1895 Liberty Twenty, MS64+ Nearly Uncollectible in Finer Grades

- 4719 1895 MS64+ PCGS. CAC.** A borderline Gem, this Plus-graded twenty ranks close to the top of the grading scale in terms of both eye appeal and technical surface quality. Hints of orange-gold surround the central motifs to embellish the rich-gold coloration. The surfaces are frosty and smooth with an almost velvet sheen that emboldens the cartwheel luster. Full Gem examples are very rare, with PCGS reporting just five coins in a numerically finer grade. Population: 16 in 64+, 5 finer. CAC: 51 in 64, 0 finer (9/16). NGC ID# 26CD, PCGS# 9027

- 4720 1898-S MS64 PCGS.** Semireflective fields are remarkably smooth and unmarked, yet it is the vibrantly colorful toning that earns this twenty extra points for eye appeal. Orange highlights encircle the central motifs while lilac accents visit the fields. Light chatter on the portrait and a couple of tiny alloy spots on the reverse are the only marks to mention. The strike is sharp and the eye appeal is tremendous. NGC ID# 26CL, PCGS# 9034

---

### 1899 Double Eagle, MS64+ Very Scarce Any Finer

- 4721 1899 MS64+ PCGS.** One of the top selections among the Type Three issues for type purposes, the 1899 is readily available in grades up to near-Gem Uncirculated. Finer coins are much more challenging. This example earns the PCGS Plus designation for both eye appeal and surface quality. The strike is needle-sharp. Deeply frosty surfaces impart a finely textured appearance to the lustrous, medium-gold surfaces for excellent eye appeal. Population: 38 in 64+, 27 finer (9/16). NGC ID# 26CM, PCGS# 9035

- 4722 1899 MS64+ PCGS. CAC.** An available date through MS64, the 1899 double eagle becomes conditionally rare any finer. This Plus-graded, CAC-approved near-Gem displays a sharp strike and frosty sun-gold luster. A few light grazes on the cheek are all that limit the grade. NGC ID# 26CM, PCGS# 9035

- 4723 1899-S MS63+ NGC. CAC.** A splendid Select Mint State double eagle, this piece exhibits rich yellow-gold luster and satiny surfaces with a few trivial marks on each side. CAC: 43 in 63, 22 finer (9/16). NGC ID# 26CN, PCGS# 9036

- 4724 1901 MS64 PCGS. CAC.** The debut Philadelphia issue of the 20th century, the 1901 double eagle is popular as a type coin. This Choice example displays a sharp strike and original, frosty orange-gold luster. A few trivial abrasions are not out of line for the grade. NGC ID# 26CS, PCGS# 9039

**1903-S Twenty Dollar, MS64+  
Substantially Scarce This Nice**

**4725 1903-S MS64+ PCGS. CAC.** With a mintage of under 1 million pieces, the 1903-S was heavily exported and the return of examples from foreign holdings was considerable, although most are in lower Mint State grades. As a result, the 1903-S is rare in Gem or finer condition. This borderline Gem example displays both the PCGS Plus designation and CAC endorsement. Vibrant yellow-gold surfaces are frosty and minimally marked for the issue, along with an expectantly sharp strike. Minor die doubling is visible at the base of TWENTY. Population: 21 in 64+, 15 finer. CAC: 28 in 64, 0 finer (9/16). NGC ID# 26CX, PCGS# 9044

**4726 1904 MS64 NGC. CAC.** This frosty yellow-gold 1904 double eagle is well-struck and displays clean fields — only light grazes on Liberty's cheek prevent a finer grade. The CAC green label confirms the strong near-Gem quality. This issue is a favorite type-coin candidate due to its readily availability. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS65+  
Vivid Color and Deep, Frosty Luster**

**4727 1904 MS65+ PCGS.** More than 5,000 1904 double eagles have obtained the MS65 grade from PCGS, yet only 3.5% of those qualify for the important PCGS Plus designation to reward their high-end Gem quality. This frosty and deeply lustrous example shows only a few tiny ticks that are easily overcome by the rich, apricot-gold coloration. The strike is razor-sharp and the eye appeal is off the charts. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Head Twenty, MS65+  
Exceptional Appeal**

**4728 1904 MS65+ PCGS.** Always popular as the most-available Type Three Liberty Head twenty for type purposes, nearly all 1904 double eagles are sharp and lustrous. This frosty and minimally marked example is high-end for the Gem grade, with a greenish tinge to its medium-gold coloration and excellent eye appeal. The strike is uniformly crisp including the obverse stars. A solitary nick by the nose requires a glass, but it is inconsequential in terms of the assigned grade. Worth a strong bid for the vibrant, smooth surfaces and exceptional visual impact. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+  
Smooth and Impressive Type Coin**

**4729 1904 MS65+ PCGS.** The 1904 has the highest mintage of any Liberty twenty dollar issue, but superior examples are desirable as type representative. The present Gem displays smooth and lustrous green-gold surfaces, and is much nicer than the bagmarked pieces prevalent on the marketplace. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS64 Prooflike  
Mirrored Fields, Great Eye Appeal**

**4730 1904 MS64 Prooflike NGC. CAC.** Fresh dies inevitably impart prooflike characteristics to normal business strikes, as well as a notably sharp and often frosty strike on the raised devices. The reflectivity and sharpness soon fade as more coins are struck, accounting for the scarcity of fully prooflike examples. This near-Gem representative is both Choice and high-end, earning CAC endorsement. The fields are deeply reflective with only a bit of cloudiness and a few light marks. Census: 54 in 64 (2 in 64★) Prooflike, 12 finer (9/16). NGC ID# 26CY, PCGS# 79045

**4731 1904-S MS64+ NGC.** Nearly Gem quality, this Choice Mint State double eagle is a splendid piece with sharp design definition and brilliant yellow luster. An excellent type candidate. NGC ID# 26CZ, PCGS# 9046

---

### 1905-S Twenty Dollar, MS63

- 4732 1905-S MS63 PCGS.** Vibrant orange-gold and sea-green toning provides the eye appeal for this lustrous and well struck double eagle. A smattering of minor obverse marks determines the graded. The reverse is only lightly abraded. We note small obverse alloy spots at 5 and 11 o'clock. NGC ID# 26D3, PCGS# 9048

---

### 1906 Liberty Twenty, MS62 Seldom Encountered in High Grade

- 4733 1906 MS62 NGC.** The 1902, 1905, and 1906 issues form a scarce, often-overlooked trio in the Liberty Head double eagle series. This 1906 is a particularly appealing example for the MS62 grade. Medium green-gold surfaces display frosty mint luster and only scattered minor abrasions. A small double reeding mark on the chin is the sole abrasion of any consequence. The strike is bold for the issue — one of just 69,500 pieces minted. NGC has graded 65 numerically finer examples (9/16). NGC ID# 26D4, PCGS# 9049

---

### 1906 Double Eagle, MS62 Low-Mintage Philly Issue

- 4734 1906 MS62 PCGS. CAC.** The enormous double eagle mintages during 1904 must have sated Treasury holdings, since the 1905 and 1906 Philadelphia productions were each only about 1% of the 1904 coinage. Despite its low mintage, the 1906 is available in Mint State, though Select pieces are very scarce and Gems are rare. The present MS62 orange-gold example has fewer marks than is usual for the grade, though a tick on the reverse rim at 12 o'clock is noted as an identifier. NGC ID# 26D4, PCGS# 9049
- 4735 1907 MS64+ PCGS. CAC.** A razor-sharp, Plus-graded example of this final-year type-coin issue, showing satiny yellow-gold luster and only a few light, scattered surface grazes. PCGS reports only 20 finer representatives (9/16). NGC ID# 26D7, PCGS# 9052

- 4736 1907-S MS63 PCGS.** This frosty Select Mint State double eagle marks the end of an era as the last Liberty Head double eagle coined at any Mint, in this case San Francisco. A moderate mark on Liberty's chin is sufficient to prevent a higher grade. NGC ID# 26D9, PCGS# 9054

## SAINT-GAUDENS DOUBLE EAGLES

- 4737 1907 Arabic Numerals MS63 NGC.** An attractive Select example from the first year of Saint-Gaudens iconic design, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor, grade-consistent contact marks on both sides. NGC ID# 26F5, PCGS# 9141
- 4738 1908 No Motto MS66+ NGC.** Short Rays Obverse. The 1908 No Motto twenty is known for its availability in high grade, but the present example is nonetheless nicer than most survivors. Field marks are inconsequential, and a strong lens is required to locate the infrequent minor contact on the motifs. One aqua speck noted on the N in UNITED. NGC ID# 26F6, PCGS# 9142
- 4739 1908 No Motto, Wells Fargo Nevada, MS66 PCGS.** Short Rays Obverse. A beautiful peach-gold Premium Gem. No Motto 1908 twenties are known for their prevalence in quality Mint State, but the present example is nonetheless exceptionally nice for the designated grade. Well struck aside from incompleteness on the eagle's leg plumage. Certified in a green label holder. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142
- 4740 1908-D No Motto MS64 PCGS.** An impressive Choice specimen from the last year of the short-lived No Motto design, this coin offers sharply defined design elements and well-preserved orange-gold surfaces with vibrant mint luster throughout. Overall visual appeal is outstanding. NGC ID# 26F7, PCGS# 9143
- 4741 1908-D Motto MS62 PCGS.** The 1908-D Saint-Gaudens double eagle represents the first year of the important Motto design. This attractive MS62 example is sharply detailed, with vibrant mint luster and pleasing orange-gold surfaces that show some scattered, minor contact marks and luster grazes. NGC ID# 26F9, PCGS# 9148
- 4742 1908-D Motto MS64 PCGS.** This Choice 1908-D double eagle is among the finer examples that are available to the budget-concerned collector. The strike is sharp, and each side yields warm golden-orange luster. A few minor marks are not out of line for the grade. NGC ID# 26F9, PCGS# 9148

---

### 1909/8 Twenty Dollar, MS62 Green Label Holder

- 4743 1909/8 FS-301 MS62 PCGS.** The only prominent overdate of the double eagle denomination, the 1909/8 was created when a working die was impressed with both 1908 and 1909 working hubs. The variety comprised about half of the 1909 Philadelphia mintage, but received little attention until the 1940s. This is an attractive example with sea-green borders and orange-gold centers. Lustrous and moderately marked. Housed in a green label holder. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

---

**1909 Double Eagle, MS64  
Optimal Grade for Collectors**

- 4744 1909 MS64 PCGS.** The frosty, sun-gold color is particularly vibrant on this Choice 1909 twenty. Both the strike and the surface quality are easily of near-Gem caliber, while the eye appeal suggests an even finer grade. Both PCGS and NGC show coins in numerically finer condition, making MS64 the optimal collecting grade for the issue. Substantially more expensive at even the next-finest level, PCGS and NGC combined report just 36 coins in numerically finer grades (9/16).

*From The Cherny Collection.* NGC ID# 26FC, PCGS# 9150

---

**1909-S Saint-Gaudens Twenty, MS65  
Seldom Available Any Finer**

- 4745 1909-S MS65 PCGS.** This Gem 1909-S Saint-Gaudens double eagle is among the finest budget-conscious collectors will be able to acquire. Higher-grade pieces are rarely seen. This piece displays sharp motifs and satiny straw-gold luster. A few trivial surface grazes preclude an even finer grade. PCGS lists 19 coins in MS66 or better (9/16). NGC ID# 26FE, PCGS# 9153

---

**1909-S Saint-Gaudens Twenty, MS65  
Conditionally Rare in Finer Grades**

- 4746 1909-S MS65 PCGS.** An available issue in lower grades, the 1909-S Saint-Gaudens double eagle becomes scarce at the MS65 level, and finer coins are rare. This spectacular Gem exhibits sharply detailed design elements throughout and the well-preserved orange-gold surfaces radiate vibrant mint luster. PCGS has graded 19 numerically finer examples (9/16). NGC ID# 26FE, PCGS# 9153

---

**1909-S Twenty Dollar, MS65  
Rarely Seen Finer**

- 4747 1909-S MS65 PCGS.** An attractive, frosty sheen flashes from the radiant cartwheel luster of this vibrant, yellow-gold Gem twenty. More than 2.7 million pieces were struck at the San Francisco Mint in 1909, yet Gem or finer examples are scarce-to-rare. The present example displays a hint of rose-red at the centers and a sharp, Mint-fresh look sure to delight the advanced collector or gold specialist. PCGS shows a mere 19 numerically finer coins (9/16).

*From The Cherny Collection.* NGC ID# 26FE, PCGS# 9153

- 4748 1909-S/S FS-501 MS64 PCGS.** The mintmark is repunched southwest with a slight clockwise rotation. The right curve and partial base from the first mintmark impression are readily apparent beneath a lens. This lustrous wheat-gold near-Gem has a sharp strike and an absence of relevant marks. Population: 22 in 64 (2 in 64+), 8 finer (9/16). NGC ID# 26FE, PCGS# 145741 Base PCGS# 9153

- 4749 1910 MS64+ PCGS. CAC.** Available in MS64, the 1910 Saint-Gaudens double eagle becomes scarce in Gem condition. This Plus-graded CAC coin displays a sharp strike and frosty wheat-gold luster. Light, scattered marks are not out of line for the grade. NGC ID# 26FF, PCGS# 9154

- 4750 1910 MS64+ PCGS. CAC.** A splendid near-Gem, this lovely Saint-Gaudens twenty exhibits frosty mint luster and brilliant yellow surfaces. This is the last of the common P-Mint issues for the decade. NGC ID# 26FF, PCGS# 9154

- 4751 1910-S MS64 PCGS.** A well-struck, satiny example with medium orange-gold coloration. Abrasions are trivial for the grade. This Choice 1910-S double eagle represents the ideal collecting grade for the budget-conscious enthusiast, as finer examples are infrequently seen and represent a higher price point. NGC ID# 26FH, PCGS# 9156

---

**1911 Double Eagle, MS64  
Popular Lower-Mintage Issue**

- 4752 1911 MS64 PCGS.** A coruscating yellow-gold Choice Saint-Gaudens twenty. Nicely struck and only inoffensively abraded. A popular, lower mintage issue seldom encountered any finer. 1911 was the final year of the subtype with 46 stars on the obverse periphery. The addition of New Mexico and Arizona to the Union compelled a new, 48-star obverse design introduced in 1912. NGC ID# 26FK, PCGS# 9157

**4753 1911-D MS65 PCGS.** A spectacular Gem Saint-Gaudens double eagle, with razor-sharp definition on all design elements and vibrant mint luster throughout. The well-preserved orange-gold surfaces add to the terrific visual appeal. NGC ID# 26FK, PCGS# 9158

**4754 1911-D MS65+ PCGS.** A great early type coin in the series, the 1911-D was struck to the extent of 846,500 coins. Many of the them survive through MS65 and even MS66. This high-quality straw-gold Gem glows with frosty luster and features few marks for the technical grade. The torch hand and Capitol are strongly detailed. NGC ID# 26FK, PCGS# 9158

---

**1911-D Saint-Gaudens Twenty, MS66  
Colorfully Patinated**

**4755 1911-D MS66 PCGS.** Ex: Cherny. Splendid orange and lilac toning accents enrich the gleaming, lemon-gold surfaces of this vibrant Premium Gem double eagle. Both the peripheral and central devices are sharply defined, emboldened by rich, orange-gold patina that congregates in the recessed areas. Marks are minimal across the smooth and lustrous surfaces. PCGS reports just seven numerically finer examples.

*From The Cherny Collection.* NGC ID# 26FK, PCGS# 9158

---

**4756 1911-D/D FS-501 MS63 PCGS.** The best-known repunched mintmark variety in the Saint-Gaudens series. The Denver mintmark is doubled east, along its curve. A lemon-gold Select example with potent luster and a good strike. Only a couple of marks are of any relevance. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

---

**1911-D/D Saint-Gaudens Twenty, MS66  
FS-501, Bold Repunched Mintmark**

**4757 1911-D/D FS-501 MS66 PCGS.** Repunched Mintmark. Current research by Roger Burdette suggests that five distinct repunched mintmark varieties are known for 1911-D (and that additional repunchings may exist). The FS-501 is the sole *Cherrypickers'* variety with the greatest spread, where a Large D shows 25% west of the original position and a bit of the original mintmark's serif shows above the primary D. It is one of the most prominent repunched mintmarks in the entire Saint-Gaudens series. This is a Premium Gem example, with a tinge of green over the frosty, medium-gold surfaces. Sharply struck, the coin is fresh and lustrous with abrasions limited to a few tiny ticks. Tied for numeric finest at PCGS. Population: 41 in 66, 0 finer (9/16). NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

---

**1911-S Twenty Dollar, Bold MS65**

**4758 1911-S MS65 PCGS.** Original orange-gold surfaces showcase hints of lilac over the device high points. An overlay of frosty luster washes over each side. The strike is bold throughout, including the Capitol building, the torch fingers, Liberty's face, and the eagle's breast feathers. An attractive example with 39 finer representatives at PCGS (9/16).

*Ex: Summer FUN Signature (Heritage, 7/2007), lot 3197.* NGC ID# 26FL, PCGS# 9159

---

**1911-S Twenty Dollar, MS65  
Splendid Color and Luster**

**4759 1911-S MS65 PCGS. CAC.** Ex: Cherny. A sharply struck Gem of the highest order, this smooth and lustrous twenty displays a subtle interplay of colors when viewed at varying angles. Orange, rose, lilac, and green shades all augment the vibrant, yellow-gold surfaces and bolster the standout eye appeal. CAC endorsed for both its visual and technical merit, this vibrant 1911-S is at the upper-end of its grade and worthy of a strong bid.

*From The Cherny Collection.* NGC ID# 26FL, PCGS# 9159

---

**1912 Double Eagle, MS64  
Few Marks, Sharp Strike**

**4760 1912 MS64 PCGS.** When analyzing the factors affecting survivors of export among Saint-Gaudens double eagles, Roger Burdette notes that coins going to European holdings were repeatedly counted and rebagged, or melted. South and Central American exports normally remained in their Mint-sealed bags. The 1912 issue was mostly shipped to Europe, suggesting that this minimally marked, smooth and frosty near-Gem was either put aside here in the U.S., or it found a secure corner in an original bag that saw little transport. Softly lustrous, mellow-gold toning covers the deeply frosted, sharply struck surfaces. PCGS has certified just 50 numerically finer pieces (9/16). NGC ID# 26FM, PCGS# 9160

**1915-S Twenty Dollar, MS66  
None Finer at PCGS**

- 4761 1915-S MS66 PCGS.** Even the finest double eagle collections are unable to exceed the MS66 grade for the 1915-S, since just one piece is certified numerically finer than MS66 by both services combined (9/16). This representative holds its own with other top-drawer examples, with glistening, frosty eye appeal and spectacular orange-gold coloration. A finer piece will be challenging to locate of this popular San Francisco issue, since it is sharply struck with only a few faint grazes and tiny marks.  
*From The Cherny Collection.* NGC ID# 26FW, PCGS# 9168

- 4762 1916-S MS63 PCGS.** The lustrous orange-gold surfaces are well struck and exhibit minor obverse marks consistent with the Select grade. An alloy spot above the eagle's neck provides an identifier. Encapsulated in a first generation holder. NGC ID# 34NJ, PCGS# 9169

**1920 Double Eagle, MS64  
Only One Finer at PCGS**

- 4763 1920 MS64 PCGS.** The fact that PCGS has graded just one numerically finer coin bodes well for this near-Gem example (9/16). Alternating accents of lilac and rose-gold enliven the vibrant, flashy-gold surfaces. Only a few small marks occupy the smooth fields and sharply struck motifs. The eye appeal is exceptional.  
*From The Cherny Collection.* NGC ID# 26FY, PCGS# 9170

**1922 Double Eagle, MS65  
Popular Saint-Gaudens Type Coin**

- 4764 1922 MS65 PCGS.** An attractive butter-gold Gem. Well struck and lustrous with marks confined to the obverse border near 10:30. A trace of struck-in grease is noted above the DO in DOLLARS. By the 1920s, the public had become accustomed to paper money, and gold coins hardly circulated, even in the West. Gold coins were held by the Treasury to back gold certificates, and were also used as reserves by U.S. and foreign banks. NGC ID# 26G3, PCGS# 9173

**1922 Twenty Dollar, MS65  
Very Rare any Finer**

- 4765 1922 MS65 NGC.** Olive-green borders encompass peach-gold centers. Lustrous and boldly struck with exemplary surfaces. 1922 is the first in a series of years (through 1928) in which Philadelphia issues are plentiful, while their branch mint peers are very scarce to very rare. The exception to that rule is the 1923-D, the only common postwar branch issue. NGC ID# 26G3, PCGS# 9173

**1922 Twenty Dollar, MS65  
Exceptional Eye Appeal**

- 4766 1922 MS65 PCGS. CAC.** Ex: Cherny Collection. Variegated toning alternates among lilac, lemon-gold, and rich orange-gold shades for the tremendous eye appeal of this Gem Saint. The surfaces show few marks of any kind, while the strike is sharp throughout. Only slight flattening of the torch bands is noted. CAC endorsed for quality and eye appeal. The 1922 is scarce this nice and rare any finer despite a mintage of more than 1.3 million pieces. PCGS reports just eight numerically finer coins (9/16).  
*From The Cherny Collection.* NGC ID# 26G3, PCGS# 9173

**4767 1922-S — Improperly Cleaned — NGC Details. AU.** The 1922-S had a generous mintage, but the preponderance of the issue never left Treasury vaults, and was eventually melted into gold bricks to line the walls of Fort Knox. A few thousand pieces survived, and gradually returned to the U.S. from foreign bank holdings. This yellow-gold example displays vertical hairlines but has little if any actual circulation wear.

---

**1922-S Double Eagle, MS62  
Much-Melted Issue**

**4768 1922-S MS62 PCGS.** For ten years, the 1922-S was likely obtainable for close to face value from the Treasury, but few numismatists took advantage of the offer. 99.9% of the issue remained unissued until the 1933 gold recall, and were eventually melted. Fortunately for collectors, several bags of examples were released, and ended up in foreign bank holdings, repatriated after World War II. The present lemon-gold piece likely made a trip to Europe and back, and displays small to moderate obverse marks consistent with the grade. NGC ID# 26G4, PCGS# 9174

---

**1923 Double Eagle, MS65  
Prohibitively Rare any Finer**

**4769 1923 MS65 PCGS.** Ex: Cherny Collection. While the 1923 is somewhat available in Gem condition, it is one of the series notable condition rarities any finer. This example displays vivid orange-gold coloration and a strong strike on the peripheral elements. The central figure of Liberty is well-detailed and minimally marked. All in all, an exceptionally well-preserved example of a date that is virtually uncollectible any finer. PCGS and NGC combined have seen just four numerically finer pieces (9/16).  
*From The Cherny Collection.* NGC ID# 26G5, PCGS# 9175

---

**1923 Double Eagle, Honey-Gold Gem  
Practically Unobtainable Any Finer**

**4770 1923 MS65 PCGS.** The preponderance of 1923 double eagles in MS62 to MS63 results from mass exportation to Europe, where coins were handled without care in interbank transactions. Shipments to Latin American countries were generally left undisturbed and are likely the source of this honey-gold Gem. Frosty surfaces offer attractive glints of rose color and showcase well-struck relief elements. A couple of small pedigree markers occur above the eagle's head. PCGS shows four finer grading events (9/16). NGC ID# 26G5, PCGS# 9175

**4771 1924 MS66 PCGS.** A frosty, blatantly original Premium Gem example of the most famous type-coin issue in the series, showing smooth yellow-gold fields and boldly rendered design elements. Finer examples are elusive. NGC ID# 26G7, PCGS# 9177

**4772 1924 MS66+ PCGS.** Sun-gold color around the borders turns to lighter shades of peach-orange and rose over the centers. A lens reveals a couple of tiny ticks near the left obverse rays that prevent a full Superb Gem assessment for this incredibly appealing type coin. NGC ID# 26G7, PCGS# 9177

**4773 1924 MS66+ PCGS.** The 1924 has the second-highest production total in the Saint-Gaudens series (4.3 million coins) after the 1928. High-grade coins are readily collectible, often serving as type representatives. This exemplary MS66+ twenty dollar gold piece radiates swirling mint luster over unabraded rose and peach-gold surfaces. NGC ID# 26G7, PCGS# 9177

**4774 1924 MS66+ PCGS.** Augustus Saint-Gaudens' masterful design is strongly brought-up on this splendid MS66+ twenty dollar gold piece. The primary shade is light yellow-gold with complementary glints of rose near the central obverse. Expectedly clean for the grade and radiantly lustrous. NGC ID# 26G7, PCGS# 9177

---

**1925 Double Eagle, MS66  
Excellent Type Representative**

**4775 1925 MS66 PCGS. CAC.** A favorite issue for type that is seldom seen any finer, the 1925 mintage of more than 2.8 million double eagles was intended for foreign trade and to use as backing for gold certificates. A prescribed ratio of gold coin to certificates was required by law, inflating the mintages for coin that was otherwise useless in day-to-day commerce. This Premium Gem example is a radiant, sun-gold example with smooth, frosty surfaces and virtually no abrasions or marks. Sharply struck, the eye appeal is terrific as confirmed by its CAC endorsement. PCGS reports just seven numerically finer pieces (9/16).

*From The Cherny Collection.* NGC ID# 26GA, PCGS# 9180

**1926 Twenty Dollar, MS66  
Radiant, High-End Type Coin**

**4776 1926 MS66 PCGS. CAC.** The 1926 is readily available in lesser grades, yet top-notch Premium Gem examples are scarce and numerically finer coins are rare. John Sinnock prepared the master dies for the 1926 double eagles, and the issue is a favorite among collectors for its overall quality and eye appeal. This example is exceptionally frosty and attractive, with vibrant orange-gold color and olive shades across the lustrous fields. Full fingers on both hands and crisp details at the torch top confirm the sharp strike, while CAC endorsement verifies the eye appeal. PCGS shows just five numerically finer coins (9/16).

*From The Cherny Collection.* NGC ID# 26GD, PCGS# 9183

**4777 1927 MS65 NGC.** Glimmering satin luster is particularly vibrant as it cartwheels around unmarked orange-gold surfaces on this Gem 1927 double eagle. The strike is sharp, and the type coin appeal is significant. NGC ID# 26GG, PCGS# 9186

**4778 1927 MS65 PCGS.** This is an exceptional example for a type collection or specialized collection of Saint-Gaudens double eagles. Both sides are highly lustrous with rich orange-gold surfaces. NGC ID# 26GG, PCGS# 9186

**4779 1927 MS66 PCGS.** 30th Anniversary Green Label Holder. A high-grade caramel-gold representative that provides potent luster and excellent eye appeal. The Capitol building shows blending, but the strike is otherwise bold. NGC ID# 26GG, PCGS# 9186

**4780 1927 MS66+ PCGS.** The availability of the 1927 through MS66 makes it a suitable issue to represent the Saint-Gaudens design in a high-end type set. Unencumbered mint frost swirls over each side. Light butter-gold surfaces appear mark-free at first glance and yield a few minute specks upon close examination. PCGS reports 20 finer grading events (9/16). NGC ID# 26GG, PCGS# 9186

**4781 1928 MS66 PCGS.** This impressive Premium Gem approaches the finest that PCGS has ever certified, with just 86 numerically finer examples (9/16) from a total population of more than 50,000 coins for this issue alone. Both sides exhibit frosty yellow-gold luster with orange tendencies. NGC ID# 34VK, PCGS# 9189

**1928 Double Eagle, MS66+  
Impressive Luster and Eye Appeal**

**4782 1928 MS66+ PCGS.** Always a preferred issue for gold type, the 1928 is readily available through the MS66 grade. Plus-graded Premium Gem coins are scarce, and Superb Gems are very scarce-to-rare. This smoothly lustrous and high-end MS66 earns the Plus designation for its sharp strike and nearly unmarked fields. The torch top is fully defined. Brilliant luster cascades across the finely granular surfaces, which display a rich, greenish-gold patina. PCGS shows 86 pieces in a numerically finer grade (9/16). NGC ID# 34VK, PCGS# 9189

**1928 Saint-Gaudens Twenty, MS66+  
Imposing Eye Appeal**

**4783 1928 MS66+ PCGS.** Pale olive-gold coloration blankets both sides of this smooth and satiny Saint. The 1928 is renowned for its eye appeal in high grades, and this Plus-graded Premium Gem is a suitable representative. Only tiny abrasions dot the high points of the motifs, while the fields are nearly free of bagmarks or abrasions. The devices are sharply defined. PCGS reports 3,101 MS66 certifications, but only 132 pieces receiving the Plus designation at the MS66 level (9/16). NGC ID# 34VK, PCGS# 9189

**1928 Double Eagle, MS66  
Impressive Eye Appeal**

**4784 1928 MS66 PCGS. CAC.** While the 1928 is among the most collectible issues for Saint-Gaudens type, quality varies widely from coin to coin. More than 20% of the mintage was declared defective by the Mint's quality control, resulting in a net mintage of 8.8 million pieces. This example is remarkably well-produced and attractive. The strike is sharp throughout and there are no individual marks to mention. Vibrant sun-gold toning emits deep-orange and lilac highlights. CAC endorsed for the obvious eye appeal and high quality surfaces. CAC: 267 in 66, 24 finer (9/16). *From The Cherny Collection.* NGC ID# 34VK, PCGS# 9189

## CALIFORNIA FRACTIONAL GOLD

- 4785 1853 Liberty Octagonal 25 Cents, BG-101, Low R.5, MS62 PCGS.** Breen-Gillio Die State III with a "broken" nose. The very first Breen-Gillio variety, attributed to Joseph Bros. of San Francisco, is a crude entry with nine irregular stars, a reasonable rendition of Liberty, and an awkwardly entered reverse legend. This is a better grade example featuring smooth lavender and caramel-gold surfaces. Population: 21 in 62, 14 finer (9/16). NGC ID# 2BGK, PCGS# 10370
- 4786 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS66+ Prooflike NGC.** Breen-Gillio Die State II with portions of the portrait lapped away, as made. An exquisite honey-gold example with flashy fields and an even impression. An early Frontier, Deviercy & Co. variety. Census: 6 in 66 (1 in 66+) Prooflike, 1 finer (9/16). NGC ID# 2BGP, PCGS# 710374
- 4787 1855/4 Liberty Octagonal 25 Cents, BG-106, R.3, MS65+ Prooflike NGC.** Breen-Gillio Die State II. This Period One Frontier, Deviercy & Co. Gem has flashy canary-gold fields and a consistent strike. BG-106 is rarely certified as Prooflike. Census: 3 in 65 (1 in 65+) Prooflike, 0 finer (9/16). NGC ID# 2TTL, PCGS# 710375
- 4788 1853 Liberty Round 50 Cents, BG-409, R.3, MS65 NGC.** Breen-Gillio Die State IV with advanced cracks and breaks on the reverse. A Deriberpie & Nouzillet variety that imitates its contemporary Federal gold dollar design. A lustrous, mark-free, and typically struck green-gold Gem. As of (9/16), the single-finest certified by either NGC or PCGS. NGC ID# 2BJV, PCGS# 10445
- 4789 1853 Liberty Octagonal 1 Dollar, BG-530, R.2, MS63 PCGS.** Blushes of rose-red toning visit the borders, but the majority of this Period One dollar is green-gold. Well struck and void of detrimental marks. Minor strike-throughs, as made, are noted on the reverse within the beaded circle. Population: 15 in 63, 1 finer (9/16). NGC ID# 2BLV, PCGS# 10507
- 4790 1870 Liberty Octagonal 25 Cents, BG-713, R.4, MS66 PCGS.** BG-713 is the sole 1870-dated Frontier & Co. octagonal quarter variety. The large, homely head of Liberty is characteristic of the issuer. This is a pristine honey-gold example that retains hints of the planchet surface on the concave central reverse. Population: 10 in 66, 2 finer (9/16). NGC ID# 2BMP, PCGS# 10540
- 4791 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS66+ PCGS.** The widely spaced date is a means to distinguish BG-717 from the several other 1871-dated varieties issued by Frontier, Deviercy & Co. A flashy and immaculate lemon-gold example that displays fine concentric die lines across both fields. Population: 23 in 66 (1 in 66+), 7 finer (9/16). NGC ID# 2BMU, PCGS# 10544
- 4792 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 Prooflike NGC.** The mirrored lemon-gold fields provide remarkable eye appeal. This sharply struck Superb Gem appears as made, and cannot be surpassed from either leading grading service. One of several 1871 marriages issued by the busy firm of Frontier & Co. Census: 7 in 67 Prooflike, 0 finer (9/16). NGC ID# 26MT, PCGS# 710544

## 1871 Liberty Octagonal Quarter, BG-765 MS65 Deep Prooflike

- 4793 1871 Liberty Head Octagonal 25 Cents, BG-765, R.3, MS65 Deep Prooflike NGC.** The mirrored sun-gold and peach fields are ideal save for a small strike-through above star 1. Mint-made "ghosts" from the wreath accompany the right-side stars. The reverse die engraver entered guide lines for the placement of DOLLAR and CAL, but the C is nonetheless too low and repunched. Census: 2 in 65 Deep Prooflike, 0 finer (9/16). PCGS# 910592 Base PCGS# 10592
- 4794 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS66 PCGS.** The mirrored apricot-gold fields are undisturbed. The portrait and wreath are well struck, and designed in fine style by Christopher Mohrig. The obverse is clashed and cracked, as usual for BG-790. Population: 7 in 66, 0 finer (9/16). NGC ID# 2BRA, PCGS# 10617
- 4795 1867 Liberty Round 25 Cents, BG-805, Low R.5, MS66 PCGS.** An unabraded butter-gold example with hints of lilac toning. Outstanding from the technical perspective, though we note laminations (as made) along the upper borders, notably at 1 o'clock on the reverse. Population: 5 in 66, 0 finer (9/16). NGC ID# 2BST, PCGS# 10666
- 4796 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS65 Deep Prooflike NGC.** A beautiful pumpkin-gold Gem with an exemplary strike and pristine preservation. A prominent vertical die crack bisects the reverse. Census: 4 in 65 Deep Prooflike, 4 finer (9/16). Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 2876. NGC ID# 2BV2, PCGS# 910730
- 4797 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS66 Deep Prooflike NGC.** A splendid Premium Gem with mirrored sun-gold surfaces and a sharp central strike. BG-869 is among the voluminous varieties of Christopher Ferdinand Mohrig. The overdate was crudely executed on the die, and reverse die breaks on the wreath further complicate the aesthetics. Census: 4 in 66 Prooflike, 0 finer (9/16). NGC ID# 2BV2, PCGS# 910730
- 4798 1875 Indian Round 25 Cents, BG-878, R.3, MS67 Deep Mirror Prooflike NGC.** A well struck sun-gold Premium Gem with outstanding preservation and highly reflective fields. The Indian has a sleepy expression on this more available Christopher Mohrig die marriage. Census: 3 in 67 Deep Mirror Prooflike, 0 finer (9/16). NGC ID# 2BVD, PCGS# 910739 Base PCGS# 10739
- 4799 1868 Liberty Octagonal 50 Cents, BG-906, High R.4, MS67 PCGS.** A splendid green-gold Superb Gem. The satiny fields are unabraded and display hints of tan toning. Among the many die marriages associated with Bay Area firm Frontier & Co. Population: 2 in 67, 0 finer (9/16). NGC ID# 2BW2, PCGS# 10764
- 4800 1868 Liberty Octagonal 50 Cents, BG-906, High R.4, MS67 NGC.** A scarce Period Two octagonal half dollar by Frontier & Co. The present butter-gold example is well struck save for the D in DOLLAR, and is essentially immaculate. This piece is tied with one other as the finest at NGC (9/16). NGC ID# 2BW2, PCGS# 10764

**4801 1872/1 Indian Octagonal 50 Cents, BG-937, High R.4, MS65 Deep Prooflike NGC.** Breen-Gillio Die State I. An intricately struck and unabraded sun-gold Gem. The reverse exhibits scattered pinpoint strike-throughs, as coined. BG-937 is among the prodigious output of Christopher Ferdinand Mohrig. Census: 2 in 65 Prooflike, 1 finer (9/16). NGC ID# 2BX5, PCGS# 910795 Base PCGS# 10795

**4802 1872 Indian Octagonal 50 Cents, BG-939, Low R.5, MS66+ Prooflike NGC.** This scarce Breen-Gillio variety is identified by its handwritten date, along with a “fancy 2” denominator and no leaf tip immediately below the R in DOLLAR. The canary-gold surfaces are void of abrasions. The wreath shows incompleteness of strike where opposite the stars. Census: 1 in 66+ Prooflike, 1 finer as 67 without a Prooflike designation (9/16). NGC ID# 2BX7, PCGS# 710797

**4803 1881 Octagonal 50 Cents, BG-956, High R.4, MS66 Prooflike NGC.** Breen-Gillio State I. The upper right tip of the wreath points up. The bright yellow-gold surfaces display remarkable depth of reflectivity, along with moderately frosted devices. The frost extends into the fields between the elements of the wreath. A minor retained lamination is west of the fraction bar. Census: 1 in 66 Prooflike, 2 in 66 Deep Prooflike, 1 in 67 Deep Prooflike (9/16). NGC ID# 2BXT, PCGS# 710814

**4804 1881 Indian Octagonal 50 Cents, BG-965A, R.6, MS63 Prooflike NGC.** Struck from the same dies as BG-965, but on a thin planchet. The lemon-gold surfaces are unmarked. The maker is unknown for this well-engraved variety. Coined from boldly clashed dies, as usual for both BG-965 and BG-965A. Census: 2 in 63 Prooflike, 1 finer in 65 without a Prooflike designation (9/16). PCGS# 710911

**4805 1874/3 Indian Round 50 Cents, BG-1052, High R.4, MS65 Prooflike NGC.** A lovely sun-gold Gem with an especially reflective obverse field. The reverse displays a few small “ghosts” from the stars, as made. Die State I, with heavy die lines from the Indian’s chin and star 10. The dies were later lapped to remove the die lines, creating a much different appearance for strikes from Die State II. Census: 3 in 65 Prooflike, 2 finer (9/16). NGC ID# 2C23, PCGS# 710881

**4806 1875 Indian Octagonal 1 Dollar, BG-1127, R.4, MS63 Prooflike NGC.** Octagonal dollars are scarce relative to their fractional counterparts. A mirrored honey-gold representative. The central reverse is lightly brought up and retains the granular texture of the flan prior to the strike. A small lamination (as made) affects the D in DOLLAR. Census: 4 in 63 Prooflike, 3 finer (9/16). NGC ID# 2C3V, PCGS# 710938

## MORGAN DOLLARS

**4807 1878 7/8TF Doubled Legs, VAM-33, MS65+ PCGS.** The lower reverse margin exhibits rich orange-red and cobalt-blue toning. The remainder of this lustrous Gem is mostly brilliant. The strike is sharp, and marks are nearly absent. A mint-made strike-through on Liberty’s chin determines the market grade. NGC ID# 2TY3, PCGS# 134032 Base PCGS# 7074

**4808 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS.** A die line within the B in LIBERTY, and a tine below the fletchings, combine to confirm the VAM variety. A nicely struck Gem with booming luster and only a trace of golden toning. Refreshingly unabraded, and a desirable example of the ever-popular doubled tailfeathers *Guide Book* entry. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

**4809 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS.** Light tan-gold toning visits the lower reverse periphery. A lustrous Gem with minor obverse field grazes and a good strike save for blending above the ear. The several “doubled tailfeather” VAMs are popular, and frequently collected by die variety. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

## 1878 7/8TF Silver Dollar, MS65+ VAM-37, 7/4 Strong

**4810 1878 7/8TF 7/4 Strong, VAM-37, MS65+ PCGS.** A trace of golden patina visits the reverse margin, but this lustrous and nicely struck Gem is nearly brilliant. The fields are uncommonly free from abrasions, and the portrait exhibits minimal marks. A well-preserved example of the popular “doubled tailfeathers” first-year Morgan dollar. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078

**4811 1878 7TF Reverse of 1879 MS65 PCGS.** A broad arc of aquamarine and rose-red toning adorns more than half of the obverse. The toning pattern was created when one coin overlapped another within a sealed canvas bag, with the exposed portion near the bag surface. Sharply struck and lustrous with well preserved fields and minor facial contact. NGC ID# 253L, PCGS# 7076

**4812 1878-CC MS65 PCGS.** This first-year Carson City Morgan is razor-sharp and brilliant with frosty luster. A few vertical roller marks remain on Liberty’s jaw, but actual abrasions are scant. Eye appeal is outstanding. NGC ID# 253M, PCGS# 7080

**4813 1878-CC MS65 PCGS.** An impressive Gem Carson City Morgan dollar representing the first year of the design, this piece exhibits fully brilliant and untuned silver surfaces with frosty luster. NGC ID# 253M, PCGS# 7080

**4814 1878-CC MS64 Prooflike NGC.** Lightly mirrored fields frame the lustrous devices of this Choice Mint State example that displays excellent contrast. Both sides are brilliant and untuned. NGC ID# 253M, PCGS# 7081

**4815 1879 MS66 PCGS.** The obverse is orange-gold with a hint of ruby-red throughout the border. The reverse is predominantly navy-blue but lavender is also present, particularly near UNITED. Lustrous and nicely struck with exemplary preservation. NGC ID# 253S, PCGS# 7084

**4816 1879 MS66 PCGS.** While reasonably available at the Premium Gem grade, finer examples are extremely challenging to locate and they are seldom offered. This MS66 example is frosty and brilliant with dazzling cartwheel luster. A glass reveals smooth surfaces and a clean cheek on Liberty with essentially full details on Liberty’s portrait and the eagle’s plumage. PCGS shows just four numerically finer pieces (9/16). NGC ID# 253S, PCGS# 7084

**4817 1879 MS66 PCGS.** Narrow but splendid bands of orange-red and navy-blue endow the peripheries of this lustrous second-year Morgan dollar. The reverse appears immaculate, and the obverse shows only delicate marks. The centers lack a complete impression. NGC ID# 253S, PCGS# 7084

**4818 1879-O MS65 NGC.** Each side exhibits a crescent of reddish-gold toning on the otherwise brilliant silver surfaces of this highly lustrous Gem. NGC has only certified eight numerically finer examples (9/16). NGC ID# 253X, PCGS# 7090

**4819 1879-S Reverse of 1878, VAM-9, MS64+ PCGS. CAC.** A Top 100 Variety. Third Reverse 1879-S dollars are prevalent, even in quality Mint State, but Second Reverse examples are scarce. They are also increasingly collected by VAM variety. The present sharply struck and lustrous near-Gem has clean surfaces and light gold toning. NGC ID# 253W, PCGS# 133858 Base PCGS# 7094

**4820 1879-S MS67+ PCGS. CAC.** The obverse of this lovely Superb Gem Morgan dollar exhibits satin luster beneath blue and iridescent toning, and the reverse is reflective with mostly brilliant silver surfaces that show delicate iridescence above the eagle. NGC ID# 253X, PCGS# 7092

**4821 1880 MS66 PCGS.** This Premium Gem 1880 Morgan dollar is among the finest at PCGS (10/16), displaying radiant, frosty luster with a hint of champagne color near the borders. The strike is sharp, and the only mentionable abrasions are few field marks above the eagle's head on the reverse. NGC ID# 253Y, PCGS# 7096

**4822 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. Potent luster invigorates nearly brilliant surfaces. A well struck Gem with a practically pristine reverse. The obverse is smooth aside from a two moderate marks near the nose. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

#### 1880/79-CC Silver Dollar, MS66 Reverse of 1878, VAM-4

**4823 1880/79-CC Reverse of 1878, VAM-4, MS66 PCGS.** A Top 100 Variety. Sharply struck and lustrous with a mere hint of tan toning. The reverse is essentially pristine, and the obverse shows only delicate grazes. The most obvious overdate of the Morgan series, with strong remnants of *two* underdigits. The obsolete Second Reverse only adds to the appeal. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**4824 1880-CC Reverse of 1879, 8/7 Dash, VAM-8, MS65 NGC. Gold CAC.** Autumn-gold and forest-green toning embrace the borders of this lustrous and well preserved Carson City dollar. The centers are incompletely brought up, but the remainder of the strike is good. Certified in a pre-hologram holder. *From The Walter Freeman Collection, Part II.* PCGS# 41142 Base PCGS# 7100

#### 1880-CC Dollar, MS66+ Crescent of Rainbow Toning

**4825 1880-CC Reverse of 1879, 8/7 Dash, VAM-8, MS66+ PCGS.** The 1880-CC was well-represented in the GSA release of the 1970s, explaining the prevalence of high-grade examples on the market. Nevertheless, there are always more collectors looking for a nice representative than there are coins in the top levels of preservation. A crescent of rainbow toning colors the lower obverse. The other areas are fully brilliant and thickly frosted. Crisply impressed aside from the centers. PCGS shows 35 finer submissions (9/16). PCGS# 41142 Base PCGS# 7100

#### 1880-CC VAM-10 Dollar, MS66+

**4826 1880-CC Reverse of 1879, 8/7 Dash, VAM-10, MS66+ PCGS. CAC.** A high-grade Carson City Morgan dollar with lustrous and virtually brilliant surfaces. The strike is good, and the fields are close to pristine. Minor grazes on the portrait are all that deny an even finer grade. VAM-10 is identified by the hockey stick-shaped die line on Liberty's upper lip. NGC ID# 35BV, PCGS# 41148 Base PCGS# 7100

**4827 1880-O MS64 NGC.** Small or Micro O. A sharply struck New Orleans type coin. The reverse is brilliant, but the obverse displays dusky ruby-red and caramel-gold toning. The reverse is well preserved, and the obverse shows only a few unobtrusive abrasions. NGC ID# 2543, PCGS# 7114

**4828 1880-O Checkmark, VAM-21, MS64 PCGS.** A Hot 50 Variety. Micro O. The variety is undesignated on the holder, but its characteristics are present, including a die scratch on Liberty's eye and specific die cracks through STATES OF. A lightly toned, well struck, and highly lustrous Choice New Orleans dollar. NGC ID# 2543, PCGS# 133987 Base PCGS# 7114

**4829 1880-S MS67+ PCGS.** Medium S. A magnificent silver dollar type coin. Potent luster sweeps nearly pristine surfaces. The strike is precise, and the eye appeal is exceptional. A glimpse of struck-in grease is at the base of the eagle's left (facing) wing. NGC ID# 2544, PCGS# 7118

**4830 1880-S MS67 PCGS. CAC.** Waves of rainbow toning embellish the lower half of this Superb Gem 1880-S Morgan dollar, while the balance of the obverse and the entire reverse is untuned. The strike and preservation are all that could be expected for this grade and issue, but the amazing patina rules. NGC ID# 2544, PCGS# 7118

**4831 1880-S MS66 Deep Mirror Prooflike PCGS. CAC.** Medium S. A brilliant and beautiful silver dollar that boasts blatant contrast between the frosty motifs and reflective fields. Although the 1880-S will never be rare, examples with comparable eye appeal remain elusive. NGC ID# 2544, PCGS# 97119

**4832 1880/9-S VAM-11, Medium S, MS67 PCGS.** A Hot 50 Variety. A semiprooflike Superb Gem. Essentially brilliant, and the reverse is practically pristine. Obverse contact is minimal. A *Guide Book* variety, VAM-11 is traditionally regarded as an 1880/9 overdate, though the die lines within the upper half of the 0 are less than definitive. NGC ID# 2544, PCGS# 133988 Base PCGS# 7122

**4833 1881-CC MS65+ NGC.** A wonderful Gem Carson City Morgan dollar, richly toned in gold, blue, and violet over the entire obverse. The reverse is fully brilliant with frosty silver luster. NGC ID# 2549, PCGS# 7126

**4834 1881-CC MS66 NGC. VAM-2.** A blush of orange toning illuminates the date region, and the margins display hints of golden patina. Otherwise, this lustrous and sharply struck Carson City dollar remains brilliant. The reverse field is essentially pristine, and the portrait shows only trivial contact. NGC ID# 2549, PCGS# 7126

**4835 1881-CC MS66+ PCGS.** Dazzling, frosty mint luster cartwheels around untuned surfaces on this high-end Premium Gem, showcasing sharp devices and impeccable preservation to their fullest advantage. The 1881-CC is a popular issue, although pieces grading finer than the present piece are infrequently available. NGC ID# 2549, PCGS# 7126

**4836 1881-CC MS66 PCGS. CAC. VAM-2.** Light tan toning graces this lustrous and precisely struck Premium Gem. An exemplary example of the second-lowest mintage Carson City Morgan dollar issue, made available in quality grades by the GSA auctions of the 1970s. NGC ID# 2549, PCGS# 7126

**4837 1881-CC MS66+ PCGS. CAC.** Vibrant, frosty mint luster gives this high-end Premium Gem excellent visual appeal, while a loupe fails to reveal more than a few tiny ticks on the surfaces. The coin is sharp and brilliant, showing no observable toning. NGC ID# 2549, PCGS# 7126

**4838 1881-O MS65+ PCGS. CAC.** This brilliant, vibrantly lustrous high-end Gem shows only a few trivial marks in the left obverse field that prevent a full MS66 grade. Eye appeal is strong. The 1881-O dollar is plentiful in MS65, but PCGS records only 36 numerically finer representatives (9/16). NGC ID# 2548, PCGS# 7128

**4839 1881-S MS67+ PCGS. CAC.** Arcs of cherry-red, honey-gold, and ocean-blue toning grace the upper obverse. Hints of lemon patina adorn the peripheries. This splendidly toned Superb Gem type coin has a full strike, and is pristine aside from minor marks on Liberty's neck. NGC ID# 2549, PCGS# 7130

**4840 1881-S MS67+ PCGS. CAC.** This 1881-S Morgan dollar is a dream coin for the type collector. The availability of the issue will make the price affordable, while the extent of the eye appeal will surpass even the most strict expectations. The strike is full, and the satiny surfaces radiate cartwheel luster. The obverse displays a wide crescent of rainbow toning along the left and lower margins, while the reverse has a brilliant interior with vivid rainbow hues along the left-hand border. A couple of tiny nicks on Liberty's chin are the only flaws. NGC ID# 2549, PCGS# 7130

**4841 1881-S MS67+ PCGS. CAC.** Blazing cartwheel luster combines with modest reflectivity in the fields, delivering stellar eye appeal in conjunction with sharp motifs and unabraded surfaces. The coin is brilliant and seemingly untouched — the ideal type coin. NGC ID# 2549, PCGS# 7130

**4842 1881-S MS67+ PCGS. CAC.** A very nearly flawless example of this popular type-coin issue, showing dazzling, brilliant mint bloom and razor-sharp design elements. Eye appeal is exceptional, certain to please even the most discerning collector. NGC ID# 2549, PCGS# 7130

**4843 1881-S MS67+ PCGS. CAC.** Dazzling mint luster engulfs the radiant surfaces of this high-end Superb Gem type coin. The strike is razor-sharp, and neither side shows mentionable toning. Eye appeal is outstanding. NGC ID# 2549, PCGS# 7130

#### 1881-S Dollar, MS68 Stunning Eye Appeal

**4844 1881-S MS68 NGC.** Exceptionally attractive toning covers the obverse in tangerine-gold, lemon-yellow, violet, cherry-red, and robin's egg blue shades while the reverse is brilliant-white. Semireflective fields surround frosted devices for pleasing contrast. A tiny surface flaw, apparently as struck, above TE of STATES is the only mark to mention on this supremely attractive, Superb Gem 1881-S dollar. The strike, surfaces, and visual appeal are virtually unimprovable. Tied for finest at NGC, while PCGS reports just two numerically finer coins (9/16). NGC ID# 2549, PCGS# 7130

#### 1881-S Dollar, MS68 Dramatic Reverse Toning

**4845 1881-S MS68 NGC.** Always a popular issue for type in the finest Mint State grades, the 1881-S is almost always found with attractive surfaces and excellent eye appeal. This blazing, silver-white coin shows a thin band of orange toning above PLURIBUS but is otherwise untuned and reflective on the obverse. The reverse surrenders a slice of its right side to a crescent of vivid toning with shades ranging from reddish-bronze and amazonite-blue to fuchsia-pink, yellow, and green. Tied for the numeric finest at NGC (9/16). NGC ID# 2549, PCGS# 7130

**4846 1881-S VAM-54, Wounded Eagle, Hit List 40, MS65 PCGS.** A Hit List 40 Variety. According to Morgan dollar expert John Roberts, VAM-54B "features one of the longest die breaks found on any coin in the series. The break traverses the eagle's breast and neck with displacement of the design." The present white, lustrous, and well preserved Gem shows the break in its full glory. Population: 5 in 65, 1 finer (9/16). PCGS# 412604 Base PCGS# 7130

**4847 1882 MS66 PCGS.** This vibrantly lustrous Premium Gem is among the finest that the budget-restricted collector will be able to acquire, as PCGS has seen only 10 Superb Gems finer (9/16). The strike is bold, and the frosty, brilliant surfaces show trivial signs of contact. NGC ID# 254A, PCGS# 7132

**4848 1882 MS66 PCGS.** A brilliant, frosty example of this conditionally better-date Philadelphia issue, showing a sharp strike and only a few minor grazes on the cheek. PCGS has recorded only 10 Superb Gems finer (9/16). NGC ID# 254A, PCGS# 7132

#### 1882 Morgan, MS65 Deep Mirror Prooflike Conditionally Scarce

**4849 1882 MS65 Deep Mirror Prooflike PCGS.** This cameo-contrasted Gem is near the top of the line for Deep Mirror Prooflike 1882 silver dollars. The strike is razor-sharp, and lightly marked fields show considerable mirroring. A hint of light golden toning appears around the extreme outer peripheries. Population: 34 in 65 (1 in 65+) Deep Mirror Prooflike, 1 finer (9/16). NGC ID# 254A, PCGS# 97133

**4850 1882-CC MS66 PCGS.** A particularly well-preserved, frost-white example of this popular Carson City issue, showing well-struck motifs and virtually flawless fields. A few faint grazes on Liberty's cheek are barely noticed. Finer examples of the date are scarcely seen. NGC ID# 254S, PCGS# 7134

- 4851 1882-CC MS66+ PCGS. CAC.** An impressive Premium Gem, this highly lustrous Carson City dollar exhibits fully brilliant and satiny silver surfaces. Sharp design motifs add to its eye appeal. A few minuscule freckles of gold toning are evident on each side. NGC ID# 254S, PCGS# 7134
- 4852 1882-CC MS65+ Deep Mirror Prooflike PCGS.** Dramatic cameo contrast sets off deep mirrors and frost-white devices on this high-end Gem 1882-CC dollar, showcasing sharp design elements. A few faint grazes are not out of line for the grade. The coin is brilliant and impressively eye-appealing. Finer Deep Mirror Prooflike examples are scarce. NGC ID# 254B, PCGS# 97135
- 4853 1882-CC MS65 Deep Mirror Prooflike PCGS. CAC.** A stunning Gem with brilliant and highly lustrous devices over deeply mirrored fields and exceptional eye appeal. Scarce at this grade level, and elusive in finer grades. PCGS has only certified 76 finer pieces (9/16). NGC ID# 254B, PCGS# 97135
- 4854 1882-CC MS65 Deep Mirror Prooflike PCGS. CAC.** The exceptionally mirrored fields contrast with icy motifs. A brilliant Carson City type coin that has a good strike and a well preserved reverse. The portrait is also refreshingly unabraded. The field near the profile displays delicate contact. NGC ID# 254B, PCGS# 97135
- 4855 1882-O MS65 PCGS. CAC.** This satiny Gem features a brilliant and highly lustrous obverse, with a fully lustrous and richly toned reverse featuring olive and blue with a splash of gold. PCGS has only certified 64 finer examples (9/16). NGC ID# 254C, PCGS# 7136
- 4856 1882-O MS65+ PCGS. CAC.** This is an important condition rarity in the Morgan dollar series that is elusive in finer grades. A lovely Gem, this piece features brilliant and untuned silver surfaces with above average design elements and brilliant satin luster. PCGS has only certified 64 finer examples (9/16). NGC ID# 254C, PCGS# 7136
- 4857 1882-O MS65 Prooflike PCGS.** Rarely does one encounter an 1882-O dollar so impeccably preserved with Prooflike surfaces. The strike is remarkably strong for the Louisiana branch mint. Each side virtually brilliant with glimpses of sea-green and sky-blue color at certain angles. Population: 41 in 65 Prooflike, 2 finer (9/16). NGC ID# 254C, PCGS# 7137

**1882-O/S Dollar, MS64+  
VAM-4, Top 100 Variety**

- 4858 1882-O/S Recessed, VAM-4, MS64+ PCGS. CAC.** A Top 100 Variety. The crossbar of the S is recessed within the loop of the O mintmark. The dies made to produce this variety were originally intended for use at San Francisco. Shimmering frost illuminates untuned, carefully preserved surfaces. A loupe reveal microscopic ticks on the cheek. Strongly struck for the facility. PCGS records two finer submissions for all O/S varieties. CAC: 36 in 64, 0 finer (9/16). NGC ID# 254D, PCGS# 133891 Base PCGS# 7138
- 4859 1883 MS67 PCGS.** Original, satiny luster envelops unabraded surfaces on this Superb Gem 1883 Morgan dollar. This Philadelphia issue is elusive in this lofty grade, and PCGS records only four numerically finer submissions (9/16). The coin is sharply struck and devoid of mentionable toning. NGC ID# 254G, PCGS# 7142

- 4860 1883 MS65 Deep Mirror Prooflike PCGS.** This is a sharply struck, well-preserved Gem with deeply reflective fields that offer pleasing cameo contrast on each side. A hint of light golden toning emerges from the peripheries but vanishes in the fields. PCGS lists only 10 numerically finer Deep Mirror Prooflike examples (10/16). NGC ID# 254G, PCGS# 97143

**1883-CC Morgan Dollar, MS66  
Eye-Stopping Deep Mirror Prooflike Fields**

- 4861 1883-CC MS66 Deep Mirror Prooflike PCGS.** A stunning white-on-black Deep Mirror Prooflike example of this Carson City issue that did not see extensive distribution until the GSA government releases in the 1970s. A minor portion of the released coins display prooflike surfaces, and a small number of those are truly Deep Mirror Prooflike such as the current Premium Gem. Untuned and brilliant with intensely mirrored fields, the raised devices show thick mint frost for outstanding contrast. A minimally marked and sharply struck coin, it exhibits brief blending of the hair definition over the ear. PCGS reports just two numerically finer coins in DMPL (9/16). NGC ID# 254H, PCGS# 97145
- 4862 1883-S MS61 PCGS.** A bright, untuned Mint State example of this better San Francisco issue, showing well-detailed devices and satiny mint luster. Scattered abrasions determine the grade, but none are individually noteworthy. NGC ID# 254K, PCGS# 7148
- 4863 1883-S MS61 NGC.** Both sides of this brilliant Mint State piece exhibit scattered grade-consistent marks. A patch of planchet striations above the eagle on the reverse remain from the draw bench when this planchet was prepared for striking. An attractive, untuned example, this piece will make a nice addition to a Mint State Morgan dollar collection. NGC ID# 254K, PCGS# 7148
- 4864 1883-S MS62 PCGS.** An impressive Mint State example of an important condition scarcity, this brilliant and untuned silver example has bold design motifs and satin luster. NGC ID# 254K, PCGS# 7148
- 4865 1883-S MS62 PCGS.** The 1883-S is a challenging date in Uncirculated condition, and most coins in the lower end of that range are lacking in eye appeal. The present MS62 coin showcases uncommonly vibrant, eye-catching luster and well-struck devices. Splashes of gold toning appear alongside scattered abrasions that determine the grade. NGC ID# 254K, PCGS# 7148
- 4866 1883-S MS62 PCGS. VAM-12.** The 1883-S has a fairly high mintage, but is nonetheless much scarcer than its S-mint Morgan predecessors in Uncirculated grades. Well struck and lustrous with refreshingly unmarked surfaces. The "Pitted Bow" variety with die rust left of the bow. Certified in a green label holder.  
*Ex: Chicago Central States Signature (Heritage, 4/2014), lot 10205, which realized \$3,055.* NGC ID# 254K, PCGS# 7148

**1883-S Morgan Dollar, Lightly Toned MS64  
Rarely Encountered Finer**

**4867 1883-S MS64 PCGS.** An attractive Choice Morgan dollar, with a blanket of greenish-gold, magenta, and amber toning. The lustrous surfaces show a scattering of minor contact marks under the patina and the design elements are well-detailed. The 1883-S is very scarce in finer Mint State grades and rare in Gem or finer conditions. PCGS reports just 20 numerically finer pieces (9/16). NGC ID# 254K, PCGS# 7148

**4868 1884-CC MS66+ PCGS. VAM-7A.** Lustrous, sharply struck, and brilliant with exemplary surfaces. The 1884-CC is the most available Carson City issue in Uncirculated grades, and provides many interesting VAM varieties for the advanced collector. VAM-7A has a repunched first 8 in the date, and heavy die cracks through STATES. NGC ID# 8BBF, PCGS# 7152

**4869 1884-CC MS66+ PCGS. CAC. VAM-6.** A crisply struck and thoroughly lustrous Carson City type coin. The fields are well preserved, and the portrait shows only trivial contact. VAM-6 is best known for its repunched left C in the mintmark. Field die lines near the tail are also characteristic of high-grade survivors. NGC ID# 8BBF, PCGS# 7152

**4870 1884-CC MS66+ PCGS. CAC. VAM-4A.** An attractively toned high-grade Carson City type coin. Caramel-gold and sea-green accompanies most of the coin, but a blush of tan, plum-red, and cobalt-blue patina embraces the upper reverse. Lustrous and well preserved with an interesting narrow diagonal streak across the eagle's breast. NGC ID# 8BBF, PCGS# 7152

**4871 1884-CC MS66+ PCGS. CAC.** Collectors have the GSA release of the 1970s to thank for the preponderance of high-grade 1884-CC dollars. This crisp, fully brilliant Premium Gem borders on Superb Gem quality. Cartwheel luster rolls over unmarked, thickly frosted surfaces. NGC ID# 8BBF, PCGS# 7152

**4872 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-4.** The obverse margin displays sun-gold. The reverse border exhibits apple-green and russet-red. Flashy and carefully preserved. The "Spiked Date" variety with a defective flag on the 1 in the date. An early die state, before VAM-4A, with a die line through the E in STATES but no "Pinned Wing Gouge" on the eagle. NGC ID# 254M, PCGS# 97153

**4873 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-4A.** A snow-white Carson City dollar that boasts mirrored fields and icy devices. Lightly abraded overall, with a reed impression near the arrowheads mentioned as an identifier. The so-called Spiked Date, Pinned Wing Gouge VAM, which refers to mint-made characteristics on the 1 in the date and the right (facing) wing near the breast. NGC ID# 254M, PCGS# 97153

**4874 1885 MS67 PCGS.** This is a plentiful date in the Morgan dollar series, but rarely found in Superb Gem grades. This piece has satiny silver luster with brilliant mint surfaces and extraordinary eye appeal. PCGS has only certified three finer examples (9/16). NGC ID# 254R, PCGS# 7158

**4875 1885 MS67 PCGS.** A crescent of iridescence clings to the right obverse border of this frosty Superb Gem. The surfaces are largely brilliant otherwise, save for a blush of champagne toning. PCGS reports only three examples in MS68 (one MS68+) (9/16). NGC ID# 254R, PCGS# 7158

**4876 1885-CC MS65 PCGS.** This is a frosty, untuned example with a strong cartwheel effect, sharp devices, and minimal marks. Only light grazes on Liberty's cheek limit the grade. The 1885-CC is a popular Carson City issue due to its low mintage of 228,000 pieces. NGC ID# 254S, PCGS# 7160

**4877 1885-CC MS65 PCGS. VAM-2.** 30th Anniversary Green Label Holder. Light olive-gray toning visits the obverse. The reverse displays peripheral golden-brown shades. Lustrous and well preserved with a good strike and pleasing eye appeal. The pick-up point for VAM-2 is a die line below the Morgan initial. NGC ID# 254S, PCGS# 7160

**4878 1885-CC MS65 PCGS. VAM-2.** Hints of wheat-gold toning adorn this primarily brilliant Carson City dollar. The fields and portrait are well preserved, though we note parallel thin lines on the hair above the ear. Among the lowest mintage issues of the Morgan series. Housed in an old green label holder. NGC ID# 254S, PCGS# 7160

**4879 1885-CC MS65 PCGS. VAM-3.** Delicate caramel-gold toning visits this highly lustrous and impressively preserved Gem. The strike is good and the cheek shows only faint contact. The reverse is close to pristine. A popular, low mintage Carson City issue. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS66+  
Lightly Toned and Lustrous**

**4880 1885-CC MS66+ PCGS. VAM-3.** Light silver-gray toning visits this lustrous Premium Gem. The surfaces are well preserved, and the strike shows only minor inexactness at the centers. Lowest mintage among Carson City Morgan issues, the 1885-CC is nonetheless available in better Mint State grades due to the GSA auctions of the 1970s. NGC ID# 254S, PCGS# 7160

**4881 1885-CC MS66+ PCGS. VAM-3.** A hint of almond-gold patina graces this highly lustrous and nicely struck Premium Gem. The fields are splendidly preserved, and the portrait displays only delicate marks. VAM-3 is readily attributed by a pair of die lines in front of Liberty's eye. NGC ID# 254S, PCGS# 7160

**4882 1885-CC MS66+ NGC. VAM-3.** Light sun-gold toning enriches the peripheries of this thoroughly lustrous Carson City coin. The surfaces are nicely struck, and free from mentionable imperfections. In Uncirculated grades, VAM-3 is the most prevalent variety of the low mintage 1885-CC. NGC ID# 254S, PCGS# 7160

**4883 1885-CC MS64 Deep Mirror Prooflike PCGS. VAM-3.** Frosty motifs and glassy fields ensure the eye appeal of this well-struck Carson City near-Gem. The brilliant surfaces display relatively few marks. The lowest mintage CC-mint Morgan issue. NGC ID# 254S, PCGS# 97161

**4884 1885-O MS65+ Deep Mirror Prooflike PCGS. CAC.** At first glance, this Deep Mirror Prooflike New Orleans dollar looks like a full proof. Only on close inspection does its circulation strike characteristics become apparent. A splendid piece, mostly brilliant, with peripheral blue and violet toning. CAC: 27 in 65, 11 finer (9/16). NGC ID# 254T, PCGS# 97163

**4885 1885-S MS65 PCGS.** The 1885-S silver dollar is rarely seen above the Gem grade level. This piece displays a bold strike and incredibly vibrant, frosty luster with the barest trace of light champagne color. A few insignificant grazes and ticks preclude a finer grade but hardly reduce the eye appeal. PCGS lists 43 numerically finer submissions, NGC only 14 (9/16). NGC ID# 254U, PCGS# 7164

---

**1886-O Dollar, MS63**  
**Very Scarce Any Finer**

**4886 1886-O MS63 PCGS.** Untoned save for the suggestion of pale-gold patina that imparts a faint ivory sheen across smooth and satiny silver surfaces, this Select Uncirculated example is sharply struck for an 1886-O. Solidly in the “optimal collecting grade” for the issue. Finer coins are available for a price, but often without a substantial improvement in surface quality or eye appeal over this appealing representative. NGC ID# 254W, PCGS# 7168

**4887 1887 MS66 PCGS. CAC.** Spectacular arcs of powder-blue, sun-gold, cherry-red, autumn-brown, and jade-green endow the lower obverse. The reverse border displays apricot toning. Lustrous and nicely struck with exceptionally mark-free fields. A minor strike-through (as made) on the field northeast of the arrowheads. NGC ID# 27Y3, PCGS# 7172

**4888 1887-S MS65+ PCGS.** Both sides of this lovely Gem exhibit delicate champagne toning with splashes of gold and emerald along the borders. An impressive, sharply struck example exhibiting frosty luster and an above average strike. PCGS has only certified 33 finer examples (9/16). NGC ID# 2554, PCGS# 7180

**4889 1888-O MS66 PCGS.** Although usually available in this grade, the 1888-O Morgan dollar is unknown finer at PCGS (10/16). The present Premium Gem displays a bold strike and frosty, luminous luster. There are no significant abrasions, and each side produces only brilliant, silver-white color. NGC ID# 2556, PCGS# 7184

**4890 1889-CC VF30 PCGS.** Deep steel-gray toning blankets this lightly abraded key date Carson City dollar. The eagle's wings are well defined. Those in search of a quality midgrade representative need look no further.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2559, PCGS# 7190

**4891 1889-CC VF30 PCGS.** Hints of almond-gold toning visit this predominately slate-gray representative. A lightly to moderately abraded key date Carson City dollar. The lower reverse has occasional traces of microgranularity.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2559, PCGS# 7190

**4892 1889-CC VF35 PCGS.** Golden-brown and cobalt-blue toning graces the borders of this otherwise pearl-gray representative. Glimmers of luster emerge from the margins, and no marks require singular description. The scarcest Carson City Morgan dollar issue.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2559, PCGS# 7190

**4893 1889-CC XF40 NGC.** This is a relatively smooth, pewter-gray XF example of the key date in the Carson City short set, showing faint remnants of luster in the protected peripheral fields near the rims. The 1889-CC is elusive in this upper circulated grade. NGC ID# 2559, PCGS# 7190

---

**1889-CC Silver Dollar, XF40**  
**Originally Toned, Coveted CC Issue**

**4894 1889-CC XF40 PCGS.** Rich, olive-gray toning encompasses both sides of this key Carson City dollar. The Carson City Mint was not fully operational until October of 1889 after a three-year shutdown of coinage operations. As a result, just 350,000 pieces were struck for the year. This is a pleasing, original example — many similarly graded pieces are less so.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2559, PCGS# 7190

---

**1889-CC Morgan Dollar, XF40**  
**Carson City Key Issue**

**4895 1889-CC XF40 PCGS.** Gunmetal-blue, russet, and deep-gray toning yields to silver-gray interludes across the smoothly worn surfaces of this key Carson City dollar. Just 350,000 pieces were struck, making the 1889-CC among the most sought-after issues in the Morgan dollar series. A few light marks are hidden beneath the toning, along with some old build-up at the date and within the lettering.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2559, PCGS# 7190

---

**1889-CC Morgan Dollar, XF45**  
**Lightly Toned, Few Abrasions**

**4896 1889-CC XF45 NGC.** Just 350,000 pieces were struck and the GSA sales released only a single coin, solidifying the 1889-CC's position as indisputably the rarest Carson City silver dollar. This Choice XF example is lightly abraded with pleasing silver-gray surfaces and a hint of mint luster at the borders. As usual, the strike is incomplete at the centers but the device definition is sharp in all other areas. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, Choice XF  
Famous Capstone Issue**

- 4897 1889-CC XF45 PCGS.** The 1889-CC ranks high up among the most famous Morgan dollars. Most of the 350,000 coins minted were probably melted or otherwise lost through attrition in Western commerce. Stone-gray surfaces show traces of champagne-gold and olive-green patina. Although this Choice XF dollar has clearly seen circulation, the motifs still show substantial detail. A few scuffs appear on Liberty's cheek. NGC ID# 2559, PCGS# 7190

**1889-O Silver Dollar, MS65  
Clean Cheek**

- 4898 1889-O MS65 PCGS.** Frosty, brilliant luster gives this Gem 1889-O Morgan dollar outstanding visual appeal. The hair above Liberty's ear shows minor incompleteness, but the eagle's breast is well-defined. Only a few faint grazes below the E and P in E PLURIBUS UNUM prevent a finer grade. As it stands, only 10 finer coins are reported by PCGS (10/16). NGC ID# 255A, PCGS# 7192

- 4899 1889-S MS65 PCGS.** The low mintage 1889-S is a much better date as a Gem. This lustrous example displays faint almond-gold toning and a good strike. The fields are remarkably void of marks, and the cheek is also smooth. NGC ID# 255B, PCGS# 7194

- 4900 1890 MS65 PCGS.** This brilliant and frosty Gem has untuned surfaces and full cartwheel luster. A highly appealing piece with few that are certified in higher grades. PCGS has only graded five finer examples (9/16). NGC ID# 255C, PCGS# 7196

- 4901 1890 MS65+ PCGS.** Gem condition is about the finest grade most collectors can reasonably expect to acquire, as hundreds of 1890 dollars are available at that level. The population declines by nearly 99% from MS65 to MS66, though. Each side is entirely brilliant and strongly detailed with frosty cartwheel luster. There are merely five finer submissions at PCGS (9/16). NGC ID# 255C, PCGS# 7196

- 4902 1890 MS64 Deep Mirror Prooflike PCGS.** A deeply mirrored and modestly contrasted Choice example of this better Philadelphia issue. The devices are well brought up, and only light abrasions are seen in the fields. PCGS lists 10 Deep Mirror Prooflike coins finer (10/16). NGC ID# 3VX7, PCGS# 97197

- 4903 1890-CC MS64 PCGS. VAM-5.** The second C in the mintmark is repunched north. A late die state with many interesting cracks across both sides. Potent cartwheel luster illuminates this brilliant and sharply struck Choice Carson City dollar. The obverse is especially free from relevant contact. NGC ID# 255D, PCGS# 7198

- 4904 1890-CC MS64 PCGS.** This Choice Mint State Carson City Morgan dollar exhibits wispy splashes of gold toning on its otherwise fully brilliant silver surfaces. Minuscule marks prevent a higher grade assessment. NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65  
Better Carson City Issue**

- 4905 1890-CC MS65 PCGS. VAM-7.** Doubled CC Inside Loops. A stark-white, brilliant Gem example of this better Carson City issue. Cartwheel mint luster flashes across the sharply struck, nearly mark-free and frosty surfaces. Those who prefer untuned, high-end Morgan dollars will be hard-pressed to improve on this coin, scarce in its technically advanced condition and very rare in a higher grade. PCGS reports just 15 numerically finer pieces (9/16). NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS64 Deep Mirror Prooflike  
Cameo Contrast**

- 4906 1890-CC MS64 Deep Mirror Prooflike PCGS.** The 1890-CC is challenging in high grade Deep Mirror Prooflike. This near-Gem displays sharp, frosty design elements set amid reflective, cameo-contrasting fields. A few light marks in the field are insignificant. Traces of light golden toning appear throughout. PCGS has seen only 27 numerically finer Deep Mirror Prooflike examples (10/16). NGC ID# 45YV, PCGS# 97199

- 4907 1890-O MS65 PCGS.** Pleasing golden-brown and aquamarine toning ensures the eye appeal of this lustrous, nicely preserved, and moderately well-struck New Orleans Gem. A high mintage but conditionally elusive issue. PCGS has seen only 28 numerically finer representatives (9/16). NGC ID# 255E, PCGS# 7200

- 4908 1890-O MS65 PCGS.** Light golden toning warms this frosty and beautifully preserved Gem 1890-O Morgan dollar, deepening around the outer peripheries. The strike is weak on the central high points, as usual, with faint roller marks across Liberty's cheek. PCGS has seen only 28 numerically finer submissions (9/16). NGC ID# 255E, PCGS# 7200

- 4909 1890-O MS65 PCGS.** Frosty luster and remarkably clean surfaces complement warm champagne toning the cedes to richer amber-orange and sea-green around the borders. The strike is soft on the eagle's breast and the hair above Liberty's ear, as usual. PCGS lists only 28 numerically finer representatives (10/16). NGC ID# 255E, PCGS# 7200

- 4910 1890-O MS65 Prooflike PCGS.** Faint champagne toning appears on the prooflike surfaces of this lovely Gem Morgan dollar. The fields are fully mirrored while the devices exhibit satin luster, providing light field-to-device contrast. A splendid piece that exhibits an unusually sharp strike. Population: 31 in 65 (2 in 65+) Prooflike, 3 finer (9/16). NGC ID# 2XU9, PCGS# 7201

- 4911 1891 MS64 Prooflike PCGS.** Brilliant surfaces yield prooflike fields and frosty design elements on this Choice 1891 Morgan dollar. The strike is sharp, and a few light marks on Liberty's cheek are all that limit the grade. Prooflike 1891 dollars are rare in MS64 and unknown finer. Population: 21 in 64 Prooflike, 0 finer (9/16). NGC ID# 255G, PCGS# 7205
- 4912 1891-CC MS64 PCGS.** In high grade, the 1891-CC is a better date in the Carson City short set. This near-Gem example displays frosty, untuned mint luster with only a few minor grazes. The strike is well-executed, and the overall eye appeal is excellent. NGC ID# 255H, PCGS# 7206
- 4913 1891-CC Spitting Eagle, VAM-3, Top 100, MS64 PCGS.** A Top 100 Variety. A die chip near the eagle's beak gives this popular variety its famous "Spitting Eagle" moniker. The present coin displays frosty, untuned luster and well-defined motifs. A small mark on Liberty's cheek is all that prevents a finer grade. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 4914 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. Lavender-brown and forest-green enrich the obverse margin. The reverse shows only a glimpse of russet toning. This lustrous and nicely struck Carson City dollar is surprisingly void of marks aside from an obverse rim nick at 1 o'clock. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 4915 1892-CC MS62 PCGS. VAM-10A.** A 9 or 2 appears in the denticles below the date, and both sides show heavy clash marks. Effusive mint frost washes over brilliant, lightly abraded surfaces. Delicate gold and lavender toning adorns the upper obverse and lower reverse rims. NGC ID# 255M, PCGS# 7214
- 4916 1892-CC MS63 NGC. VAM-10A.** The protected regions of this Select Carson City dollar display golden-orange and gunmetal-blue iridescence, while the fields and devices maintain a frosty, brilliant appearance. Well-struck with a trace of merging over the ear. Remnants of a 9 or 2 in the denticles and bold clashing confirm the variety. NGC ID# 255M, PCGS# 7214
- 4917 1892-CC MS63 PCGS.** This is a spectacular Select Mint State example with mostly brilliant silver surfaces and splendid accents of reddish-gold toning. A few trivial marks are noted, but the eye appeal is strong for the assigned grade. NGC ID# 255M, PCGS# 7214
- 4918 1892-CC MS63 PCGS.** Splashes of sea-green and amber toning appear over faintly lavender-tinted silver luster on this Select 1892-CC Morgan dollar. Slight weakness is seen on the hair above Liberty's ear, as usual. No major abrasions are mentionable. NGC ID# 255M, PCGS# 7214

**1892-O Morgan Dollar, MS65  
Snow-White and Smooth**

- 4919 1892-O MS65 PCGS.** Like several other O-mint issues from the 1880s and 1890s, the 1892-O is common in circulated grades, but scarce in Mint State. Gems are desirable, as they are insufficient in quantity to meet demand. This brilliant and lustrous silver dollar has exceptionally smooth surfaces. The centers display minor incompleteness, usual for the New Orleans facility of the era. NGC ID# 255N, PCGS# 7216
- 4920 1892-S AU50 PCGS.** An above-average example of the elusive semi-key 1892-S Morgan dollar, this piece exhibits light gray surfaces and delicate peripheral gold toning. NGC ID# 255P, PCGS# 7218

- 4921 1892-S AU53 PCGS.** A brilliant representative of this much better San Francisco issue. The centers display wear, but luster flashes from the wings and borders. The only reportable marks are near the upper left portion of the wreath. NGC ID# 255P, PCGS# 7218
- 4922 1892-S AU53 PCGS.** Considerable luster remains on the attractive light gray surfaces of this pleasing AU example. Unlike many similarly graded pieces, this example has no unsightly bagmarks to distract the viewer. A highly appealing example for the assigned grade. NGC ID# 255P, PCGS# 7218
- 4923 1892-S AU53 PCGS.** Although the 1893-S is known as the key to the circulation strike Morgan dollar series, the 1892-S parallels its famous brother. This issue is typically found in lower circulated grades, with an average certified grade of just XF40, and pieces in the AU grade range are elusive. This example has brilliant and untuned silver surfaces, and retains considerable mint luster. An important opportunity for the advanced collector. NGC ID# 255P, PCGS# 7218

**1892-S Silver Dollar, AU55  
Reflective, Semiprooflike Fields**

- 4924 1892-S AU55 NGC.** Aside from some brief field chatter and a few tiny marks and faint lines, the surfaces of this conditionally scarce 1892-S dollar are remarkably problem-free given the semiprooflike surfaces that exist on both sides. The strike is sharp and actual wear is difficult to discern. The coin is virtually untuned save for a glint of gold at the rims. A Choice About Uncirculated example, challenging at this level and any finer. NGC ID# 255P, PCGS# 7218

**1892-S VAM-2 Dollar, Choice AU  
Doubled Date, Top 100**

- 4925 1892-S Doubled Date, VAM-2, AU55 PCGS.** A Top 100 Variety. The variety is undesignated on the PCGS holder, but broad repunching is evident on the final three date digits. Light butter-gold and lilac toning visits the borders. Luster dominates the margins and motifs. Marks are inconsequential aside from moderate contact near the upper left portion of the wreath. Population: 5 in 55, 1 finer (9/16). NGC ID# 255P, PCGS# 133941 Base PCGS# 7218
- 4926 1893 MS63 PCGS. VAM-2.** The 3 in the date is lightly repunched north. A lustrous example with a brilliant obverse and light straw-gold toning on the central reverse. The strike is good, and the lustrous fields are only lightly abraded. The cheek displays grazes consistent with the grade. NGC ID# 255R, PCGS# 7220

**4927 1893 MS64 PCGS. VAM-2.** This low mintage silver dollar is brilliant and lustrous with smooth fields and unimportant contact on the portrait and the eagle's left (facing) wing. VAM-2 shows minor repunching on the 3 in the date. NGC ID# 255R, PCGS# 7220

**4928 1893-CC XF40 NGC.** The final-year Carson City dollar is also a series semikey. This is a lightly abraded silver-gray example with noticeable luster and a blush of two of gunmetal toning near the left termination of the wreath.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 255S, PCGS# 7222

#### 1893-CC Dollar, AU58 Final-Year Carson City Example

**4929 1893-CC AU58 PCGS.** This is the final entry in the Carson City Morgan dollar set and always popular as such. The CC mint manufactured 677,000 dollars before shutting down its coining operations on June 1. They represent the secondmost elusive issue of the year after the 1893-S. This nearly Uncirculated is brilliant with splashes of rose-gold color around the borders. Bright surfaces glow with partial remaining luster. Close examination yield what would otherwise be an indiscernible trace of friction over the cheek, ear, and breast feathers. NGC ID# 255S, PCGS# 7222

**4930 1893-S Good 4 PCGS. VAM-1.** LIBERTY is bold on this affordable key date 1893-S dollar. The mintmark is apparent, and the date is well separated from the rim. The pearl-gray surfaces are unblemished aside from a small dig on the reverse field above the eagle's head.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 255U, PCGS# 7226

**4931 1893-S — Filed Rims — PCGS Genuine. VG Details. VAM-1.** A cream-white key date silver dollar. All legends are sharp, and the only mentionable marks are a reed impression behind the mouth, and an obverse rim knock at 5 o'clock. Both rims are filed, and the surfaces display parallel hairlines. NGC ID# 255U, PCGS# 7226

**4932 1893-S — Improperly Cleaned — NGC. Fine. VAM-2.** A slate-gray key date example with evenly hairlined surfaces. Only lightly abraded for a Fine silver dollar, though we note an edge knock over the ED in UNITED, and a small cigar-shaped mark below Liberty's ear. NGC ID# 255U, PCGS# 7226

#### 1893-S Dollar, VF Details Smallest Mintage in the Series

**4933 1893-S — Improperly Cleaned — NGC Details. VF.** Morgan dollar production decreased at all branches of the U.S. Mint in 1893, but nowhere was the decline more pronounced than the San Francisco facility. Only 100,000 Morgan dollars were manufactured there in 1893, and the issue has since become the lowest-mintage key to the series. This circulated example was once cleaned but has since retoned at the margins. The relief elements maintain good detail, though considerable signs of friction are evident. Abrasions are peppered throughout, including a few on Liberty's cheek. NGC ID# 255U, PCGS# 7226

**4934 1894 AU53 NGC.** Luster illuminates the margins and motifs of this lightly circulated but problem-free silver dollar. Peripheral chestnut-gold and lilac shades frame pearl-gray fields. The lowest mintage Philadelphia issue, excluding the proof-only 1895.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 255V, PCGS# 7228

**4935 1894 AU55 PCGS.** An untoned rare date silver dollar. Substantial luster brightens both sides, and the hair above the ear shows just a trace of wear. The only mentionable mark is a graze west of Liberty's ear.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 255V, PCGS# 7228

**4936 1894 AU58 PCGS. CAC.** Substantial mint luster remains on this near-Mint, CAC-approved 1894 dollar, delivering eye appeal comparable to that of many Mint State pieces. The strike is sharp, and light chatter on Liberty's cheek appears to be the only grade-limiting factor. NGC ID# 255V, PCGS# 7228

#### 1894 Dollar, Lustrous MS61

**4937 1894 MS61 NGC.** A softly frosted Mint State example of this key to the Philadelphia circulation strikes. The coin is well-struck and untuned, showing light marks that determine the grade. The 1894 Morgan boasts a small mintage of 110,000 pieces, the second-lowest mintage in the series, trailing only the 1893-S. NGC ID# 255V, PCGS# 7228

**1894-O Dollar, MS62**  
**Brilliant With Golden-Olive Patina**

**4938 1894-O MS62 PCGS. CAC.** Mint State 1894-O dollars are elusive and subject to ever-strong demand from collectors of this popular series. Although locating an Uncirculated representative is not necessarily a difficult task in itself, finding a CAC-approved coin is an exceedingly challenging undertaking. Brilliant surfaces glitter softly beneath a veil of mottled golden-olive patina. The strike is characteristically soft over the centers. Minimally abraded. CAC: 6 in 62, 79 finer (9/16). NGC ID# 255W, PCGS# 7230

**4939 1894-S MS63 PCGS.** This is a well-struck Select 1894-S dollar with brilliant, frosty luster. Scattered light marks on the obverse limit the grade, but the reverse is virtually pristine. This "two-faced" coin displays dazzling cartwheel luster. NGC ID# 255X, PCGS# 7232

**4940 1894-S MS64 PCGS.** Both sides of this satiny Choice Mint State Morgan dollar exhibit brilliant luster with wispy champagne toning. The San Francisco Mint issue is the most accessible 1894 Morgan, ideal for one-a-year collectors. NGC ID# 255X, PCGS# 7232

**1894-S Dollar, Semiprooflike MS64+**  
**High End for the Grade, Brilliant**

**4941 1894-S MS64+ PCGS. CAC.** Among the three Mints striking silver dollars in 1894, the San Francisco Mint claims the honor of being the most available issue for the year in near-Gem or finer grades. The surfaces of this brilliant-silver example are noticeably semiprooflike. Frosted central motifs show a sharp strike that stands out from the reflective fields. The PCGS Plus designation along with CAC endorsement confirm the high quality of this exceedingly Choice 1894-S. NGC ID# 255X, PCGS# 7232

**1895-O Silver Dollar, AU58**  
**Vivid Toning on Each Side**

**4942 1895-O AU58 NGC.** Moderate field luster remains on this near-Mint 1895-O Morgan dollar, cast in gold and amber-red toning on each side. The devices are well-defined, showing minimal wear. Scattered abrasions accompany the grade. The 1895-O is out of reach in Mint State for many collectors, heightening demand for the present grade. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58**  
**Low-Mintage Issue, Strong Luster Remains**

**4943 1895-O AU58 PCGS.** Translucent champagne toning enhances the brilliant satin luster of this key-date Morgan dollar. A small bagmark appears on Liberty's cheek. The reverse displays the same faint-gold patina as the obverse, but with areas of field reflectivity. Full Mint State examples are rare and expensive, making this near-Mint lot an ideal selection for a high-end circulated set that is equally at home among Uncirculated coins. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, AU58**  
**Conditionally Rare, Low Mintage**

**4944 1895-O AU58 PCGS.** New Orleans Morgan dollar production amounted to 450,000 coins in 1895, a famously challenging date for collectors of this popular series. The 1895-O is a semikey issue and major condition rarity in Mint State. This AU58 representative balances technical quality and affordability. Brilliant, softly frosted surfaces display a touch of central incompleteness, but definition is crisp elsewhere. Each side is remarkably smooth. NGC ID# 255Y, PCGS# 7236

**1895-S Dollar, Untoned AU58  
San Francisco Semikey**

- 4945 1895-S AU58 PCGS.** The San Francisco and New Orleans branch mints were the only facilities to coin Morgan dollar circulation strikes in 1895. (The Philadelphia Mint supposedly struck 12,000 examples, but that is now considered an erroneous entry.) The S-mint coins are more available in high grades than their Louisiana counterparts. Trace friction is virtually indistinguishable over the high points of this near-Mint semikey. Each side is radiant and brilliant with myriad abrasions. NGC ID# 255Z, PCGS# 7238

**1896 Dollar, MS66  
Spectacularly Toned Obverse**

- 4946 1896 MS66 PCGS.** The obverse of this impressive Premium Gem is spectacularly toned in shades of burnt-orange, gold, and violet, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster radiates from both sides. The 1896 is not a date one normally associates with rainbow toning. NGC ID# 2562, PCGS# 7240

**1896-S Silver Dollar, MS63  
VAM-2, Repunched Date**

- 4947 1896-S MS63 PCGS. VAM-2.** The 6 in the date is lightly repunched north. Lavender, chestnut-gold, and stone-gray toning encompasses highly lustrous and beautifully preserved surfaces. High end for the grade despite minor contact near Liberty's nose. The centers are incompletely impressed, but the rest of the strike is good. NGC ID# 2564, PCGS# 7244

- 4948 1897 Pitted Reverse, VAM-6A, MS66+ PCGS. CAC.** A Top 100 Variety. Lustrous, untoned, and well struck. The fields and the sweet spot of the cheek are smooth. Although undesignated as such on the PCGS insert, this is the well-known variety with substantial die rust west of the ribbon loop. As of (9/16), PCGS has graded 269 examples as VAM-6A, with the finest nine as MS66, which suggests the present coin could be reholdered as the single finest PCGS-certified VAM-6A. NGC ID# 2565, PCGS# 133946 Base PCGS# 7246

- 4949 1897-O MS62 NGC.** Satiny mint luster gives this Mint State 1897-O Morgan dollar a soft cartwheel effect, illuminating warm amber-gold hues around the borders. The central high points are slightly soft, as usual, and light marks on Liberty's cheek determine the grade. NGC ID# 2565, PCGS# 7248

- 4950 1897-O MS62 PCGS. VAM-6.** The mintmark is high and tilted dramatically right on this lesser-known variety. The present Mint State coin displays satiny luster and well-struck motifs. Mottled sea-green toning appears on the obverse with dusky lavender-gray on the reverse. NGC ID# 2565, PCGS# 7248

- 4951 1900-S MS66 PCGS.** Wispy splashes of reddish-gold toning appear on the obverse of this otherwise brilliant Premium Gem. The surfaces exhibit satiny silver luster. A few hair strands over Liberty's ear are merged, but all other design elements are bold. A lovely example for the advanced collector. PCGS has only certified three numerically finer pieces. NGC ID# 256H, PCGS# 7270

**1901 Morgan Dollar, MS62  
Touch of Peripheral Toning**

- 4952 1901 MS62 NGC.** Light handling marks on Liberty's cheek account for the grade of this Mint State 1901 Morgan dollar, with no major abrasions in evidence. The coin is well-struck and satiny, with pale champagne toning over the interiors and deeper amber and blue around the peripheries. Finer examples will prove challenging to locate. NGC ID# 256J, PCGS# 7272

**1901-O Dollar, MS66+  
Extremely Rare Any Finer**

- 4953 1901-O MS66+ PCGS. CAC.** Although readily available through MS66, the 1901-O Morgan dollar is a major condition rarity any finer. This Plus-graded Premium Gem displays vibrant cartwheel luster and well-defined motifs. The obverse has mottled aquamarine and rose-gold toning, while the reverse displays a light champagne hue. PCGS records only six Superb Gems finer (9/16). NGC ID# 256K, PCGS# 7274

### 1901-S Dollar, Frosty MS65

**4954 1901-S MS65 PCGS.** Frosty luster and a sharp strike give this Gem 1901-S Morgan dollar pleasing eye appeal. Hints of golden toning emerge from the peripheries. A few light grazes on Liberty's cheek are all that prevent a finer grade. PCGS reports only 41 finer representatives, including possible resubmissions (10/16). NGC ID# 256L, PCGS# 7276

**4955 1902-O MS66+ PCGS. CAC.** This Premium Gem is on the verge of joining a rarified group of top-graded examples. The 1902-O is accessible through MS66 but becomes exceedingly difficult to find in MS67, where PCGS has seen only 23 finer submissions (9/16). Fully brilliant with cartwheel luster and remarkably clean fields. NGC ID# 256N, PCGS# 7280

**4956 1903-S AU50 NGC.** A pleasing cream-gray example. Void of detrimental contact, and luster peers from peripheral elements. Although the 1902-S and 1903-S have similar mintages, the latter is much scarcer in better grades. NGC ID# 256T, PCGS# 7288

**4957 1921 MS66+ PCGS. CAC.** This Premium Gem is atypical for its amazing eye appeal. Both sides are brilliant and untuned with frosty silver luster. Sharply struck with full design elements. PCGS has only certified 11 numerically finer, and CAC has only seen three finer pieces (9/16). NGC ID# 256X, PCGS# 7296

## PROOF MORGAN DOLLARS

**4958 1881 PR62 PCGS.** Gold toning warms the mirrored fields on this pleasing lower-end 1881 proof Morgan, deepening around the peripheries. The strike is full, and grade-limiting hairlines are not immediately apparent. NGC ID# 2725, PCGS# 7316

**4959 1886 PR62 PCGS.** Although both sides have trivial hairlines and minuscule contact marks, this brilliant proof has lovely, untuned silver surfaces and bold design motifs. NGC ID# 272F, PCGS# 7321

## PEACE DOLLARS

### 1921 Peace Dollar, MS65+ Popular High Relief Design

**4960 1921 MS65+ NGC.** The 1921 is a popular first-year issue and single-year type within the Peace dollar series. Its high relief caused striking difficulties and was reduced the following year. This MS65+ example is brilliant with splashes of charcoal patina on the reverse. Typically incomplete over Liberty's ear but strongly rendered elsewhere. Seldom seen in higher grades. NGC ID# 2U4E, PCGS# 7356

### 1921 High Relief Peace Dollar Golden-Toned MS66

**4961 1921 MS66 NGC.** A frosty, particularly well-preserved High Relief Peace dollar, showing warm golden toning that has a few violet and blue overtones along the upper obverse border. The usual strike softness is seen on the central high points, but there are no abrasions to distract. NGC has seen only six Superb Gems finer (10/16). NGC ID# 2U4E, PCGS# 7356

**4962 1926-S MS65+ PCGS. CAC.** An original skin of speckled grayish-blue toning covers both sides of this minimally marked and sharply struck 1926-S. Silver luster shines through the attractive patina. Despite a mintage approaching 7 million pieces, the 1926-S is scarce in any grade above MS65 and challenging to find finer than this CAC-endorsed example. Population: 23 in 65+, 90 finer. CAC: 105 in 65, 9 finer (9/16). NGC ID# 257R, PCGS# 7369

**4963 1927 MS65 NGC.** This original Gem exhibits dusky gold toning on its pristine ivory surfaces and features a sharp strike with excellent design definition. NGC has only certified three finer examples (9/16). NGC ID# 257S, PCGS# 7370

**4964 1927 Doubled Motto, VAM-2, MS65 PCGS. CAC.** A Top 50 Variety. Undesignated as VAM-2 by PCGS, but the motto is nicely die doubled, especially on WE. The designer's monogram is also doubled. This lustrous Gem displays light to medium butter-gold and ice-blue patina. The preservation is exceptional. NGC ID# 257S, PCGS# 133776 Base PCGS# 7370

**4965 1927-D MS64 PCGS.** Pleasing gold and champagne toning appears on the obverse of this Choice Mint State Peace dollar, with distinctive gold toning on the reverse. NGC ID# 257T, PCGS# 7371

### 1927-D Dollar, Brilliant Gem Bold Legends

**4966 1927-D MS65 PCGS.** The 1927-D is one of prime condition rarities in the Peace dollar series, very scarcely seen this fine and extremely rare in higher grades. Brilliant surfaces awash in satiny luster account for the mint-fresh look. Bold legends occur on each side, and a couple of minor grazes are all that stand in the way of an even higher grade. PCGS reports 12 better grading events (9/16). NGC ID# 257T, PCGS# 7371

**4967 1927-S MS64+ PCGS.** A well-struck example of this conditional semikey with frosty luster that showcases delicate iridescent toning. Only a light graze on Liberty's cheek prevents a Gem designation. Finer examples of the 1927-S Peace dollar are elusive and out of reach for many collectors. NGC ID# 26J6, PCGS# 7372

**4968 1927-S MS64+ PCGS. CAC.** The certified population at PCGS drops by almost 95% from MS64 to MS65. The decline comes with a five to tenfold increase in price, making this high-end example perfect for the collector on a budget. Golden-violet tones blend with areas of frosty brilliance. Well-deserving of the added recognition from PCGS and CAC. NGC ID# 26J6, PCGS# 7372

---

**1928 Peace Dollar, Sharp MS65  
Original Appeal, Few Graded Finer**

**4969 1928 MS65 PCGS.** Relatively few 1928 Peace dollars survive with natural toning at the Gem grade, and this example is one of the more distinctive ones. Deep and attractive rainbow iridescence at the borders yields to lemon-gold toning and orange-gold accents over the sharply struck surfaces. Bright mint luster shines through the original patina. PCGS reports just 18 numerically finer examples (9/16). NGC ID# 257V, PCGS# 7373

**4970 1928-S MS64+ PCGS.** Sun-gold and powder-blue patina adorns the peripheries of this lustrous and nicely struck near-Gem. The obverse is pristine save for unobtrusive marks on the bust truncation. The designer's monogram and WE TR and hub doubled, as seen on most high-grade 1928-S dollars. NGC ID# 257W, PCGS# 7374

**4971 1935-S MS65 PCGS.** Three rays below ONE. Light to medium almond-gold toning adorns this lustrous and nicely struck better-date Gem. Well preserved aside from minor marks on Liberty's neck and the R in PLURIBUS. NGC ID# 2583, PCGS# 7379

---

**1935-S Peace Dollar, MS66  
Seldom Seen Any Finer**

**4972 1935-S MS66 PCGS.** Three rays below ONE. A brilliant and frosty Premium Gem example, with creamy silver luster across both sides and remarkably fresh Mint bloom. The surfaces show few marks of any kind, and those that do exist are merely tiny ticks plus a faint, shallow abrasion from the trailing hair strands to the edge. The strike is suitably sharp for the 1935-S. The surface quality and eye appeal of this smooth Peace dollar are incredible. As has long been the case, PCGS reports just two numerically finer coins (9/16). NGC ID# 2583, PCGS# 7379

## EISENHOWER DOLLARS

**4973 1974-D MS66+ PCGS. CAC.** This is a vibrant, brilliant, and high-end Premium Gem 1974-D Ike, seldom seen so impeccably well-preserved. Both the PCGS Plus designation and CAC endorsement are of particular importance to series specialists — few coins at the MS66 level have received either distinction, much less both awards. Population: 522 in 66 (21 in 66+), 24 finer. CAC: 28 in 66, 8 finer (9/16). NGC ID# 258E, PCGS# 7416

**4974 1978-D MS66+ PCGS.** Spectacular ruby-red, orange-gold, and blue-green patina consume both sides of this lustrous and well struck final-year Denver Ike dollar. Despite its high mintage and mint set placement, the 1978-D is conditionally rare at the MS66+ level. NGC ID# 258R, PCGS# 7426

---

## PROOF EISENHOWER DOLLAR

**1973-S Clad Eisenhower Dollar  
Rare PR70 Deep Cameo Example**

**4975 1973-S Clad PR70 Deep Cameo PCGS.** Given a high mintage of 2.7 million proofs, it should come as little surprise that the 1973-S Clad Eisenhower dollar is readily available through PR69 Deep Cameo. There are, however, remarkably few PR70 Deep Cameo specimens reported at PCGS, just 27 pieces in all (9/16). This conditionally rare proof dollar features entirely brilliant, strongly contrasted surfaces. Deeply reflective, jet-black fields are absolutely pristine. NGC ID# 258U, PCGS# 97430

---

## GSA DOLLARS

**4976 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64 NGC.** A Top 100 Variety. A hint of golden-gray toning visits this lustrous and crisply struck Choice Carson City GSA dollar. Light facial contact precludes a higher grade, though the fields are refreshingly unabraded. The 1880-CC VAM-4, VAM-5, and VAM-6 are the three most prominent overdates of the entire Morgan series. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

**4977 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64 NGC.** A Top 100 Variety. Light straw-gold toning visits this lustrous and crisply struck Choice Carson City dollar. The reverse is well preserved. The cheek and right obverse field display minor marks. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

**4978 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64+ NGC.** A Top 100 Variety. Although undesignated as Prooflike by NGC, the present virtually brilliant near-Gem has flashy fields. The strike is crisp, and the fields are smooth save for a minor reed impression above IN GOD. The portrait displays moderate grazes. NGC ID# AP7P, PCGS# 518922 Base PCGS# 407108

**4979 1880/79-CC Reverse of 1878, VAM-4, GSA, MS64 Prooflike NGC.** A Top 100 Variety. This stone-white Carson City silver dollar has mirrored fields and nicely frosted motifs. The reverse is well preserved, and the obverse shows no more than the expected number of faint marks. A well struck example of the popular overdate and obsolete reverse variety. NGC ID# AP7P, PCGS# 518923 Base PCGS# 518922

- 4980 1880-CC 8 Over High 7, VAM-5, GSA, MS65 PCGS.** A Top 100 Variety. Among the most obvious overdate varieties of the series, with much of the 7 apparent above, below, on, and within the second 8 in the date. This lustrous and lightly toned Gem offers well preserved fields and a sharp central strike. NGC ID# 2542, PCGS# 518854 Base PCGS# 7102
- 4981 1880-CC GSA MS65 NGC. VAM-10.** Lustrous and lightly toned. The centers exhibit minor incompleteness. The fields are smooth except for a mark beneath the TR in TRUST. The die line on Liberty's upper lip is characteristic of VAM-10. A GSA box and certificate accompany the lot. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100
- 4982 1880-CC GSA MS65 PCGS. CAC. VAM-8.** The "Line Through M" variety with a brief, broad line through the right diagonal of the M in AMERICA. Light to medium lemon-gold toning adorns the obverse. The reverse is essentially brilliant. The centers lack a full impression, but the lustrous surfaces are well preserved. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100
- 4983 1882-CC GSA MS66 NGC.** Traces of honey-gold toning visit this thoroughly lustrous and magnificently preserved Carson City type coin. Nicely struck, and certain to please even the most jaded specialist. The box and certificate of GSA issue are included. NGC ID# 254H, PCGS# 518866 Base PCGS# 7134
- 4984 1885-CC GSA MS65 NGC. VAM-2.** A lustrous and essentially brilliant Gem of this popular low mintage Carson City issue. The strike shows minor inexactness at the centers. The base of the 5 is lightly repunched, but VAM-2 is best known for its delicate "dash" below the second 8 in the date. No box or certificate is included. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160
- 4985 1885-CC GSA MS65 NGC. VAM-2A.** Light tan-gold patina adorns the obverse, but the reverse is nearly white. Booming luster sweeps splendidly smooth surfaces. An exceptional example of this low mintage Carson City issue. The N from IN is faintly clashed in front of Liberty's neck. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

## REDFIELD DOLLAR

- 4986 1888-S MS65 Paramount (MS64 Prooflike NGC).** Ex: Redfield Collection. Golden-russet toning adorns the margins, while the fields and devices remain brilliant. Well struck and lustrous with infrequent moderate marks. The La Vere Redfield hoard of silver dollars was secured by Paramount International, who distributed the coins in sealed custom holders during the early 1980s. NGC ID# 349N, PCGS# 7187

## COMMEMORATIVE SILVER

- 4987 1893 Isabella Quarter MS66 PCGS.** An impressive Premium Gem, this lovely Isabella quarter exhibits delicate champagne and iridescent toning on the brilliant obverse, and mostly pewter-gray toning on the subdued reverse. A lovely example for the high-level Set Registry collector. NGC ID# BYJ9, PCGS# 9220
- 4988 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** Light almond-gold toning visits this lustrous and exceptionally unabraded Lafayette dollar. The strike is bold, though Washington's cheek retains traces of the planchet surface. A small strike-through (as made) is left of the chest of the horse.  
*From The Walter Freeman Collection, Part II.* NGC ID# BYKW, PCGS# 9222
- 4989 1937 Antietam MS67 PCGS. CAC.** A splendid, fully original Superb Gem, this Antietam half dollar displays delicate champagne toning on both sides, with a crescent of gold at the lower obverse border. Traces of iridescent toning are evident along part of the reverse border. PCGS has only certified 20 numerically finer submissions. NGC ID# BYF4, PCGS# 9229
- 4990 1936-D Cincinnati MS67 NGC.** Smooth and unblemished, the mint luster rolls around each side uninterrupted by the abrasions usually seen on this low mintage issue. The obverse is pearl-gray while the reverse has iridescent amber-gold toning, suggestive of many years residency in an original holder of issue. Census: 42 in 67 (4 in 67+, 5 in 67★), 3 finer (9/16). NGC ID# BYCK, PCGS# 9284
- 4991 1893 Columbian MS66+ PCGS.** This Premium Gem Columbian half dollar is beautiful, exhibiting pale gold and rich sea-green toning on the obverse. The reverse is mostly brilliant and highly lustrous with delicate peripheral gold and turquoise toning. PCGS has only certified 30 numerically finer examples (9/16). NGC ID# BYGG, PCGS# 9297
- 4992 1936 Elgin MS67+ PCGS. CAC.** Frosty, glowing luster emerges from the unabraded surfaces of this virtually flawless Elgin Centennial half dollar. The strike is bold. The interiors are brilliant, ceding to warm sun-gold tab toning around the peripheries. PCGS has seen only seven finer representatives (9/16). NGC ID# BYGL, PCGS# 9303
- 4993 1936 Gettysburg MS66+ PCGS. CAC.** Autumn-gold patina adorns both borders of this lustrous and magnificently preserved Civil War commemorative. Tab-toned, with a tell-tale small area of multicolor toning at the obverse center. NGC ID# BYGM, PCGS# 9305
- 4994 1936 Gettysburg MS67 PCGS.** This fully struck Gettysburg commemorative half dollar displays glowing, frosty mint luster with a hint of iridescence that appears throughout the undisturbed surfaces. Eye appeal is exceptional. PCGS has seen only three numerically finer representatives (9/16). NGC ID# BYGM, PCGS# 9305
- 4995 1922 Grant With Star MS63 PCGS.** A satiny Select example of the scarcer With Star variant, showing light toning around the borders. Slight strike weakness is seen on the high point of Grant's hair, as usual.  
*From The Walter Freeman Collection, Part II.* NGC ID# BYPP, PCGS# 9307
- 4996 1928 Hawaiian — Cleaning — PCGS Genuine. Unc. Details.** A satiny, lightly abraded, and crisply struck pearl-white representative. Careful evaluation reveals delicate vertical hairlines. The key silver commemorative type. NGC ID# BYGR, PCGS# 9309
- 4997 1928 Hawaiian MS64 PCGS.** This attractive near-Gem displays satiny champagne-gray luster and sharp design elements. A loupe reveals fewer abrasions than are typically seen at this grade level on the Hawaiian commemorative half. Issued in 1928 to mark the 150th anniversary of Captain James Cook's "discovery" of the Hawaiian Islands in 1778.  
*From The Walter Freeman Collection, Part II.* NGC ID# BYGR, PCGS# 9309
- 4998 1946 Iowa MS68 PCGS. CAC.** This sharp, luminous Superb Gem is among the finest-certified Iowa Centennial half dollars. Lovely iridescence appears throughout each side, while the obverse borders have amber-red accents and the reverse periphery exhibits pastel rainbow hues. Population: 86 in 68 (13 in 68+), 0 finer. CAC: 45 in 68, 0 finer (9/16). NGC ID# BYGV, PCGS# 9316
- 4999 1936 Long Island MS67 PCGS.** A lovely Superb Gem, this Long Island half dollar commemorates the first white settlement on the island, less than a decade before this cataloger's ancestors arrived there circa 1643. This piece exhibits splashes of gold and iridescent toning on its brilliant silver surfaces. Population: 83 in 67 (6 in 67+), 0 finer (10/16). NGC ID# BYGX, PCGS# 9322
- 5000 1923-S Monroe MS66 PCGS.** The Monroe half dollar is one of the important condition rarities in the commemorative series. This Premium Gem exhibits frosty and highly lustrous silver surfaces with a sliver of peripheral gold toning on each side. The strike is impressive, and the eye appeal is far above average for the issue. PCGS has only certified seven finer pieces (9/16). NGC ID# BYH4, PCGS# 9333

- 5001 1915-S Panama-Pacific MS65 PCGS.** A pleasing and fully lustrous pewter-gray Gem with frosty surfaces, this Panama-Pacific half dollar exhibits bluish-steel and pale gold toning. NGC ID# BYHP, PCGS# 9357
- 5002 1920 Pilgrim MS67 PCGS. CAC.** Lovely forest-green, cherry-red, and lemon-gold toning adorns this lustrous and virtually immaculate Superb Gem. A solitary tick at the top of the hat precludes perfection. Population: 58 in 67 (8 in 67+), 2 finer. CAC: 21 in 67, 0 finer (9/16). NGC ID# BYHR, PCGS# 9359
- 5003 1935 Spanish Trail MS66 PCGS. CAC.** Medium silver-gray toning graces sharply struck and coruscating surfaces. Uncommonly void of abrasions, even for the lofty MS66 level. Among the lowest mintage classic silver types. Housed in a green label holder. NGC ID# BYJ5, PCGS# 9376
- 5004 1927 Vermont MS66+ PCGS.** Subtle gold and iridescent toning visits the obverse and reverse of this Premium Gem Vermont half dollar that commemorates the sesquicentennial of the 1777 Battle of Bennington during the Revolutionary War. NGC ID# BYJR, PCGS# 9401
- 5005 1947-S Booker T. Washington MS67 PCGS. CAC.** This glistening Superb Gem is beautifully preserved and lustrous with iridescence interiors that cede to reddish-gold peripheral toning. The strike is sharp. This piece is among the finest certified of this date and mint. Population: 37 in 67, 0 finer. CAC: 21 in 67, 0 finer (9/16). NGC ID# BYJX, PCGS# 9410

## COMMEMORATIVE GOLD

- 5006 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS.** This Premium Gem has pristine yellow-gold surfaces, frosty mint luster, and bold design motifs. Copper toning splashes are noted on the obverse. NGC ID# BYLD, PCGS# 7443
- 5007 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 NGC.** This well-preserved example is sharply struck and displays luminous orange-gold luster with peach and yellow hues visible when rotated beneath a light. A thin, horizontal mint-made grease mark appears at Jefferson's eye. Finer examples of this early gold commemorative are scarce. NGC ID# BYLD, PCGS# 7443
- 5008 1903 Louisiana Purchase, McKinley Gold Dollar MS66 NGC.** The obverse fields display satiny luster from faint die striations, while the reverse has semiprooflike mirroring. Both sides are sharply struck and offer medium yellow-gold color. The 1903 McKinley gold dollar is elusive in finer condition. NGC ID# BYLE, PCGS# 7444

### 1903 McKinley Gold Dollar, MS67 Visually Impressive Two-Tone Effect

- 5009 1903 Louisiana Purchase, McKinley Gold Dollar MS67 NGC.** Smooth and satiny lemon-gold interiors are framed by deep, orange-gold rims for an unusual and visually impressive two-tone coloration that drapes both sides of this Superb Gem 1903 McKinley. Mint luster abounds across the vibrant surfaces, with rose highlights adding extra eye appeal. There are no marks to report other than two tiny alloy spots in the left obverse field. We rarely handle a McKinley gold dollar with such a distinctive and attractive appearance. NGC reports just five numerically finer pieces (10/16). NGC ID# BYLE, PCGS# 7444

- 5010 1904 Lewis and Clark Gold Dollar MS63 NGC.** A well-defined example but with the usual metal flowlines in the fields. This Select 1904 Lewis and Clark gold dollar displays bright yellow-gold luster with only occasional marks that limit the grade. NGC ID# BYLE, PCGS# 7447
- 5011 1904 Lewis and Clark Gold Dollar MS63 PCGS.** Satiny orange-gold luster is the hallmark of this piece, which shows the usual flowlines in the fields from worn dies. Light handling marks are all that limit the grade. Suitable for the budget-conscious collector seeking a high-quality-for-the-grade coin in MS63. NGC ID# BYLE, PCGS# 7447
- 5012 1904 Lewis and Clark Gold Dollar MS64 PCGS.** A well-struck example, with straw-gold luster and semiprooflike mirroring in the fields. A few stray lines limit the grade, but there are no obtrusive abrasions. This 1904 issue is slightly more available in high grade than its 1905 counterpart, ideal for type representation. NGC ID# BYLE, PCGS# 7447
- 5013 1904 Lewis and Clark Gold Dollar MS64 PCGS. CAC.** A satiny orange-gold example with only a few stray lines that prevent a full Gem grade. This CAC-endorsed coin is sharply struck and lacks the field roughness often seen on this issue — a product of fresh dies. *From The Walter Freeman Collection, Part II.* NGC ID# BYLE, PCGS# 7447

### 1904 Lewis and Clark Gold Dollar, MS65 Attractive Luster and Eye Appeal

- 5014 1904 Lewis and Clark Gold Dollar MS65 NGC.** The surfaces are mostly prooflike on this glittering Gem Lewis and Clark gold dollar. A combination of careless handling at the Mint and die problems limit the number of high-grade pieces available to collectors. This Gem example shows the loss of dentilation in a few sections of the obverse rim, yet the remaining surface quality is above average for the issue. Radiant sun-gold color covers both sides with only minimal marks. NGC ID# BYLE, PCGS# 7447

### 1904 Lewis and Clark Gold Dollar, MS65 Bright, Frosty Surfaces

- 5015 1904 Lewis and Clark Gold Dollar MS65 NGC.** The radiant, greenish-gold surfaces are frosty and lustrous, while the strike is particularly sharp at the borders with full dentils on both sides. A glass reveals virtually no field marks — certainly none worth mention — and the portraits are unblemished with nearly full details. A strong coin for the Gem level. NGC ID# BYLE, PCGS# 7447

**5016 1905 Lewis and Clark Gold Dollar MS64 PCGS.** A satiny coin with deep orange-gold coloration that draws the viewer's attention. A few light marks are present, as expected for the grade. The 1905 Lewis and Clark gold dollar becomes increasingly scarce and pricey in finer grades. NGC ID# BYLG, PCGS# 7448

**5017 1905 Lewis and Clark Gold Dollar MS64 PCGS.** Orange toning visits both sides, but is more prominent on the portrait of Meriwether Lewis. This semiprooflike near-Gem is sharply struck and impressively unabraded. Second and final year of our only double-headed commemorative type. Encapsulated in a green label holder.

*From The Walter Freeman Collection, Part II.* NGC ID# BYLG, PCGS# 7448

**5018 1915-S Panama-Pacific Gold Dollar MS65 NGC.** A lustrous and virtually pristine lemon-gold Gem. Two small rose-red alloy spots are noted on the nose of the canal worker and the right top of the M in AMERICA.

*Ex: Joan Carroll Collection (Heritage, 9/2013), lot 4526.* NGC ID# BYLH, PCGS# 7449

#### 1915-S Panama-Pacific Quarter Eagle, MS63

**5019 1915-S Panama-Pacific Quarter Eagle MS63 PCGS.** While the quality of production did not always live up to the beauty of the design, Pan-Pac quarter eagles are popular with collectors in all Mint State grades. This Select Uncirculated example displays finely grained surfaces with soft, satiny luster. The lack of any significant abrasions and an overall bold strike are worthy of special note.

*From The Twelve Oaks Collection, Part III.* NGC ID# BYLP, PCGS# 7450

#### 1915-S Panama-Pacific Quarter Eagle, MS64 Scarce Classic Commemorative Gold Issue

**5020 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** With a net distribution of just 6,749 pieces, the 1915 Panama-Pacific quarter eagle was not a huge success when issued, but now it is a favorite among gold and commemorative specialists alike. The unusual design was the combined work of Charles E. Barber (obverse) and George T. Morgan (reverse) for one of their most appealing collaborations. This near-Gem example is softly lustrous with greenish-gold patina. The strike is sharp for the issue, with only a few light abrasions. NGC ID# BYLP, PCGS# 7450

#### 1915-S Panama-Pacific Quarter Eagle, MS64 Classic Gold Commemorative

**5021 1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** A five-coin commemorative program was established for the 1915 Panama-Pacific International Exposition, including a silver half dollar, gold dollar, quarter eagle, and two 50-dollar gold pieces, round and octagonal. The present coin is an attractive Choice example of the quarter eagle, from a modest distribution of 6,749 pieces. The design elements are well-detailed and the pleasing orange-gold surfaces radiate satiny mint luster on both sides, with only minor signs of contact.

*From The Walter Freeman Collection, Part II.* NGC ID# BYLP, PCGS# 7450

**5022 1916 McKinley Gold Dollar MS66 NGC.** The McKinley gold dollars were minted in 1916 and 1917 and differ in appearance. This Premium Gem is typical of the 1916 pieces with satiny and slightly prooflike surfaces. Sharply struck with yellow-gold luster that shows faint traces of rose.

*Ex: New York Signature (Heritage, 3/2012), lot 3853.* NGC ID# BYLK, PCGS# 7454

**5023 1916 McKinley Gold Dollar MS66 PCGS.** Both dates of the McKinley gold dollar are scarce above MS66. This collectible Premium Gem 1916 example displays frosty rose-gold luster and a strong strike. There are no distracting abrasions or handling marks.

*From The Twelve Oaks Collection, Part III.* NGC ID# BYLK, PCGS# 7454

#### 1916 McKinley Gold Dollar, MS67 Registry Set Candidate, None Finer at PCGS

**5024 1916 McKinley Gold Dollar MS67 PCGS.** Traces of olive and rose toning enhance the frosty wheat-gold patina of this immaculate Superb Gem McKinley. The public responded to the offering to memorialize the slain president's birthplace in Niles, Ohio. About 75% of the 1916 mintage of some 20,000 pieces were sold. This example is razor-sharp and exceptionally attractive. Population: 96 in 67 (3 in 67+), 0 finer (9/16). NGC ID# BYLK, PCGS# 7454

**5025 1917 McKinley Gold Dollar MS66 PCGS.** Straw-gold and radiant mint luster combine over the surfaces of this well-preserved commemorative dollar. Issued to raise funds for a McKinley memorial in Niles, Ohio, the 1917-dated examples are significantly scarcer than those of the previous year, as just 5,000 coins were sold. NGC ID# BYLL, PCGS# 7455

**5026 1922 Grant Gold Dollar, No Star, MS64 PCGS.** A lovely lemon-gold near-Gem. Well struck and coruscating with exceptionally unabraded surfaces. The Star and No Star varieties have similar mintages and third party populations. Certified in a green label holder.

*From The Walter Freeman Collection, Part II.* NGC ID# BYLN, PCGS# 7458

**5027 1922 Grant Gold Dollar, No Star, MS64 PCGS.** Aesthetically, there is not much difference between this Choice Grant No Star gold dollar and many of the Gem-graded pieces on the market; A loupe is needed to differentiate any technical surface flaws, which are nearly indiscernible. This piece is well-struck and displays satiny orange-gold luster. NGC ID# BYLN, PCGS# 7458

**5028 1922 Grant Gold Dollar, No Star, MS66 NGC.** Representative of a type that is not offered at the present grade level with any frequency, this is a mostly yellow-gold Premium Gem Grant gold dollar. Indirect angles, however, do reveal more deeply set green-gold undertones, but one would be hard pressed to find even a single outwardly distracting abrasion. Well-struck for the type with solid eye appeal.

*Ex: Long Beach Signature (Heritage, 9/2002), lot 9144; FUN Signature (Heritage, 1/2003), lot 9478.* NGC ID# BYLN, PCGS# 7458

**5029 1922 Grant Gold Dollar, With Star, MS64 PCGS.** Lovely orange and yellow-gold hues blended together over this Choice Grant Memorial gold dollar, showing a sharp strike and mostly untouched surfaces. This is the earlier With Star variant.

*From The Walter Freeman Collection, Part II.* NGC ID# BYPS, PCGS# 7459

**5030 1922 Grant Gold Dollar, With Star, MS66 NGC.** This is the first of two types for the Grant Memorial gold dollar, featuring a small incused star in the right obverse field. Frosty green-gold luster graces virtually pristine surfaces on this high-end Premium Gem, while a strong strike only adds to the immense visual appeal. NGC ID# BYPS, PCGS# 7459

#### 1922 Grant With Star Gold Dollar, MS67 Mintage Only 5,000 Pieces

**5031 1922 Grant Gold Dollar, With Star, MS67 NGC.** This attractive, greenish-gold Superb Gem features a pinpoint-sharp strike and rich, frosty luster for great eye appeal. The With Star variant is definitively rare any finer, making this MS67 coin an optimal candidate for a high-end gold or classic commemorative collection. PCGS and NGC combined list just 15 numerically finer coins (10/16). NGC ID# BYPS, PCGS# 7459

#### 1922 With Star Grant Gold Dollar, MS67 Impressively Sharp Strike

**5032 1922 Grant Gold Dollar, With Star, MS67 PCGS.** General Grant's hair is impressively sharp on this frosty straw-gold Superb Gem, and the preservation is exceptional. The reverse shows two noticeable die cracks, one vertically across the cabin and another horizontal break from the rim at 3 o'clock. Only four numerically finer coins are reported by PCGS (10/16). NGC ID# BYPS, PCGS# 7459

#### 1922 With Star Grant Gold Dollar Vividly Colored MS67

**5033 1922 Grant Gold Dollar, With Star, MS67 PCGS.** Vivid tangerine hues dominate on this Superb Gem With Star type coin, although yellow-gold undertones emerge in select areas. This beautifully preserved Grant Memorial gold dollar displays a sharp strike and offers exceptional visual merit. Four finer representatives are recorded by PCGS (10/16). NGC ID# BYPS, PCGS# 7459

#### 1922 Grant Gold Dollar, Frosty MS67 Attractive With Star Type Coin

**5034 1922 Grant Gold Dollar, With Star, MS67 PCGS. CAC.** A particularly frosty Superb Gem example of the With Star Grant Memorial gold dollar, showing a bold strike and delicately preserved surfaces that hold up even under a 10x loupe. The coloration is mainly mint-gold, although wisps of warmer peach appear over the central reverse. PCGS lists only four numerically finer With Star coins (10/16). NGC ID# BYPS, PCGS# 7459

**5035 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** This Gem example is remarkably clean, even for the grade, showing frosty peach-gold luster with faint yellow and greenish highlights that appear beneath a loupe. The strike is sharp, and the eye appeal is exceptional. Elusive in finer condition. NGC ID# 2FE9, PCGS# 7466

- 5036 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Hints of peach and orange highlight frosty yellow-gold surfaces on this Gem Sesquicentennial quarter eagle. The strike is sharp, and the surface preservation is outstanding, even for the MS65 grade. Finer examples of this final gold classic commemorative are infrequently available. NGC ID# 2FE9, PCGS# 7466
- 5037 1926 Sesquicentennial Quarter Eagle MS65 NGC.** A beautiful Gem example of an issue that is seldom seen finer. This Sesquicentennial quarter eagle displays a sharp strike and frosty yellow-gold luster. A few microscopic ticks on Liberty's figure are all that limit the grade. NGC ID# 2FE9, PCGS# 7466
- 5038 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Issued to celebrate the 150th anniversary of the signing of the Declaration of Independence, over three-quarters of the original mintage was sent to the melting pot because of popular distaste for the low-relief design. This Gem shows a typical strike with orange-, rose-, and green-gold coloration. NGC ID# 2FE9, PCGS# 7466
- 5039 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** A collectible yet eye-appealing Gem example of the final gold issue in the classic commemorative series, showing frosty yellow-gold luster and a bold strike. There are no distracting abrasions. NGC ID# 2FE9, PCGS# 7466
- 5040 1926 Sesquicentennial Quarter Eagle MS65 NGC.** Frosty orange-gold luster gives this Gem Sesquicentennial quarter eagle its signature cartwheel luster and luminous appearance. The strike is sharp throughout the low-relief design, and minor abrasions are nearly unnoticed.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2FE9, PCGS# 7466
- 5041 1926 Sesquicentennial Quarter Eagle MS65 NGC.** Barely a few faint grazes on the obverse figure prevent an even finer grade for this Gem Sesquicentennial quarter eagle. Frosty yellow-gold luster illuminates virtually flawless fields, and the devices are sharply brought up. Visual appeal exceeds expectations.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 2FE9, PCGS# 7466
- 5042 1926 Sesquicentennial Quarter Eagle MS65 PCGS. CAC.** Faint traces of green appear along the borders of this highly lustrous Gem that features brilliant and frosty yellow surfaces. Trivial grade-consistent marks are noted, although no unsightly copper toning spots are evident on either side. NGC ID# 2FE9, PCGS# 7466

#### 1926 Sesquicentennial Quarter Eagle Attractive Premium Gem

- 5043 1926 Sesquicentennial Quarter Eagle MS66 PCGS.** The 1926 Sesquicentennial is the final gold issue in the classic commemorative era. Distribution totaled 46,019 pieces (including assay coins), and Premium Gems are only infrequently seen. This example is among the finest at PCGS (9/16). The strike is bold, and the frosty surfaces display varying arrays of peach, lilac, and mint-gold luster. Eye appeal is excellent. NGC ID# 2FE9, PCGS# 7466

## MODERN ISSUE

- 5044 1997-W Jackie Robinson Gold Five Dollar MS70 NGC.** This modern gold commemorative key issue is seldom available in perfect MS70 condition, boasting a small distribution of 5,174 pieces. This example is fully struck and showcases frosty mint-fresh luster. Listed at number five in Schechter and Garrett's *100 Greatest U.S. Modern Coins*. NGC ID# 28UG, PCGS# 9759 Base PCGS# 9759

## MODERN BULLION COINS

### 1987 One-Ounce Gold Eagle, MS70 Perfect and Pristine

- 5045 1987 One-Ounce Gold Eagle MS70 PCGS.** Collector enthusiasm over the American Eagle program was evident during its initial years. The first two one-ounce gold dates, 1986 and 1987, witnessed mintages above 1 million pieces. Production waned thereafter, reaching a low in 1996, before sales rose between 1997 and 2000 due to Y2K fears. The present second-year example provides flawless apricot-gold satin surfaces. NGC ID# 26PB, PCGS# 9814
- 5046 1988-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** Infinite depth of mirroring in the blackened fields gives the sharp, frosty design elements an almost "painted on" appearance. The level of contrast is eye-catching from a distance. A beautiful coin in every respect. PCGS# 100040 Base PCGS# 9825
- 5047 1989 Tenth-Ounce Gold Eagle MS70 PCGS.** The 1989 tenth-ounce gold eagle is rare in this top grade at PCGS. The present coin is fully struck from dies that show faint granularity in the fields. Each side has satiny yellow-gold luster. Population: 20 in 70 (9/16). NGC ID# 26KY, PCGS# 9828
- 5048 1989-W One-Ounce Gold Eagle, Saint-Gaudens Signature, PR70 Deep Cameo PCGS.** One of only three dozen examples in PR70 Deep Cameo with the Saint-Gaudens Signature PCGS holder. This piece is beautifully struck with stark field-device contrast. The preservation is flawless. NGC ID# 28YY, PCGS# 100050 Base PCGS# 9835

### 1990 Tenth-Ounce Gold Eagle, MS70

- 5049 1990 Tenth-Ounce Gold Eagle MS70 PCGS.** This perfect Mint State tenth-ounce American Eagle gold piece is an impeccable example with brilliant yellow luster, bold design elements, and satin surfaces that exhibit faintly reflective fields. The Philadelphia Mint coined 41,000 of these tenth-ounces pieces, and just 15 of those pieces have survived in the top grades per PCGS population data (9/16). NGC ID# 26KZ, PCGS# 9838

**5050 1990-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** The Saint-Gaudens signature NGC holder. This 1990-W proof one-ounce Gold Eagle is flawlessly preserved and displays incredible field-motif contrast. The strike is needle-sharp. NGC ID# 28YZ, PCGS# 100060 Base PCGS# 9845

**5051 1993-P Silver Eagle PR70 Deep Cameo PCGS.** Splashes of ivory patina appear along the right obverse border of this exquisite Superb Gem that features brilliant surfaces and impressive field-to-device contrast. NGC ID# 26JK, PCGS# 9867

**5052 1993 Tenth-Ounce Gold Eagle MS70 PCGS.** PCGS has seen only 22 1993 tenth-ounce Gold Eagles in perfect MS70 condition (10/16). The present coin displays a full strike and exuberant yellow-gold luster. An essential Registry Set acquisition. NGC ID# 26L4, PCGS# 9868

#### 1993-W One-Ounce Gold Eagle Series Key, PR70 Deep Cameo

**5053 1993-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Demand for Gold Eagle proofs remained steady through the early 1990s, but interest has skyrocketed in the intervening years. That is especially true of the 1993-W, which enjoys one of the lowest certified populations in PR70 Deep Cameo in the series. Pristine surfaces displays reflective, jet-black fields against frosted, yellow-gold motifs. Eye appeal is extraordinary. The PCGS label is signed by the 35th Mint Director, Philip Diehl. NGC ID# 28Z5, PCGS# 9875

**5054 1993-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** An exquisite Superb Gem featuring perfect yellow-gold surfaces and impressive field-to-device contrast. PCGS has certified 145 similar examples (9/16). NGC ID# 28Z5, PCGS# 9875

**5055 1993-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** Dramatic cameo contrast adorns the flawlessly preserved surfaces of this proof one-ounce Gold Eagle, housed in a Saint-Gaudens signature holder. The visual appeal is outstanding. NGC ID# 28Z5, PCGS# 100090 Base PCGS# 9875

**5056 1994-P Silver Eagle PR70 Deep Cameo PCGS.** This perfect black-and-white Superb Gem proof is a beauty to behold with brilliant and untuned silver surfaces. NGC ID# 26UF, PCGS# 9877

**5057 1994 Quarter-Ounce Gold Eagle MS70 NGC.** Examples of this quarter-ounce gold bullion issue are seldom available in perfect MS70 condition, the grade in which series enthusiasts simply must acquire an example. This piece is fully struck and lustrous with mint-fresh surfaces. NGC ID# 26MA, PCGS# 9880

**5058 1994 Half-Ounce Gold Eagle MS70 PCGS.** These pieces were intended for bullion rather than numismatic purposes, but the popularity of the American Silver Eagle series spilled over, among well-heeled collectors, to the American Gold Eagles as well. It became obvious, with time, that these coins were, in fact, conditionally elusive — a familiar tale to aficionados of modern coinage. This is an extremely eye-appealing wheat-gold example. A recent example of this issue in the same grade that we offered was lot 5142 in our Dallas Signature (Heritage, 3/2016), which brought \$4,700. Population: 22 in 70 (9/16). NGC ID# 26NF, PCGS# 9882

#### 1995-W Silver Eagle, PR69 Ultra Cameo Ever-Popular Series Key

**5059 1995-W Silver Eagle PR69 Ultra Cameo NGC.** All 1995-W silver eagles originated in the American Eagle 10th anniversary set, which also included the four denominations of proof gold eagles. Many silver eagle collectors could not afford to purchase the set, and were obliged to obtain examples from the secondary market at ever-escalating prices. Today, the low mintage 1995-W remains the key to the series. This is an immaculate specimen with frosty motifs and glassy fields. NGC ID# CFWX, PCGS# 9887

**5060 Four-Piece 1995-W Gold Eagle Set, Elizabeth Jones Signature, PR70 Ultra Cameo NGC.** The set includes the tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50. A fully struck and pristine quartet that exhibits unimprovable cameo contrast. The four coins are housed in separate NGC holders, with each insert autographed by former Chief Engraver Elizabeth Jones. (Total: 4 coins) NGC ID# 28Z7, PCGS# 9895

**5061 1995-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** Flawlessly preserved in the grade essential for Registry purposes. This one-ounce 1995-W Gold Eagle displays remarkable Ultra Cameo contrast and beautifully defined, frosty devices. NGC ID# 5RRU, PCGS# 100110 Base PCGS# 9895

**5062 1996-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** Glistening, frosty devices appear atop jet-black mirroring in the fields on this perfectly preserved Ultra Cameo proof. Only the finest will do for the advanced Registry Set collector. PCGS# 100121 Base PCGS# 9909

#### 1997 Half-Ounce Fifty Dollar Gold Eagle, MS70

**5063 1997 Half-Ounce Gold Eagle MS70 NGC.** The mintage for this 19-year old issue was only 79,605 pieces. This is one of the few examples certified as technically perfect by either of the grading services. The color is even over each side and there is just the slightest reflectivity apparent in the fields. The strike is complete overall. NGC ID# 26NJ, PCGS# 9918

**5064 1997 Quarter-Ounce Platinum Eagle MS70 NGC.** With a mintage only 27,100 pieces, the quarter-ounce 1997 Platinum Eagle is scarce in perfect MS70 condition. Fewer than 100 pieces are reported this fine at NGC, and PCGS has seen only nine (9/16). The present coin displays a full strike and flawless preservation with the appropriate eye appeal. Census: 92 in 70 (9/16). NGC ID# 26SR, PCGS# 99753

**5065 1997 Quarter-Ounce Platinum Eagle MS70 NGC.** The reversed contrast of this perfect MS70 example is stunning, featuring frosty gray fields and mirrored devices. Census: 92 in 70 (9/16). NGC ID# 26SR, PCGS# 99753

- 5066 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC.** During the Y2K year of 1999, the West Point mintmark was reserved for proof bullion coins, but a Mint mix-up resulted in a mintmarked issue with the same surface finish as the Uncirculated, sans-mintmark 1999 quarter-ounce gold bullion coins. The mintage is unknown, but undoubtedly low relative to both 1999-W proofs and 1999 Uncirculated pieces. This apricot-gold example is pristine save for a single thin line on the central reverse. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942
- 5067 1999-W One Ounce Gold Eagle, Augustus Saint Gaudens, PR70 Ultra Cameo NGC.** Appearing as though just struck, this flawless-in-every-way 1999-W one-ounce Gold Eagle proof displays incredible contrast and eye appeal. The strike is full, and the Registry Set appeal is obvious. NGC ID# BZZ5, PCGS# 100150 Base PCGS# 9946
- 5068 2000-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** A flawlessly preserved Ultra Cameo example of the 2000-W proof one-ounce Platinum Eagle, housed in a black retro holder. The field-device contrast is remarkable, and the only strike abnormality noticed is a thin, threadlike strike-through below Liberty's left (facing) eye that gives the appearance of tears running down her cheek. NGC ID# 293R, PCGS# 99782
- 5069 2001-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** Housed in a black retro holder and perfectly preserved therein with engaging field-device contrast. The silver-white motifs are fully struck, and the fields appear jet-black from every angle. This is the debut proof of the 21st century. NGC ID# 293S, PCGS# 99789
- 5070 2002 Quarter-Ounce Gold Eagle MS70 PCGS.** In a PCGS holder, the 2002 quarter-ounce Gold eagle is a great rarity in top grade. This piece is fully struck and displays satiny yellow-gold luster. Population: 20 in 70 (9/16). NGC ID# 26SA, PCGS# 9961
- 5071 2002-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** A flawlessly preserved proof, struck in an ounce of .9995 fine platinum. This flawlessly preserved coin displays jet-black fields that beautifully set off the frost-white devices. NGC ID# 293T, PCGS# 99797
- 5072 2007-W One-Ounce Gold Buffalo, Fraser Facsimile Signature, .9999 Fine, PR70 Ultra Cameo NGC.** Struck in an ounce of pure, 24-karat gold, this 2007-W proof one-ounce Gold Buffalo showcases a full strike with flawless preservation and beautiful contrast. Only the fifty dollar denomination was coined for the Gold Buffalo series in 2007. NGC ID# 26RP, PCGS# 91010 Base PCGS# 149583
- 5073 2008-W Quarter-Ounce Gold Eagle, Burnished, MS70 NGC.** The 2008 Burnished quarter-ounce Gold Eagle comes from a limited mintage of 8,883 pieces, the lowest of the three Burnished issues produced from 2006 to 2008. This perfectly preserved example displays a full strike and lovely yellow-gold luster. Eye appeal is exceptional. NGC ID# BNLJ, PCGS# 393064
- 5074 2008-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** The Saint-Gaudens signature holder with a coin that is flawlessly struck and beautifully preserved. Dramatic field-motif contrast adorns each side. Suitable for Registry purposes. NGC ID# 26R7, PCGS# 100232 Base PCGS# 393076
- 5075 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** Reflective fields are not quite mirrored enough for a Prooflike designation, although the preservation of this 2009 Ultra High Relief twenty is flawless. The strike is full, and the eye appeal is outstanding. Due to the prohibitive rarity of 1907 Ultra High Reliefs, this 2009 "reproduction" is the only way most collectors can acquire Saint-Gaudens' original design in its intended relief. NGC ID# 26S4, PCGS# 407404
- 5076 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS.** The small diameter, double thickness Ultra High Relief gold pieces mimic the original double thickness patterns (Judd-1917), of which just two exist, both in the Smithsonian Institution. This flawless MS70 example has fully mirrored yellow-gold surfaces. NGC ID# 26S4, PCGS# 407404
- 5077 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS.** A fully struck, deeply reflective example of this iconic modern bullion issue, showcasing the ultra high relief design of the 1907 Saint-Gaudens patterns that are uncollectible today. This piece is nearly flawless in terms of preservation. NGC ID# 26S4, PCGS# 506602
- 5078 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS.** Prooflike fields complement fully struck devices on this 2009 Ultra High Relief gold twenty, and the preservation is nearly flawless. This issue is immensely popular, and the present MS69 Prooflike coin will appeal to many budget-conscious collectors. NGC ID# 26S4, PCGS# 506602
- 5079 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS.** Although technically a bullion coin, the 2009 Ultra High Relief gold twenty appeals to a whole different category of collectors seeking a collectible version of the 1907 Ultra High Relief double eagles. This almost flawlessly preserved example offers deeply mirrored fields and sharp motifs. NGC ID# 26S4, PCGS# 506602
- 5080 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 Prooflike PCGS.** Liberty's fully struck and satiny figure is particularly well set-off from the reflective fields on this piece, delivering a power visual impression. The preservation is nearly perfect. This piece is ideal for the budget-conscious collector wanting a representative of this famous ultra high relief design. NGC ID# 26S4, PCGS# 506602

---

**MMIX Ultra High Relief Twenty  
Pristine MS70 Prooflike**

- 5081 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** The MMIX Ultra High Relief twenty imitates the non-collectible Judd-1917 pattern, a double-thick piece with the diameter of a ten dollar gold piece. U.S. Mint Director Edmund Moy is credited with the idea for the issue, an immediate hit with collectors, even though the 2007 centennial of Saint-Gaudens' design was missed by two years. This is a pristine example with radiant yellow-gold surfaces. NGC ID# 26S4, PCGS# 506602
- 5082 2010-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Philip Diehl signature holder. This one-ounce proof Gold Eagle displays pristine surfaces and dramatic contrast. Eye appeal radiates from every angle. A must-have item for the Registry Set collector and also a suitable bullion coin in proof format. NGC ID# 26RA, PCGS# 415544
- 5083 2010-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Housed in a Philip Diehl signature holder. This perfectly preserved one-ounce proof 2010-W Gold Eagle displays a full strike and stark Deep Cameo contrast. Ideal for Registry purposes or as a type coin. NGC ID# 26RA, PCGS# 415544
- 5084 2010-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Philip Diehl signature holder, encasing a flawlessly preserved 2010-W one-ounce proof Gold Eagle with incredible cameo contrast and outstanding strike sharpness. An essential coin for the Registry Set collector. NGC ID# 26RA, PCGS# 415544

**5085 2010-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Philip Diehl signature holder. This 2010-W one-ounce proof Gold Eagle displays flawless contrast and preservation with a full strike on the devices. The depth of mirroring in the fields is seemingly infinite. NGC ID# 26RA, PCGS# 415544

**5086 2010-W One-Ounce Gold Eagle, Augustus Saint-Gaudens, PR70 Deep Cameo PCGS.** The Saint-Gaudens Signature holder adds to the appeal of this piece, as only 14 2010-W proof one-ounce Gold Eagles are graded PR70 Deep Cameo with the Saint-Gaudens insert (9/16). This piece is beautifully struck and perfect in regards to preservation. NGC ID# 26RA, PCGS# 100257 Base PCGS# 415544

**5087 2011-W One-Ounce Gold Buffalo, Fraser Facsimile Signature, .9999 Fine, PR70 Ultra Cameo NGC.** Proof coinage of the one-ounce Gold Buffalo at West Point in 2011 amounted to only 28,693 pieces, with many not achieving the PR70 Ultra Cameo grade when submitted for certification. This piece is flawlessly preserved and fully struck with dramatic eye appeal. PCGS# 91025 Base PCGS# 506885

**5088 2011-W One-Ounce Platinum Eagle PR70 Ultra Cameo NGC.** Housed in a black retro holder. This one-ounce proof 2011-W Platinum Eagle displays the "Domestic Tranquility" reverse and has stark field-device contrast. The preservation is flawless. NGC ID# 26UM, PCGS# 507770

**5089 2015-W High Relief One-Ounce Gold, First Strike, .9999 Fine Gold, Moy/Mercanti Signature MS70 PCGS.** Signatures of the 38th Mint Director, Edmund Moy, and the 12th Chief Engraver, John Mercanti, appear on the PCGS label of this impressive Liberty gold coin that exhibits brilliant yellow luster and reflective fields. PCGS# 546087 Base PCGS# 545532

**5090 2016-W One-Ounce Gold Eagle, Burnished, MS70 NGC.** In the NGC Saint-Gaudens signature holder, this perfectly preserved Burnished 2016-W one-ounce Gold Eagle yields flawless preservation and strike characteristics. The luminous surfaces delivers pleasing yellow-gold luster. PCGS# 598615

**5091 2016-W One-Ounce Gold Eagle, 30th Anniversary, Augustus Saint-Gaudens, PR70 Ultra Cameo NGC.** The 30th anniversary issue of the American Eagle bullion coin program, this 2016-W one-ounce Gold Eagle proof showcases a flawless strike and a depth of mirroring in the fields that appears jet-black at most angles. PCGS# 570538

**5092 2016-W One-Ounce Gold Buffalo, Tenth Anniversary, .9999 Fine, PR70 Ultra Cameo NGC.** The 10th anniversary issue of the proof one-ounce Gold Buffalo series, this piece showing a perfect strike and equally impressive preservation. Ideal for the Registry Set collector or the Gold Buffalo enthusiast. PCGS# 593786

**5093 2016 Saint-Gaudens Winged Liberty Private Medal PR70 Ultra Cameo NGC.** Specified as .9999 Fine gold with a weight of 31.21 gm, a diameter of 27 mm, and a mintage of 1,000 pieces. Struck by the Royal Mint in the United Kingdom, and authorized by the National Park Foundation on behalf of the Saint-Gaudens National Historic Site. The NGC insert is signed by former U.S. Mint engraver John Mercanti. A presentation box and certificate of authenticity are included.

## COINS OF HAWAII

**5094 1883 Hawaii Quarter MS66+ PCGS Secure. CAC.** The obverse of this boldly defined Premium Gem Hawaii quarter (hapaha) exhibits rich gold and iridescent toning, while the reverse is mostly brilliant with peripheral iridescence. A splendid example for a specialized collection of Hawaiian coins and currency. CAC: 46 in 66, 17 finer (9/16). NGC ID# 2C5B, PCGS# 10987

**5095 1883 Hawaii Half Dollar MS63 PCGS.** A pleasing Select example of the Hawaii half dollar, showing razor-sharp detail and thoroughly lustrous surfaces. Abrasions are minimal for the grade. This piece is mostly brilliant on the obverse but with a halo of tan-gold toning. The reverse is encompassed by the same dusky patina of the obverse rims. NGC ID# 2C5B, PCGS# 10991

## WORLD

### (1947) Saudi Arabia Gold Sovereign, MS62 Struck by the Philadelphia Mint

**5096 (1947) Saudi Arabia, Abdal Aziz bin Saud Gold Sovereign (Pound) MS62 PCGS. KM-35.** Struck at the Philadelphia Mint to exchange for Saudi oil. Per the reverse inscription, contains 0.2354 troy ounces of gold. One of the few gold coin issues struck by the U.S. Mint during the era when American private gold ownership was illegal. This example is well preserved and offers excellent eye appeal. The broad obverse rim exhibits two lengthy die cracks.

## INGOT

### 6.21-Ounce San Francisco Mint Silver Ingot Rarely Seen Type One Ingot With Straight 9s Inked Weight on Back Side

**5097 6.21-Ounce San Francisco Mint Silver Ingot.** Seldom seen Type One oval hallmark with small font, straight stem 9s, and 999.5 fineness. This particular series is the rarest of all San Francisco Mint Type One ingots. Noted authority on the series, Ken Conaway, has only seen five other examples from this series, and each of these are limited to Lots 7 and 8. This example is from Lot 7, as seen on the short, lower edge. The more frequently seen Type One ingots used curved stem 9s in the fineness. This is a particularly attractive and obviously original silver ingot in the five-ounce class that shows the usual layout: hallmark at the top and well centered / 578 / 999.5 / FINE. The Lot Number is on the lower edge. In the center of the back side is the weight: 6.21 / OZS. Above the deeply stamped weight is an inked weight as well. Ken Conaway said it was reported that after mint employees cast an ingot and it was removed from the mold, the next step was to weigh it and mark the weight on the back side before it was moved on to receiving the hallmark and other stampings. So, it is entirely likely the inked weight was done in the mint, further reinforcing the originality of this ingot. Subtle multicolored toning is seen over each side. The ingot measures: 30 x 50 x 11 mm.

## ERRORS

### Double Struck 1891 Dime, AU50 Second Strike 90% Off Center

- 5098** 1891 Seated Dime — Double Struck, Second Strike 90% Off Center — AU50 PCGS. The first strike was normal, but the coin was struck a second time, 90% off center at 4:30 relative to the first strike. The second strike shows only an arc of dentils on both sides. Light to medium golden-brown, lavender, and ice-blue toning visits the borders of the first strike. No marks are mentionable, and luster shimmers from the designs.

### Error Mated Pair of 2007-D Satin Finish Dimes SP68 and SP67

- 5099** Mated Pair of 2007-D Satin Finish Dime Errors PCGS. Both coins are certified in a single, double-wide PCGS holder. Coin #1 is SP68 PCGS. Coin #2 is Reverse Die Cap with Brockage SP67 PCGS. Coin #1 was normally struck, but remained in the striking chamber instead of getting ejected. Coin #2 was then fed in, between Coin #1 and the reverse die. The pair were then struck, one stacked atop the other. Coin #2 has a steep and consistent reverse rim, where the coin wrapped around the border of the reverse die. The obverse of Coin #2 is a perfect brockage impression of the reverse of Coin #1. Coin #1 has an irregular wire obverse rim and a dished reverse border. (Total: 2 coins)

### Undated Statehood Quarter, MS67 Double Struck Obverse Die Cap

- 5100** Undated Statehood Quarter — Double Struck Obverse Die Cap — MS67 NGC. A statehood quarter (not the present coin) was struck normally, but failed to eject. A second quarter (also not the present coin) was then struck between the obverse (Washington portrait) die and the previously struck coin, which flattened the portrait on the obverse of the first coin. The second coin was ejected, the first coin remained, and a third quarter (the present coin) was struck between the obverse die and the first coin. The strike created an obverse die cap (on the present coin) with a midstage brockage (of the obverse design) on the reverse. The present coin was struck a second time, a few degrees off center toward 6 o'clock, at 7 o'clock relative to the first strike. The second strike for the present coin occurred between the obverse die and a newly fed planchet (also not the present coin), which blocked the reverse die and further flattened the brockage image on the reverse of the present coin.

### 1921 Morgan Dollar, Near-Mint Double Struck in Collar

- 5101** 1921 Morgan Dollar — Double Struck in Collar — AU58 PCGS. The first strike was normal, but the coin failed to eject from the dies. Instead, it rotated a couple of degrees counter-clockwise, and struck a second time. No planchet was fed in during the second strike. The peripheral legends on both sides show many remnants of the first impression. Sharply struck and lustrous with medium caramel-gold and ice-blue toning. Marks are surprisingly few, though the reverse field exhibits three patches of interesting vertical die lines (as made).

1911 Indian Ten, MS64  
Reverse Strike Through

- 5102 1911 Indian Eagle — Reverse Strike Through — MS64 NGC.** A narrow and slightly curved 8 mm strike-through (as coined) rests near the reverse rim between 8 and 9 o'clock. Perhaps a short thin wire was fed along with the planchet and was struck into the coin, although no foreign material is present, as usual for strike-throughs. The coin may be of greater interest for its conditional rarity, since 1911 eagles are infrequently encountered with smooth and lustrous peach-gold surfaces.

## CERTIFIED MODERN PROOF SETS

- 5103 Five-Piece 1937 Proof Set PCGS.** The coins are separately housed in PCGS holders with consecutive certification numbers. The set includes: **cent PR66 Red and Brown**, orange-red throughout except for an olive-gold reverse center; **nickel PR67**, sharply struck and pristine with straw-gold and ice-blue toning; **dime PR66**, fully struck, light gold toning, a tiny strike-through on the chin; **quarter PR66**, the boldly struck and flawless surfaces exhibit medium apricot patina; and a **half dollar PR66**, a good strike, almond-gold and steel-blue intermingle across glassy and undisturbed surfaces. *Ex: New York Signature (Heritage, 11/2013), lot 4995.* (Total: 5 coins)
- 5104 Five-Piece 1938 Proof Set PR65 PCGS.** The five coins are separately housed in old green holders, four of which have consecutive certification numbers. The set includes: **cent PR65 Red PCGS**, an outstanding peach-gold Gem; **nickel PR65 PCGS**, a magnificent first-year Gem with pastel lilac and gold patina; **dime PR65 PCGS**, beautiful and virtually brilliant; **quarter PR65 PCGS**, another flawless Gem; and a **half dollar PR65 PCGS**, fully struck and exemplary with light silver-gray toning. (Total: 5 coins)
- 5105 Five-Piece 1939 Proof Set NGC.** Housed in separate NGC holders, which display consecutive certification numbers. The set includes: **cent PR65 Red**, a conservatively graded orange-gold Gem; **Reverse of 1938 nickel PR67**, nearly brilliant, outstanding quality; **dime PR66**, dappled sea-green and wheat-gold toning; **quarter PR64**, streaky apple-green and chestnut patina; and **Walking Liberty half dollar PR66**, lovely rose-red, lime-green, and sun-gold toning. *From The Twelve Oaks Collection, Part III.* (Total: 5 coins)
- 5106 Five-Piece 1939 Proof Set NGC.** Separately housed in NGC holders that have consecutive certification numbers. The set includes: **cent PR66 Red**, a peach-red beauty; **Reverse of 1938 nickel PR66**, a trace of golden patina; **dime PR66**, iridescent jade-green and pumpkin-gold toning; **quarter PR66**, lightly dappled green-gold patina; and a **Walking Liberty half dollar PR66**, lightly toned and lovely. *From The Twelve Oaks Collection, Part III.* (Total: 5 coins)

## SO-CALLED DOLLAR

1909 Hendrik Hudson Daalder, MS66  
Gold, HK-371, DeLorey-75

- 5107 1909 Hendrik Hudson Daalder, Gold, MS66 NGC. HK-371, DeLorey-75, R.7.** *Ex: Jeff Shevlin Collection.* 15 mm. Well-known numismatist Thomas Elder issued two medal designs for the 1909 Hudson-Fulton Exposition, one each for explorer Hendrik Hudson and inventor Robert Fulton. These were issued in various alloys and diameters, but the gold so-called dollars are the most desirable. This is a sharply struck and pristine butter-gold example pedigreed to exnumia specialist Jeff Shevlin.

## 20TH CENTURY TOKENS AND MEDAL

1942 Nobel Committee Medal, MS64  
Gold Medallion for Physics

- 5108 1942 Nobel Committee 23K Gold Medal, MS64 NGC.** 27 mm. 20 grams. The five members of the Nobel committees are tasked with the identification of a worthy laureate for the Nobel Prize in the various classes. With just five committee members, these medals were struck in minuscule quantities and are extremely rare today. Issued to committee members for Physics, this medal exhibits minuscule marks in the fields and on the rims, with frosty and fully lustrous yellow-gold surfaces. Nobel's portrait on the obverse, and the arms of the Academy of Sciences on the reverse are bold and well-struck.
- There were no Nobel Prizes awarded in 1942 for any category, one of just six years that the prize for physics went unawarded. The other years were 1916, 1931, 1934, 1940, and 1941. The prize money was returned to the Nobel Fund, with one-third going to the Main Fund and two-thirds going to the Special Fund.

## End of Session Two

## SESSION THREE

## COLONIALS

Lord Baltimore Shilling, AU50  
W-1080, Large Bust  
Rare Colonial Silver Issue

- 5109** (1659) Lord Baltimore Shilling AU50 PCGS. Hodder 1-A, W-1080, R.6. The Boston Mint operated for several years, and as a result, early Massachusetts silver is comparatively available. The same cannot be said for Maryland pieces, struck briefly in England under the authority of Cecil Calvert, second Lord Baltimore. The English government disapproved of exports of silver to the colonies, and Calvert's arrest in October 1659 put an end to his coinage. Four denominations were issued, but the denarium is extremely rare, and only one die marriage each for the groat, sixpence, and shilling are collectible. This is a pleasing and unblemished dove-gray Large Bust shilling. The strike is consistent throughout except near 6 o'clock on the obverse, and opposite near 12 o'clock on the reverse, where the flan is slightly thinner. Listed on page 42 of the 2017 *Guide Book*. NGC ID# 2U3L, PCGS# 34

1787 Fugio Cent, MS64 Red and Brown  
STATES UNITED, N. 11-X  
Pointed Rays, Four Cinquefoils

- 5110** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Red and Brown PCGS. N. 11-X, W-6790, R.4. Glimpses of brick-red accompany design elements, but this Choice Fugio copper is predominantly chocolate-brown. The strike is good and no abrasions are apparent. Minor toned laminations (as coined) affect the I in FUGIO, the chain links, and the lower obverse margin. Likely originally from the Bank of New York hoard. Listed on page 89 of the 2017 *Guide Book*. *From The Walter Freeman Collection, Part II*. NGC ID# 2B8E, PCGS# 884

## HALF CENTS

### 1793 C-3 Half Cent, MS62 Brown First Year of Mint Operations

**5111 1793 C-3, B-3, R.3, MS62 Brown PCGS.** The 1793 Liberty Cap has obvious significance as the first half cent produced by the Mint, and it is also a highly coveted one-year type. In the informative *Encyclopedia of United States Half Cents: 1793-1857*, Walter Breen wrote that the Philadelphia Mint prepared two obverse and three reverse dies for this issue between April and July 1793. The obverse design was based on sketches prepared by David Rittenhouse, who in turn relied heavily on Augustin Dupré's attractive *Libertas Americana* medal of 1782. On July 20, the first 7,000 pieces were produced, followed by 24,934 coins on July 26, and a further 3,400 pieces on September 18. These three deliveries totaled a mere 35,334 coins.

The surfaces on this extraordinary Mint State representative are an appealing medium brown color with hints of faded pinkish-orange that is primarily seen around the peripheral areas of the reverse. The high points of the devices are uniformly bold, and none of the usual porosity, corrosion, or other problems that so often mar these important early coppers are visible. A small obverse rim bruise is noted over LI. The Condition Census status of this high-quality 1793 half cent is secure, making it a landmark offering for the quality-conscious collector. Our EAC grade AU55.

Ex: 1959 ANA (Leo A. Young, 8/1959), lot 402; Kagin's; Leo A. Young; Auction '80 (RARCOA, 8/1980), lot 1512; later, Long Beach Signature Sale (Heritage, 2/2002), lot 5018; Central States Signature Sale (Heritage, 8/2006), lot 5017; The Jim O'Neal Collection of U.S. Type, Part One / Central States Signature (Heritage, 4/2014), lot 5498. NGC ID# 2222, PCGS# 35009 Base PCGS# 1000

1795 Half Cent, XF45  
No Pole, Plain Edge, C-5a, Thin Planchet

- 5112** 1795 Plain Edge, No Pole, Thin Planchet, C-5a, B-5a, R.3, XF45 PCGS. An impressive example of the popular No Pole variety. As always for C-5a, a biplanar diagonal crack is present above HALF. On most examples, HALF CENT is worn smooth, but those letters are fully readable on the present coin. The olive-brown surfaces are well defined, and the only remotely mentionable marks are located near the LI in LIBERTY. Our EAC grade XF40. NGC ID# 2225, PCGS# 35083 Base PCGS# 1018

1802/0 C-1, B-1 Half Cent, AG3  
Reverse of 1800

- 5113** 1802/0 Reverse of 1800, C-1, B-1, R.6, AG3 PCGS. CAC. An unused Draped Bust obverse die dated 1800 was overdated to create the lone obverse die used for the 1802 half cents, and the reverse is from the 1800 production die that remained in use. Die state evidence tells us that the 1802 half cents with the new reverse (called Reverse of 1802) were struck first, then these Reverse of 1800 coins were minted, followed by more of the New Reverse coins.

PCGS and NGC have graded a total of 13 1802 Reverse of 1800 half cents with none finer than XF40. However, the typical survivor is low grade, and often damaged. Just enough of the reverse die rust is visible through the E of UNITED to identify this rare variety. The olive-brown surfaces are remarkably smooth for the grade. Our EAC grade Fair 2. NGC ID# 222C, PCGS# 35122 Base PCGS# 1054

1806 C-4 Half Cent, MS63 Red and Brown  
Large 6, Stems Reverse

- 5114** 1806 Large 6, Stems, C-4, B-4, R.1, MS63 Red and Brown PCGS. Manley Die State I, showing repunching on the 6 in the date. This Select Red and Brown C-4 half cent is boldly struck, although minutely off-centered toward 12 o'clock, where the rim is nearly too thin to discern. Medium brown toning accounts for the Red and Brown designation, although significant Mint red around the relief elements delivers pleasing eye appeal. The reverse is rotated approximately 45 degrees counterclockwise, as is typical of this die marriage. Our EAC grade MS60. NGC ID# 222J, PCGS# 35201 Base PCGS# 1100

## PROOF CLASSIC HEAD HALF CENT

1835 C-2 Half Cent, PR63 Brown  
Rare Proof Date

- 5115** 1835 PR63 Brown PCGS. C-2, B-2, R.6 as a proof. Manley Die State 1.0. Medium apple-green and wheat-gold toning visits this intricately struck and unabraded Select proof. Void of detractors, and the quality is superior for the designated grade. Breen believed that the C-2 proofs were struck from perfect dies, but it appears that all examples of C-2 display a delicate die crack from ERICA to the field below the wreath ribbon, which likely emerged on the reverse die while it was hardened, prior to coinage. Our EAC grade PR60. NGC ID# 26YU, PCGS# 1204

# PROOF BRAIDED HAIR HALF CENTS

1842 First Restrike Half Cent  
B-2, PR66 Brown

- 5116** 1842 Restrike PR66 Brown PCGS. CAC. B-2, R.6. PCGS has certified three examples PR66 Brown and two others in PR66 Red and Brown. Those five submissions represent the finest that grading service has certified, although the specific identification of First or Second Restrikes is unknown. All three varieties of 1842 are rated R.6, meaning less than 30 examples are known of each. It is thought that only a little over half that number of First Restrikes exist today. This piece has hints of red on both sides, with delicate blue overtones on its olive-brown surfaces. The design elements are sharp and the fields are completely mirrored. Our EAC grade PR62. NGC ID# 26Z8, PCGS# 1263

1856 Half Cent, PR63 Brown  
Scarce Proof Variety

- 5117** 1856 PR63 Brown PCGS. CAC. B-3, R.4. Doubling on the T of CENT and on the ribbon identifies this proof variety. Well struck and void of contact. Deeply patinated with sea-green and rose-red undertones. Although traditionally designated as Rarity-4, the proof 1856 appears scarcer, since PCGS has certified just 41 specimens in all grades, a number of which are resubmissions over the past 27 years. Our EAC grade PR60. Population: 7 in 63 Brown, 16 finer. CAC: 1 in 63, 7 finer (9/16). NGC ID# 26ZX, PCGS# 1329

## LARGE CENTS

1795 Liberty Cap Large Cent, S-76b, AU50  
Interesting Plain Edge Variety

- 5118** 1795 Plain Edge, S-76b, B-4b, R.1, AU50 PCGS. CAC. Sheldon-76b is characterized by the placement of the 5 with its flag overlapping the bust, the plain edge, and the high placement of ONE CENT on the reverse. Lovely olive-brown patina embraces minimally marked surfaces of this pleasing survivor. Much detail remains on the design elements and light, even wear is seen over the slightly granular surfaces. Our EAC grade VF35. Ex: *Central States Signature* (Heritage, 4-5/2010), lot 52. NGC ID# 223T, PCGS# 35723 Base PCGS# 1380

1795 S-78 Cent, Fine Details  
Triple Struck, Last Strike Flipover

- 5119** 1795 Plain Edge, S-78, B-8, R.1 — Triple Struck, Last Strike Flipover, Corroded — NCS. Fine Details. The first strike was normal. The second strike was approximately 30% off center toward 10:30. The third strike, a flipover, was 10% off center toward 10 o'clock. Fortuitously, all three dates are visible and complete, although the dates from the first two strikes are affected by lavender verdigris. The deep walnut-brown surfaces are evenly granular and are free from consequential contact. Our EAC grade Good 6.

1802 S-237, B-10 Cent, MS61 Brown  
Intermediate Die State

- 5120** 1802 S-237, B-10, R.2, MS61 Brown PCGS. Breen Die State VI. Several reverse die cracks provide attribution guidance for the S-237 die marriage. Considerable faded pinkish-orange appears, at the upper obverse and in the protected areas of the reverse, on the bluish-brown surfaces of this attractive and important large cent. No corrosion is evident on either side, with only a few scattered marks. The reverse of this example is bluntly struck as usual for the die pair. Only four EAC graded Mint State pieces appear in Del Bland's Condition Census, with a small additional number of AU examples. Our EAC grade XF45. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470

1804 S-266b, B-1 Cent, VF30  
Middle Die State

- 5121** 1804 S-266b, B-1, R.2, VF30 PCGS. The intermediate die state has a rim break over RTY on the obverse but no rim break on the reverse. The die states of 1804 are highly collectible and even carry their own Sheldon subvariety labels of a, b, and c. In all other instances among the early cents, the subvariety labels are reserved for edge changes or planchet differences. This pleasing representative has olive and dark brown surfaces with splashes of lighter tan on the obverse and traces of reddish corrosion on the reverse. A few small areas of dark green verdigris are also visible, along with several old scratches on the portrait, but overall, this middle state 1804 cent is pleasing and quite collectible. Our EAC grade Fine 15.  
*Ex: Central States Signature (Heritage, 4/2011), lot 5020.* NGC ID# 224H, PCGS# 36422 Base PCGS# 1504

1844 N-4 Large Cent, MS65 Red and Brown  
The Finest Certified

- 5122** 1844 N-4, R.1, MS65 Red and Brown PCGS. CAC. Grellman Die State c, with thin rim breaks over stars 4 and 5, but with no evidence of the later die crack through the tops of AMERICA. The 1844 large cent is the second most difficult late date issue to locate with any original mint color, trailing the 1841 by a small number. PCGS has certified 20 1841 large cents with the Red and Brown or Red designation, and they have certified 32 1844 cents as Red and Brown or Red. This lovely Gem exhibits olive and bluish-brown patina on both sides, and retains about 50% of its brilliant orange mint color. Our EAC grade MS63. Population: 1 in 65 Red and Brown, 0 finer (9/16). PCGS# 397729 Base PCGS# 1857

1857 Large Cent, MS64+ Red  
N-4 Small Date

- 5123 1857 Small Date, N-4, R.1, MS64+ Red PCGS. CAC. The diagnostic points that extend down from the ear lobes are extremely faint on this brilliant Gem cent. Both sides have frosty mint luster with original bright orange surfaces. Some low areas are evident inside the wreath, and a few areas of weak striking are noted. Our EAC grade MS64. PCGS# 403970 Base PCGS# 1932

FLYING EAGLE CENT

1858 Flying Eagle Cent, MS66  
Luminous Large Letters Coin

- 5124 1858 Large Letters MS66 PCGS. A fully struck Premium Gem with luminous rose and olive-gold luster that delivers a magnificent display of the design elements. Some minor strike doubling is seen on the obverse peripheral lettering. The coin is devoid of mentionable abrasions. Although sufficiently rare in this grade, the Large Letters 1858 Flying Eagle cent is prohibitively so any finer. NGC ID# 2277, PCGS# 2019

PROOF FLYING EAGLE CENTS

1856 Snow-3 Flying Eagle Cent, PR62  
Satinny Proof Example

- 5125 1856 Snow-3 PR62 PCGS. Snow-3 makes up about one fifth of the the surviving 1856 Flying Eagle cent population, according to Rick Snow (2014), and likely comprised a significant quantity of the pieces distributed to Congress to "help promote passage of the pending coinage bill." PCGS has graded examples as both proof and regular-issue strikings, although very few show truly prooflike qualities. Most examples were likely only struck once, as minor weakness on portions of the devices is often seen. Proof Snow-3 coins are typically encountered with satiny surfaces rather than deeply mirrored, similar to the Snow-9 proofs of 1857 to 1860. This Snow-3 example displays a sharp strike and smooth bronze-gold coloration. A few faint marks define the grade but are hardly noticed by the naked eye. Wisps of lavender and peach also appear in the fields. This is an outstanding 1856 Flying Eagle cent for the date or variety specialist. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

**1856 Flying Eagle Cent, Snow-9, PR62**  
**Sharp and Appealing for the Grade**

**5126 1856 Snow-9 PR62 PCGS.** A thin die line in the eagle's wing and a small spike off the left wreath stem identify this frequently seen variety. Snow-9 was produced during the second striking period of 1857 to 1860, although the exact number of pieces struck and in how many deliveries is unknown. Rick Snow suggests as many 1,500 Snow-9 proofs may have been coined, many of which are known in circulated condition today. It is likely that a number of pieces were released into circulation during the early part of the Civil War, either mistakenly or in the possible event that sales of the 1856 Flying Eagle cent had nearly dissolved by that point and the Mint was just unloading excess coins.

All proof 1856 Flying Eagle cents are in high demand. This unworn example shows full detail throughout the eagle and wreath, and the modestly reflective fields exhibit few noticeable imperfections. Satiny bronze-gold color adorns each side. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

**INDIAN CENTS**

**1862 Indian Cent, MS67**  
**Tied for Finest Certified**

**5127 1862 MS67 NGC.** This impeccable Superb Gem features a full strike with bold feather tips and complete shield details. Both sides have virtually flawless satin surfaces with brilliant cartwheel luster. The obverse is brilliant gold with subtle blue accents, and the reverse is tan with faint traces of gold overtones. NGC has certified only 14 examples of the copper-nickel type in MS67, with none finer for any issue. Census: 6 in 67, 0 finer (9/16). NGC ID# 227H, PCGS# 2064

**1872 Cent, MS66 Red and Brown**  
**Low-Mintage Date**

**5128 1872 MS66 Red and Brown PCGS. CAC.** Bold N in ONE. Low-mintage dates from the 1870s constitute many semikeys of the Indian cent series. The 1872 production barely exceeded 4 million pieces and relatively few were saved. The present sharply struck and lustrous Premium Gem has unabraded honey-gold and jade-green surfaces. A few trivial reverse flecks are noted near 2 o'clock. Population: 10 in 66 Red and Brown, 0 finer. CAC: 3 in 66, 0 finer (9/16). NGC ID# 227W, PCGS# 2104

1872 Indian Cent, MS65 Red  
One Finer Coin at PCGS

**5129 1872 MS65 Red PCGS. CAC.** The 1872 Indian cent claims a mintage of just over 4 million pieces. Many examples were struck from planchets made from remelted coins of earlier years and the quality of these blanks was uneven. Many examples show streaks due to improper alloy mix and the issue is often seen with a weak strike. Richard Snow believes the 1872 is the most difficult issue of the series to find in high grade, outside of the famous 1877.

This delightful Gem displays original red surfaces with vibrant mint luster on both sides. The obverse is sharply detailed, but the reverse shows a touch of softness on the wreath. No mentionable distractions are evident and eye appeal is outstanding. Population: 19 in 65 (1 in 65+) Red, 1 finer. CAC: 4 in 65, 0 finer (9/16). NGC ID# 227W, PCGS# 2105

1889 Cent, MS66 Red  
Condition Census Registry Coin

**5130 1889 MS66 Red PCGS.** The 1889 Indian cent tops out at the MS66 Red grade level, where PCGS reports 10 submissions and NGC has seen only one (9/16). No finer examples are known. This Registry candidate displays a bold strike and frosty copper-orange luster. There are no mentionable distractions. Population: 10 in 66 Red, 0 finer (9/16). NGC ID# 2732, PCGS# 2174

1891 Cent, MS66 Red  
Misplaced Date

**5131 1891 MS66 Red PCGS. Snow-6.** A conditional rarity, this Premium Gem Red 1891 Indian cent is also among the finest known of the issue. Frosty, unabraded copper-orange luster shows brighter golden hues throughout, while the devices exhibit razor-sharp detail. This piece is representative of the Snow-6 variety, showing the tops of a misplaced 1 and 8 protruding from the dentils below the date. Snow writes: "Very few have been reported, and as such, this is likely very rare." Population: 18 in 66 (3 in 66+) Red, 0 finer (9/16). NGC ID# 228K, PCGS# 2180

## PROOF INDIAN CENT

1864 Bronze Cent, PR64 Red Cameo  
Snow-PR1, L on Ribbon Variety

**5132 1864 L On Ribbon PR64 Cameo PCGS. Snow PR-1.** There are three die varieties known for the proof 1864 L on Ribbon bronze cents with a combined population of about 20 coins. For many years it was thought that just one die pair existed for genuine pieces (PR-2). It was not until 1984 that Walter Breen confirmed the existence of PR-1. The only known example of the third variety, PR-3, was authenticated by Richard Snow in 1997.

PR-1 and PR-3 are believed to be originals struck in 1864, while the PR-2 coins, using a reverse die that is seen on later-year proofs, are considered restrikes coined circa 1868. PR-1 appears significantly less often than PR-2. Our roster, drawn from Snow's *Flying Eagle and Indian Cent Attribution Guide*, third edition, includes six individual coins and several additional appearances that likely represent different coins and early appearances of confirmed specimens. Snow estimates about eight or nine different pieces exist, although few have appeared at auction in recent years.

This full Red Choice Cameo fails to match any of the previously known examples of the PR-1 variety, although comparisons become increasingly difficult with the older catalog listings. The coin has the distinction of being the *only* full Red example in the Census, and by extension the only Cameo proof. Each side displays stark field-motif contrast with rich copper-gold coloration and pronounced mirroring. Smooth surfaces lack major signs of contact. A carbon speck between feathers 2 and 3 serves as a pedigree identifier. This piece ranks as one of only two coins, all varieties included, designated as Red Cameo at PCGS, the other being a Gem PR-2 representative (9/16).

**Roster of Proof 1864 L on Ribbon Bronze Cents (PR-1)**

1. **PR66 Red and Brown PCGS.** Marks (Bowers and Ruddy, 11/1972), lot 164; Austin Collection (Bowers and Ruddy, 5-6/1974), lot 285; Dr. Curtis R. Paxman Collection (Bowers and Ruddy, 11/1974), lot 215; Dr. Stanley Spurgeon Collection.
2. **PR66 Brown PCGS.** Fern E. Wagner Trust; West Palm Beach Signature (Heritage, 6/2008), lot 210; Baltimore Auction (Bowers and Merena, 3/2009), lot 173; New York Collection / Long Beach Signature (Heritage, 9/2013), lot 6233.
3. **PR65 Red and Brown PCGS.** Rarities Sale (Bowers and Merena, 1/1999), lot 1031; Legend Numismatics.
4. **PR65 Red and Brown PCGS.** R.L. Miles, Jr. Collection, Part II (Stack's, 4/1969), lot 234; Philadelphia Signature (Heritage, 8/2012), lot 5033; Q. David Bowers Proof Indian Cent Collection; Chicago ANA Sale (Stack's Bowers, 8/2015), lot 10035.
5. **PR64 Red Cameo PCGS.** Central States Signature (Heritage, 4/2015), lot 4928. Likely the same as A, B, or C below. **The present coin.**
6. **PR63 Red and Brown PCGS.** Robert Shultz; Lloyd M. Higgins, M.D. Collection (Bowers and Merena, 1/1988), lot 99. This was the first PR-1 example attributed.

**Additional Appearances**

- A. **PR63.** Auction Sale (New England, 11/1979), lot 74.
- B. **Brilliant Proof.** Massachusetts Historical Society (Stack's, 3/1973), lot 379; Public Auction Sale (Stack's, 3/1982), lot 620.
- C. **Brilliant Proof.** Anderson-DuPont, Part II (Stack's, 11/1954), lot 1177. PCGS# 82281

## LINCOLN CENTS

1912-S Cent, MS66 Red  
Original Luster, Condition Census

**5133 1912-S MS66 Red PCGS.** The 1912-S Lincoln cent is an issue that quickly becomes a condition rarity in high grade. None are known at the Superb Gem level, regardless of color designation, and this Premium Gem Red coin is tied with just four others at both services combined as the finest known (9/16). The strike is sharp, and the satiny surfaces display luminous copper-tan color. Hints of olive near the borders guarantee the originality of the patina. A loupe reveals a few faint flecks, none bothersome. For the Registry Set collector, this top-grade coin represents the an incredibly important opportunity to acquire one of the finest-known 1912-S cents for their collection. Population: 4 in 66 Red, 0 finer (9/16). NGC ID# 22BC, PCGS# 2458

1955 Cent, MS64+ Red and Brown  
FS-101, Doubled Die Obverse

**5134 1955 Doubled Die Obverse, FS-101, MS64+ Red and Brown PCGS.** The 1955 Doubled Die Obverse cent has captured the imaginations of collectors since the variety was first discovered shortly after its production. Today, the dramatic error is considered the "King of Varieties" in U.S. numismatics and ranks 74th in Garrett and Guth's *100 Greatest U.S. Coins*. The obverse is mostly copper-orange, while deeper amber shadings on the reverse prevent a full Red color designation. Well-struck with clean fields and two minor abrasions on Liberty's cheek. PCGS has seen eight Red and Brown submissions finer (9/16). NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

1955 Doubled Die Cent, MS64+ Red  
Elusive With Full Red Color

- 5135** 1955 Doubled Die Obverse, FS-101, MS64+ Red PCGS. CAC. Mint workmen noticed the doubling at the time these pieces were struck, and have estimated that about 24,000 were released into circulation, having been mixed with normal 1955 cents on the production line. Many of these pieces turned up in Massachusetts and upstate New York, and the variety was first reported in the January 1956 issue of *Numismatic Scrapbook* magazine. PCGS and NGC have certified 8,000 of these cents, including just over 300 examples designated Red (9/16). This impressive Choice Mint State piece has a bold strike and brilliant orange mint luster, showing minimal marks that prevent a higher grade. CAC: 23 in 64 Red, 1 finer (9/16). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

## PROOF LINCOLN CENTS

1915 Cent, Attractive PR66 Brown

- 5136** 1915 PR66 Brown PCGS. Burnt-red, brown, and steel-blue hues appear in equal parts over each side of this Premium Gem 1915 matte proof cent. The strike is tack-sharp, and the surfaces are well-preserved. High-end examples of the challenging matte proof issue are scarce, regardless of color designation. Population: 23 in 66 (3 in 66+) Brown, 6 finer (9/16). NGC ID# 22KY, PCGS# 3321

1916 Cent, PR66 Red  
Among the Finest at PCGS  
Second-Rarest Matte Proof Issue

- 5137** 1916 PR66 Red PCGS. The Lincoln cent debuted amid an experiment by the Mint with a matte finish on its proof coins. The visual effect was somewhat dull and lifeless compared to the brilliant, mirrored proofs of previous years, and collector appreciation for the matte finish was less than enthusiastic. Matte proof Lincoln cent coinage in 1909 and 1910 was fair, but demand and production began to fall after 1911. The 1916 was the final matte proof Lincoln cent struck before the Mint ceased all regular proof coinage. Only 1,050 pieces were produced. Today, the 1916 is the second-rarest matte proof in high grade, trailing only the briefly coined 1909 VDB.

This Premium Gem Red example is conditionally rare. Hints of amber and green peripheral color accentuate the rich copper-orange surfaces, and the design elements are fully rendered. The matte texture of the luster shows no discernible contact marks. Population: 5 in 66 Red, 0 finer (9/16). NGC ID# 22KZ, PCGS# 3326

1936 Cent, PR66 Red  
Brilliant Finish

- 5138 1936 Type Two — Brilliant Finish PR66 Red PCGS. CAC.** A glimmering carbon-free Premium Gem with uniform rose-gold color over liquidlike mirroring in the fields. The strike is sharp, and there are no distractions. The Type Two 1936 proof cent is seldom available this fine. The present coin is among the finest Red examples endorsed by CAC. Population: 54 in 66 (3 in 66+) Red, 2 finer. CAC: 15 in 66, 0 finer (9/16). NGC ID# 22L3, PCGS# 3335

1941 Cent, PR67 Red  
Tied for the Finest Certified

- 5139 1941 PR67 Red NGC.** The fields and devices are fully mirrored without contrast on this fiery orange Superb Gem proof. A small number of trivial copper toning spots are evident on each side, in no way affecting the superior eye appeal of this lovely piece. Census: 9 in 67 Red, 0 finer (9/16). NGC ID# 3H34, PCGS# 3350

1990 Lincoln Cent, PR69 Red Deep Cameo  
Missing the S Mintmark

- 5140 1990 No S, FS-101, PR69 Red Deep Cameo PCGS.** A new error type was introduced once proof coinage production was transferred from Philadelphia to San Francisco in 1968. That error is the Missing Mintmark of proof coins. Although theoretically, any denomination could have a No S variant, observed examples to date are limited to cents, nickels, and dimes. This amazing Superb Gem is essentially flawless with brilliant pinkish-orange mint color and extraordinary contrast. Population: 41 in 69 Deep Cameo, 0 finer (9/16). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

PROOF TWO CENT PIECES

1866 Two Cent Piece, PR65 Red, Only Seven Finer at PCGS

- 5141 1866 PR65 Red PCGS.** Only 20% of PCGS submissions of proof 1866 two cent pieces have received the Red designation, and those 51 coins fall in the narrow range of PR64 Red to PR66 Red. The brilliant orange surfaces of this boldly detailed Gem proof exhibit dappled gold toning on each side. Slight field-to-device contrast is evident, although insufficient for a Cameo designation. Population: 31 in 65 Red, 7 finer (9/16). NGC ID# 274V, PCGS# 3632

1866 Two Cent, PR66+ Red Cameo  
The Sole Finest Cameo Certified

- 5142 1866 PR66+ Red Cameo PCGS.** Full Red examples of the proof 1866 two cent piece are scarce across all grades, and Cameo-designated pieces are decidedly rare. A half-dozen Premium Gem Red coins are the finest Cameos at PCGS, and the present Plus-graded example stands out among these as the sole finest (9/16). The coin is fully struck and displays vivid coppery-orange and reddish color without distracting carbon spots. Field-device contrast is immediately apparent on each side, unlike on many other Cameo-designated coins for which one side or the other is slightly lacking in presentation. This high-end Red Cameo is a must-have item for the Registry Set enthusiast. NGC ID# 274V, PCGS# 83632

**1868 Two Cent Piece, PR66 Red**  
Rarely Encountered at This Lofty Grade Level

- 5143 1868 PR66 Red PCGS. CAC.** Virtually flawless fields display deep, watery mirrors and a lovely copper-gold color that lies uniformly across the surfaces. Red proof copper is such an underestimated rarity — this issue boasts only nine pieces graded PR66 Red by PCGS with two finer (9/16), a population that has remained unchanged since we last sold this piece in 2005.  
*Ex: Palm Beach Signature (Heritage, 3/2005), lot 5224. NGC ID# 274X, PCGS# 3638*

### THREE CENT SILVER

**1854 Three Cent Silver, MS67 ★**  
None Finer at NGC

- 5144 1854 MS67 ★ NGC.** In 1854 the design of the three cent silver piece was modified to include two lines around the obverse star. Three cent pieces of this style were produced from 1854 through 1858 inclusive, and are referred to as Type or Variety Two. A melange of orange-gold, sky-blue, purple, and crimson covers the obverse of this sharply detailed Superb Gem, while champagne, violet-purple, lavender, and sky-blue adorns the reverse. Immaculately preserved, lustrous surfaces round out the coin's eye appeal. Light clash marks are visible on the obverse, as is a spindly crack in the right field. Census: 2 in 67 (1 in 67★), 0 finer (9/16). NGC ID# 22Z3, PCGS# 3670

**1859 Three Cent Silver, MS67**  
Few Known This Fine

- 5145 1859 MS67 PCGS.** The availability of the 1859 silver three cent declines significantly at the Gem grade level, and Premium Gems are rare. This Superb Gem is an exceptional piece, showing virtually untouched, frosty surfaces and a bold central strike. Brilliant interiors cede to gold, lavender, and aquamarine border hues, attesting to the originality of the surfaces. Population: 5 in 67, 1 finer (9/16). NGC ID# 22Z8, PCGS# 3677

**1863 Three Cent Silver, MS66**  
Only 21,000 Pieces Struck

- 5146 1863 MS66 PCGS.** As with most dates from the 1860s, the 1863 is a rare item in business strike format. Only 21,000 pieces were produced. This coin is similar to many other low-mintage issues in other series, there were so few struck the initial die polish never had a chance to dull to a satiny or frosted finish, thus leaving the fields bright and reflective. This is a beautiful piece that retains much of the original die polish, but has been further lightly striated and polished, giving a slightly wavy, uneven texture to the surfaces. Very light color is present and the strike definition is nearly complete. Population: 23 in 66 (1 in 66+), 6 finer (9/16). NGC ID# 22ZD, PCGS# 3682

**1869 Three Cent Silver, Toned MS65**  
Only 4,500 Pieces Struck for Circulation

- 5147 1869 MS65 PCGS Secure. CAC.** *Ex: Simpson.* The three cent silver series is overlooked and underappreciated, mostly because collectors prefer "big coins." Only 4,500 business strikes were produced in 1869 and remarkably few are known, especially in high grade. PCGS has only certified four pieces in MS65 with eight finer (9/16). This is a richly toned example with glowing rose and sea-green patina covering each side. Sharply struck in almost all areas. NGC ID# 22ZK, PCGS# 3689

### THREE CENT NICKEL

**1885 Three Cent Nickel, MS65**  
Underrated Circulation Strike

- 5148 1885 MS65 PCGS.** An underrated and important rarity, the 1885 three cent nickel had a mintage of only 1,000 circulation strikes, far fewer than the 3,790 proofs coined that year. Aside from proof-only issues, this is one of only a few 19th century American coinage issues where proof production exceeded the circulation strike mintage. This pleasing Gem has delicate champagne toning over frosty gray surfaces and bold design motifs. Population: 17 in 65 (1 in 65+), 16 finer (9/16). NGC ID# 275G, PCGS# 3753

## PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR66 Cameo  
Key Proof Date to the Series

- 5149 1865 PR66 Cameo PCGS. CAC.** First year of issue and tied with the 1877 as the dual keys to the three cent nickel series, each with a mintage of approximately 500 pieces. Fewer 1865 proofs were set aside, however, giving them a slight edge in rarity. Surprisingly deep mirrors are seen on each side with thick mint frost over the devices. Pale pinkish color is barely discernible. Population: 34 in 66 Cameo, 4 finer. CAC: 13 in 66, 2 finer (9/16). NGC ID# 275K, PCGS# 83761

1865 Nickel Three Cent, PR65 Ultra Cameo  
Widely Repunched Date

- 5150 1865 PR65 Ultra Cameo NGC.** This variety is similar to FS-302 with a widely repunched date that shows remnants of the original date west of the final position. The 1865 is the rarest date in proof format, while it ranks among the most common issues as a circulation strike. This amazing Gem has brilliant nickel-gray surfaces with excellent field-to-device contrast. Census: 4 in 65 Ultra Cameo, 8 finer (9/16). NGC ID# 52MV, PCGS# 93761

1872 Three Cent Nickel, PR66 Deep Cameo  
Tied for the Finest Certified

- 5151 1872 PR66 Deep Cameo PCGS. CAC.** Deep Cameo proof examples of the 1872 three cent nickel are extremely rare. PCGS has only certified five such pieces, and none have been so designated at NGC. This impressive Premium Gem has exceptional contrast between the frosty devices and fully mirrored fields. Both sides are brilliant nickel-gray with no evidence of toning. Population: 3 in 66 (1 in 66+) Deep Cameo, 0 finer. CAC: 2 in 66, 0 finer (9/16). NGC ID# 275T, PCGS# 93768

1877 Three Cent Nickel, PR66+ Cameo  
Series Key, Very Low Mintage

- 5152 1877 PR66+ Cameo PCGS. CAC.** Only proofs were struck in 1877 and 1878, with far fewer produced in 1877 (an estimated 510+ pieces). This is an untoned example that shows strong contrast between the thickly frosted devices and depth in the mirrored fields. No obvious post-striking defects can be seen. Population: 65 in 66 (3 in 66+) Cameo, 14 finer. CAC: 40 in 66, 16 finer (9/16). NGC ID# 275X, PCGS# 83773

1877 Three Cent Nickel, PR66 Deep Cameo  
Among the Few Deep Cameos Known

- 5153 1877 PR66 Deep Cameo PCGS.** This proof-only issue had a small 900-coin mintage. Deep Cameo survivors are rare, including three at PCGS (one PR64 and two PR66) and two at NGC (one PR65 and a PR66+) (9/16). The present example displays fully detailed, frosty devices set against reflective fields. Neither side exhibits perceptible toning. The preservation is outstanding. NGC ID# 275X, PCGS# 93773

## SHIELD NICKEL

1883/2 Shield Nickel, MS65  
FS-303, Popular Overdate Variety

- 5154 1883/2 FS-303 MS65 PCGS.** Apparently the Philadelphia Mint anticipated a need for many 1882-dated obverse dies that were never used, as there are five different 1883/2 overdate varieties known. This one has the base of the 2 visible between the second 8 and the 3, and is the most frequently encountered variety. A satiny Gem, the surfaces exhibit faint champagne toning over nickel-gray luster. Population: 7 in 65 (2 in 65+), 4 finer (9/16). PCGS# 38414 Base PCGS# 3813

## PROOF SHIELD NICKEL

1877 Shield Nickel, PR66 Cameo  
Key, Proof-Only Date

- 5155 1877 PR66 Cameo NGC.** There is no certain number of proofs known for 1877. At least 900 pieces were produced for proof sets or sold singly, but as many as 1,250 may have been struck — the rest struck “off the books.” This is one of the finest 1877 nickels we can remember. The surfaces are untoned and each side displays strong contrast between the deeply mirrored proof fields and the heavily frosted devices. Exceptional quality and unquestioned rarity. Census: 64 in 66 Cameo (3 in 66★), 4 finer (9/16). NGC ID# 276U, PCGS# 83831

## LIBERTY NICKELS

1883 With Cents Liberty Nickel, MS67  
Much Scarcer Than Its No Cents Counterpart

- 5156 1883 With Cents MS67 PCGS.** The last of three nickel five cent types struck in 1883 (Shield nickel, No Cents Liberty nickel, and With Cents Liberty nickel), this With Cents nickel is remarkably well-preserved with satiny silver-gray luster. The strike is boldly rendered throughout the devices. Several thin peripheral die cracks are seen on each side, as usual with coins from this period. Population: 7 in 67, 0 finer (9/16). NGC ID# 22PH, PCGS# 3844

1885 Nickel, Lightly Toned MS65  
In an Old Green Label Holder

- 5157 1885 MS65 PCGS.** A glowing Gem representative of this famous Liberty nickel key, strongly struck overall with only slight softness on a few of the obverse stars. Rich orange-rose patina drapes most of each side. Finer examples are seldom seen. Housed in an old green label holder. Population: 51 in 65 (4 in 65+), 38 finer (9/16). Ex: *Central States Signature* (Heritage, 4/2006), lot 914; *FUN Signature* (Heritage, 1/2010), lot 475. NGC ID# 2773, PCGS# 3846

1903 Nickel, Near-Brilliant MS67  
Condition Census

- 5158 1903 MS67 PCGS.** A hint of iridescent toning accents otherwise brilliant, frosty mint luster on this Superb Gem 1903 Liberty nickel. The strike is sharp on the lower wreath and peripheral stars, delivering strong visual appeal. The 1903 is a common date in most grades, but the present coin is conditionally rare and among the finest known. Population: 5 in 67, 0 finer (9/16). NGC ID# 277E, PCGS# 3864

1912-S Liberty Nickel, MS66  
Tied for Finest Certified

- 5159 1912-S MS66 PCGS.** The San Francisco Mint struck their first and only Liberty nickel in 1912, and these pieces are in strong demand from Liberty nickel collectors and type collectors alike. Just 238,000 were minted, and most surviving examples are heavily circulated. Gem or finer Mint State pieces are elusive and extremely popular with collectors. This piece exhibits satin luster on its natural gray surfaces with lovely gold and iridescent toning. Population: 49 in 66 (2 in 66+), 0 finer (9/16). NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

1892 Nickel, PR67 Cameo  
Stark Contrast, Brilliant Mirrors

- 5160 1892 PR67 Cameo PCGS.** Conditionally rare, this Superb Gem Cameo numerically surpasses the handful of Deep/Ultra Cameos reported. The strike is fully executed, and the untuned silver-gray surfaces yield stark contrast between frost-white motifs and jet-black fields. No Cameos are known numerically finer. Population: 6 in 67 (1 in 67+) Cameo, 0 finer (9/16). NGC ID# 5EJP, PCGS# 83890

1897 Nickel, PR66+ Deep Cameo  
Condition Census Rarity

- 5161 1897 PR66+ Deep Cameo PCGS. CAC.** This high-end Deep Cameo is a Condition Census 1897 proof nickel, essential for a high-ranking Registry Set. The strike is full throughout, and stark field-device contrast characterizes the untuned surfaces. The depth of mirroring in the fields is exquisite. Quality of this sort is seldom encountered at auction. Population: 5 in 66 (2 in 66+) Deep Cameo, 1 finer. CAC: 3 in 66, 1 finer (9/16). NGC ID# 2787, PCGS# 93895

1903 Nickel, Colorful PR68  
Sole Finest Non-Cameo at PCGS

- 5162 1903 PR68 PCGS. CAC.** This is the sole finest non-Cameo proof 1903 nickel at PCGS, and NGC has seen few others this fine. Reflective mirrors frame fully struck, satiny devices, producing modest cameo contrast on the obverse. Soft ice-blue and lavender interiors cede to vivid mint-green, yellow-gold, and rose peripheral toning. Population: 1 in 68, 0 finer. CAC: 2 in 68, 0 finer (9/16). NGC ID# 27MY, PCGS# 3901

1903 Nickel, PR67+ Cameo  
Delicately Toned CAC Coin

- 5163 1903 PR67+ Cameo PCGS. CAC.** Lovely lavender and champagne hues grace glimmering mirrors on this high-end Superb Gem Cameo proof, adding to already strong eye appeal that is produced by the sharp wreath and star detail. Appreciable contrast is seen on each side. Population: 23 in 67 (7 in 67+) Cameo, 1 finer. CAC: 20 in 67, 0 finer (9/16). NGC ID# 278D, PCGS# 83901

## BUFFALO NICKELS

1913-S Buffalo Nickel, MS66  
Type Two Reverse

- 5164 1913-S Type Two MS66 PCGS.** An amazing Premium Gem representing the modified Type Two reverse design, this piece is highly lustrous with soft, frosty gray surfaces. Both sides exhibit wispy gold and blue toning that enhance the eye appeal. While slight peripheral design weakness is evident, most of the motifs are boldly defined. Population: 37 in 66, 4 finer (9/16). NGC ID# 22R3, PCGS# 3923

1921 Nickel, Lightly Toned MS67  
Better Philadelphia Date

- 5165** 1921 MS67 PCGS. CAC. The Philadelphia Mint reduced Buffalo nickel output by 52.4 million coins between 1920 and 1921. Despite the significantly lower mintage, 1921 nickels are accessible through MS66. The date becomes rare in Superb Gem, where this coin ranks among the finest certified at PCGS and NGC. This 1921 representative is sharply impressed with radiant, frosty luster. A couple of microscopic flecks define the grade. Registry enthusiasts should recognize the importance of this offering. Population: 28 in 67, 0 finer. CAC: 3 in 67, 0 finer (9/16). NGC ID# 22RT, PCGS# 3947

1924-S Nickel, Satiny MS64  
Pastel Toning

- 5166** 1924-S MS64 NGC. The 1924-S Buffalo nickel is a scarce, low-mintage issue, and Q. David Bowers considers MS64 the Optimal Collecting Grade. The present coin is well-struck for a '24-S, but some softness is evident on the central details. Attractive shades of green and lavender enhance the pleasing surfaces.  
Ex: ANA Signature (Heritage, 8/2010), lot 4304. NGC ID# 22RZ, PCGS# 3953

1926 Buffalo Nickel, MS67  
Tied for the Finest at PCGS

- 5167** 1926 MS67 PCGS. CAC. This Superb Gem 1926 Buffalo nickel exhibits brilliant luster that beams through its reddish-gold and iridescent toning. Both sides have pristine, frosty surfaces and outstanding design definition. In fact, this is one of the sharpest non-proof Buffalo nickels we recall handling. Population: 41 in 67 (1 in 67+), 0 finer. CAC: 9 in 67, 0 finer (9/16). NGC ID# 22S5, PCGS# 3957

1926-S Mint State Nickel, MS64

- 5168** 1926-S MS64 PCGS. CAC. In his December 7, 2004 "Item of the Week" column for *Numismatic News*, Paul M. Green comments on the minor paradoxes of the 1926-S nickel, particularly that it "... is not an especially tough date. It probably should be tougher when you consider the fact that it had a mintage of 970,000, which makes it the lowest-mintage regular-date Buffalo nickel."

Later, however, Green acknowledges that the issue "... has become an enormously important Buffalo nickel in top grades." This appealing near-Gem offers quicksilver luster beneath deep rose, olive, and dusky gold toning. It is well-defined for the date with few overt marks. PCGS has graded just 14 coins finer (9/16).  
Ex: Cincinnati Central States (Heritage, 4/2009), lot 2150. NGC ID# 22S7, PCGS# 3959

## 1926-S Nickel, Lightly Toned MS65 Series Key in This Grade

**5169 1926-S MS65 NGC.** Apart from the various varieties such as the 1916 Doubled Die, the 1918/7-D, et cetera, the greatest condition rarity among regular issues in the Buffalo nickel series is the 1926-S. This date is famous for its low (for the series) mintage of 970,000 pieces, the only production total that does not breach the seven-figure barrier. Survivors bring a premium even in low circulated grades. Mint State examples are actively traded due to the “conditional key” status of the issue, although these are primarily in the MS63 to MS64 range. At the Gem grade level, the availability of this issue plummets, and finer pieces are prohibitively rare.

Previously, we have handled a Gem example on only 14 occasions, including multiple reappearances of some pieces. The most recent offering was a PCGS CAC coin in our ANA Signature sale (Heritage, 8/2014), lot 5543, which garnered \$84,500. The present example is equally well-preserved and possesses comparable visual appeal. Although many examples of the 1926-S are poorly struck from eroded dies, this Gem displays mostly sharp detail with only trivial weakness on the bison’s shoulder and the hair immediately above the Indian’s braid. The fields are satiny, not flowlined, and each side displays delicate pastel shades of sky-blue, champagne, peach-gold, and rose. A loupe reveals only a few tiny ticks that are not out of line for the grade.

NGC and PCGS combined report only two dozen other Gem-level examples of this issue, and a trio of Premium Gem submissions at NGC are the only finer pieces documented. In a series as heavily collected as the Buffalo nickels, this paltry survival rate in high grade makes for a headlining event whenever such a piece is offered. Census: 11 in 65 (2 in 65+, 1 in 65 ★), 3 finer (9/16). NGC ID# 22S7, PCGS# 3959

## PROOF BUFFALO NICKELS

1915 Buffalo Nickel, PR67+  
Sharply Detailed and Unusually Lustrous

- 5170 1915 PR67+ NGC.** A stunning proof Buffalo nickel, from a mintage of just 1,050 pieces, this high-end Superb Gem exhibits razor-sharp definition on all design elements. The slightly granular matte surfaces are unusually lustrous and mostly brilliant, with just a wisp of sea-green toning on the reverse and a dab of amber color below the Indian's eye on the obverse. Census: 36 in 67 (1 in 67+, 1 in 67★), 4 finer (9/16). NGC ID# 278U, PCGS# 3992

1937 Nickel, Lightly Toned PR68  
Only One Coin Finer

- 5171 1937 PR68 PCGS.** The proof 1937 Buffalo nickel is scarce in this lofty grade and almost unknown finer. The present coin displays full detail and complementary mirrors in the fields. Ice-blue and champagne toning graces each side, delivering outstanding eye appeal. There are no discernible flaws. An exceptional Registry Set acquisition. Population: 32 in 68, 1 finer (9/16). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

1943/2-P Nickel, MS67 Full Steps  
Blazing Frost-White Luster

- 5172 1943/2-P Doubled Die Obverse, FS-101, MS67 Full Steps PCGS.** This popular overdate also exhibits minute die doubling on the obverse legends. This Superb Gem is tied with six others as the finest at PCGS (9/16). The brilliant, vibrant surfaces showcase frosty luster, illuminating bold design elements. Close study fails to identify noteworthy abrasions. Metal flow lines are seen around the peripheries, but the overdate feature is clear. NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

1952 Nickel, MS66 Full Steps  
Delicately Toned, Registry-Grade Coin

- 5173 1952 MS66 Full Steps PCGS.** Full Steps examples of the 1952 Jefferson nickel are rare in any grade, and this Premium Gem is among the finest certified. The frosty surfaces yield soft champagne and lavender toning over unmarked fields. Monticello is not fully defined, but the steps are delineated. Eye appeal is excellent. Population: 4 in 66 (1 in 66+) Full Steps, 0 finer (9/16). NGC ID# 22UK, PCGS# 84046

1952-S Nickel, MS66+ Full Steps  
Tied for Finest at PCGS

- 5174 1952-S MS66+ Full Steps PCGS.** Although marginally available in MS64 and MS65, Full Steps 1952-S nickels are rarely seen in Premium Gem condition, and such coins are unknown finer at PCGS. This Plus-graded coin is Condition Census for the issue and a must-have Registry item. Sharp devices complement softly frosted luster, which boasts delicate champagne toning. Population: 11 in 66 (3 in 66+) Full Steps, 0 finer (9/16). NGC ID# 22UM, PCGS# 84048

## PROOF JEFFERSON NICKEL

1951 Nickel, PR68 Deep Cameo  
Tied for Finest at PCGS

- 5175 1951 PR68 Deep Cameo PCGS.** This remarkable proof 1951 Jefferson nickel is tied with just three others as the finest at PCGS (9/16), a standout coin and a must-have Registry Set item. The strike is flawless, and the preservation is virtually so. This piece is almost untoned, showing only a hint of light golden color over stark white-on-black cameo contrast. NGC ID# BBUZ, PCGS# 94183

## EARLY HALF DIMES

1795 V-4, LM-10 Half Dime, MS65  
Lustrous, Late Die State Example

**5176** 1795 V-4, LM-10, R.3, MS65 PCGS. CAC. Late obverse die state, showing a considerable retained cud at the rim above TY and star 9 to the right. On the LM-10 variety, star 1 is joined to a tip of curl 2 on the obverse, and star 15 solidly connects with the front of the bust. The digit 1 touches curl 1, and the flag of the 5 connects to the underside of the bust. T and Y are close at the top. Stars 1 and 2 in particular, but most of the other left-side stars as well, show evidence of die lapping — the dies clashed early on this marriage and were subsequently lapped — and are markedly weaker than the right-side stars. The single outside berry between UN in UNITED is sufficient to attribute the reverse. The reverse die is rotated clockwise about 90 degrees with respect to the obverse die.

Splendid luster and surfaces that are problem-free are the calling cards of this Gem Flowing Hair half dime, one of the more available die marriages from the two-year type (along with 1794) but quite a conditional rarity in so fine a grade. Glints of gold, aqua, and jade are more prominent at the rims on each side, with coin-gray centers and a bold strike throughout. Bold clash marks are more prominent on the reverse, along with a couple of large die cracks on the left side of the wreath.

The relative availability of the LM-10 die marriage will make this piece a logical, key acquisition for type collectors. For the 1795 date, PCGS reports 11 examples in MS65, one in MS65+, and 14 submissions (but likely fewer separate coins) finer (9/16). This piece is one of only five in MS65 with the CAC green approval sticker. The aesthetics as well as the technicals should make the bidder cards fly high when this lot is called. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1797 Half Dime, XF40 CAC  
V-2, LM-1, 15 Stars

**5177** 1797 15 Stars, V-2, LM-1, R.3, XF40 PCGS. CAC. The 15 stars obverse shows two small 7s in the date, making for easy attribution. The present example is in the terminal die state, showing heavy cracks from the obverse rim at star 2, the 9 in the date, at the bust point, and from the T in LIBERTY, converging on the portrait. The coin is evenly struck with complete dentils, but some weakness appears on the central portion of Liberty and the eagle. Mottled lavender-gray and olive-gold toning blankets each side. There are no environmental impairments. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

**1797 LM-3 Half Dime, MS66,  
16 Stars Obverse  
From the D. Brent Pogue Collection**

**5178** 1797 16 Stars, V-3, LM-3, R.5, MS66 PCGS. CAC. Our first silver coins, half dollars and dollars, were coined in the last quarter of 1794, with half dimes minted early in 1795 (bearing the 1794 date). At the time, the nation consisted of 15 states, as Vermont became a state in 1791, and Kentucky in 1792. For that reason, those initial silver coins had 15 stars. Once Tennessee was admitted to the Union in June 1796, another star was added to the silver and gold coins, creating the 16 star varieties.

Some 1797 half dimes also exist with just 15 stars, and we believe that those pieces were coined from an obverse die that was actually engraved early in 1796, omitting the final date digit, in anticipation of a coinage need that never materialized. Early in 1797, that die was completed by punching a 7, then the die was hardened and put to use. Those were the first 1797 half dimes minted, and they are known by the variety notation Logan-McCloskey 1 (LM-1). When a new obverse die was created in 1797 for further coinage, the obverse was correctly engraved with 16 stars. As Pennsylvanians and others migrated to the Northwest Territory in the early and mid-1790s, Mint officials obviously and correctly realized that additional states were on the horizon, and they also realized that they would soon run out of space for additional stars representing more states. The last half dime obverse engraved in 1797 (LM-4) had 13 stars representing the original 13 states, and that star count remained constant into the 20th century with only a few exceptions.

The Pogue cataloger sold this coin short, in our opinion, when he wrote:

“This is the finest example known from these dies. Two of its closest competitors are pieces we have offered in the last dozen years: the 2004 Oliver Jung specimen, graded PCGS MS-65, and the Eliasberg coin currently graded NGC MS-66.”

However, both of those coins are actually examples of LM-2, and not LM-3 that is offered here. The only comparable example of LM-3 that we have located is the MS66 NGC coin that appeared as lot 85 in the August 1998 Bowers and Merena Rarities sale and reappeared in our August 2014 sale of the Oliver Jung Collection. Although PCGS grades three 1797 half dimes in MS66 and one in MS67, and NGC adds three more graded MS66, we are aware of just four 1797 half dimes that exceed MS65, three in MS66 and one in MS67, as shown in the following roster.

**Finest 1797 Half Dimes**

**LM-1 MS67 PCGS.** Pittman Collection (David Akers, 10/1997), lot 426; Superior (2/1999), lot 552; Superior (2/2002), lot 1654; Stack's-Bowers (5/2015), lot 1008.

**LM-2 MS66 NGC.** Eliasberg Collection (Bowers and Merena, 5/1996), lot 899; American Numismatic Rarities (1/2005), lot 322; Stack's (1/2010), lot 3143.

**LM-3 MS66 PCGS. The Present Specimen.** Lawrence R. Stack Type Set; D. Brent Pogue Collection (Stack's-Bowers, 5/2015), lot 1009.

**LM-3 MS66 PCGS.** Bowers and Merena (8/1/1998), lot 85; Oliver Jung Collection (Heritage, 8/2014), lot 5549.

While the MS67 LM-1 half dime is numerically finer according to PCGS, this piece from the Pogue Collection and the similarly graded Oliver Jung coin that we sold in August 2014 are the sharpest struck 1797 half dimes we have encountered. In addition to the sharp strike, this piece exhibits pristine surfaces with full mint luster and pewter-gray surfaces beneath original cobalt-blue, emerald-green, and iridescent toning. Careful examination, even with a strong glass, will fail to turn up more than a few minuscule marks that have gathered in the last 220 years since this beauty was struck. NGC ID# 22ZZ, PCGS# 38599 Base PCGS# 4259

## SEATED HALF DIMES

1842-O Half Dime, Warmly Toned MS65  
Few Seen This Fine

- 5179 1842-O MS65 PCGS. The 1842-O is a better date in all grades but really becomes scarce in the upper circulated levels. In Mint State, this New Orleans half dime is a genuine rarity regardless of grade. A few coins reported in MS66 are the finest, but this Gem example is nonetheless firmly within the Condition Census. Observing the frosty, golden-orange surfaces under a glass fails to reveal a single notable imperfection in the preservation, although considerable strike weakness is seen on Liberty's head and the lower portion of the wreath, as usual. The coin glows beneath a light, and the overall appeal is excellent. Population: 4 in 65, 2 finer (9/16). NGC ID# 256X, PCGS# 4331

1865 Half Dime, MS68  
Sole Finest Certified

- 5180 1865 MS68 NGC. A single set of dies was employed to strike 13,000 half dimes in 1865. Silver coinage was virtually unseen in Eastern circulation during the Civil War, explaining the low mintage. The upper portion of Liberty is brilliant and contrasts markedly against the ice-blue toning that covers much of the obverse. The reverse exhibits a violet center surrounded by a thick band of blue. This visually impressive Superb Gem is made all the more desirable by its status as the single-finest certified example (10/16). NGC ID# 234G, PCGS# 4386

1865-S Half Dime, MS65  
Condition Census Rarity

- 5181 1865-S Repunched Date, V-1, FS-301, MS65 PCGS. CAC. The date is dramatically doubled on this obverse. As a Gem 1865-S half dime, this CAC-endorsed coin is a Condition Census rarity. Frosty champagne luster illuminates well-struck motifs and beautiful surface preservation. The coin is struck from clashed dies with a bisecting die crack on the reverse from 10 to 4 o'clock. This San Francisco issue is scarce in all Mint State grades and almost never seen this fine. Population: 2 in 65, 1 finer. CAC: 4 in 65, 1 finer (9/16). NGC ID# 3G3F, PCGS# 145480 Base PCGS# 4387

## PROOF SEATED HALF DIMES

1852 Half Dime, Sharp PR64  
The Pittman Collection Coin

- 5182 1852 PR64 NGC. V-3.** Dabs of copper near the obverse rim contrast against light sky-blue and pale green patina on this high-end near-Gem proof 1852 half dime. Sharply struck proof surfaces contrast with extensively mirrored fields that show abundant evidence of die polishing. Although not identified as such, this near-Gem proof is clearly the John Jay Pittman 1852 half dime. In the 1997 Pittman Collection auction, David Akers posited that only five or six proofs were known, calling this a “superb, nearly flawless specimen.” Akers believes that the 1852 half dime proofs and all 1852 proofs may be restrikes produced later in the 1850s or early 1860s, explaining their more-obvious proof characteristics. NGC population data: NGC reports (2) PR63, (1) PR64, (2) PR64 Cameo, (2) PR65, and (2) PR65 Cameo, with the likelihood of duplications (9/2016).

*Purchased from David Bullowa sale (5/1952); John Jay Pittman; Pittman Collection (Akers, 10/1997), lot 490; Eugene H. Gardner II (Heritage, 10/2014), lot 98215. NGC ID# 235K, PCGS# 4429*

1856 Half Dime, PR65 Cameo  
Seldom Seen With Contrast

- 5183 1856 PR65 Cameo NGC. CAC.** This early Mint proof has no production records surviving, but estimates from Breen forward put the number surviving at 30 to 40, with few of those so fine as this Gem, and few in any grade showing cameo contrast. This piece boasts well-detailed surfaces with moderate mint frost and reflective fields. No singular contact appears. Census: 2 in 65 Cameo, 1 finer. CAC: 2 in 65 Cameo, 2 finer (9/16). NGC ID# 235L, PCGS# 84434 Base PCGS# 84435

1857 Half Dime, PR66  
Ex: Pittman

- 5184 1857 PR66 NGC. Ex: Pittman.** A splendid Premium Gem from the John Jay Pittman Collection, this piece exhibits light gold, blue, and iridescent toning on both sides that subdues the mirrored fields and lustrous devices. Slight field-to-device contrast is evident, although the toning prevents a Cameo designation. Census: 8 in 66, 1 finer (9/16). NGC ID# 3X58, PCGS# 4436

1867 Half Dime, PR67 Ultra Cameo  
Sole Finest Certified

- 5185 1867 PR67 Ultra Cameo NGC.** Another all-brilliant proof, this example displays remarkably strong contrast between the fields and devices, explaining the Ultra Cameo designation. The devices are fully struck and the surfaces are remarkably clean, as one would expect from a PR67. This is the single finest Ultra Cameo proof known (10/16). NGC ID# 2364, PCGS# 94450

1872 Seated Half Dime, PR67+  
High-Quality Type Representative

- 5186 1872 PR67+ PCGS. CAC.** The obverse of this Superb Gem proof displays near-brilliant centers with violet and golden-orange peripheral toning, while teal-green, blue, and purple color dominate the reverse. Field-device contrast is slight, but the attractive toning more than compensates in terms of visual appeal. Signs of contact are invisible to the unaided eye. A relatively high mintage of 950 proofs, in addition to nearly 3 million circulation strike coins, makes the 1872 a sought-after issue among type specialists. *Purchased from Joseph O'Connor (2/2004); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98199. NGC ID# 2369, PCGS# 4455*

## EARLY DIME

1807 JR-1 Dime, AU58+  
Rich Multicolor Patina

- 5187** 1807 JR-1, R.2, AU58+ PCGS. The only die marriage for this final Draped Bust date. This well-struck type coin displays rich plum-mauve, forest-green, and golden-brown toning. The surfaces are satiny, and the reverse appears unabraded. The obverse exhibits only trivial contact. Shield lines are clashed near Liberty's ear. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

## BUST DIMES

1814 Large Date Dime, MS65+  
JR-3, Clashed and Cracked  
Exceptional Technical Quality

- 5188** 1814 Large Date, JR-3, R.2, MS65+ PCGS. Autumn-brown peripheries frame stone-gray fields and devices. An unmarked, satiny, and desirable Gem. The obverse field is clashed, and the reverse exhibits several fine cracks, characteristic of JR-3. The dies were slightly out of parallel, and as a result, the left-side stars and UNITED are more sharply struck than the right-side stars and AMERICA. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488

1827 JR-6 Dime, MS64  
Conditionally Elusive

- 5189** 1827 Pointed Top 1, JR-6, R.2, MS64 PCGS. CAC. Over the last 23 years since we started our Permanent Auction Archives in 1993, we have only handled seven equal or finer grade examples of this die marriage. This Choice Mint State example has reflective silver fields and brilliant ivory devices. Delicate blue-steel and golden-brown toning is limited to the peripheral obverse and reverse. Population: 62 in 64, 17 finer for all 1827 varieties (9/16). NGC ID# 2375, PCGS# 38816 Base PCGS# 4504

1827 Capped Bust Dime, Pointed Top 1, JR-12, MS65

- 5190** 1827 Pointed Top 1, JR-12, R.1, MS65 NGC. Open areas of the obverse are cream-gray, while gunmetal toning outlines the stars, date, and portrait. The reverse displays infrequent glimpses of pearl-white, but is mostly draped in dusky sea-green and lavender shades. An unabraded and coruscating Gem with minor incompleteness of strike on the stars and eagle. NGC ID# 2375, PCGS# 38822 Base PCGS# 4504

## PROOF BUST DIME

1835 Capped Bust Dime, JR-4, PR64  
Perhaps a Dozen Known in All Grades

- 5191** 1835 PR64 PCGS. CAC. JR-4, Low R.7 as Proof. Proof 1835 dimes are only known from the JR-1 and JR-4 die marriages, with perhaps a dozen survivors in all grades. PCGS and NGC have graded a total of 18 proof 1835 dimes in grades from PR62 to PR67, including likely resubmissions. This piece is at the middle level of that range yet is highly desirable. Both sides are uniformly bright and radiate with intensity that is undiminished by the gorgeous electric-blue and russet peripheral iridescence. The powerful strike elicits every last design feature and is a harbinger of the bold definition that would characterize many business strikes following the introduction of steam power to the Mint in 1836. An attractive and historically significant specimen that deserves a carefully considered bid. CAC-endorsed in an old green label holder. Population: 3 in 64, 3 finer. CAC: 1 in 64, 2 finer (9/16). Ex: Long Beach Signature (Heritage, 2/2000), lot 5457; FUN Signature (Heritage, 1/2012), lot 3141; Philadelphia Signature (Heritage, 8/2012), lot 5091. NGC ID# 237P, PCGS# 4557

## SEATED DIMES

1839-O No Drapery Dime, Toned MS67+  
Sharply Struck F-104a, Top 100 Variety

**5192** 1839-O/O No Drapery, Large O, F-104a, FS-501, High R.4, MS67+ NGC. A Fortin Top 100 Variety. The color plate coin for Fortin-104a, formerly in the Eugene H. Gardner Collection. Star 8 is noticeably repunched, and a spectacular, bisecting die crack runs rim-to-rim from the I in UNITED, through DIME, and through the C in AMERICA. The mintmark is boldly repunched below the primary Large O.

Orange-russet and violet patina visits the highly lustrous silver-gray surfaces of this magnificent Superb Gem. The devices are sharply struck, significantly better than typically seen on this issue, including Liberty's head, the shield, and the leaves, elements usually found weak. Impeccable preservation adds to the coin's wonderful eye appeal. Clearly in the Condition Census for the 1839-O, and perhaps unsurpassable in terms of visual impact. Census: 1 in 67+, 2 finer (9/16).

Ex: Bowers and Merena (8/1999), lot 1314; Eugene H. Gardner Collection Part III (Heritage, 5/2015 as MS67 NGC without the Plus designation), lot 98221; Houston Money Show (Heritage, 12/2015), lot 3097; ANA Signature (Heritage, 3/2016), lot 4796. NGC ID# 237Y, PCGS# 537685 Base PCGS# 4572

1839-O No Drapery Dime, MS66  
Large O Reverse, Rare This Well-Preserved

**5193** 1839-O No Drapery, Large O, F-105, R.3, MS66 PCGS. Rich gunmetal-gray toning embraces the centers of this coruscating and razor-sharp Premium Gem No Drapery dime. The borders are closer to brilliant. Marks are absent save for a single vertical line beneath star 1. The No Drapery, With Stars New Orleans subtype is scarce as it was coined for just two years. Both the 1839-O and the 1840-O No Drapery issues are rare in Mint State, but the earlier date is slightly more plentiful for type purposes. This Premium Gem example is nearly Condition Census, although in this grade it is just as rare as the handful of technically finer pieces. No Drapery type coins of any date and mint are highly sought-after in this remarkable condition. Population (all varieties included): 4 in 66 (1 in 66+), 3 finer (9/16). PCGS# 537686 Base PCGS# 4572

1854-O Dime, MS67  
Conditionally Challenging

- 5194 1854-O Arrows MS67 NGC.** The 1854-O Arrows Dime is appreciably scarcer than its P-mint counterpart in all Mint State grades, particularly at the Gem level of preservation. At the MS67 level only five pieces have been so graded, all by NGC, with none finer (9/16). The surfaces on this piece are highly frosted and, as far as we can tell, free from abrasions. The obverse has rich rose coloration in the center and is surrounded by deep cobalt-blue at the margin. The reverse, on the other hand, is brilliant. An extremely attractive coin for the advanced type collector.  
*Ex:* FUN Signature (Heritage, 1/2003), lot 6399. NGC ID# 239B, PCGS# 4606

1864 F-102a Dime, MS65+  
Low Mintage Civil War Date

- 5195 1864 F-102a, R.5, MS65+ PCGS. CAC.** Silver dimes were hoarded by the public during the Civil War, and the small mintage of 11,000 pieces was coined only to avoid collector speculation over the 470 proofs. Light almond-brown toning drapes smooth, coruscating, and clashed surfaces. A wire rim is present across the reverse and the left obverse. Population: 2 in 65+, 6 finer (9/16). NGC ID# 239M, PCGS# 538202 Base PCGS# 4639

1870-S Dime, Top-Grade MS66  
Among the Rarest S-Mint Dimes

- 5196 1870-S Misplaced Date, F-101, R.3, MS66 PCGS. CAC.** The 1870-S is the rarest S-mint issue in the entire Seated dime series after the 1885-S. Only 50,000 pieces were produced, and this Gem is in the upper echelon of surviving representatives. Freckled olive-tan patina overlies richly frosted design features. The obverse remains more brilliant than the reverse. Boldly defined devices (apart from a bit of softness on the left wreath leaves) and minimally marked surfaces round out the broad appeal. A few roller marks occur over the upper-right obverse. The only known die variety of the issue (rated High R.6 in Mint State) shows two misplaced numerals below 87 in the date, which have been of mild interest to Seated dime specialists in recent years. Population: 5 in 66, 0 finer (9/16). CAC: 3 in 66, 0 finer (9/16). PCGS# 538254 Base PCGS# 4652

**1874 Arrows Dime, Colorful MS67  
High-End Type Coin**

- 5197 1874 Arrows, F-107, R.3, MS67 PCGS.** For the short-lived Legend Obverse, With Arrows type of 1873 and 1874, the 1874 Philadelphia Seated Liberty dime is the most accessible in high grade for type purposes. It is rare in Superb Gem condition, but it is also the only issue of the type that exists or is at least collectible in this grade (the 1873-S and '74-S are both pop-one issues in MS67). This piece displays frosty mint luster shining through blended rainbow toning that spans both sides and deepens toward the rims. A few hair-thin grazes are discernible only with a loupe. A superb example of this With Arrows type. Population: 9 in 67 (3 in 67+), 3 finer (9/16). PCGS# 538338 Base PCGS# 4668

**1888-S Seated Dime, MS67  
The Finest Certified**

- 5198 1888-S F-106, R.3, MS67 PCGS.** Fortin-106 is a relatively plentiful variety in lower grades. However, this is the sole MS67 that PCGS has certified for any variety, with no similar examples at NGC (9/16). It is the finest certified 1887-S dime, surviving from a mintage of nearly 4.5 million coins. This piece has frosty silver luster with champagne, blue, and rose toning. PCGS# 538787 Base PCGS# 4701

**PROOF SEATED DIMES**

**1843 Seated Dime, PR66  
Rare in All Grades**

- 5199 1843 F-103, R.7, PR66 PCGS. CAC.** The proof 1843 dime is a formidable rarity. PCGS estimates that 8 to 12 examples are known, approximately the same degree of rarity as the costly and famous 1894-S dime. When Heritage auctioned the Phil Kaufman Collection of Early Proof Sets in July 2008, the pedigrees of known proof 1843 dimes were exhaustively researched for lot 1807 in that auction, and nine examples were confirmed. The present coin was listed as second-finest, behind only the Kaufman specimen. It can be identified by a small spot above the diagonal of the 4 in the date. Otherwise, a flawless Premium Gem with straw-gold borders, sea-green fields, and a blush of lavender toning on the central reverse. PCGS# 538984 Base PCGS# 4730

1867 Dime, PR67+ Cameo  
Condition Census

- 5200** 1867 PR67+ Cameo NGC. F-103, R.5. Cameo proof 1867 Seated dimes are scarce in all grades but become exceedingly so at the Superb Gem level. This Plus-designated representative displays considerable contrast and sharpness with near-brilliant interiors that cede to ocean-blue, olive-green, and amber border toning. Only a handful of pieces have achieved this or finer grades. Census: 1 in 67 Cameo (1 in 67+), 2 finer (9/16). NGC ID# 23CR, PCGS# 84760

1867 Dime, PR66 Deep Cameo  
Tied for Finest at PCGS and NGC

- 5201** 1867 PR66 Deep Cameo PCGS. Fortin-103, Repunched Digits 1, 8, and 7. A completely untoned, glittering silver proof. The fields display the depth of mirroring expected with the added touch of thick mint frost over the devices, the result being a well-deserved Deep Cameo designation. Close inspection reveals a few randomly placed lint marks that were struck into the planchet after wiping the dies (the lint from the cloth then adhered to the die and was subsequently struck into the coin). The strike is pinpoint sharp in all areas except at the upper-left sprigs of the wreath. Population: 2 in 66 Deep Cameo, 0 finer (9/16). NGC ID# 23CR, PCGS# 94760

1873 Arrows Dime, PR65 Cameo  
Glassy-Mirrored Fields, Nice Contrast

- 5202** 1873 Arrows PR65 Cameo PCGS. Fortin-102, R.4. The strike is sharper than often seen on the 1873 Arrows proofs, with Liberty's head hair strands well-defined. Only minor weakness is noted at the top-left wreath and at Liberty's rock base and foot. A glimmer of pale-champagne toning emerges when the coin is angled in light, but the overall brilliance prevails. The central motifs show a thick coat of mint frost to earn the Cameo designation. PCGS reports just four finer such proofs. Population: 5 in 65 Cameo, 4 finer (9/16). NGC ID# 23DH, PCGS# 84769

BARBER DIMES

1903-O Dime, MS67  
Sole Finest Certified

- 5203** 1903-O MS67 PCGS. This is a somewhat scarcer date in the series in all grades despite an unremarkable mintage of nearly 8.2 million coins. What is remarkable is that this is the single-finest certified survivor at PCGS (9/16). Violet-gray patina overall reveals olive-gold and ice-blue accents when held at the proper angle. The striking definition is excellent for a New Orleans coin, though the usually seen incompleteness occurs on the hair above Liberty's forehead. The reverse wreath is expertly detailed throughout, and a few ticks that prevent an even higher grade are well-hidden beneath the toning. We expect significant interest from Registry Set enthusiasts when this lot is called. NGC ID# 23EN, PCGS# 4831

1910 Barber Dime, MS67

- 5204** 1910 MS67 PCGS. CAC. The 1910 Barber dime is not difficult to locate in lower grades, but examples in MS67 condition are quite rare, and finer specimens are virtually unobtainable. This delightful Superb Gem is well-detailed and lustrous, with attractive shades of golden-brown, lavender-gray, and violet patina. Population: 16 in 67 (4 in 67+), 1 finer. CAC: 9 in 67, 2 finer (9/16). NGC ID# 23FF, PCGS# 4854

## MERCURY DIMES

1916-D Dime, AU58+ Full Bands  
Original Surfaces, Lovely Eye Appeal

- 5205** 1916-D AU58+ Full Bands PCGS. CAC. Undeniably original olive-gold and ice-blue tones cover this wonderful near-Mint dime. Trivial cabinet friction over the centers prevents an Uncirculated grade, but the level of overall preservation is no less impressive. The fields are impeccably clean with satiny luster that radiates through the attractive overlay of undisturbed patina. Few 20th century issues in any series can rival the fame or desirability of the 1916-D Mercury dime. Its low mintage of 264,000 coins and first-year status explain the draw it possesses. Seldom found this nice with Full Bands and CAC approval. NGC ID# 23GY, PCGS# 4907

1916-D Mercury Dime, MS62 Full Bands  
Coveted Key Date With a Sharp Strike

- 5206** 1916-D MS62 Full Bands PCGS. This collectible Full Bands example shows lightly toned and lustrous surfaces with a sharp strike. Both sides are mostly smooth save for a thin mark on the back of the cap and a couple of small ticks on Liberty's cheek that collectively limit the grade. The low-mintage 1916-D has always been the key date of the series, but examples apparently circulated well into the 1920s, since most survivors are in VG or lower grades. Dealers such as Wayne Raymond managed to set aside a number of Uncirculated examples, although the pool is insufficient to meet collector demand.

*Ex: Long Beach Signature (Heritage, 2/2009), lot 987; Summer FUN Signature (Heritage, 7/2009), lot 388. NGC ID# 23GY, PCGS# 4907*

**1920-D Mercury Dime, MS66 Full Bands  
Premier Condition Rarity**

- 5207 1920-D MS66 Full Bands PCGS.** A premier condition and strike rarity in the Mercury dime series, the 1920-D is seldom encountered with a sharp strike as shown on this Premium Gem. In addition to the sharp central bands, the upper and lower horizontal bands are equally well defined, and the obverse design motifs are fully developed. Both sides exhibit satin champagne luster with delicate peripheral gold toning. Population: 20 in 66 Full Bands, 7 finer (9/16). NGC ID# 23HC, PCGS# 4931

**1927-D Dime, Top-Grade MS66 Full Bands  
Original Luster and Toning**

- 5210 1927-D MS66 Full Bands NGC.** This Premium Gem is among the finest Full Bands examples known and is conditionally rare as such. The Registry Set collector will appreciate the frosty, delicately toned luster and unabraded surfaces. Champagne interiors show pastel iridescence around the margins, and a scattering of tiny pepper specks appears on the reverse, attesting to the originality of the coloration. Census: 6 in 66 Full Bands, 0 finer (9/16). NGC ID# 23HV, PCGS# 4963

**1921 Dime, MS66 Full Bands  
Bold Obverse Peripheral Toning**

- 5208 1921 MS66 Full Bands PCGS.** A highly appealing Gem with ivory surfaces and frosty luster. The obverse has deep russet and iridescent toning at the periphery, and the reverse is faintly iridescent. The 1921 is a key-date in the series, although not in the same rarity category as the 1916-D issue. Nonetheless, the 1921 is extremely rare any finer than the present piece. Population: 48 in 66 (3 in 66+) Full Bands, 2 finer (9/16). NGC ID# 23HE, PCGS# 4935

**1942/1-D Dime, MS64 Full Bands  
Rare, High-Grade Overdate**

- 5211 1942/1-D FS-101 MS64 Full Bands PCGS.** A pleasing and lustrous near-Gem of this difficult mint error. The strike is strong throughout, and the obverse is especially well-preserved. Delicately toned in cream and gold tints. Minor contact near PLURIBUS and a tiny spot on the T in UNITED are appropriate for the grade. Population: 47 in 64 Full Bands, 32 finer (9/16). Ex: FUN Signature (Heritage, 1/2007), lot 2770. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

**1926-S Dime, MS65 Full Bands  
Important Strike Rarity**

- 5209 1926-S MS65 Full Bands NGC.** Poor production quality and a low mintage combine to create an important strike rarity in the Mercury dime series. The 1926-S is rarely encountered with a strong strike. This piece has brilliant silver luster with no evidence of toning. Finer Full Bands examples are exceedingly rare. Census: 7 in 65 Full Bands, 2 finer (9/16). Ex: FUN Signature (Heritage, 1/2012), lot 5640. NGC ID# 5LX7, PCGS# 4959

1942/1-D Mercury Dime, MS65 Full Bands  
Very Scarce Denver Mint Overdate

**5212** 1942/1-D FS-101 MS65 Full Bands PCGS. CAC. Knowledgeable numismatists are aware of several popular “wartime overdates,” a catch-all term that masks some interesting differences in the actual coins. The varieties in question include the 1918/7-D Buffalo and 1943/2-P Jefferson nickels, the 1942/1-P and -D Mercury dimes, and the 1918/7-S Standing Liberty quarter. A spirited discussion arose several years ago (April 2010) in the E-Sylum concerning the differences between those issues. Numerous contributors lumped the issues together as “dual hub overdates,” created when two differently dated working hubs were used to finish a working die.

Tom DeLorey — formerly editor of “Collector’s Clearinghouse” for Coin World, former ANACS senior authenticator, and an expert in errors and varieties — however, pointed out that the 1942/1-P and -D Mercury dimes were actually created when the Mint respaced the digits in the date, and that no other portion of the design is doubled:

“The doubling on the 4 on the 1942/41-P and 1942/41-D dimes is the result of the 4 being moved slightly between the master die for 1941 and the master die for 1942. The rest of the design is not doubled. Just the 4 and the 2/1. The Mint’s engravers often respaced the third date digit when there was a significant difference in the width of the old fourth digit and the new fourth digit, as happened between 1941 and 1942. Occasionally they would remake the entire date for the sake of artistic balance.”

Of course, such overdates can still only be produced by impressions from two differently dated working dies in the annealing process, but DeLorey’s point is that it is more than a simple matter of different dates.

This is an all-brilliant example of the Denver overdate, and a coin that shows remarkably thick mint luster. Very rarely seen in Gem condition. NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

1945 Dime, MS66 Full Bands  
Conditionally Rare

**5213** 1945 MS66 Full Bands PCGS. Compared to the branch mint issues of this year, the 1945 Philadelphia Mercury dime is surprisingly scarce in Full Bands, and pieces grading finer than MS65 are genuinely rare. The last PCGS coin that we offered in this grade appeared in our Central States Signature sale (Heritage, 4/2011), lot 5077, and realized \$14,950. The present coin is arguably finer than that piece in terms of visual appeal, showcasing vibrant, frosty luster and virtually pristine surfaces. Hints of light golden border toning appear around the outer peripheries, framing the sharp design elements. Population: 15 in 66 Full Bands, 3 finer (9/16). NGC ID# 5A98, PCGS# 5057

## PROOF MERCURY DIME

1942 Dime, Registry-Grade PR68+

- 5214** 1942 PR68+ PCGS. CAC. The final year of proof coinage in the Mercury dime series amounted to 22,329 specimens. Collectors should be able to find a nice PR68 representative with minimal effort, but those who require the absolute best will need patience and resources. On this Plus-designated coin, iridescent toning takes the form of concentric rings in shades of green, blue, magenta, lavender, and gold. Eye appeal is outstanding. Population: 86 in 68 (7 in 68+), 1 finer. CAC: 50 in 68, 1 finer (9/16). NGC ID# 27DN, PCGS# 5077

## TWENTY CENT PIECE

1875-S Twenty Cent, MS66

- 5215** 1875-S MS66 NGC. CAC. BF-5, R.2. Faint golden-gray toning is confined to the margins of this essentially immaculate Premium Gem. Only the peak of the wings and the right-side stars lack a bold impression. Struck from moderately clashed dies. A desirable representative of the briefly coined Seated type. Census: 55 in 66 (2 in 66+, 3 in 66★), 9 finer. CAC: 15 in 66, 0 finer (9/16). Ex: Pittsburgh Signature (Heritage, 10/2011), lot 3554. NGC ID# 23R7, PCGS# 5298

## EARLY QUARTERS

1804 B-1 Quarter, Collectible Problem-Free Example, Fine 12

- 5216** 1804 B-1, R.3, Fine 12 NGC. CAC. Tompkins Die State 1/1. The desirability of and sustained demand for the 1804 owes much to the legendary dollars bearing that date. However, only 6,738 quarters were struck in that year. Most coins entered into circulation and survive to a lesser extent than the first-year 1796 pieces. This well-worn example has steel-gray patina with lighter-toned areas over the high points and occasional glimpses of gold and lavender hues. The overall impression still shows good detail. *Selections From the Collection of Dr. Donald Knaack*. NGC ID# 23RB, PCGS# 38921 Base PCGS# 5312

1806/5 B-1 Quarter, XF45  
Sharp Detail, Original Color

- 5217** 1806/5 B-1, R.2, XF45 NGC. CAC. Tompkins Die State 2/3. A charming example with pearl-gray high points offset by slightly darker cream-gray in the fields. No surface detractors are seen save for a minor rim bump above LI on the obverse. B-1 is an obvious overdate with the lower half of the underdigit present, as well as the upper left corner of the crossbar. Ex: Dallas Signature (Heritage, 11/2005), lot 1236; Long Beach Signature (Heritage, 6/2011), lot 3463. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

1806 B-3 Draped Bust Quarter  
The Eliasberg Select Mint State Piece

- 5218** 1806 B-3, R.1, MS63 NGC. Tompkins Die State IV. Serifs are broken on the I and T of LIBERTY, with evidence of rim crumble and die clashing on both sides. Like the vast majority of Draped Bust quarters, the demands of metal flow and low rims resulted in shallow strikes, with incomplete details on the obverse stars and the eagle's head, ribbon, and field stars. This is the Eliasberg coin, which the present cataloger described in 1997 as a Condition Census example and one of the finest survivors of the die marriage. More recently, the Rea-Koenings-Haroutunian Census placed the coin ninth among high-grade B-3 coins. The surfaces are remarkably smooth and slightly reflective, with gunmetal-gray and blue toning and underlying iridescence. A few minor surface abrasions account for the assigned grade. Census: 9 in 63 (1 in 63+), 16 finer for all 1806 varieties (9/16). NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

1806 Draped Bust Quarter, MS63  
Browning-9, Terminal Die State

**5219** 1806 B-9, R.1, MS63 NGC. Tompkins Die State 6/5, the latest obverse and reverse die states recorded in that reference. The obverse shows a bisecting rim-to-rim crack from the 1 in the date to the E in LIBERTY. A second crack from the rim to the drapery joins the first crack behind the neck.

Both sides display extensive clash marks, and the reverse has a number of small rim breaks. The date is notably clashed at TES OF. This lovely Select Uncirculated quarter exhibits gray-gold toning over ivory luster with delicate blue overtones. Trivial marks limit the grade but fail to diminish the eye appeal. Census (all varieties): 9 in 63 (1 in 63+), 16 finer (9/16). NGC ID# 23RD, PCGS# 38935 Base PCGS# 5314

## BUST QUARTERS

1822 B-1 Quarter, MS64  
Ex: Garrett, Pogue  
Toned and Prooflike

**5220** 1822 B-1, R.2, MS64 PCGS. Ex: Garrett, Pogue. The 1822 has a reported mintage of only 64,080 pieces. Most were the B-1 variety, although a small percentage coined were B-2, the blundered denomination variety. The present B-1 quarter is iridescently toned. The borders are golden-brown, the fields are ocean-blue, and the portrait is cream-gray. The surfaces are semiprooflike and lack any mentionable marks. Among the finest examples of this better Capped Bust date. Population: 6 in 64 (1 in 64+), 1 finer (9/16).

Ex: Bangs & Co., 7/1879; T. Harrison Garrett; John Work Garrett, 1888; Johns Hopkins University, 1942; Garrett Collection (Stack's, 3/1976), lot 147; James A. Stack, Sr. Collection (Stack's, 10/1994), lot 352; D. Brent Pogue Collection, Part I (5/2015), lot 1069. NGC ID# 23RN, PCGS# 38969 Base PCGS# 5332

1825/4/2 Capped Bust Quarter, MS66  
Tied for Finest Browning-2 at PCGS

**5221 1825/4/(2) B-2, R.2, MS66 PCGS.** In the past, the overdate varieties of the 1825 quarter have been the subject of much debate in regards to exactly what the underlying numerals were; B-1 was generally labeled an 1825/2, while B-2 and B-3 have been viewed as 1825/3, 1825/4, and more recently 1825/4/(2). A recent study of die states and emissions sequences, however, outlined in-depth by Steve Tompkins in his *Early United States Quarters 1796 - 1838* (2008), suggests rather convincingly that all three 1825 varieties were struck with just two different obverses, both of which are in fact 1825/4/2 overdates.

The first was used only for the B-1 marriage, while the second was used for B-2, then lapped, and reemployed for B-3. The story of how this remarkable scenario came to be is not set in stone, but a careful study of the available data suggests that both dies were prepared in 1822, but were unneeded for production, so they were shelved. In 1824, they were among three dies that were overdated for new coinage (likely by the hand of Christian Gobrecht), but were again not employed for production. Then, in 1825, they were overdated once more (this time by William Kneass) and finally used for coinage. This likely chain of events is substantiated by noticeable recutting on the 8 in the date of both obverses, a characteristic shared by the 1824/2 obverse that was used in that year and overdated by Christian Gobrecht.

Of the three 1825 overdate varieties, B-2 is the most frequently seen, but its availability in Mint State is nearly nil. PCGS has certified and attributed only 26 examples in all levels of Uncirculated, with just two pieces in MS66 and none numerically finer (9/16). This example is lightly toned lavender-gray, with glowing underlying luster and notable preservation. The stars show complete centers and the central devices are sharply impressed. This is an early die state piece (Tompkins 1/1), with the upper curve of the underlying 2 clearly evident to the right and left of the primary 5, and the horizontal crossbar of the 4 faintly visible within the lower loop of the same. An important condition rarity and an intriguing variety for the Capped Bust quarter specialist. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

1831 B-2 Small Letters Quarter, MS64  
Approaches Condition Census Status

- 5222** 1831 Small Letters, B-2, R.2, MS64 PCGS. CAC. Broad Arrowheads. Tompkins Die State 2/3. Lustrous with a razor-sharp strike, this near-Gem quarter displays vibrant and attractive multicolor toning to embellish its technical merits. Shades of sea-green, amber-gold, and dusky rose dazzle the eye. While the B-2 variety is readily available in circulated grades, it is scarce in Mint State and very scarce when certified at the Choice Uncirculated level or finer. The present gleaming example is CAC endorsed to confirm its outstanding quality and eye appeal. The only mentionable mark is a short scrape between the rim and stars 3 and 4. NGC ID# 23RW, PCGS# 38981 Base PCGS# 5348

SEATED QUARTERS

1840-O Drapery Quarter, Large O, MS64  
Briggs 1-A, FS-501, Doubled Denticles

- 5223** 1840-O Drapery, Large O, FS-501, MS64 PCGS. CAC. Large O, Doubled Denticles on the reverse. Only 43,000 pieces were struck of the 1840-O Drapery quarters between the Large O and Small O variants combined — an amount far smaller than the 1840-O No Drapery, struck to the extent of 382,200 coins. The mintmark is considerably larger on the Large O — *Cherrypickers'* calls it "25% larger" — than on normal O-mint quarters of this period, but an easier way to distinguish the Large O versus Small O is the centering and shape. The Large O is neatly centered at the apex of the fletchings and olive stem tip and it is elongated, where the Small O (Briggs Reverse B) is shifted perceptibly to the left (facing the coin), and it is round.

Briggs notes of this curious reverse:

"[Two] sets of dentils were hand cut into the dies. The first set was 0.9 mm high and faint. The second set was 0.7 mm high, boldly cut, and centered over the gaps of the first set. This gives the appearance of diagonal spurs running off the corners of the second cut dentils. A die crack runs from the rim through the left upright of the 'N' in 'UNITED' to the wing. A die bulge is at the juncture of right wing and shield. Also another at the lower right thigh - field area."

When writing his 1991 series reference, Briggs called the 1840-O Large O Drapery quarter R.6 in all grades, adding that it was "to date" the rarest collectible Seated Liberty quarter.

This near-Gem offers muted luster over silver-gray surfaces accented with pale blue and copper tones near the rims. This piece should create a considerable stir within the Liberty Seated collector base. PCGS# 395925 Base PCGS# 5398

**1843-O Large O Seated Quarter, MS63+  
Finest Known, Ex: Eliasberg**

**1849 Seated Quarter, Toned MS65  
Single Finest CAC Example**

**5224** 1843-O Large O, FS-501, MS63+ PCGS. CAC. Ex: Eliasberg. The Large O mintmark, as *Cherrypickers'* notes, was "likely intended for a half dollar." This piece is an early die state of the variety, where the high mintmark brushes up against the arrow fletchings and the olive branch. Only minor signs of die rust exist — a feature that contrasts with most examples, where the dies are heavily rusted. Both sides are blanketed in attractive shades of dove-gray, champagne-gold, and lavender toning, with soft mint luster shining through the patina. The design elements are well-detailed, and the fields show only minor signs of contact.

This is the sole finest example of the Large O 1843-O Seated quarter by a country mile, unknown in Uncirculated until the 1997 Eliasberg sale. NGC reports an MS64 example, but it is the same coin as this one. Now certified MS63+ PCGS with CAC endorsement, it is the only 1843-O Large O quarter certified in Uncirculated by either service, with its nearest competitor at PCGS grading only AU53. The finest at NGC is XF45 once the duplicate submission is removed. Population: 1 in 63+, 0 finer (9/16).

Ex: Louis Eliasberg, Sr. *Collection* (Bowers and Merena, 4/1997), lot 1434; FUN *Signature* (Heritage, 1/2013), lot 5594; Eugene H. Gardner *Collection, Part III* (Heritage, 5/2015 as MS64 NGC), lot 98335. NGC ID# 23SS, PCGS# 395927 Base PCGS# 5405

**5225** 1849 MS65 PCGS. CAC. Briggs 1-A. The famous and popular Compass Point reverse, showing a circular anomaly at the top of the leftmost vertical shield stripe. Much of the reverse periphery shows light die cracks. The obverse date is high and heavy, and the stars display Longacre doubling. The present Gem is a lovely example of this early Seated quarter issue, showing uniformly well-struck rose-pink devices that contrast against the sky-blue fields on both sides. One small area of charcoal toning shows under the right (facing) eagle's wing. Population: 2 in 65, 0 finer. CAC: 1 in 65, 0 finer (9/16). NGC ID# 23T2, PCGS# 5413

1852-O Seated Quarter, MS63  
Classic Key Date

- 5226 1852-O MS63 NGC. Briggs 1-B.** The New Orleans Mint coined 96,000 Seated Liberty quarters in 1852, and a large number of those pieces were melted since the silver value was actually higher than the face value. Typical survivors grade no better than Very Fine. NGC and PCGS have graded a combined 30 examples in XF40 or finer grades. Only four Mint State pieces are certified: MS61 NGC, MS62 PCGS, MS63 PCGS, and MS63 NGC (9/16). A soft strike is evident on Liberty's head, some stars, and the arrow fletchings on the reverse. Both sides have brilliant silver luster with splashes of gold toning on the reflective surfaces. NGC ID# 23T9, PCGS# 5420

1854 Arrows Quarter, Frosty MS65  
Lavender and Golden-Gray Patina

- 5227 1854 Arrows MS65 PCGS.** Frosty luster issues from surfaces lightly toned in pale lavender and golden-gray hues with radiant brilliance visible underneath. The peripheral devices are incompletely defined, while the centers show stronger detail. There are remarkably few blemishes even for the Gem assessment. More than 12.3 million 1854 Arrows quarters were struck, and survivors are collectible through MS64. Examples prove challenging in this high grade and very rare in MS66 or finer. Population: 15 in 65 (2 in 65+), 14 finer (9/16). NGC ID# 23U6, PCGS# 5432

1857 Quarter, MS67+  
Frosty and Colorfully Toned

- 5228 1857 MS67+ PCGS.** The 1857 quarter claims a large mintage approaching 10 million pieces from multiple die pairs. Larry Briggs identifies eight different obverse and reverse dies in his 1991 reference, although such a large mintage suggests that other marriages exist. The obverse of this variety shows the date slightly more distant from the rock than most other obverses.

This Superb Gem displays frosty luster that emanates from smooth surfaces delightfully toned in accents of sky-blue, orange, and amber-gold. The strike is generally bold, although a few star centers are softly impressed, especially stars 12 and 13. The eagle is fully defined. Population: 8 in 67 (2 in 67+), 1 finer (9/16). NGC ID# 23TE, PCGS# 5442

1858 Seated Liberty Quarter, Top-Grade MS67

- 5229 1858 MS67 PCGS.** The 1858 Seated quarter saw a generous mintage of nearly 7.4 million coins, although the strike quality of such a large production varies widely, from poor to exceptional. This Superb Gem is "as good as it gets" but it is plenty good enough, with bright fields tending toward semiprooflikeness on each side, a trait evident even through the toning. Rich rose and golden-brown patina appears throughout, surrounded by a ring of blue at the rims. The only evident strike softness is confined to the uppermost stars on the obverse. Tied for the finest graded at PCGS. Population: 2 in 67, 0 finer (9/16). NGC ID# 23TH, PCGS# 5445

1858-O Seated Quarter, MS65  
'Stealth Rarity' in the Series

**5230 1858-O MS65 PCGS. Briggs 1-A.** New Orleans in 1858 was in her heyday as Queen of the Delta, the paddlewheel steamship capital of the world, before her glory would be tarnished, first by the Civil War, and shortly thereafter by the completion of the transcontinental railroad. The products of her illustrious Mint traveled far and wide to satisfy the needs of booming commerce. How this coin survived for more than 150 years in Gem condition is a mystery, but the eye appeal of the piece is perfectly clear. Silver, gold, and peach interior shadings give way to blue-green, azure, and cerulean at the margins. Strong cartwheel luster swirls through the fields, and the well-defined devices offer appealing touches of frostiness.

Amazingly, Gene Gardner had the two finest 1858-O quarters in his collection. He preferred the present coin, saying "The eye appeal of this coin is compelling — strong strike, vibrant luster, and beautiful coloring. No spots, lines, or marks mar the surfaces." Most 1858-O quarters found today are not rare, precisely because they are well-circulated, frequently down to XF or VF grade levels. More than a half-million examples of the issue were struck, and Larry Briggs comments that "other varieties possibly exist," given his identification of only two die marriages. At the MS65 level, the 1858-O quarter is an ultimate condition rarity, and this piece is destined for the finest Seated quarter collection. Population: 1 in 65, 0 finer (9/16).

Ex: *Long Beach Signature* (Heritage, 9/2011), lot 3399.; *ANA Signature* (Heritage, 10/2012), lot 4132; *The Eugene H. Gardner Collection, Part III* (Heritage, 5/2015 as MS64+ PCGS), lot 98346. NGC ID# 44LC, PCGS# 5446

1865 Seated Quarter, MS67+  
Finest-Known Circulation Strike

**5231 1865 MS67+ PCGS. Briggs 1-A.** This impossibly high-end Superb Gem is a smooth, satiny, and distraction-free example of an underrated and low-mintage Philadelphia date, struck to the extent of only 58,800 pieces during the final year of the Civil War. It ranks among the finest No Motto Seated Liberty quarters of any date. Faint golden highlights accentuate richly lustrous, pearlescent silver surfaces.

Naturally, it is the finest example of the Briggs 1-A die pair. The date shows a Large 1 struck over a Small 1 to confirm the variety. Extra bits of the underlying smaller 1 show in the underside apex of the flag, the right-top tip of the bottom serif, and as an extra, thin diagonal right of the final 1. The 6 is joined to the 5 by a thin extra canal of connecting metal. The dentils show weakness around one quadrant of each side, as made at the Mint. Variety aside, this is the sole finest of the issue certified at either service and it is the plate coin in the 2016 *Guide Book of Liberty Seated Silver Coins*. Population: 1 in 67 (1 in 67+), 0 finer (9/16).

Ex: *FUN Signature* (Heritage, 1/1999), lot 6605; *New York Rareities Auction* (Stack's Bowers, 10/2015), lot 29; *FUN Signature* (Heritage, 1/2015), lot 4092. NGC ID# 23U2, PCGS# 5461

**1871 Quarter, MS65 Prooflike  
Beautifully Reflective**

- 5232** 1871 MS65 Prooflike NGC. Briggs 2-B. This Gem 1871 quarter boasts beautifully reflective fields and frosty surfaces that are well within the context of the Prooflike designation. The strike is bold but not quite absolute, and the already-high eye appeal is furthered by the lovely ring of peach-gold toning encircling each side. The 1871 quarter issue was a low 118,200 circulation strikes — even though that was the largest production since the end of the Civil War. NGC reports four MS65 of this issue and one MS66 finer, but this is the sole Prooflike in any grade (9/16). NGC ID# 23UM, PCGS# 85478 Base PCGS# 5478

**1873 Open 3, No Arrows Quarter, MS65  
Extremely Rare So Fine**

- 5233** 1873 Open 3, No Arrows, MS65 PCGS. Briggs 1-A. Open 3, No Arrows quarters were struck early in the year before Arrows were added to signify an indiscernible weight increase, but after the Closed 3 was replaced for too closely resembling an 8. The Mint struck 172,000 Open 3, No Arrows quarters. This conditionally rare Gem has softly frosted mint luster beneath a veil of multicolor patina that includes shades of blue, green, purple, and gold. The reverse is lighter in tone. Each side offers bold definition on the devices with few marks. Population: 6 in 65, 4 finer (9/16). NGC ID# 23UV, PCGS# 5485

**1877-CC Quarter, MS66+  
Lovely Original Toning**

- 5234** 1877-CC Large CC MS66+ PCGS. CAC. The two Cs in the mintmark are closely spaced and lean slightly to the left, unlike any reverse listed in the Briggs Encyclopedia. This Premium Gem has lovely gray toning on both sides, with peripheral blue on the obverse. An impressive piece featuring a bold strike, this is an excellent example for an advanced Seated Liberty quarter cabinet, or a Carson City type set. Population: 24 in 66 (8 in 66+), 6 finer. CAC: 11 in 66, 3 finer (9/16). NGC ID# 23V6, PCGS# 5505

**1877-S Quarter, MS67  
S Over Horizontal S, FS-501  
Single Finest Example**

- 5235** 1877-S S Over Horizontal S, FS-501, MS67 PCGS. Briggs 4-D. There are only five repunched mintmark varieties in the Seated Liberty quarter series, this being the most famous and dramatic. Both sides feature a bold strike with full star, shield, and head details on the obverse, and strong feather, shield, and claw details on the reverse. The original horizontal S mintmark is sharp and clear. Frosty mint luster shines through the gorgeous champagne, lavender, gold, and blue toning over both surfaces. This stunning Superb Gem will make a fine addition to a top-rated Seated Liberty quarter collection. The sole finest example at PCGS or NGC (9/16). NGC ID# 23V7, PCGS# 145562 Base PCGS# 5506

1891-O Quarter, MS65 Prooflike  
Only 68,000 Pieces Produced  
Sole Prooflike Coin Certified

**5236 1891-O MS65 Prooflike NGC.** The New Orleans Mint struck silver dollars annually once the mint reopened in 1879; however, no dimes or quarters were minted until the final year of the Seated Liberty design. While the 1891-O dime is relatively common, the 1891-O quarter is rare, with only 68,000 pieces produced. This well-struck Gem has pale sky-blue, gray, and rose toning. The fields show undeniable reflectivity on each side, and there is virtually no sign of coin-to-coin contact. This remains the only Prooflike of this rare issue certified by NGC (9/16). NGC ID# 23VS, PCGS# 5525

## PROOF SEATED QUARTERS

1858 Seated Liberty Quarter, PR67  
Early Silver Proof Rarity

**5237 1858 PR67 NGC. Briggs 5-E.** The original mintage of 1858 proof silver coins is open to question. The long-estimated number struck is 80 pieces. However, this mintage figure did not originate with Mint records but apparently with one of the Chapman brothers. Later estimates of the 1858 silver proofs rose to between 225 and 300 coins, based largely on David Bowers' research on the 1858 proof dollar for *Silver Dollars and Trade Dollars of the United States*. The 300-piece figure was extrapolated to the other 1858 silver proof denominations and found its way into the current *Guide Book*. Based on the certified population, it would appear their mintage was between about 80 and 200 specimens. In any event, 1858 proof quarters are rare in the Gem and finer levels of preservation.

This Superb Gem proof ranks high in the lineup of proof 1858 quarters, probably the finest known, and is one of the two finest NGC-certified specimens of its issue (both PR67 submissions) (8/15) — although duplication is known to exist in the reported population of this issue. The obverse has a few minor lint marks, similar to most proof quarters of the date. The fields are deep mirrors beneath pale champagne toning with intense peripheral gold, lilac, and blue near the borders, especially on the obverse. The central devices are dominated by champagne-gold. Both sides yield modest field-motif contrast when the coin is tilted ever so slightly beneath a light. A sharp strike is indicated by full design features and a high wire rim with bold dentilation over each side. NGC ID# 23WK, PCGS# 5554

1880 Quarter, PR68 Cameo  
Gorgeous Original Toning  
Among Finest Certified

- 5238** 1880 PR68 Cameo PCGS. Briggs-2B. Type Two Reverse with narrow feet on the As in the reverse legend. Forest-green toning dominates a majority of the obverse, leaving a window of brilliance across Liberty's waist and the left field. A narrow arc of plum-red serves as the transition between the toned and brilliant portions of the obverse. The reverse offers narrow but rich peripheral bands of autumn-brown, sun-gold, and ocean-blue. The remainder of that side is stone-white. A needle-sharp specimen with a pristine appearance and exceptional eye appeal. Population: 2 in 68 (1 in 68+) Cameo, 0 finer (9/16). NGC ID# 23XC, PCGS# 85581

1880 Quarter, PR68 Cameo  
Low-Mintage as Proof and Business Strike

- 5239** 1880 PR68 Cameo NGC. Type One Reverse: Wide feet on A's, cut on left shield border. The 1880 Seated quarter coins struck for circulation were among a string of decadelong low-mintage silver coin issues from 1880 to 1890, when a flood of earlier-struck silver coins came back into circulation from domestic and Canadian hoards once parity between gold, silver, and paper currency was achieved in late 1879, for the first time since the Civil War. The 1880 business strike quarter was produced to the extent of 13,600 coins, complementing the proof manufacture of 1,355 pieces. This stunning, well-contrasted Superb Gem proof offers silver-white devices with a ring of deep golden-amber at the periphery of each side. The preservation is every bit as high-quality as the strike, which is full throughout. Census: 5 in 68 Cameo (1 in 68★), 1 finer (9/16). NGC ID# 23XC, PCGS# 85581

1882 Quarter, PR68 Cameo  
Tied for Finest, Ex: Newman, Gardner

**5240 1882 PR68 Cameo PCGS. CAC.** Ex: Newman. Deceptive prooflike business strikes exist, but the true proofs, as here, show the bottom-left serif of the 1 over the right edge of a dentil. Additionally, proofs exhibit a level date, while the 2 on the Uncirculated pieces is punched noticeably below the other digits. The mintage of 15,200 Seated quarters for circulation in 1882 was joined by 1,100 proofs. This PR68 Cameo example is at the top end of the surviving population, and the eye appeal is simply off the charts. The central obverse shows amber patina, ceding to pink, aqua, and deep purplish-charcoal near the rims, with a silver center on the reverse and similar rim colors. Similar hues encircle the reverse, leaving the interiors brilliant. The thin, iridescent bands serve to immediately identify this as a Newman coin. Population: 1 in 68 Cameo, 0 finer. CAC: 3 in 68, 0 finer (9/16).

Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33389; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR68 Cameo NGC with CAC approval), lot 98393. NGC ID# 23XE, PCGS# 85583

BARBER QUARTERS

1894-O Quarter, Resplendent MS66  
Fully Struck, Among the Finest at PCGS

**5241 1894-O MS66 PCGS.** More than 2.8 million quarters were struck at New Orleans in 1894, the third year of Barber coinage production. Submissions at the leading grading services are fairly evenly spread across all grade levels. Most mint condition coins grade between MS62 and MS64. Premium Gems are very rare. Those who appreciate originality will admire this wonderfully toned example. Shades of purple and peach-gold coalesce over the obverse. The reverse is mostly brilliant, minimally toned in similar hues. Perhaps most impressive is that this MS66 coin is fully struck. Population: 12 in 66 (2 in 66+), 0 finer (9/16). NGC ID# 23Y2, PCGS# 5608

**1896-O Barber Quarter, MS67**  
**Stunning Example, Tied for Finest Certified**

**5242 1896-O MS67 PCGS.** While most collectors, novice and advanced, recognize the 1896-S as an important rarity in the Barber quarter series, its New Orleans Mint cousin is every bit as elusive in top condition, especially with a sharp strike. In fact, David Lawrence, in *The Complete Guide to Barber Quarters*, second edition, gives the date an R.6 rarity rating in Mint State. This Superb Gem is a memorable coin that is tied with two others (one each at PCGS and NGC) for the finest certified of the issue (9/16).

Nearly every design feature is boldly rendered, including the star radials, Liberty's hair strands, and the eagle's feathers; only the arrow fletchings near the eagle's claw show slight weakness. The central regions display creamy luster, complementing peripheral hues of gold, magenta, and electric-blue around the obverse and a narrower ring of the same color palette on the reverse. An impressively preserved example.

Ex: ANA Signature (Heritage, 8/2007), lot 1658; FUN Signature (Heritage, 1/2009), lot 3781; Baltimore Auction (Bowers and Merena, 11/2009), lot 743; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98412; Long Beach Signature (Heritage, 9/2015), lot 3883; Central States Signature (Heritage, 4/2016), lot 4637. NGC ID# 23Y8, PCGS# 5614

**1896-S Quarter Dollar, MS65**  
**Exceptional Key Date, Condition Rarity**

**5243 1896-S MS65 PCGS. CAC.** It is not unusual for decades to pass without Heritage offering a Gem or finer 1896-S quarter — such is the high-grade rarity of this San Francisco issue. Those few coins that do exist in comparable grade are tightly held in advanced collections. The 1896-S quarter has long been recognized as one of the three key issues in the Barber quarter series, not quite as rare as the 1901-S, but more challenging than the lower-mintage (but more readily available) 1913-S.

The present coin is housed in an old green label holder, now with the label turned yellow by exposure to light. It is one of only four coins to receive the important CAC endorsement at this level. Frosty and virtually untuned except for some faint, dappled olive-gray and ice-blue patina, cartwheel silver luster radiates from both sides of the pinpoint-sharp surfaces. Destined for one of the finest Barber quarter sets, either as an upgrade to an existing collection or as the cornerstone of an emerging new set. Population: 10 in 65, 2 finer. CAC: 4 in 65, 0 finer (9/16). NGC ID# 23Y9, PCGS# 5615

## 1901-S Quarter, MS65 Extremely Rare at the Gem Level

**5244 1901-S MS65 PCGS.** Three dates in the Barber quarter series stand out as rarities. Dave Bowers (2006) gives an overview: "Along the way [in the production of Barber quarters], three varieties of exceptionally low mintage were created: 1896-S, of which just 188,039 were minted; 1901-S, with 72,664; and 1913-S, with 40,000. Interestingly, the most available of these three in Mint State is the lowest-mintage 1913-S ... choice and gem pieces that are well struck and very attractive are extremely hard to find, except in just a few varieties."

PCGS currently shows 834 grading events in all grades for the 1901-S quarter (9/16). Most of those submissions grade Good 4 or lower. There are more coins certified About Good 3 than any other grade. The reason for the preponderance of heavily worn 1901-S quarters in population data is, reasonably, that most of the quarters were used rather than put aside. It is interesting that all three of the rare Barber quarter dates are more heavily represented by low grades than high grades in comparison to the other years in the series. Those three rarities are also San Francisco issues, and the citizens of Western states tended to prefer coins rather than paper notes. Perhaps with relatively few coins to start with, the quarters kept moving from pocket to cash drawer and back again, and they were simply used up. Whatever the reason, a Mint State 1901-S quarter is rare, and a Gem example extremely rare.

The history surrounding the Barber design is enlivened by events of intrigue and self-interest, not surprising for the era. The Seated Liberty quarter design had been around since the late 1830s, and some thought it time for a change. Either because of legitimate confusion over past legislative intent, or perhaps due to other motives, Mint Director James P. Kimball worked with Senator Justin Morrill to have a bill introduced that would simplify the approval process for new coin designs. The resultant Act of September 26, 1890, allowed the Treasury to change coin designs, without Congressional approval, after an existing motif had been in use for 25 years.

Walter Breen (1988) colorfully describes what happened next: "Implementing Kimball's eccentric idea, the Treasury shortly afterward announced a competition among 10 of the best-known American artists for new coin designs — only to find that they jointly rejected the terms ... the Treasury's riposte was to throw the competition open to the public ... [Mint Chief Engraver Charles Barber's] presence among the judges was the kiss of death. The Treasury circular of April 4, 1891, giving details of the competition, elicited about 300 entries. Of these 300, only two were thought worth even an honorable mention; Barber made certain that no prize would be awarded. The new Mint Director, Edward O. Leech, called the contest 'too wretched a failure' ever to be tried again, and ordered Barber to prepare the designs himself — which is exactly what Barber had wanted all along."

Director Leech was more magnanimous toward Barber. In a letter to art critic R.W. Gilder, Leech noted that "Mr. Barber comes from three generations of mint engravers and designers, and has done excellent work in coin designing, and is in every way equipped for this important duty." Perhaps anticipating further concern about Barber, he added "artistic designs for coins, which would meet the ideas of an art critic like yourself, and artists generally, are not always adapted for practical coinage." (Don Taxay, *The U.S. Mint and Coinage*, 1966). Even today Barber's artistic abilities are debated, but nonetheless the coins bearing his designs are avidly collected.

For Barber quarter enthusiasts, the 1901-S is the premium issue of the series. The surfaces of this example are lustrous and well struck, though with a bit of softness at the hairline of Liberty and on the right edge of the reverse shield and nearby wing. The surfaces boast a pleasing palette of rose and cinnamon toning, accented with blue and silver highlights (including a blue blush on Liberty's cheek). There are no distracting marks or spots. Many collectors are happy to find a 1901-S quarter at any grade, but an example at this level of preservation and with such a remarkable appearance is a rare opportunity. This coin is sure to be a standout of the advanced Barber or type collection, admired and appreciated for many years to come. Population: 8 in 65, 8 finer (9/16).

Ex: FUN Auction (*Heritage*, 1/2009), lot 3782. NGC ID# 23YR, PCGS# 5630

## Key 1913-S Quarter, XF Details

**5245** 1913-S — Corrosion, Cleaned — NGC Details. XF. With a mintage of only 40,000 coins, the 1913-S is one of the three key issues in the Barber quarter series. This issue is extremely hard to locate in grades better than Very Good. Despite heavy corrosion and cleaning with resultant bright silver surfaces, this is an important piece for the advanced collector due to its exceptional detail. NGC ID# 23ZW, PCGS# 5666

1908 Barber Quarter, PR68  
Lightly Toned

**5247** 1908 PR68 NGC. This conditionally rare 1908 proof quarter ranks among the finest non-Cameos certified. The strike is full, and the fields are deeply mirrored. Light champagne surfaces exhibit occasional splashes of amber-gold and sea-green toning. An outstanding proof type coin. Census: 7 in 68 (2 in 68 ★), 0 finer (9/16). NGC ID# 242P, PCGS# 5694

## PROOF BARBER QUARTERS

1896 Quarter, PR68 Deep Cameo  
Stark Contrast, Seemingly Immaculate

**5246** 1896 PR68 Deep Cameo PCGS. CAC. The 1896 proof Barber quarter claims a modest mintage of just 762 pieces and only a handful of survivors can match the incredible technical quality and eye appeal of the present coin. The spectacular contrast between the frost-white devices and the deeply mirrored fields on this remarkable untuned specimen generates a stunning cameo effect. The design elements are unsurprisingly fully struck, and the surfaces are seemingly immaculate. A minute mint-made planchet flaw in the field below the S in PLURIBUS will identify this gorgeous piece in future auction appearances. Population: 7 in 68 Deep Cameo, 1 finer. CAC: 4 in 68, 0 finer (9/16). NGC ID# 242B, PCGS# 95682

## STANDING LIBERTY QUARTERS

1916 Quarter, AU Details  
Capstone Issue

**5248** 1916 — Improperly Cleaned — NGC Details. AU. This key-date quarter was at some point subjected to cleaning, but it has since retuned. Mauve, blue, magenta, and gold patina appears over the upper obverse, while the remaining areas are lightly covered in shades of olive and gunmetal-gray. High-point blending over the head, shield, and feathers is minimal, and the overall impression is strong. The 1916 is the heralded capstone date in Hermon MacNeil's Standing Liberty quarter series, a first-year issue with a meager mintage of 52,000 coins.

1916 Standing Liberty Quarter, MS63  
Delicately Toned Full Head Example

1917-S Type One Quarter, MS67 Full Head  
Conditionally Rare

**5249 1916 MS63 Full Head PCGS.** Although numismatic tradition suggests that the bare bust of Liberty on the 1916 Standing Liberty quarter sparked a public outcry that forced congress to issue a design change, there is no known documentation to substantiate this. The congressional legislation of July 1917, mentioned nothing of adding chain mail to Liberty's torso, and therefore its addition to the figure was technically illegal. Modern research into the reasons for the design change of mid-1917 traces back to a formal complaint by the coins' designer Hermon MacNeil in a January 11, 1917 letter to Mint Director F.H. von Engelken. This preceded the coin's public release after the 17th of the month and debunks the theory that public outcry initiated the design change proceedings.

Why MacNeil added chain mail to Liberty's torso on the revised 1917 design is not documented, although the clearest explanation that can be proposed from research by Roger Burdette and others is that the armor covering was intended to signify the fact that the United States had now entered the World War - Previously, the design was intended to signify the United States' preparedness for war. Other non-numismatic allegorical depictions by MacNeil from this period show similar armor garments.

The 1916 Standing Liberty quarter was a last-minute issue of December 1916, and boasts a proportionately small mintage of 52,000 coins. The present Select Full Head coin is about as sharp as this issue is known to exist and lacks any severe abrasions. A hint of light golden color graces satiny mint luster, offering pleasing eye appeal. NGC ID# 2AMV, PCGS# 5705

**5250 1917-S Type One MS67 Full Head PCGS.** The 1917-S is the most elusive Type One 1917 issue in high grade and is genuinely rare at the Superb Gem level. This Full Head example displays unabraded, frosty surfaces with a blush of lavender-gold toning. Moderate strike weakness is seen on the eagle, Liberty's waist, and the outer rim of the shield as it passes over the bust. Liberty's head and other peripheral elements are sharp. Among the finest certified. Population: 16 in 67 (2 in 67+) Full Head, 0 finer (9/16). NGC ID# 2433, PCGS# 5711

**1918/7-S Quarter, AU55 Full Head  
Premier Strike Rarity of the Series**

**5251 1918/7-S FS-101 AU55 Full Head PCGS.** Although the 1918/7-S is not technically part of the date and mintmark Standing Liberty quarter set, it has been collected as a separate issue for decades and is almost always included in quality collections. Finding a pleasing example, however, is more difficult for this issue than any other. The 1918/7-S was struck from a worn, clashed die pair with weak definition and poor luster the norm. The date is unknown with a full strike, and there are a plethora of AU and lower-end Mint State coins that have been cleaned.

This AU-Choice example is uncommonly pleasing for the grade and boasts remarkably original light golden color. But its chief attribute is the sharp Full Head. The late J.H. Cline wrote (2007): "A few struck with Full Heads: about 12 pieces." Although this estimate is low by current population numbers, it firmly cements the reality that the overdate is by far the rarest issue in the series with full head detail. This piece has typical weakness on the central shield, gown, and eagle's wing, with nothing more than trivial high-point friction.

*From The Cherny Collection.* PCGS# 395950 Base PCGS# 5727

**1918-S Quarter, MS65 Full Head  
Outstanding Luster and Originality**

**5252 1918-S MS65 Full Head PCGS.** Ex: Cherny. This is a mostly stone-white Gem with suggestions of olive and lilac coloration. The surfaces are highly lustrous and free of mentionable abrasions. Striking attributes include a Full Head, sharp date, and well-defined eagle and stars. Slight weakness is seen on the shield rivets, as usual. The 1918-S is a scarce date in Gem Full Head condition and a rarity any finer. Population: 37 in 65 (1 in 65+) Full Head, 16 finer (9/16).

Ex: FUN Signature (Heritage, 1/2002), lot 6833, which realized \$6,325.

*From The Cherny Collection.* NGC ID# 2439, PCGS# 5725

**1920-D Quarter, MS65 Full Head  
Underrated Rarity**

**5253 1920-D MS65 Full Head PCGS.** The 1920-D is somewhat underrated as a rarity in high grade Full Head. This Gem example yields sharp definition throughout the head, shield, date, eagle, and stars. Satiny mint luster exhibits light golden toning and shows minimal evidence of contact. Finer Full Head pieces will be far out of reach for most collectors. Population: 31 in 65 Full Head, 19 finer (9/16).

*From The Cherny Collection.* NGC ID# 243F, PCGS# 5737

**1923-S Quarter, MS65 Full Head  
Original Luster, Lightly Toned**

**5254 1923-S MS65 Full Head PCGS.** CAC. Ex: Cherny. The 1923-S is a key date in all grades, and Gem Full Head pieces are highly sought-after. This CAC coin displays vibrantly golden-toned luster with hints of lavender color throughout. A few tiny ticks do not detract. Liberty's head is sufficiently defined, but the shield rivets exhibit the typical strike weakness. Population: 57 in 65 (2 in 65+) Full Head, 45 finer. CAC: 8 in 65, 13 finer (9/16).

*From The Cherny Collection.* NGC ID# 243K, PCGS# 5745

**1927-S Standing Liberty Quarter**  
Rare Choice Example, With Full Head Designation

**5255 1927-S MS64 Full Head NGC.** The 1927-S Standing Liberty quarter is the premier condition rarity of the second design type, and it is especially attractive with Full Head definition. In his reference, Jay Cline writes: "The 1927-S is very softly struck as are many of the pieces in the 1920s. I don't think I have ever seen a 1927-S with full shield lines and rivets. An MS66 FH that is encapsulated comes the closest to being the exception. There are a few pieces of this date that are real 'screamers,' but they still only have approximately 50-60 percent Head [details]!"

This example has brilliant and frosty silver surfaces with no toning on either side. In addition to the full head details, most other design elements are bold, although the shield on the obverse shows some weakness with a few indistinct rivets. The fields on both sides show minor clash marks as well as extensive lapping lines. Although just shy of Gem, this Choice Mint State piece is an incredible beauty, and it will undoubtedly be well received by the successful bidder. NGC ID# 243W, PCGS# 5765

**1929-D Quarter, MS66 Full Head**  
Frosty and Original Luster

**5256 1929-D MS66 Full Head NGC.** Light, blended olive-gray and almond-gold toning adorns lustrous and unabraded surfaces. The strike is far above average on Liberty's head, waist, and shield, with moderate incompleteness on the lower obverse and upper reverse periphery. Struck from moderately rotated dies. This 1929-D is among the finest Full Head pieces certified and is conditionally rare as such. Census: 9 in 66 Full Head, 0 finer (9/16).

Ex: *Dallas Signature* (Heritage, 12/2004), lot 5970; *Chicago Signature* (Heritage, 8/2011), lot 3890. NGC ID# 2443, PCGS# 5775

**WASHINGTON QUARTERS**

**1932-D Washington Quarter, MS65**  
Important First-Year Key

**5257 1932-D MS65 PCGS.** A delightful Gem specimen of this first-year, low-mintage key, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces shine through highlights of sea-green, lavender-gray and amber toning, with ample eye appeal. Population: 86 in 65 (3 in 65+), 2 finer (9/16). NGC ID# 2448, PCGS# 5791

**1936-D Quarter, Brilliant MS67**  
Top-Grade Registry Coin

**5258 1936-D MS67 PCGS.** The 1936-D is a better date in high grade, particularly at the Superb Gem level where it is conditionally rare. The present coin is among the finest certified. This piece displays frosty, untuned satin luster and sharp design elements. A loupe reveals a few tiny, insignificant ticks that define the grade. Population: 22 in 67 (1 in 67+), 0 finer (9/16). NGC ID# 244H, PCGS# 5801

## PROOF WASHINGTON QUARTER

1941 Quarter, Toned PR68  
Top-Grade Rarity

- 5259** 1941 PR68 PCGS. CAC. With no Cameos known to exist, this CAC-endorsed, high-end Superb Gem proof 1941 quarter is tied for the finest certified. The Registry Set appeal is unrivaled, as only six pieces are this fine at PCGS, and only six coins from PCGS and NGC combined are CAC-approved (9/16). The coin shows a bold strike and deeply reflective fields. Dusky yellow-gold and pale russet toning blankets each side. NGC ID# 27HU, PCGS# 5980

## EARLY HALF DOLLARS

1805 Half Dollar, AU55, O-112  
Concentric Bands of Toning

- 5260** 1805 O-112, T-2, R.2, AU55 PCGS. Iridescent navy-blue, olive-green, and canary-gold encircle each side in concentric bands. Both obverse and reverse are also sharply detailed and lightly abraded. Evenly struck except for the uppermost stars on the reverse. Approaches the Condition Census for the die marriage. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069

1806 Knob 6, Small Stars Half, AU55  
O-106

- 5261** 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU55 NGC. The 1 of the date nearly touches the hair curl, the 6 is high and slender, and the AME of AMERICA is solidly joined at the base. Sharply defined and well centered, with splotches of cobalt-blue, gold-brown, and lavender patination. Traces of luster are apparent in the recesses, and the surfaces are devoid of significant marks. Ex: FUN Signature (Heritage, 1/2006), lot 2630. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

1806 O-109 Half Dollar, AU58+  
Pointed 6, No Stem

- 5262** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU58+ PCGS. CAC. Light clash marks are evident over the date and elsewhere on the obverse of this splendid near-Mint 1806 half dollar. Combining a Pointed 6 obverse with the No Stem reverse, it is an excellent candidate for a type collection or Guide Book set of the early half dollars. Both sides have rich gray-gold and iridescent toning that creates exceptional eye appeal. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

1806 O-116 Half Dollar, Choice AU  
Pointed 6, Stem Through Claw

- 5263** 1806 Pointed 6, Stem, O-116, T-20, R.3, AU55 PCGS. Tompkins Die State 3/5. The reverse is typically sharper on this example than the obverse, although both sides are heavily clashed and cracked. Choice About Uncirculated surfaces show glimpses of colorful iridescent toning with bluish-gray overtones. An attractive example, well-struck for the die stage, with remaining mint luster and virtually no marks of any consequence. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

## BUST HALF DOLLARS

1808 Half Dollar, Richly Toned MS64  
Condition Census O-104 Example

- 5264** 1808 O-104, R.2, MS64 PCGS. A die line above the R in LIBERTY and another between the olive stem and talon attribute the variety. This Choice offering is tied for second the Condition Census for O-104. Strike can be a problem for the issue, limited here to the left obverse and corresponding area on the reverse. Detail is good elsewhere. Eye-appealing toning covers each side in blue, green, gold, and lavender hues, through which radiant luster shines. Population (all varieties): 18 in 64 (2 in 64+), 12 finer (9/16). NGC ID# 24EP, PCGS# 39365 Base PCGS# 6090

1809 O-102a Half Dollar, MS63  
Conditionally Rare This Fine

- 5265** 1809 Normal Edge, O-102a, R.1, MS63 PCGS Secure. CAC. Despite the low rarity rating (R.1), the finest confirmed O-102a reported in Stephen Herrman's roster is MS63, the same Select Uncirculated grade as this coin. A pair of die cracks in the date area are the primary pick-up points for the late die state, where a short crack at the base of the date runs parallel to a longer crack from the top of 1 across Liberty's drapery folds to star 1. On the reverse, enigmatic pointed segments are visible (scroll marks, also seen on O-110), and the U in UNITED shows recutting at the base. This is an exceptional example with lovely iridescent toning in pastel hues throughout both sides. The strike is sharp except at the eagle's left wing shoulder. NGC ID# 24ES, PCGS# 39391 Base PCGS# 6092

1811/10 O-101 Half, Still-Lustrous AU58  
Spiked Cap, 'Dotted Date' Variety

- 5266** 1811/10 O-101, R.1, AU58 PCGS. CAC. Frosty, slate-gray surfaces deepen into bluish toning at the rims while silver luster shines through the rich patina. The central devices retain sharp definition despite the minimal circulation. Often described as the "dotted date" variety, the overdate requires some imagination to envision, yet the remnants of underdigits are clearly evident on this near-Mint example. A CAC-endorsed coin, original and attractive, important as a *Guide Book* variety. NGC ID# 24EV, PCGS# 39421 Base PCGS# 6099

1812 O-109a Bust Half, MS64  
First Generation Holder, Gold CAC

- 5267** 1812 Large 8, O-109a, R.2, MS64 PCGS. Gold CAC. Struck from a late state of clashed dies, this near-Gem half is nevertheless sharply struck and crisply defined throughout both sides. Only the dentils are weak, surrendering to the late die state. Vibrant silver luster glows beneath a thin veil of lilac-gray toning. The coin exudes Mint-fresh originality. Both the Parsley reference and the Steve Herrman census listing would rank this coin at the lower end of the Condition Census, but it is demonstrably finer than that as confirmed by the Gold CAC seal. Housed in a first generation PCGS holder. NGC ID# 24EW, PCGS# 39456 Base PCGS# 6100

1814 O-109 Capped Bust Half, MS63  
Vibrant Luster, Iridescent Toning

- 5268** 1814 O-109, R.2, MS63 NGC. CAC. Two center dots in the horizontal shield lines help identify the reverse, while a split curl beneath the L in LIBERTY is diagnostic of the obverse to confirm the O-109 variety. The date is widely spaced — moreso than any other 1814 variety. Multiple clash marks occupy both sides of this Select Uncirculated example, which shows virtually no other marks of note. The toning is vibrant and iridescent, dominated by shades of steel-blue and coppery-gold. A fully struck coin, with razor-sharp star centers and full details on the drapery and cap folds. Housed in a former generation NGC holder with CAC endorsement. Purchased from Jonathan Kern (8/1995). NGC ID# 24F3, PCGS# 39486 Base PCGS# 6105

1815/2 Bust Half, O-101, VF25  
Visible 2 Beneath 5

- 5269** 1815/2 O-101, R.2, VF25 PCGS. The underdigit 2 is more prominent on this richly toned example than on most 1815/2 halves, represented by a curved remnant that rises above the rounded outer loop of the primary 5. Deep, gunmetal-gray patina covers the fields while the raised elements are toned a lighter silver-gray. Smoothly worn yet well-defined for the grade, this example shows a Mint-related planchet flaw on the rim above E of UNITED. Faint die clashing exists on both sides. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101 Bust Half, VF30  
Popular, Low-Mintage Overdate

- 5270** 1815/2 O-101, R.2, VF30 PCGS. Faint die clashing but no die cracks suggests a middle stage of the dies, which were leftover from 1812 and repurposed with an overpunched 5 in the date. Traces of the underdigit 2 remain beneath the flag and to the left of the upright. A shortage of silver bullion and residual effects of the War of 1812 accounted for only a brief mintage of 47,150 pieces from the single, hard-used die pair. This survivor is attractively toned in olive-gray with blue and rose accents. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101a Half Dollar, XF40  
Date Set Necessity, Sole Dies for Type

- 5271** 1815/2 O-101a, R.3, XF40 PCGS. Traces of remaining silver luster intersperse with areas of powder-gray toning on this crisply struck 1815/2 half. Struck from a late state of the dies, several diagnostic cracks surround the reverse legends. Die clashing appears on both sides in the O-101a die stage. This example is attractive with sharp eye appeal for the XF40 level. Bold definition remains on the obverse devices with only light rub visible on Liberty's cheek, along with visible wear on the eagle's head, neck, and left (facing) wing shoulder. Only three denominations were struck dated 1815 at the Mint: quarters, half dollars, and half eagles, of which only quarters and half dollars are available to date collectors given the extreme rarity of the half eagles. NGC ID# 24F5, PCGS# 39492 Base PCGS# 6108

1815/2 Half Dollar, AU Details  
O-101a, Late Die State

- 5272** 1815/2 O-101a, R.3 — Improperly Cleaned — NGC Details. AU. Die cracks encircle the reverse legend and denomination, joining multiply clashed dies on both sides to confirm the late die state. This is a sharply defined example of the overdate — nearly untuned — with traces of mint luster at the margins and areas of faint golden patina forming among the devices. Hairlining is minimal despite the old cleaning. A few light abrasions and high point rub on the cheek and wing shoulders attest to brief circulation. Ex: H.W. Blevins Collection (Superior Galleries, 6/1988), lot 3290, flip included.

1817 Half Dollar, O-110, MS64  
Lustrous and Highly Attractive

- 5273 1817 O-110, R.2, MS64 PCGS. CAC. Ex: Friend. A well-preserved, attractively toned half dollar with iridescent hues of yellow-gold, sea-green, and steel-blue that adorn the peripheries on both sides. The design motifs are sharply struck, with just a trace of softness noted on the eagle's talons and arrow feathers. A lustrous near-Gem half dollar with tremendous eye appeal. CAC endorsed, this coin ranks near the Condition Census for the variety according to both the Parsley and Herrman rosters (9/16). NGC ID# 24F6, PCGS# 39502 Base PCGS# 6109

1821 O-105a Half Dollar, MS64  
Dusky Multicolor Toning

- 5274 1821 O-105a, R.1, MS64 PCGS. Dr. Peterson attributes this die marriage by the close 21 in the date, but the bold die crack over D STATES OF AM provides further confirmation. Ocean-blue, chestnut-gold, and lavender toning endows both sides. A loupe fails to locate any marks, and the coruscating surfaces are sharply struck. The present piece is within the Condition Census, which is topped by the MS66 NGC Eliasberg example. PCGS# 39583 Base PCGS# 6128

1823 Half Dollar, MS63  
O-101a, Patched 3 Obverse

- 5275 1823 Patched 3, O-101a, R.1, MS63 PCGS. The so-called "Patched 3" obverse, showing a lump of metal in the center of the 3, strengthening what was a nearly severed joint between the upper and lower loops on the earlier die state. This Select O-101a example displays an even strike with insignificant weakness on a few obverse stars. Traces of golden toning grace the satiny surfaces, while grade-limiting abrasions are minor. NGC ID# 24FJ, PCGS# 39621 Base PCGS# 6133

1825 O-111 Half Dollar, MS64  
Repunched 50 C  
Condition Census Quality

- 5276 1825 O-111, R.3, MS64 PCGS. CAC. 50 C is widely repunched north. A sleeper variety that might someday attain *Guide Book* status. Among the finest examples of the die marriage. The essentially unabraded surfaces exhibit rich autumn-brown, forest-green, gunmetal-gray, and ruby-red patina. Liberty's profile is strongly strike doubled. The stars and the RIB in PLURIBUS are lightly brought up, but the portrait and eagle are sharp. NGC ID# 24FL, PCGS# 39658 Base PCGS# 6142

1826 Capped Bust Half, MS64  
Attractively Toned O-106a Variety

- 5277 1826 O-106a, R.3, MS64 PCGS. CAC. Lightly toned at the centers with colorful blue, rose, and gold hues at the borders, this satin-smooth Choice Uncirculated half exudes mint luster and eye appeal. The strike is sharp for the late state of the dies, which display peripheral die cracks through the reverse legend including a diagnostic crack at RICA of AMERICA, through the arrowheads, through C, and to the rim below 50. An attractive example, CAC endorsed. This piece appears to be tied for second in the Condition Census for the late die state O-106a according to the Stephen Herrman listing (9/16). NGC ID# 24FM, PCGS# 39674 Base PCGS# 6143

1829/7 O-101a Half Dollar, MS64  
Partially Prooflike, Lapped Die State

- 5278 1829/7 O-101a, R.1, MS64 PCGS. CAC. A partially prooflike example of the advanced (lapped) die state with original peripheral golden-brown and powder-blue toning. The devices display predominantly cream-gray color with reddish accents in the recesses. Only minor marks are encountered. This Choice, CAC-endorsed example is sharply struck at the centers with die-related incompleteness at the claws, the arrow fletchings, and along the top of the denomination. Tied for second in Steve Herrman's Condition Census for the late die state (9/16). NGC ID# 24FT, PCGS# 39808 Base PCGS# 6155

## REEDED EDGE HALF DOLLARS

1836 Reeded Edge Half, GR-1, MS63  
Iridescent Peripheral Patina

**5279** 1836 Reeded Edge, GR-1, R.2, MS63 PCGS. A beautifully toned and fully struck Select example of this historic and popular first-year issue. An iridescent arc of ocean-blue patina accompanies both borders, and golden-brown and plum-red shades are also present. The centers, though, are only lightly toned. Both sides shimmer with luster, and only delicate, unimportant marks emerge beneath a loupe. A mintage of 12,000 was accepted by the hobby for many years, but third-party population data (primarily in VF through AU grades) suggests either a greater production or an unusually high survival rate. Population: 12 in 63 (1 in 63+), 8 finer (9/16). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Reeded Edge Half Dollar, GR-1, MS64  
First Issue Struck Using the Steam Press  
Just a Single Example Graded Finer

**5280** 1836 Reeded Edge, GR-1, R.2, MS64 PCGS. The Thonnelier steam press was installed at the Philadelphia Mint in 1836, and used to coin a few copper medalets early in that year. The modified-design Capped Bust, Reeded Edge half dollars were among the first regular-issue coins struck using the new technology. This Choice Mint State half dollar ranks high on the list of known survivors from a limited mintage traditionally given as 1,200 coins. Both sides have mottled gold and violet-gray toning with iridescent accents of blue, green, and rose. Softly frosted mint luster shines through the original patina. The relief elements are well-detailed but display incompleteness over the hair curls, lower stars, and the eagle's left wing feathers. This lovely near-Gem presents the advanced specialist with the chance to acquire one of the finest examples of this low-mintage key date issue. Population: 7 in 64 (1 in 64+), 1 finer (9/16). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1838 Reeded Edge Half, MS64  
GR-9, Very Late Die State

- 5281** 1838 GR-9, R.3, MS64 PCGS. CAC. Very Late Die State. Characterized by a bisecting crack which branches through the first T of STATES, and extends to the dentils between F and D of HALF DOLLAR. Bright orange-gold toning over most of the coin with the centers remaining silvery-gray. A boldly struck coin of this short-lived type, with strong curls on Liberty and complete definition on the eagle.  
Ex: *San Francisco Signature* (Heritage, 7/2005), lot 6289; *Dallas Signature* (Heritage, 11/2005), lot 2576. PCGS# 531090 Base PCGS# 6177

SEATED HALF DOLLARS

1842 Half Dollar, MS65+  
Small Date, Large Letters  
The Finest-Certified Example

- 5282** 1842 Small Date, Large Letters, WB-101, MS65+ PCGS. The 1842 Small Date half dollar is significantly scarcer than its Medium Date counterpart and is genuinely rare in Mint State. This example is one of two Gems certified by PCGS, but is the only one awarded a Plus designation, with none numerically finer. NGC has seen five MS65 coins, also with none finer (9/16). Both sides display frosty luster and hints of gold, lilac, and pale lavender patina. The strike is bold and the surface preservation is exceptional. The reverse is extensively cracked, typical of this variety, with peripheral cracks connecting UNITED STATES OF, and radial cracks extending through the olive leaves and along the left side of the O in DOL. Population: 2 in 65 (1 in 65+), 0 finer (9/16). NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

1846-O WB-103 Half Dollar, MS64  
Repunched Medium Date

- 5283** 1846-O Medium Date, Repunched Date, WB-103, Die Pair 5, R.4, MS64 PCGS. The date is lightly repunched, most apparent below the base of the 1. Die cracks along the reverse periphery confirm the die pair. This ocean-blue and butter-gold near-Gem offers coruscating luster, a sharp strike, and a virtual absence of abrasions or other detractors. Population: 4 in 64, 1 finer (9/16). NGC ID# 27SW, PCGS# 572050 Base PCGS# 6255

1854-O Arrows Half Dollar, MS65  
Heavily Cracked Reverse Die

- 5284** 1854-O Arrows, WB-101, Die Pair 4, R.3, MS65 PCGS. Heavy die cracks on the reverse and a rim cud below the D in DOL. aid in attribution of this die pairing. This Gem 1854-O half dollar is conditionally scarce and vibrantly lustrous beneath iridescent champagne and lavender toning. The left-hand stars are poorly defined, but the remaining design elements are bold. There are no significant abrasions. Population: 20 in 65, 16 finer (9/16). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

1866-S Seated Liberty Half, MS62  
Elusive No Motto Type, Rare in Mint State

- 5285** 1866-S No Motto, Small Thin S, WB-101, MS62 NGC. The slow and spotty communication between Philadelphia and San Francisco saw the latter Mint strike several issues after the main facility ordered a particular design discontinued, including No Motto coins in 1866. This No Motto 1866-S half dollar, one of 60,000 pieces struck, has no trace of wear, though the silver-blue surfaces show slightly restrained luster. There are virtually no marks on the satin-smooth surfaces, while the strike is sharp with the exception of stars 1, 2, and 13. As usual, minor die clashing is seen on both sides.

Randy Wiley and Bill Bugert considered the 1866-S No Motto half an R.7 issue in Mint State grades, although that was in 1993 when their reference was published. More recently, the 2016 *Bowers Guide Book of Liberty Seated Silver Coins* suggests the verifiable Uncirculated population ranges between just six and 10 coins, underscoring the rarity of this final No Motto type in high grade. We show only a handful of Mint State examples in our entire auction archives. Census: 4 in 62, 4 finer (9/16). NGC ID# 5V4T, PCGS# 572170 Base PCGS# 6315

**1867 Half Dollar, Incredible MS67  
Second Finest Example Certified  
Fully Struck, Original Patina**

**5286 1867 WB-101 MS67 PCGS.** Despite a mintage of 449,300 coins, the 1867 half dollar does not survive to any great extent. Examples are scarce, as the population has been whittled away though attrition. Most coins were made for export rather than domestic circulation. Many were melted, and those that did come back survive in lower grades. Mint State coins are challenging to locate but appear on the market from time to time. Condition Census-quality representatives command considerable attention when they surface, and deservedly so. This MS67 half dollar is the second finest example at PCGS and NGC combined. A single coin — the Eugene Gardner MS68 piece — is finer (9/16).

Pale gold interiors yield outwardly to shades of russet, purple, and cobalt-blue. The strike is sharp, and close study with a loupe fails to reveal a single mentionable flaw. Luster is frosty and original. The staggering eye appeal must be seen in person to be fully appreciated. PCGS# 572177 Base PCGS# 6321

**1873 Arrows Half Dollar, Nicely Toned MS65  
Scarcer Small Arrowheads Variant**

**5287 1873 Small Arrows, WB-107, MS65 PCGS.** The Small Arrowheads varieties are much more challenging to locate than their Large Arrowheads counterparts. Only three WB varieties have been recorded and the other two show either a Repunched Date or a Doubled Die Obverse (a.k.a. quad stripes). The obverse of this piece has blended blue-rose toning across that side, while the reverse is mostly untuned. Mint luster is strong throughout, but of course, it is more apparent on the largely untuned reverse. The strike is sharp throughout and there are only the tiniest abrasions discernible NGC ID# 2XVM, PCGS# 572212 Base PCGS# 6343

**1878 Half Dollar, Toned MS65  
Rarely Seen This Fine**

**5288 1878 WB-101 MS65 PCGS.** Type Two Reverse, closed bud. The 1878 is a better date in Uncirculated condition and is rarely seen at the Gem level. This piece exhibits frosty luster and original amber-orange, gold, and sea-green toning. The strike is sharp, and there are no significant abrasions. Population: 10 in 65, 4 finer (9/16). PCGS# 572256 Base PCGS# 6358

## PROOF SEATED HALF DOLLAR

1860 Half Dollar, PR65  
Eye-Catching Iridescence

- 5289 1860 PR65 PCGS.** Type Two Reverse. Although proof production jumped to 1,000 coins in 1860, the added 13-cent fee implemented that year was enough to suppress demand. The net distribution is estimated to have been merely 525 specimens. Mottled crimson, ice-blue, green, and gold hues color the obverse. The reverse shows a uniform blanket of iridescence in similar shades. The rich patina effectively conceals any tiny, grade-limiting contact marks and accounts for the great eye appeal. Population: 12 in 65, 13 finer (9/16). NGC ID# 27TK, PCGS# 6414

## BARBER HALF DOLLARS

1895-S Half Dollar, MS65  
Original Toning

- 5290 1895-S MS65 PCGS.** This high-end 1895-S Barber half dollar displays satiny mint luster beneath mottled russet-brown toning on the obverse and light golden color on the reverse. The eagle's right (facing) talons and wing junction show minor weakness, but the obverse is well-defined. The 1895-S is rare this well-preserved and exceedingly so any finer. Population: 11 in 65 (1 in 65+), 6 finer (9/16). NGC ID# 24LU, PCGS# 6473

1895-S Half Dollar, MS66  
Low High-Grade Population

- 5291 1895-S MS66 PCGS.** Premium Gem and finer grade examples of the 1895-S half dollar are elusive with only nine examples certified MS66 at PCGS and NGC combined, and just three finer pieces (9/16). Pale gold toning appears on the frosty white surfaces of this lovely piece that features bold design elements on both sides. Population: 4 in 66, 2 finer (9/16). NGC ID# 24LU, PCGS# 6473

1902-O Half Dollar, MS65  
Splendid Original Toning

- 5292 1902-O MS65 NGC.** Pastel gold and iridescent toning resides on the fully lustrous surfaces of this Gem New Orleans Mint Barber half dollar. A full cartwheel effect is visible through the toning. The usual weakness appears along the hairline above Liberty's eye, and at the junction of the wing and right shield border. Census: 9 in 65, 7 finer (9/16). NGC ID# 24MG, PCGS# 6493

1902-S Half Dollar, MS66  
Few Known This Fine

- 5293 1902-S MS66 PCGS. CAC.** CAC-approved Premium Gems are seldom seen for any Barber half dollar issue. This 1902-S displays luminous, frosty mint luster and warm golden toning that lightens across the reverse. The devices are sharply rendered. The 1902-S is a rarity this fine, and higher-grade pieces are extremely scarce. Population: 9 in 66 (1 in 66+), 3 finer. CAC: 4 in 66, 3 finer (9/16). NGC ID# 24MH, PCGS# 6494

1907-O Barber Half, MS66+  
Ex: Shireman, Price

- 5294 1907-O MS66+ PCGS. CAC. Ex: Shireman/Price.** An unusually sharp and frosty example of this conditionally rare New Orleans issue, showing luminous surfaces with lovely lavender-gray, olive-gold, and aquamarine toning. Finer coins are prohibitively rare, and the eye appeal of this piece is ample. The notable pedigree adds to the desirability. Population: 7 in 66 (1 in 66+), 2 finer. CAC: 7 in 66, 4 finer (9/16).  
*Ex: Dr. Thaine B. Price Collection (Akers, 5/1998), lot 172, which realized \$6,050.* NGC ID# 24N2, PCGS# 6510

**1909-O Half Dollar, MS66  
Final New Orleans Issue**

- 5295 1909-O MS66 NGC.** The New Orleans Mint ceased coinage production at the end of 1909, and the three Barber denominations were the last silver issues to bear the O mintmark. The half dollar mintage was limited to 925,400 examples, and Mint State survivors are infrequently encountered. This lovely Premium Gem has a typical strike showing weakness at the usual points on each side. The surfaces are fully lustrous with lovely gold and iridescent toning. Census: 5 in 66, 0 finer (9/16). NGC ID# 24N9, PCGS# 6517

**1909-S Half Dollar, Sunset-Orange MS66  
The Sole Finest at NGC**

- 5296 1909-S MS67 NGC.** This high-end coin is sharply struck and shows not even a single distracting abrasion. Mottled orange-gold surfaces feature abundant luster in the fields. Like virtually all S-mint Barber half dollars, this issue is scarce not only in Gem condition, but across the board in Mint State. Produced in respectable numbers (1.7 million pieces), the 1909-S was apparently not widely saved at the time of issue. The present coin is the single finest seen at NGC (9/16). NGC ID# 24NA, PCGS# 6518 Base PCGS# 6518

**1910-S Half Dollar, MS66+  
Condition Rarity**

- 5297 1910-S MS66+ PCGS.** The Barber half dollar series is underappreciated as a whole and semikey condition rarities in particular can be remarkable bargains. This MS66+ example comes from a San Francisco issue with a mintage of under 2 million pieces. Bold silver luster displays a touch of olive-gold at the lower obverse and the rims. Population: 16 in 66 (2 in 66+), 4 finer (9/16). NGC ID# 24NC, PCGS# 6520

**PROOF BARBER HALF DOLLARS**

**1895 Half Dollar, PR68 Cameo  
Registry-Grade Rarity**

- 5298 1895 PR68 Cameo NGC.** Proof Barber half dollars are inherently rare in the condition worthy of a PR68 grade. This Cameo 1895 proof showcases stark field-device contrast that incorporates glistening frost-white relief elements a liquidlike mirroring in the fields. The interiors are brilliant, while the peripheries show a halo of light yellow-gold toning. The coin is devoid of discernible impairments and offers astounding eye appeal.

We have previously handled a PR68 Cameo on only nine occasions, the most recent being the PCGS coin in The Eugene Gardner Collection (Heritage, 6/2014), lot 30573, which realized more than \$36,700. The present coin is comparably attractive and deserving of an equally strong bid. Census: 8 in 68 Cameo (1 in 68 ★), 1 finer (9/16). NGC ID# 24NX, PCGS# 86542

1897 Barber Half, PR68+ Deep Cameo  
Sole Finest for the Type at PCGS

- 5299** 1897 PR68+ Deep Cameo PCGS. CAC. A hint of pale gold-rose patina graces the obverse while the reverse provides more of an untuned appearance, but both sides offer profound contrast between jet-black reflective fields and silver-white, well-frosted devices. The surfaces are completely free of mentionable contact, in keeping with the ultrahigh proof grade. Only the usual right shield tip on the reverse is weak. Regardless of date, proof Barber halves at this grade level are rare as the proverbial hen's teeth. Although PCGS reports five examples in PR68 Deep Cameo, *this is the sole PR68+ Deep Cameo for the entire type at that service*. This is a coin of remarkable quality. Population: 6 in 68 (1 in 68+) Deep Cameo, 0 finer. CAC: 4 in 68 Deep Cameo, 0 finer (9/16). NGC ID# 24NZ, PCGS# 96544

WALKING LIBERTY HALF DOLLARS

1917-D Half Dollar, MS65  
Obverse Mintmark

- 5300** 1917-D Obverse MS65 PCGS. The 1917-D Obverse Mintmark half dollar is plentiful through MS64 but becomes scarce at the Gem level. This piece displays glowing mint luster cast in light golden toning that accentuates a lack of distinctive abrasions. Liberty's branch hand shows the only mentionable strike weakness, which is minor. Population: 83 in 65 (4 in 65+), 5 finer (9/16). NGC ID# 24PR, PCGS# 6570

1917-S Half Dollar, Iridescent MS64  
Obverse Mintmark

- 5301** 1917-S Obverse MS64 PCGS. The mintmark of the 1917-S half dollar was moved from the obverse field below IN GOD WE TRUST to the reverse periphery below the pine branch partway through 1917, creating two varieties of this issue. The Obverse Mintmark variant is the scarcer of the two in Mint State. This near-Gem displays a sharp strike and satiny luster with iridescent champagne toning. No major abrasions are observed. NGC ID# 26G7, PCGS# 6572

**1917-S Walking Liberty Half Dollar, MS65**  
**First Year With the Reverse Mintmark**

**5302 1917-S Reverse MS65 PCGS. CAC.** The mintmark was moved to the reverse partway through the year in 1917. Although the San Francisco Mint struck a substantial total of more than 5.5 million Walking Liberty half dollars with the new placement, the 1917-S Reverse is surprisingly difficult to locate in high grade today. Most of the coins were released into circulation and few high-quality examples were saved for numismatic purposes.

The present coin is an attractive Gem, with a better-than-average strike that shows some slight separation between Liberty's thumb and fingers on the wreath hand. The well-preserved surfaces radiate vibrant mint luster, under low-intensity shades of lavender-gray and pale gold toning. Housed in an old "rattler" holder. Population: 52 in 65, 10 finer. CAC: 15 in 65, 3 finer (9/16). NGC ID# 24PU, PCGS# 6573

**1918 Walker, Lightly Toned MS65**  
**Rarely Encountered Finer**

**5303 1918 MS65 PCGS. CAC.** This Gem 1918 half dollar is intricately struck throughout Liberty's head and branch hand, as well as the eagle's trailing leg feathers. Luminous satin surfaces offer lavender-gold toning and are devoid of major abrasions. Visual appeal is strong. The 1918 is elusive in Gem condition and challenging for the date and mintmark collector. Finer pieces are rarely seen, as PCGS reports only nine such examples (9/16). NGC ID# 24PV, PCGS# 6574

**1919 Half Dollar, MS66**  
**Early Date Condition Rarity**

**5304 1919 MS66 PCGS.** The 1919 Walking Liberty half dollar can be located through near-Gem without too much difficulty despite the relatively low mintage of 1 million coins, as a number of examples were saved at the time of issue. The Premium Gem grade level is where the 1919 begins to truly pose a challenge. There are merely 34 MS66 grading events reported at PCGS and NGC combined. This wonderful Premium Gem half dollar displays bluish-gray surfaces with splashes of russet. Both sides have pleasing luster and are well-struck, attributes that characterize this issue. A few scattered minute marks are within the confines of the grade designation. Population: 23 in 66, 5 finer (9/16). NGC ID# 24PY, PCGS# 6577

**1919-D Half Dollar, MS62  
Light Champagne Toning**

- 5305 1919-D MS62 PCGS.** The 1919-D is the rarest Walking Liberty half dollar issue in Gem condition, increasing demand for lower-end, more collectible Mint State examples. This MS62 coin displays satiny golden-toned luster with minimal abrasions for the grade. Considerable strike weakness on the figure and central eagle is consistent with norms for the 1919-D. NGC ID# 24PZ, PCGS# 6578

**1920-D Walking Liberty Half, MS63  
Elusive in High Grade**

- 5308 1920-D MS63 PCGS.** The 1920-D is a better date in Uncirculated condition, with the MS63 to MS64 grade range being ideal for the budget-conscious collector seeking technical quality. This Select representative displays satiny, champagne-tinted luster and well-defined motifs. A few minor abrasions are not obvious, leaving this piece with strong eye appeal for the grade. NGC ID# 24R4, PCGS# 6581

**1919-S Half Dollar, Satiny MS63  
Better Date in Uncirculated Condition**

- 5306 1919-S MS63 PCGS.** A well-preserved coin for the grade, showing satiny luster produced by faint die polishing lines in the fields. A light blush of champagne toning covers both sides. This Select 1919-S half dollar is moderately well-struck, although Liberty's head and branch hand retain slight softness, as is typical of this San Francisco issue. The 1919-S is among the rarest dates in the Walking Liberty half dollar series in Gem condition, heightening demand for lesser-grade Mint State pieces such as the present coin that are more easily accessible. NGC ID# 24R2, PCGS# 6579

**1921 Half Dollar, MS63  
Pleasing for the Grade**

- 5309 1921 MS63 PCGS.** A pleasing mid-level Uncirculated example of this collector-favorite key issue, showing satiny luster with a blush of light golden toning. Moderate strike weakness is seen on the central figure and eagle, as is sometimes encountered on the 1921. There are no major abrasions. High-grade examples of this conditionally scarce date are always in demand, as are more budget-friendly Mint State coins such as the present offering. NGC ID# 24R6, PCGS# 6583

**1919-S Half Dollar, MS64  
Seldom Encountered Finer**

- 5307 1919-S MS64 PCGS.** The 1919-S is a better-date Walker in Mint State condition and is particularly rare in Gem condition. The present near-Gem displays well-struck design elements and satiny luster with a hint of light golden toning. Fine die polishing lines in the fields (as struck) interrupt the cartwheel effect, but distracting abrasions are almost nonexistent. PCGS lists 52 finer submissions (9/16). NGC ID# 24R2, PCGS# 6579

**1921 Half Dollar, MS63  
Well-Struck and Satiny**

- 5310 1921 MS63 PCGS.** Better-struck than typical, this Select 1921 Walking Liberty half dollar displays satiny mint luster cast in a warm golden hue, while the fields are free of significant abrasions. The 1921 Walker owes its small 246,000-coin mintage to massive silver dollar production during that year, and Mint State examples were not immediately saved for numismatic purposes by most collectors. NGC ID# 24R6, PCGS# 6583

1921-D Half Dollar, MS63  
Branch Mint Key

**5311 1921-D MS63 PCGS.** The popularity of the Walking Liberty half dollar series is due to a combination of the attractive design as well as the relative availability of every issue therein. That said, the key dates of 1921 are only available in low circulated grades. Collectors seeking a complete Mint State date and mintmark set will encounter a roadblock with the 1921 issues, particularly those of the branch mints. The '21-D boasts the lowest mintage of the series (208,000 pieces), but this did not immediately spike collector interest. Collecting Walkers by date and mintmark did not become widespread until the 1930s, by which time the number of Uncirculated '21-D coins was scant.

The present Select example displays the bold strike and rich luster for which this issue is admired, and grade-limiting abrasions are surprisingly minimal. Dusky champagne-gray toning blankets each side. NGC ID# 24R7, PCGS# 6584

1921-S Walking Liberty Half, MS62  
Scarce in Uncirculated Condition

**5312 1921-S MS62 PCGS.** By a significant margin, the 1921-S has the lowest Mint State survival rate of any date in the Walking Liberty half dollar series, and only the 1919-D is rarer in high grade. The low mintages of 1921 across the dime, quarter, and half dollar followed record production during the previous year, in which quantities of subsidiary denominations were stocked up in anticipation of shifting production resources to new silver dollar coinage in 1921. The primary cause of low mintages of half dollars (and dimes and quarters) in 1921 was the coinage of more than 87 million silver dollars between the three active mints.

Despite its low mintage of 548,000 pieces, the 1921-S half dollar was almost unsaved in Mint State until the 1930s, by which time the availability of such coins was scant. This lower-end Uncirculated piece displays smooth, satiny surfaces with fewer abrasions than are expected for the grade. Hints of light champagne color accent each side, while Liberty's branch hand shows the typical strike weakness. NGC ID# 24R8, PCGS# 6585

**1923-S Walking Liberty Half, MS64  
Sharp Strike, Strong Mint Luster**

- 5313 1923-S MS64 PCGS.** The 1923-S Walking Liberty half dollar is much more difficult to locate in high grade than its mintage of 2.1 million pieces would suggest. Weak strikes and excessive surface marks are the norm for this issue. This impressive Select specimen shows a better-than-average strike, with just a touch of the usual softness on the wreath and eagle's leg. The lightly marked surfaces radiate satiny mint luster, under highlights of greenish-gold and lavender-gray toning. NGC ID# 24R9, PCGS# 6586

**1928-S Walking Liberty Half, MS64  
Above-Average Detail on Liberty's Hand**

- 5314 1928-S MS64 PCGS.** The 1928-S is one of the scarcer issues from the early series of Walking Liberty halves. It is one of the leading strike rarities in the series and is almost always found with soft definition in the centers. This example is definitely above-average with a faint split visible between Liberty's thumb and forefinger and the thumb and branch. The surfaces exhibit thick mint frost and just the slightest traces of russet patina. NGC ID# 24RB, PCGS# 6588

**1928-S Half, Colorful MS65  
Better Struck Than Often Seen**

- 5315 1928-S MS65 PCGS.** This lustrous Gem's most appealing attribute is its patina, swirling peach-gold and blue-green with glints of original silver. The striking softness seen in the centers is better than often seen for this scarce issue, and the reverse is noticeably better impressed. PCGS has graded just seven numerically finer pieces (9/16). NGC ID# 24RB, PCGS# 6588

**1944 Half Dollar, MS67+  
Only One Finer at PCGS**

- 5316 1944 MS67+ PCGS. CAC.** This extraordinary Superb Gem exhibits brilliant silver luster on both sides with pristine white surfaces and a touch of peripheral gold toning. PCGS has certified 21 of these half dollars in MS67+, and only one finer submission (9/16). CAC: 70 in 67, 0 finer (9/16). NGC ID# 24SC, PCGS# 6621

**PROOF WALKING LIBERTY HALF DOLLAR**

**1941 No 'AW' Half Dollar, PR69 ★  
The Finest Certified**

- 5317 1941 PR69 ★ NGC.** The Philadelphia Mint employed an all-brilliant finish on proof issues of the 1940s, but this incredible example shows just a few traces of mint frost on the high points of the central obverse portrait. The design elements are fully struck, with even the smallest details on Liberty's hand fully brought up. The brightly reflective surfaces display pale green patina at the peripheries, with a few hints of lavender and rose in the centers. This coin possesses tremendous visual appeal, and is the finest certified at either NGC or PCGS (9/16). From a mintage of 15,412 pieces. NGC ID# 24SP, PCGS# 6641

## FRANKLIN HALF DOLLARS

1951-S Half Dollar, MS67 Full Bell Lines  
A Top Example at PCGS

**5318 1951-S MS67 Full Bell Lines PCGS.** Roughly half of Mint State 1951-S Franklin half dollars show Full Bell Lines. Collectors should have little trouble finding coins as high as MS65 FBL. Premium Gems are scarce, and examples as fine as this are extremely rare. Frosty luster issues from surfaces that exhibit an overlay of champagne patina over mostly brilliant centers. The obverse rim features an arc of golden-russet iridescence with specks of mint-green, magenta, and blue colors interspersed. Amazing Registry coin. Population: 6 in 67 (1 in 67+) Full Bell Lines, 0 finer (9/16). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

1951-S Half Dollar, MS67 Full Bell Lines  
Splendid Registry Set Offering

**5319 1951-S MS67 Full Bell Lines PCGS. CAC.** The 1951-S Franklin half dollar is a scarce issue in high grade and examples in MS67 condition with Full Bell Lines are very rare. This delightful Superb Gem is among the finest-known survivors, with sharply detailed obverse devices and Full Bell Lines on the reverse. The 1951-S is nearly always softly struck, and some slight blending shows on the center of the bell and the yoke details, but the lines at the bell bottom are complete. Both sides display attractive shades of green, lavender, and champagne-gold toning at the borders, with vibrant, frosty mint luster underneath. Close inspection reveals virtually no marks or mentionable distractions on either side. Importantly, there are no numerically finer coins at either service for this strike-challenged San Francisco issue. Population: 6 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 3 in 67, 0 finer (9/16). NGC ID# 24T2, PCGS# 86660 Base PCGS# 86660

## PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half, PR66 Cameo  
Elusive Contrasted Proof

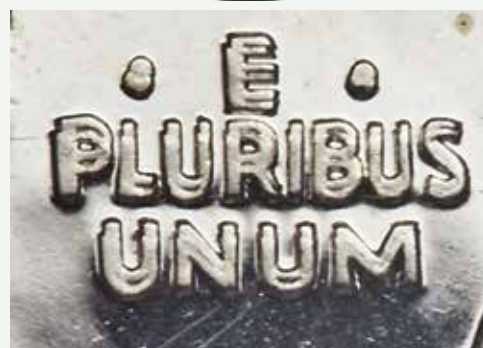

**5320** 1950 PR66 Cameo PCGS. CAC. The first year of proof Franklin half dollars is rarely found with cameo contrast. Both sides of this brilliant and untoned Premium Gem proof exhibit brilliant silver surfaces with fully mirrored fields and satin devices, resulting in light cameo contrast. Population: 65 in 66 (5 in 66+) Cameo, 20 finer. CAC: 32 in 66, 13 finer (9/16). NGC ID# 27VA, PCGS# 86691

1960 Half Dollar, PR69 Deep Cameo  
Top-Grade Registry Coin

**5321** 1960 PR69 Deep Cameo PCGS. For many Registry Set collectors, only the finest is acceptable. For the proof 1960 Franklin half dollar, this PR69 Deep Cameo is tied for the finest at either major grading service — PCGS reports eight coins in this grade and NGC six (9/16). We have previously handled a PR69 Deep Cameo proof on only six occasions, the most recent being a PCGS coin in our Rosemont Signature sale (Heritage, 8/2013), lot 5682, which realized \$15,275. The present piece is equally stellar in regards to eye appeal and quality. The strike is full, and the white-on-black appearance is outstanding. Neither side exhibits any perceptible blemishes or toning. NGC ID# 24TY, PCGS# 96701

1961 Half Dollar, PR66+ Cameo CAC  
Dramatic Doubled Die Reverse

**5322** 1961 Doubled Die Reverse, FS-801, PR66+ Cameo PCGS. CAC. Three different doubled die reverse varieties exist for the 1961 proof half dollar, although FS-801 is by far the most dramatic and highly sought-after. Most reverse design elements show a wide spread, particularly along left and lower margins. Examples are scarce in all grades and extremely rare with a Cameo designation. This Plus-graded, CAC-approved Cameo is a delightful must-have for the advanced Registry Set enthusiast. The strike is sharp, and the untuned surfaces showcase stark white-on-black contrast with glimmering reflectivity in the fields. A lack of distractions further heightens the appeal. Population: 3 in 66 (1 in 66+) Cameo, 1 finer. CAC: 3 in 66, 0 finer (9/16). PCGS# 145293 Base PCGS# 86689

## EARLY DOLLARS

1794 Dollar, Attractive XF Details  
B-1, BB-1, Inimitable First-Year Issue  
The Laurence H. Gardner Specimen

**5323 1794 B-1, BB-1, R.4 — Damaged Rim — ANACS. XF Details.** Regardless of the year or the state of the coin market, it is challenging to acquire a pleasing 1794 Flowing Hair dollar in any condition, let alone one that is completely problem-free. The coin in this lot is not perfect, but it does possess a number of noteworthy and desirable features besides the incomparable 1794 date. Of obvious mention is the striking definition along the lower left obverse periphery, which is typically compromised by limitations of expertise and equipment at the early Mint in 1794. Stars 2, 3, and 4 are discernible, if not complete, but star 1 can be described as being mostly absent. All four digits in the date are partially (if not mostly) present, this despite notable softness of detail over the 1.

The reverse die was also misaligned at the time of striking with the resultant letters in STATES soft to the point of going missing at the tops of ATE. A tiny planchet flaw is noted at 7 o'clock at the dentils. All other design features are present, and there is satisfying bold definition in protected areas of the obverse portrait and reverse eagle. Both sides reveal only minor, scattered circulation marks, and none are particularly important given the amount of wear that this coin saw. Adjustment marks are noted at the base of the obverse under the date and to its left.

Most of the surfaces display attractive dove-gray coloration, although we do note a few areas of reddish color and brief iridescence around the peripheries. This last feature brings us to this coin's most significant detractor: a small, semicircular piece of the planchet is missing at the top of the obverse, resembling a rim clip, but perhaps more accurately described as a planchet cut. It immediately pedigrees the piece as the Laurence H. Gardner specimen, who later bequeathed it to the Buffalo Historic Society where it resided for 60-odd years. We had the pleasure of selling this same coin as lot 822 of our April, 2006 Midwinter ANA Signature event. The piece is currently listed on page 134 of the definitive Martin A. Logies reference.

As a higher-grade survivor of America's first silver dollar and a fabled numismatic rarity with relatively good overall definition, the coin represents a bidding opportunity that one should consider most carefully. Housed in an early generation small-sized ANACS holder.

*Ex: Samuel Hudson Chapman Collection, (Thomas L. Elder, 5/1929), lot 1266; Laurence H. Gardner; bequeathed to the Buffalo Historical Society upon his death in 1944; Buffalo and Erie County Historical Society Sale (Stack's, 3/2005), lot 69; Old Colony Collection (American Numismatic Rareities, 12/2005), lot 1185; ANA Midwinter Signature Sale (Heritage, 4/2006), lot 822. NGC ID# 24WY, PCGS# 39972 Base PCGS# 6851*

1795 B-7, BB-18 Three Leaves Dollar, MS61  
Near the Condition Census

**5324 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, MS61 PCGS Secure.** Bowers Die State I, the usual die state of this variety with two extensions from the end of the left ribbon. Central weakness is minimal on this well-struck 1795 dollar that features exceptional centering with full obverse and reverse borders. The surfaces exhibit myriad minuscule marks that limit the grade. Both sides are brilliant and untoned with semireflective fields around the lustrous devices. Chief Coiner Henry Voigt and his team got this one right, as there are no adjustment marks visible on either side. This highly appealing 1795 Three Leaves dollar will make a nice addition to a type set or specialized collection.

The second edition of the Bowers *Silver Dollar Encyclopedia* records seven Mint State examples among the notable specimens section for the variety. The present piece makes an eighth example, appearing in the Bowers list at its former AU58 grade level. The top examples of the variety include coins graded MS66 PCGS, MS65 PCGS, MS65 NGC, MS64 PCGS with a silver plug, MS64 PCGS, MS63 Uncertified, MS61 PCGS, and MS60 Uncertified. In all grades, the B-7, BB-18 silver dollar is relatively plentiful with survival estimates ranging in the 500 to 800 coin range. However, only eight are known in Mint State at the present time. This is an extremely important opportunity for the early silver dollar collector. NGC ID# 24WZ, PCGS# 39973 Base PCGS# 6852

1795 B-1, BB-21 Dollar, VF20  
Silver Plug

- 5325** 1795 Flowing Hair, Two Leaves, Silver Plug, B-1, BB-21, R.2, VF20 PCGS. Ex: Hughes. The silver plug measures about 7 mm. in diameter, and is clearly visible on both sides of this dollar. The B-1, BB-21 die marriage is the second most plentiful variety among 1795 Flowing Hair dollars, but it is rarely encountered with a mint-inserted silver plug. This piece shows the plug clearly on both sides, and exhibits pleasing champagne toning on its pewter-gray surfaces. None of the scattered, grade-consistent circulation marks are distracting. An important opportunity for the advanced collector. NGC ID# 24WZ, PCGS# 39994 Base PCGS# 6854

1795 B-5, BB-27 Silver Dollar, XF40  
Flowing Hair, Three Leaves

- 5326** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 NGC. CAC. Bowers Die State II-III, with a die line from the left stem, nearly reaching the rim. Bowers calls this a die crack, but we believe it is a die scratch that remains reasonably constant throughout the life of the die. A flow line extends from the tip of the left (facing) wing toward the rim between the I and T of UNITED. This pleasing dollar exhibits delicate champagne toning on its light gray surfaces with minor grade-consistent circulation marks. A splendid example of the popular B-5, BB-27 dollar. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, Pleasing XF40  
Centered Bust, B-15, BB-52

- 5327** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 ANACS. Bowers Die State IV. Attractive olive-gold patina with blue highlights covers both sides of this pleasingly toned, centered portrait Draped Bust dollar. Somewhere around 200,000 1795 silver dollars were struck, most with the Flowing Hair design, but about 20% of the mintage were those of the Draped Bust type. This example shows high point wear from circulation, yet the fields and motifs remain sharply defined on both sides. Some faint adjustment marks are noted at the right obverse border, a few of which extend across Liberty's neck into the hair strands. Housed in a small-sized, early generation ANACS holder. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

1796 B-4, BB-61 Dollar, VF20  
Small Date, Large Letters

- 5328** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF20 PCGS. Bowers Die State II, an intermediate die state with the top curl fragmented from lapping, but mostly complete. A tiny die dot near the drapery above the 1 in the date is diagnostic for the obverse, and combined with the Large Letters reverse, is diagnostic for the variety. This pleasing pewter-gray dollar has considerable deep gold toning on both sides with scattered circulation marks that are expected for the grade. Diagonal adjustment marks cover much of the obverse, but they are extremely light and have no effect on the considerable eye appeal of this example. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 B-4, BB-61 Bust Dollar, XF40  
Small Date, Large Letters

- 5329** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF40 ANACS. The B-4 variety is quickly recognized by the die chip over the 1 in the date and the Large Letters reverse. Light gold toning is evident on both sides of this pleasing, nicely detailed early dollar. The strike is nicely centered with full obverse and reverse borders. Ex: FUN Signature (Heritage, 1/2009), lot 4256. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1798 B-1, BB-82 Dollar, AU55  
Small Eagle, 13 Stars

- 5330** 1798 Small Eagle, 13 Stars, B-1, BB-82, R.3, AU55 NGC. Bowers Die State III, with all the reverse die cracks mentioned in that text, and with faint clash marks inside the wreath that are not mentioned in the Bowers text. The first 1798 silver dollars were the 13 Stars and 15 Stars varieties with the Small Eagle reverse, and these are quite rare, especially in high grades. There are only two known varieties of the Small Eagle design, compared to 32 die varieties of the Heraldic Eagle type. It is estimated that just 35,000 1798 Small Eagle dollars were minted.

The reverse die was used for 1797 B-1 and 1798 B-1 dollars, and here is where it gets complicated. Early die states of the 1797 B-1 dollar were struck first, then examples of the 1798 B-1 dollar were minted, followed by *more* examples of the 1797 variety. The study of surviving coins is the closest thing we have to a time machine that could take us back to the early days of the Philadelphia Mint.

This lovely Choice AU example features impressive silver surfaces with delicate gold toning. Both sides exhibit considerable mint luster that confirms the grade despite a blunt strike. Scattered grade-consistent marks are noted on both sides, although no adjustment marks are present to diminish the eye appeal. NGC ID# 24X5, PCGS# 40006 Base PCGS# 6867

1798 Large Eagle, Pointed 9 Dollar, AU53  
B-23, BB-105, Wide Date

5331 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU53 PCGS. Bowers Die State III. Generally brilliant with just the slightest tinge of rose and golden is present over side. The well-defined surfaces display pockets of luster. Neither side shows any remotely relevant marks, though the rims have a couple of trivial imperfections. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1799 7x6 Stars Dollar, Near-Mint  
Scarce B-7, BB-156  
Condition Census Quality

5332 1799 7x6 Stars, B-7, BB-156, R.4, AU58 NGC. Bowers Die State III. Peach-gold, ocean-blue, and rose-red toning visits portions of the borders, but the fields and motifs are chiefly brilliant. Luster dominates all but the open fields, and no marks are of any notice. The usual late die state with lengthy cracks across the reverse periphery. Among the finest survivors of the conditionally rare Bolender-7 marriage, perhaps trailing only the MS62 NGC example pedigreed to the Cardinal Collection. NGC ID# 24X7, PCGS# 40048 Base PCGS# 6878

1799 7x6 Stars Dollar, AU55  
B-16, BB-158, Lush Patina

5333 1799 7x6 Stars, B-16, BB-158, R.2, AU55 PCGS. Bowers Die State III. An early to intermediate die state with "wave" clash marks above the date, but no sign of the eventually extensive obverse cracks. Golden-brown and gunmetal toning drapes minimally marked and partially lustrous surfaces. The strike is good and the eye appeal is impressive. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

1799 B-11, BB-161 Dollar, AU50  
No Berries Reverse

5334 1799 7x6 Stars, B-11, BB-161, R.3, AU50 NGC. Bowers Die State III, the latest recorded die state, and also the most often encountered die state, with heavy clash marks over the date, and extensive reverse die cracks. Two die varieties, B-11 and B-12, share the reverse die that lacks berries, and this die was previously used (with berries) for B-16 and B-23, the latter with the unusual 8x5 Stars arrangement of the obverse. This piece has tan on the highest points of the devices, with deep steel-blue elsewhere. A splendid example with trivial marks that most catalogers wouldn't bother to mention. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

1799 7x6 Stars Dollar, AU50  
B-8, BB-165

- 5335** 1799 7x6 Stars, B-8, BB-165, R.3, AU50 NGC. Bowers Die State III. Rich orange-gold, sea-green, and russet-brown toning embraces this lightly circulated and satiny early dollar. The surfaces are refreshingly unabraded. Minor adjustment marks are noted near the upper-right reverse stars, and were present on the planchet prior to the strike. The scarce late die state with numerous lengthy cracks. NGC ID# 24X7, PCGS# 40056 Base PCGS# 6878

1799 Dollar, AU50  
7x6 Stars, B-21, BB-169, Ex: Miller

- 5336** 1799 7x6 Stars, B-21, BB-169, R.3, AU50 PCGS. Ex: Miller. Bowers Die State III. Faint cracks on the obverse and reverse identify the middle state of the dies. Star 2 is noticeably repunched and the obverse stars both left and right appear bunched toward LIBERTY, useful pick-up points since BB-169 is the sole use of the obverse die. Most examples of the variety show considerable wear and are only seen in lower grades, increasing the importance of this About Uncirculated example. Reddish-brown toning with blue overtones covers the fields and devices, with silver-gray areas on the high points of the motifs and hints of silver luster in protected areas. Marks are minimal, with sharp definition on the raised elements plus strong rims and dentils. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

1800 B-13, BB-193 Dollar, AU58

- 5337** 1800 B-13, 18, BB-193, R.3, AU58 NGC. Bowers Die State I, struck from perfect dies with no clash marks on either side, an example of the variety that Bolender labeled as his number 13. He assigned a different variety number (18) to late die states, believing the dies to be different. More recent study has determined that the die pairs are the same, only in drastically different die states. This outstanding example exhibits lustrous, slightly reflective surfaces beneath lovely golden-olive and light blue toning. NGC ID# 24X9, PCGS# 40077 Base PCGS# 6887

1801 B-1, BB-211 Dollar, AU53  
Intermediate Die State

- 5338** 1801 B-1, BB-211, R.3, AU53 NGC. Bowers Die State III with a delicate reverse die crack through STA. Silver dollars struck from this obverse die (B-1, B-2, and B-3) are sometimes called the Wide Date coins, due to the space between the first three date digits. The other variety (B-4) is sometimes called the Close Date as the date digits are all close together. Considerable satin luster remains visible on the light grayish-silver surfaces of this attractive piece that exhibits splashes of iridescence. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

**1801 Draped Bust Dollar, Original AU58  
B-3, BB-213, Nice Luster Remains**

**5339 1801 B-3, BB-213, R.3, AU58 PCGS.** Bowers-Borckardt Die State III. The 1801 Draped Bust dollar is scarce as a date, from a reported mintage of 54,454 pieces. Two obverse and four reverse dies were used to strike the four known die varieties of the date. This coin represents the BB-213 variety, with the first 1 in the date away from the curl and a star point touching the upper part of the eagle's beak.

This attractive near-Mint specimen shows just a touch of wear on the sharply detailed design elements and the lightly abraded surfaces retain traces of original mint luster, under shades of gunmetal-gray and greenish-gold toning. Strong die clashing on the reverse and die flaws between LIBERTY and the rim suggest a late stage of the dies. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

**1802 Silver Dollar, MS62  
Narrow Date, B-6, BB-241  
Lovely Peach and Pale Blue Toning**

**5340 1802 Narrow Date, B-6, BB-241, R.1, MS62 PCGS.** Bowers Die State III, with the dies lightly lapped — the usual state of the dies. The T of LIBERTY is footless, an easy way to confirm the variety. While PCGS and the Guide Book identify BB-241 as the Narrow Date, the Bowers reference calls it the Close Perfect Date variety. The 2 in the date is distant from the bust, and there is a gap between the 18 and 02. Attractive peach-gold and powder-blue toning endows this satiny and minimally abraded high-grade early dollar. The strike is sharp except on obverse star 2 and the eagle's breast plumage. NGC ID# 24XB, PCGS# 40088 Base PCGS# 40087

1803 Small 3 Dollar, AU53  
Scarce B-4, BB-254

**5341** 1803 Small 3, B-4, BB-254, R.3, AU53 PCGS. Bolender-4 is scarce, as is the case for all 1803 Small 3 dollars, unlike the common Large 3 variety. Delicate honey toning visits this otherwise brilliant Draped Bust dollar. The strike is good aside from softness on the bust tip and opposite on the right-side reverse stars. The obverse has a few faded marks, but this partly lustrous example exhibits good eye appeal.

Ex: *Central States Signature* (Heritage, 4-5/2010), lot 1020. NGC ID# 24XD, PCGS# 40099 Base PCGS# 6900

## SEATED DOLLARS

1841 Silver Dollar, MS63  
Semiprooflike and Pleasantly Toned

**5342** 1841 MS63 PCGS. Semiprooflike fields and original olive-gold and grayish toning give this Select 1841 Seated dollar outstanding visual appeal. The strike is sharp throughout, and grade-limiting abrasions are minimal. After the New Orleans issues of 1859 and 1860, the early 1840s dates are the usually acquired type coins of the No Motto design. Nonetheless, pieces grading this fine are rare. Population: 19 in 63 (2 in 63+), 7 finer (9/16). NGC ID# 24YB, PCGS# 6927

1860 Seated Dollar, Vibrant MS64  
Undesignated Prooflike Surfaces

**5343** 1860 MS64 PCGS Secure. CAC. OC-1. Osburn-Cushing Die Pair 1/1, struck from perfect dies. Ocean-blue and lilac toning embrace this well struck and remarkably prooflike near-Gem Seated dollar. A few minuscule marks are well-scattered and of little relevance in comparison to the sharp strike and vivid coloration. The 1860 is far scarcer in Mint State than its New Orleans counterpart, and Uncirculated examples are demonstrably more elusive than proofs of the same date. Population: 26 in 64, 6 finer. CAC: 6 in 64, 3 finer (9/16). NGC ID# 24Z2, PCGS# 6949

1870-CC Silver Dollar, Choice AU  
Lightly Toned, Ample Luster

**5344** 1870-CC AU55 PCGS. OC-2, R.5. Despite a significantly lower mintage, the first-year Carson City dollar is less rare than its half dollar counterpart. But at least 95% of survivors are circulated, with examples certified at the major services in all grades between AG3 and MS64. The present piece is much nicer than most '70-CC dollars, since luster accompanies design recesses, and the surfaces retain their caramel-gold and pearl-gray "skin." The obverse field exhibits distributed minor marks. OC-2 is identified by two diagnostics: the base of the 7 in the date is centered over a dentil, and a diagonal die line emerges from the dentils below the left foot of the L in DOL. NGC ID# 24ZE, PCGS# 6964

1870-S Seated Dollar, XF40  
One of Only Nine Confirmed Examples  
The Miles-Queller Coin

**5345 1870-S XF40 NGC.** For four weeks in the winter of 1914, the ANS sponsored an exhibit of Colonial and U.S. coins drawn from all the prominent collectors and dealers of the era. When one views the catalog of that exhibit today, the number of major rarities is simply staggering. Such an exhibit probably could not be duplicated today. Even if collectors and dealers of today would cooperate and allow their major rarities to be exhibited, the cost of insuring such an exhibit would likely be prohibitive. A review of the exhibit and catalog, as interesting as it would be, is beyond the scope of this write-up. The mention of one major rarity would slight another that would be omitted. However, it is important to note that the catalog is organized by area of specialty and interest, and then by exhibitor. There were 27 exhibitors, and needless to say, the list reads like a Who's Who in numismatics from a hundred years ago.

One of the exhibitors was H.O. Granberg, from Oshkosh, Wisconsin. Granberg made his name and fortune in the railroad and mining businesses. Among the many rarities he contributed to the ANS exhibit was one in the United States Coins chapter on page 36. Under the Silver Dollars section and San Francisco Mint subsection is: "1870. Only specimen known. No record of issue in the mint. (*Illustrated.*)" Undoubtedly the 44-year-old Seated dollar was little noticed among the well-known rarities on display. However, one collector who did take notice was Waldo C. Newcomer, another former railroad employee who then rose to prominence in banking. Newcomer had similar collecting interests to Granberg's, and after a theft of his collection in 1913 (and sometime before 1916), he purchased both the Granberg and Heaton collections. Among the coins he purchased was the allegedly unique 1870-S silver dollar.

As Nancy Oliver and Richard Kelly point out in "The Saga of the 1870-S Silver Dollar" in the May 2005 *Numismatist*, after Waldo Newcomer purchased the coin, he exhibited it at the 1916 ANS in Baltimore. This time the piece was noticed, and *The Numismatist* reported:

"Another excessively rare, if not unique, variety of the silver dollar is the one of the regular die struck in 1870 but bearing the small letter 's' on the reverse, which is shown to most of the collectors probably for the first time, and which to many up to this time has been unknown."

The mystery of the 1870-S dollar had begun, a mystery that would remain unsolved until 2005.

The explanation of the rarity and importance of the 1870-S Seated dollar is rooted in the building of the San Francisco Mint and the laying of its cornerstone on May 25, 1870. For months it had been known that among the items to be included in the time capsule in the new Mint building would be a complete denomination set of U.S. coins dated 1870. The 1870 dies were received in December 1869, shipped from the Philadelphia Mint to San Francisco — with a couple of important omissions. The gold dollar and three dollar dies lacked an S mintmark. Once the reverse dies were received from the Philadelphia Mint and production began in earnest on all of the coins for the time capsule, it was discovered that there was no obverse die for the Seated dollar. Oliver and Kelly found evidence of a close working relationship between San Francisco Mint Superintendent A.H. LaGrange and Carson City Mint Superintendent Abraham Curry. They theorize that LaGrange asked for and received an 1870-dated dollar obverse die from Curry. Unfortunately, vast amounts of data from the various mints were destroyed some 30 years ago as a cost-cutting measure — we will never know for certain. The speculation is plausible, however, as one telegram survives from Curry to LaGrange, dated March 2, 1870:

"I have this day to acknowledge the receipt of silver dollar radius plates, and take this occasion to renew my thanks for your kindness."

What exactly "silver dollar radius plates" are is unknown, but this brief telegram underscores the working relationship between the two mints and the superintendents.

Oliver and Kelly also speculate that an S-mint silver dollar would be an excellent memento for the groundbreaking ceremonies. It is logical to conclude that such coins would be unknown to the collecting public, since they were produced under clandestine circumstances; that is, there is no mint record of the production of these dollars. When one examines the roster of the known 1870-S dollar specimens, it appears that is precisely what they were intended for — mementos — and most appear to have been used as pocket pieces. They certainly show evidence of many years' ownership by non-numismatists. Only one of the nine known examples is Uncirculated. Other pieces are scratched, one shows a test mark, another is pitted, and still another tooled.

The commonly accepted number of 1870-S dollars produced is 12. In the absence of mint records to back up that number, or any other credible primary source, we are left with nine known examples, another that allegedly appeared and then disappeared around 1990, and an 11th piece that is presumably still entombed in the cornerstone of the San Francisco Mint building. That would mean one other piece is lost, which would bring the total to a nice, round figure of 12 pieces. The roster of known and rumored 1870-S dollars follows:

**Roster of 1870-S Seated Liberty Dollars**

**1. James A. Stack Specimen, MS62 PCGS.** Morton and Joseph Stack; James A. Stack (1944); James Stack Collection (Stack's, 3/1995), lot 212; Rudolph Collection (Stack's, 5/2003), lot 2136, realized \$1,092,500; Legend Collection of Seated Liberty Dollars, displayed at the 2005 ANA Convention in San Francisco.

**2. Norweb Specimen, AU58 PCGS.** Colonel E.H.R. Green; Col. Green estate until 1942; Burdette G. Johnson; Anderson DuPont Sale (Stack's, 11/1954), lot 2551; Art Kagin; Ambassador and Mrs. R. Henry Norweb; Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3825; Jim Jessen Collection; offered as part of a silver dollar set in Coin World, January 1996.

**3. Eliasberg Specimen, AU53 PCGS.** Henry O. Granberg; illustrated in the 1914 ANS Exhibition; William H. Woodin; Waldo C. Newcomer; exhibited at the 1916 ANA Convention; Col. Green; Col. Green estate; possibly George H. Hall Sale (Stack's, 5/1945), lot 1576; Will W. Neil Sale (Mehl, 6/1947), lot 202; Stack's; Louis E. Eliasberg; Eliasberg Collection (Bowers and Merena, 4/1997), lot 2243; Stanford Coins and Bullion; Certified Acceptance Corporation (John Albanese, purchased for \$1.3 million in 2/2008).

**4. Ostheimer-Gardner Specimen, XF40 PCGS,** formerly XF40 NGC. Compton Collection; M.H. Bolender; Alfred and Jackie Ostheimer; Ostheimer Sale (Lester Merkin, 9/1968), lot 372, bought in; Gilhousen Sale (Superior, 10/1973), lot 1339; ANA Sale (Superior 8/1975), lot 1125; Julian M. Leidman; Gary Sturtridge; ANA Sale (Bowers and Ruddy, 8/1978), lot 1160; James E. Pohrer; ANA Sale (Kagin's, 8/1983), lot 2707; Leon Hendrickson and Sal Fusco; private collection; Phoenix Rare Coin Galleries (7/1992); Richmond Sale (David Lawrence, 11/2004) lot 1497; Jack Lee III Collection (Heritage, 11/2005), lot 2226; Central States Signature (Heritage, 4/2009), lot 2581; Boston Rarities Sale (Bowers and Merena, 8/2010), lot 1089; FUN Signature (Heritage, 1/2014), lot 5295; Gardner Collection Part III Signature (Heritage, 5/2015), lot 98571; FUN Signature (Heritage, 1/2016), lot 5462.

**5. Eureka Specimen, F/VF scratched.** Reportedly discovered by an 18-year-old man from Eureka, California, before 1922, who kept it until the 1970s. Numerous scratches and nicks; Donovan II Sale (Steve Ivy, 7/1978), lot 1128; Auction '85 (Paramount, 7/1985), lot 1270; Manfra, Tordella, and Brooks fixed price list, spring 1987.

**6. Queller Specimen, XF40 NGC.** Possibly Charles M. Williams; Adolphe Menjou Sale (Numismatic Gallery, 6/1950) lot 2181; possibly Clinton Hester; Abe Kosoff FPL 1955; Ben Koenig; Fairbanks Collection (Stack's, 12/1960), lot 617; Samuel Wolfson Sale (Stack's, 5/1963), lot 1431; R.L. Miles, Jr. Sale (Stack's, 4/1969), lot 1612; Autumn Sale (Stack's, 9/1978), lot 345; David Queller; Queller Family Collection (Heritage, 4/2008), lot 2129, realized \$805,000; FUN Signature (Heritage, 1/2015), lot 4173; FUN Signature (Heritage, 1/2015), lot 4173. **The present specimen.**

**Note:** Walter Breen believed this coin once belonged to 19th century collector Matthew Stickney, but it did not appear in the 1907 Henry Chapman sale of his collection, and his daughters insisted that offering was completely intact. It may be that the coin was sold privately before Stickney's death, but this seems dubious. It is possible that Virgil Brand owned this coin at some point.

**7. Carter Specimen, VF.** B. Max Mehl; Col. E.H.R. Green; James Kelly; Jack Roe; James Kelly again; Jerome Kern (B. Max Mehl, 5/1950), lot 941; Amon G. Carter; Amon Carter Sale (Stack's, 1/1984), lot 285; L.R. French Sale (Stack's, 1/1989), lot 56; James Stack, Sr. Collection (Stack's, 11/1989), lot 546.

**Note:** This coin has often been listed as a Waldo Newcomer duplicate, but the Newcomer inventory owned by PCGS lists only one coin. Newcomer's notes, written in the late 1920s or early 1930s, include, "Reported that seven were struck but only these two known. Granberg and Woodin specimen (mine) was the only known specimen. Hesslein has one about fine with initials scratched on one or both sides. Mehl is negotiating in another, making three in all. Hesslein offered me his in April 1928 for \$1300.00." Thanks to John Dannreuther for this information. The Carter coin is probably the one Mehl was "negotiating in."

**8. Schultz Specimen, VF25 PCGS.** Norman Schultz Mail Bid Sale (12/1935), lot 1302; B. Max Mehl; King Farouk; The Palace Collections (Sotheby's, 2/1954), lot 1676; Hans Schulman, per Gaston DiBello's annotated catalog of the Farouk sale; 1960 ANA Sale (Conn and Whitenack, 8/1960), lot 1168; Fall Festival Sale (Ben's Coin Company, 10/1961), lot 430 (Ben Dreiske was one of the founders of RARCOA the following year); 10th Anniversary Sale (Kreisberg-Schulman, 4/1967), lot 1253; Herman Halpern Collection (Stack's, 3/1987), lot 1203; private collection; 72nd Anniversary Sale (Stack's, 10/2007), lot 5294; Baltimore Auction (Bowers and Merena, 2/2008), lot 2035.

**9. Boyd Specimen, VF Details PCGS,** tooled to remove initials F.H.I. engraved before Liberty. Drake and Munro Collections (William Hesslein, 12/1926), lot 900; F.C.C. Boyd; World's Greatest Collection (Numismatic Gallery, 5/1945), lot 271; Southern Sale (Hollinbeck, 2/1951), lot 1248; Earl M. Skinner Collection (New Netherlands 11/1952), lot 162; Charles A. Cass; Empire Collection (Stack's, 11/1957), lot 1759; Quarter Millennium Sale, Part III (Hollinbeck Coin Company, 3/1964), lot 519; 274th Sale (Hollinbeck, 11/1967), lot 1162; Ancient, Foreign and U.S. Coins (Stack's, 6/1996), lot 1940; 73rd Anniversary Sale (Stack's, 10/2008), lot 457; Baltimore Auction (Bowers and Merena, 11/2009), lot 3086.

**10. San Francisco coin, Mint State (unverified).** San Francisco Mint employee, 1870; family of preceding Mint employee; owned by San Francisco-area military officer, examined by dealer Sam E. Frudakis who was unable to retain the coin for verification and identification.

**11.** A specimen rumored to be in the cornerstone (whereabouts today unknown) of the "Granite Lady" second San Francisco Mint, unverified.

The surfaces of this piece are bright throughout, with a pale layer of golden and lilac toning. The brightness and color is evenly matched on each side. Unlike several other circulated 1870-S dollars on the roster, there are no mentionable or distracting marks or other problems on this piece. Both sides show the normally expected number of small abrasions that a coin would receive from circulation or as a pocket piece; the brightness is also consistent with several years' residence in a pocket. The only larger mark that helps identify this as the Miles-Queller piece is located to the left of the O in OF. The strike is soft, as always, on the head of Liberty. The mintmark is also predictably small, and it appears to have been weakly punched into the reverse die.

The 1870-S dollar is a major rarity in the Seated dollar series, and is also one of the premier rarities in 19th century numismatics. It is seldom available in any condition, and usually several years pass between appearances at public auction of one of the nine known pieces. NGC ID# 24ZF, PCGS# 6965

1872-CC Silver Dollar, XF45  
Sharp and Deeply Toned

- 5346** 1872-CC XF45 PCGS. OC-1. Coming from a small mintage of 3,150 pieces, the 1872-CC Seated dollar is a scarce and sought-after issue in all grades, although finding coins in the finer levels with pleasing color is exceedingly difficult. This Choice XF coin is sharply detailed and displays smooth fields. Both sides have deep olive-gold and gunmetal-gray toning. NGC ID# 24ZK, PCGS# 6969

1873-CC Seated Liberty Dollar, VF30  
Richly Toned, Smooth Surfaces

- 5347** 1873-CC VF30 PCGS. OC-1, High R.4. Osburn-Cushing Die State a/a. Only 2,300 Seated dollars were struck at the Carson City Mint in 1873, and conceivably many of those were melted as the venerable Seated Liberty design gave way to the new Trade dollar format. The 1873-CC is the scarcest of the “famous four” CC Seated dollar issues, and it is even more challenging than the lower-mintage 1871-CC in terms of surviving coins in all grades.

Opaque, gunmetal-gray toning blankets both sides of this midgrade example. The surfaces appear smooth and virtually unmarked, although a glass reveals light abrasions hidden by the intense, finely granular toning. LI and RTY of LIBERTY are visible on the shield, while the other raised devices show sharp definition for the assigned grade. The rims and dentils are sharp and problem-free. Population: 5 in 30, 53 finer (9/16). NGC ID# 24ZN, PCGS# 6972

## PROOF SEATED DOLLARS

1846 Seated Dollar, PR65  
 Boldly Repunched Date  
 Second-Finest Proof Known

**5348 1846 PR65 PCGS Secure. CAC.** Identified as the Breen-5436 variety, with a noticeably double-punched date and remnants of the secondary digits below the primary numerals, far below their correct position. Although few proof dollars were issued by the Mint dated 1846, David Bowers reports that perhaps as many as 40 to 60 proofs were struck. Robert Julian suspected some well-heeled customer simply purchased several, or extras were struck for future sales in upcoming years.

The Mint was pointedly quiet about the number of proofs struck for each pre-1858 date. All early proof Seated dollars are undoubtedly rare, and most are restrikes made later than their stated date. Many share a “common reverse” with a defect at the final A of AMERICA above the right edge of the crossbar and on the adjacent right upright. Duncan Lee in a notable *CDN Newsletter* considered all such coins with the shared reverse to be restrikes. He mentions the dramatically recut date and rates the 1846 issue as the ninth scarcest of all Seated dollar proofs.

Somehow, the estimated mintage has not translated to the grading services, with PCGS and NGC combined reporting just 25 grading events. PCGS estimates only 20 to 30 proofs survive for the date. Among those that do exist, PR64 seems to be the highest somewhat-attainable grade, with just one coin certified finer than the present piece by either service (9/16).

This PR65 coin is one of the finest-known examples and it is the second-finest proof 1846 dollar known at PCGS. The coin is splendid, with watery-deep mirrors and vivid iridescent patina on both sides. Wide, square rims surround the fully struck surfaces. Shades of orange, blue, lavender, and gold cover the glittering fields and lightly frosted devices. A few light lines are visible with a glass beneath the toning near star 13, but they do not detract in the least from the overall visual impact. NGC ID# 24ZW, PCGS# 6987

1859 Silver Dollar, PR64  
Delightful Toning

- 5349 1859 PR64 PCGS.** The recorded mintage of the proof 1859 Seated dollar is 800 coins, but survivors are more highly sought-after than are those of many later-date proofs due to the appeal of the 1850s date. This near-Gem is fully struck and reflective, showing vivid ocean-blue toning on the obverse surrounded by a yellow-gold peripheral halo, with dusky lavender-gold across the reverse. Any grade-limiting hairlines are forgotten beneath the rich coloration. Rarely encountered finer. Population: 49 in 64 (2 in 64+), 15 finer (9/16). NGC ID# 252D, PCGS# 7002

1860 Seated Dollar, PR63+  
Collectible Proof Seated Dollar

- 5350 1860 PR63+ PCGS. OC-P1.** Osburn-Cushing Die State a/a. Diagnostic die lines in the reflective recesses of the shield confirm the proof status of this Select dollar, struck during one of the first years of marketing proofs to the public at a premium over face value. The Mint's estimate of how many proofs to strike was high, and many of the 1,330 proof dollars went unsold at the end of the year. The coin is untuned save for a thin haze of pale grayish-gold patina. Faint, delicate lines do little to diminish the mirrored fields that surround sharply struck, lightly frosted motifs. NGC ID# 252E, PCGS# 7003

1862 Seated Dollar, PR66 Cameo  
Delightful Rim Toning  
Extremely Rare This Fine

- 5351 1862 PR66 Cameo NGC.** While the proof 1862 silver dollar is available in the absolute sense — despite a limited mintage of 550 pieces — Cameo examples are rare across all grades. When seen, Cameos typically grade no finer than PR64. At the Gem and finer Cameo levels, a trio of PR65s (two at NGC, one at PCGS), a pair of PR66 NGC pieces, and a sole PR67 NGC coin comprise the reported Condition Census. Of these, one or more may be duplicate submissions. Our Permanent Auction Archives list one appearance of the PR65 Cameo PCGS coin back in 2007 and three appearances of the NGC Superb Gem, with no other Condition Census-quality offerings.

The present Premium Gem Cameo displays a full strike and modest contrast with deep mirroring in the fields. Vivid rainbow toning surrounds the peripheries in tight rings, while the interiors exhibit soft champagne color. A small fleck near star 2 serves as a pedigree identifier. Truly a rare coin in this lofty Cameo grade. NGC ID# 252G, PCGS# 87005

**1863 Seated Dollar, PR64+  
Spectacular Patina**

**5352 1863 PR64+ PCGS. OC-P1.** Proof set sales declined during the Civil War, the result of a change in pricing structure that the Mint put forward for purchasing them. If paper currency was used as payment for the set, the price was higher than if coin was used. Since silver and gold were actively hoarded during this period, the number of proof sets purchased declined. This Select 1863 proof dollar displays full detail and deeply reflective fields. Grade-limiting marks appear in the fields but are mostly hidden by vivid toning. The obverse has lavender, forest-green, crimson, and russet hues, while the reverse displays more traditional lavender and blue peripheries around a sun-gold center. Population: 38 in 64 (1 in 64+), 17 finer (9/16). NGC ID# 23BS, PCGS# 7006

**1866 With Motto Silver Dollar, Toned PR64**

**5353 1866 Motto PR64 NGC. OC-P1.** A glittering example of the new With Motto design type, deeply mirrored, and attractively toned on both sides. The surfaces have gray-brown color that is enhanced by rich cobalt-blue overtones, an entirely natural and desirable appearance. The certified population of this issue in Choice condition has actually decreased within the last decade, revealing the presence of resubmissions skewing the grading service tallies. Census: 65 in 64, 23 finer (9/16).  
Ex: ANA Signature (Heritage, 8/2007), lot 975; Dallas Signature (Heritage, 11/2007), lot 971. NGC ID# 5GDV, PCGS# 7014

**1867 Seated Dollar, PR64+ Cameo  
Exceptional Contrast**

**5354 1867 PR64+ Cameo NGC. CAC.** A remarkable proof type coin for any date Seated dollar. Each side is brilliant and the contrast between the fields and devices is profound. The strike details are complete throughout. Only close examination with a loupe shows the light hairlines that keep this flashy coin from an even higher grade. Census: 19 in 64 Cameo (2 in 64+, 1 in 64★), 23 finer. CAC: 8 in 64, 7 finer (9/16). NGC ID# 252N, PCGS# 87015

**1867 Seated Dollar, PR66 Cameo  
Conditionally Rare, Dramatic Contrast**

**5355 1867 PR66 Cameo NGC. OC-P1.** The proof 1867 Seated dollar had a mintage of 625 pieces, although it is unknown if the entirety of that production was actually distributed. The coins were issued in five deliveries from February through June. Despite this, only a single die pairing has been confirmed to exist for all proofs. (The two additional proof die marriages listed by Breen have not been since documented.) The proof dies are different than the dies used for regular coinage, despite the fact that some circulation strikes are seen with prooflike fields. This proof reverse was previously used for proof silver dollar coinage in 1866, and it would continue to be used for coinage through 1870. A diagonal die line through GOD is a ready identifier.

As a Premium Gem Cameo, this remarkably contrasted and deeply mirrored beauty is quite rare. It has few peers at NGC and is finer than any of the Cameos at PCGS. Eye appeal rivals that of some Deep Cameos on the market. The strike is full throughout, and the fields are devoid of distractions. Neither side exhibits mentionable toning. A shallow planchet void (as struck) appears at the rim left of the date. Census: 5 in 66 Cameo (2 in 66 ★), 5 finer (9/16). NGC ID# 252N, PCGS# 87015

**1870 Seated Dollar, PR65**  
Colorfully Toned, Partial Reverse Contrast

- 5356 1870 PR65 PCGS.** The 1870 Seated dollar had a high proof mintage of 1,000 specimens, but few of them can match the quality of this richly toned Gem. Rose, green, ice-blue, and apricot-gold tones meld over each side, covering all but the central reverse. The eagle remains frosty and untuned, producing eye-catching contrast on that side. The fields show partial reflectivity beneath the colorful patina and minimal contact marks. Population: 17 in 65, 6 finer (9/16). NGC ID# 252S, PCGS# 7018

**1873 Seated Dollar, PR64 Cameo**  
Pleasing Field-Device Contrast

- 5357 1873 PR64 Cameo PCGS.** The final proof issue in the Seated dollar series comes from a mintage of 600 pieces. Although Cameo coins are occasionally seen, rarely is one finer than PR64. This near-Gem represents the upper end of what can be considered an affordable Cameo proof, displaying a full strike and a touch of light golden toning. A few stray lines are all that limit the grade. Population: 23 in 64 Cameo, 10 finer (9/16). NGC ID# 252V, PCGS# 87021

**TRADE DOLLAR**

**1878-CC Trade Dollar, XF45**  
Key to the Series

- 5358 1878-CC XF45 PCGS.** The 1878-CC is a well-known key issue and it is welcome in all grades. It is seldom available in Uncirculated grades, like other Trade dollars. After almost half the mintage was melted, only 52,852 pieces remained for distribution. Since very few are known with chopmarks, one may conclude most 1878-CC Trade dollars were circulated domestically. This example has two-toned surfaces with the high points brilliant, while the recesses and peripheries are charcoal-gray. Minimally abraded. Population: 21 in 45 (1 in 45+), 78 finer (9/16). NGC ID# 253M, PCGS# 7047

**PROOF TRADE DOLLARS**

**1879 Trade Dollar, PR65**  
Beautifully Toned

- 5359 1879 PR65 PCGS.** The 1879 proof Trade dollar was the first issue in the series not accompanied by circulation strikes from any mint. Examples are usually available overall, but high-grade pieces are elusive. This Gem representative displays fully struck devices and deeply mirrored fields. Beautiful sky-blue, mint-gold, violet, and sun-orange adorn each side in concentric hues. Population: 37 in 65 (1 in 65+), 28 finer (9/16). NGC ID# 27YR, PCGS# 7059

**1883 Trade Dollar, PR65 Cameo**  
Rich Border Toning and Eye Appeal

- 5360 1883 PR65 Cameo NGC.** Lovely golden-brown and navy-blue toning enriches the borders of this fully struck and flashy proof-only Gem. The major devices are thickly frosted, and the eye appeal is outstanding. Although the 1883 Trade dollar — the last readily collectible date in the series — can be obtained in higher grades, the quality of the present specimen will satisfy the most demanding specialist. Census: 16 in 65 Cameo, 30 finer (9/16). NGC ID# 27YV, PCGS# 87063

**MORGAN DOLLARS**

**1878 VAM-2 Eight Tailfeather Dollar**  
MS64+ Deep Mirror Prooflike

- 5361 1878 8TF Lines in LIB, VAM-2, MS64+ Deep Mirror Prooflike PCGS.** A well struck near-Gem. Frosty motifs contrast with glassy fields. Brilliant aside from a blush of gray toning near the CA in AMERICA. No marks are reportable aside from a reed impression behind Liberty's eye, and minor field scuffs below the right (facing) wing. VAM-2 exhibits die doubling on ONE DOLLAR and the IB in PLURIBUS. NGC ID# 253H, PCGS# 40120 Base PCGS# 97073

**1878-CC Morgan Dollar, MS66  
Prohibitively Rare Any Finer**

- 5362 1878-CC MS66 PCGS.** A well-preserved example of the debut Morgan dollar from the Carson City Mint, showing sharp design elements and satiny, untuned luster. Light grazes on Liberty's cheek prevent a finer grade. The 1878-CC Morgan is only marginally available in MS66 compared to collector demand, and higher-grade coins are rare. PCGS lists only six Superb Gems as finer (9/16). NGC ID# 253M, PCGS# 7080

**1878-CC Silver Dollar, MS66  
VAM-22, Dies Rotated 45 Degrees**

- 5363 1878-CC — 45 Degree Clockwise Rotated Dies — MS66 PCGS. VAM-22.** Only a minute percentage of Morgan dollars have comparable die rotation. VAMworld.com notes that VAM-22 "occurs with rotated reverse of 26-95 degrees CW." A lustrous, fully struck, and brilliant Premium Gem. A lens reveals only delicate grazes on the cheek and fields. NGC ID# 253M, PCGS# 7080

**1878-CC Morgan Dollar, MS66  
Rarely Encountered Finer**

- 5364 1878-CC MS66 PCGS.** The debut Morgan dollar from the Carson City Mint is a better date in high grade compared to early 1880s issues. This Premium Gem example trails only six numerically finer coins at PCGS (9/16). The strike is razor-sharp, and the frosty, untuned surfaces are free of major abrasions. Eye appeal is outstanding. NGC ID# 253M, PCGS# 7080

**1878-CC Dollar, MS66+  
All-Brilliant With CAC Approval**

- 5365 1878-CC MS66+ PCGS. CAC.** Untoned and completely brilliant for this first-year Carson City issue, with shimmering cartwheel luster in the fields and heavily frosted devices. A prized issue in this virtually unsurpassable condition. A couple of grazes are detected on the obverse portrait under close examination. The 1878-CC is scarce but available in MS66. Representatives with added Plus designations and CAC approval stickers for quality within the assigned grade are rarely encountered and virtually impossible to improve upon given the dearth of higher-graded coins at the leading certification services. PCGS has certified merely six finer submissions (9/16). NGC ID# 253M, PCGS# 7080

**1878-CC Morgan, MS65 Deep Mirror Prooflike  
Modestly Contrasted Motifs**

- 5366 1878-CC MS65 Deep Mirror Prooflike NGC.** While available in the lower grades of Mint State and with deeply mirrored fields, at the Gem level there are very few Deep Mirror Prooflike 1878-CC dollars available. This is a brilliant coin that displays thick mint frost over the devices and sharply contrasting deep proof reflectivity in the fields. There is a curious area of weakness on the lower portion of the reverse, possibly from something that clogged the die in that area. Census: 32 in 65 (1 in 65+ Deep Mirror Prooflike, 1 in 65 ★), 0 finer (9/16). NGC ID# 253M, PCGS# 97081

**1879-CC Dollar, MS62  
Better Carson City Date**

- 5367 1879-CC MS62 PCGS.** Normal Mintmark. This Mint State 1879-CC Morgan dollar will appeal to the budget-conscious collector seeking an Uncirculated example of this better Carson City issue. The strike is slightly soft on the hair above Liberty's ear, and scuffs on the cheek limit the grade. But the vibrant, frosty luster balances the visual presentation. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, MS63+  
Normal Mintmark, Frosty and Brilliant**

- 5368 1879-CC MS63+ PCGS. CAC.** Normal Mintmark. The 1879-CC is the secondmost challenging issue from the Nevada branch mint after the well-known 1889-CC. A total of 756,000 coins were struck. This Select offering very nearly qualifies for a Choice assessment, acknowledged by both PCGS and CAC. Frosty and untuned, each side is noticeably semiprooflike with clean, partly reflective fields. Inconsequential softness is limited to the extreme centers. NGC ID# 253U, PCGS# 7086

**1879-CC Morgan Dollar, MS64  
Iridescent Obverse, Brilliant Reverse**

- 5369 1879-CC MS64 PCGS.** Normal Mintmark. The eye appeal of this wonderful near-Gem dollar owes much to the radiant luster that glows through multicolor patina on the obverse, including peach-gold, rose, lavender, and powder-blue hues. The frosty, virtually brilliant reverse suggests time spent in a Whitman folder. Sharply struck, though a trifle soft over the centers on each side. A great example of this popular Carson City semikey and very scarcely seen finer. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, MS61 Prooflike  
Cameo Contrast**

- 5370 1879-CC MS61 Prooflike NGC.** Prooflike examples of this better Carson City issue are scarce in any grade. The present lower-end example is within the grasp of budget-conscious collectors and yet maintains pleasing eye appeal with stark cameo contrast on each side. A mark on Liberty's mouth and another near the E in E PLURIBUS UNUM are the only mentionable abrasions. NGC ID# 253T, PCGS# 7087

**GSA DOLLAR**

**1879-CC GSA Dollar, MS63  
Semikey Carson City Issue**

- 5371 1879-CC GSA MS63 NGC. VAM-4.** Brilliant and lustrous with nicely preserved fields and a typical quantity of small marks on the portrait. A semikey Carson City issue. VAM-4 has a bold die line down from Liberty's nose, a small die break on the left side of the first 8 in the date, and repunching within the second C in the mintmark. No box or certified accompanies the lot. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

## MORGAN DOLLARS

### 1880-CC Dollar, Radiant MS66+ VAM-7A, Reverse of 1878

- 5372 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66+ PCGS. CAC.** A Hit List 40 Variety. The obverse is clashed on this VAM variety, showing prominently at Liberty's throat. The present coin is vibrantly frosty and untuned with a razor-sharp strike. A loupe is required to discern any minuscule grazes that prevent a full Superb Gem grade. Still, the Plus designation and CAC endorsement combination is highly appealing. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

### 1881-CC Silver Dollar, MS67 Extremely Rare Any Finer

- 5373 1881-CC MS67 PCGS.** Perhaps the only thing more exciting than completing a Carson City Morgan dollar collection in high grade is the visual showcase of the coins in that collection. This dazzling frost-white 1881-CC dollar exhibits the remarkable eye appeal and technical quality for which Superb Gem CC-mint Morgans are famous. The strike is bold, and neither side reveals perceptible toning or mentionable abrasions. PCGS and NGC each record only four numerically finer submissions (9/16). NGC ID# 2549, PCGS# 7126

### 1881-CC Dollar, MS67+ Nearly Uncollectible Finer

- 5374 1881-CC MS67+ PCGS. CAC.** Probably the only type of Morgan dollar more eye-appealing than a high-end Superb Gem 1880-S or '81-S is a frosty Carson City dollar in the same grade that is dripping with luster and eye appeal. This 1881-CC displays nearly pristine, untuned surfaces with a sharp strike and luster that dazzles the eye. PCGS has seen only four finer submissions (9/16). NGC ID# 2549, PCGS# 7126

### 1881-O Dollar, MS65 Deep Mirror Prooflike Appreciable Cameo Contrast

- 5375 1881-O MS65 Deep Mirror Prooflike PCGS. CAC.** Prooflike or Deep Mirror Prooflike 1881-O dollars are rare in high grade. Among DMPL coins, this CAC-endorsed Gem is among the finest known. The strike is sharp throughout, and the fields exhibit considerable depth of mirroring. Appreciable cameo contrast appears on each side. A few minor marks are not out of line for the grade. Population: 17 in 65 Deep Mirror Prooflike, 0 finer. CAC: 5 in 65, 0 finer (9/16). NGC ID# 2548, PCGS# 97129

### 1881-S Silver Dollar, Semiprooflike MS68 Uncollectible Finer

- 5376 1881-S MS68 PCGS. CAC. VAM-5.** The mintmark is repunched on this variety, showing the secondary serifs within the loops of the primary S. As a type coin, this semiprooflike Superb Gem is virtually unbeatable — PCGS has seen only two numerically finer coins and NGC none (9/16). This piece displays a full strike and seemingly flawless surfaces. The obverse is brilliant, while the reverse shows attractive aquamarine toning around a warm orange-gold center. NGC ID# 2549, PCGS# 7130

1884-S Morgan Dollar, MS61  
Famous Condition Rarity

**5377 1884-S MS61 PCGS.** Nearly all of the 3.2 million 1884-S Morgan dollars entered circulation, and today the average certified grade is just AU50. Although many collectors are tempted to acquire one of those AU examples until something better comes along, we recommend waiting until just the right coin, such as this example, appears in the marketplace. This impressive Mint State example has just the right combination of luster and strike to satisfy nearly any collector. A highly appealing piece, this 1884-S Morgan dollar has light peripheral gold toning on the obverse, and no issues on the reverse. NGC ID# 254P, PCGS# 7156

1884-S Morgan Dollar, Attractive MS63  
Seldom Seen at This Level

**5378 1884-S MS63 NGC.** The lack of any significant Treasury releases in the 1960s signaled the 1884 San Francisco issue was scarcer than previously known, and today the '84-S is a key condition rarity in the Morgan dollar series. Select Uncirculated examples are extremely scarce, while finer coins are beyond the means of most collectors. Even among Select Uncirculated examples, bagmarks are an issue and only a few coins have attained the Choice level as a result.

The present coin is remarkable in that regard. Exceptionally few marks exist on either side. A minor reeding mark on the jawline near Liberty's curls is the sole mentionable abrasion on the obverse, while the reverse shows two short marks — one above the eagle's head, and a minor contact below the left (facing) wing. Otherwise, the surfaces are smoothly lustrous, frosty, and untuned with the eye appeal of an even finer grade. We rarely see a finer representative of the issue. Census: 46 in 63, 15 finer (9/16). NGC ID# 254P, PCGS# 7156

**1885-CC Dollar, Brilliant MS67  
Superior Mint Luster**

- 5379 1885-CC MS67 PCGS. VAM-2.** A brilliant and highly lustrous Superb Gem. The centers exhibit moderate incompleteness of impression, but both sides are refreshingly free from abrasions. The obverse fields are essentially pristine. Liberty's chin has a shallow strike-through, as coined. The low-mintage 1885-CC has long been popular among Carson City collectors. Population: 84 in 67 (4 in 67+), 1 finer (9/16). NGC ID# 254S, PCGS# 7160

**1885-S Silver Dollar, MS65+ Prooflike  
Condition Rarity, Delightful Eye Appeal**

- 5380 1885-S MS65+ Prooflike PCGS.** The 1885-S is a better date in Gem condition, and Prooflike pieces in this grade are rare. The present coin displays appreciable contrast between the reflective fields and the glowing, frosty relief elements. There are no serious abrasions, and the eye appeal is exceptional. No toning is seen. Population: 10 in 65+ Prooflike, 1 finer (9/16). NGC ID# 254U, PCGS# 7165

**1888 Silver Dollar, MS67  
None Finer at PCGS**

- 5381 1888 MS67 PCGS.** Despite its more than 19 million-coin mintage and ready availability in lower grades, the 1888 Morgan dollar becomes a condition rarity at the Superb Gem level. The present coin is tied for the finest at PCGS. The strike is sharp, and each side displays frosty, untuned mint luster. Two small planchet voids (as struck) appear on Liberty's jaw. Population: 42 in 67, 0 finer (9/16). NGC ID# 26KE, PCGS# 7182

**1888-S Silver Dollar, MS66  
Prooflike Obverse**

**Only Three Numerically Finer Examples at PCGS**

- 5382 1888-S MS66 PCGS.** The 1888-S Morgan is an underrated issue in high grade and one that receives relatively little publicity. This Premium Gem example is among the finest most collectors will be able to acquire, PCGS reports only 3 numerically finer submissions (9/16). The strike is slightly soft on the eagle's breast and the hair above Liberty's ear, although prooflike obverse fields balance the eye appeal. The reverse is more satiny in appearance, and each side has hints of light golden toning. NGC ID# 2557, PCGS# 7186

**1889-CC Silver Dollar, AU53  
Reflective Fields**

- 5383 1889-CC AU53 NGC.** The key date to the Carson City short set is a rarity in Mint State, making attractive AU coins heavily collected as an affordable alternative. This piece is sharply detailed and retains substantial prooflike mirroring in the fields. Light handling marks accompany the grade, as does a hint of light golden toning. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, AU58  
Problem-Free Collector Coin

- 5384 1889-CC AU58 PCGS.** This is one of the lowest-mintage dates in the Morgan dollar series, surpassed only by the 1893-S, 1893-O, and 1894. The Carson City Mint began to strike coins again in 1889, having been out of commission since 1885. The doors opened on July 1, but the condition of the building and machinery delayed coining operations until October. Over the last three months of the year, the CC-mint managed a production of 350,000 silver dollars. Many of the coins experienced widespread circulation in the later years of the 19th century. However, the initial mintage is a poor indicator of the issue's availability, as only 25,000 to 100,000 avoided being converted into silver bullion under the terms of the Pittman Act of 1918. The true scarcity of the 1889-CC is reflected in the relatively small quantity made available during the Treasury release of the early 1960s and the GSA hoard of the 1970s. This is an exceptionally attractive and problem-free example of this key Morgan issue. The strike details are strong on each side and there are no obvious or distracting abrasions. Almost brilliant, there is just a whisper of pale yellow-gold patina present. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, Brilliant MS60  
The Carson City Key

- 5385 1889-CC MS60 NGC.** Under the administration of President Harrison, the Carson City Mint was instructed to resume coinage operations in June 1889. However, facility repairs postponed production until September, and first delivery of silver dollars did not occur until October. This limited production for the year to 350,000 Morgans. But the real culprit behind the scarcity of the 1889-CC Morgan is the fact that no quantities of the date were ever put into long-term storage. Coins that were not released into circulation in the 19th century were apparently melted under the terms of the Pittman Act in 1918. No significant quantities of the date turned up in the Treasury releases of the early 1960s, and only a single coin was represented in the GSA sales of a decade later.
- Today, the 1889-CC is the key to the Carson City short set and is highly sought-after in Mint State. The present coin is an ideal entry-level Uncirculated example. The strike is sharp, and the satiny surfaces are brilliant. Scattered abrasions are as expected for the grade. NGC ID# 2559, PCGS# 7190

1889-CC Dollar, MS60  
Brilliant, Undesignated Prooflike Fields

1889-CC Morgan Dollar, Pleasing MS61  
Always-Elusive Carson City Issue

**5386 1889-CC MS60 NGC.** "James Crawford, Master of the Mint at Carson City," died on March 8, 1885, after "A Short Full Life" chronicled by Rusty Goe in his recent volume of the same title. The period of mourning that followed would, for various reasons, turn into a four-year hiatus, a total shutdown during which the Carson City Mint would make no coinage at all. The Carson City Mint finally reopened in July 1889, but it would make only silver dollars and double eagles in its partial year of coinage, 350,000 Morgan dollars and 30,945 of the Liberty Head twenties. Rusty Goe maintains that some 250,000 to 325,000 of the 1889-CC silver dollars were eventually melted, "securing this date as one of the keys to a set of Morgan dollars." Curiously, a high percentage of the high-grade survivors show semiprooflike or fully prooflike fields, as seen on this piece. The surfaces are brilliant, allowing full appreciation of the mirrored fields. Numerous small abrasions are scattered over each side, explaining the grade. All-in-all, however, the coin appears much finer than the stated grade. NGC ID# 2559, PCGS# 7190

**5387 1889-CC MS61 PCGS.** Only about 6% of all the 1889-CC dollars offered by Heritage over the past 15 years (more than 2,600 examples) achieved an Uncirculated grade, and of those few coins, not many pieces compare favorably with the visual appeal of this modestly graded MS61 example. Peripherally toned in blue and russet-red shades (likely from longtime album storage), the centers are brightly lustrous and sharply struck. A reeding mark at the chin to the nose is the sole mark of note, as all of the other abrasions are minor, well-scattered, and minimal for the grade.

Such originality and surface quality is seldom seen and highly valued for the 1889-CC. Storage and transport invited coin-to-coin contact, while the issue's sparse availability has always eluded collectors. Just 350,000 pieces were struck and only a small fraction of that mintage ever reached public hands. Bidders are encouraged to pay extra attention to this strictly graded Mint State opportunity. NGC ID# 2559, PCGS# 7190

**1890 Dollar, Top-Notch MS66  
Among the Finest at Both Services**

**5388 1890 MS66 PCGS.** The availability of the 1890 Morgan dollar drops significantly between MS64 and MS65, and the issue becomes a major series rarity in Premium Gem condition. Only a dozen pieces are certified this fine at PCGS and NGC combined (five and seven coins, respectively) and none are finer (9/16). This magnificent Morgan dollar has softly frosted luster and unabraded surfaces. Blended multicolor hues blanket each side, restricting the deepest colors to the peripheral regions. The eagle's breast and the hair immediately above Liberty's ear show minor strike softness, as is frequently seen on this issue. The 1890 has long reputation as a common date. More than 16 million coins were minted and paid out in quantities for decades. However, high-end examples are nonetheless in a distinct minority. NGC ID# 255C, PCGS# 7196

**1890-CC Silver Dollar, MS65+  
Attractively Toned**

**5389 1890-CC MS65+ PCGS.** A remarkably clean example of the issue, this Plus-graded Gem 1890-CC Morgan dollar displays a bold strike and frosty luster. The obverse shows mottled lavender and ocean-blue toning, the reverse has champagne interior regions and a light blue periphery. Eye appeal is pleasing. PCGS has seen only 15 finer representatives (9/16). NGC ID# 255D, PCGS# 7198

**1890-CC Dollar, MS65+  
An Attractive CAC-Approved Coin**

**5390 1890-CC MS65+ PCGS. CAC.** The 1890-CC is a better Carson City issue in high grade, being elusive in Gem condition and rare any finer. This Plus-graded, CAC-endorsed representative yields radiant cartwheel luster with a hint of light golden toning. The strike is sharp, and the preservation exceeds expectations for the grade — only a few stray lines in the left obverse field prevent a full Premium Gem designation. NGC ID# 255D, PCGS# 7198

### 1890-S Dollar, MS65 Deep Mirror Prooflike None Certified Finer

- 5391 1890-S MS65 Deep Mirror Prooflike NGC.** At first glance, this coin could be mistaken for a proof, what with its pristine fields and intense surface reflectivity. Thickly frosted devices contrast with blinding mirrors. Each side is essentially brilliant, with just a touch of pink-champagne at the rims. Between the Deep Prooflike fields and the lack of abrasions, this is a conditionally rare coin. Census: 7 in 65 Deep Mirror Prooflike, 0 finer (9/16). NGC ID# 255F, PCGS# 97203

### GSA DOLLAR

#### 1891-CC GSA Dollar, MS63 VAM-3, 'Spitting Eagle'

- 5392 1891-CC Spitting Eagle, VAM-3, GSA MS63 PCGS. CAC.** A Top 100 Variety. A lightly toned and highly lustrous better-date Select Carson City GSA dollar. Smooth for the grade despite a few minor field marks on the upper reverse. Half or more of all Uncirculated 1891-CC dollars are VAM-3, the "Spitting Eagle" variety with a die lump below the eagle's beak. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

### MORGAN DOLLARS

#### 1891-S Silver Dollar, MS66+ Clean Cheek, Vibrant Luster

- 5393 1891-S MS66+ PCGS. CAC.** The 1891-S is a scarce date in MS66 and is extremely rare any finer. This Plus-graded, CAC-approved Premium Gem showcases a pristine cheek on Liberty with only a few light grazes in the left obverse field that limit the grade. A hint of reflectivity in the fields accentuates vibrant, frosty cartwheel luster and minimal toning. The strike is sharp throughout. PCGS lists eight Superb Gems finer (9/16). NGC ID# 255K, PCGS# 7210

#### 1892-CC Dollar, Untoned MS65

- 5394 1892-CC MS65 PCGS.** This satiny 1892-CC Morgan dollar shows remarkably few abrasions, thus the Gem grade. The strike is razor-sharp with complete definition above the ear of Liberty and the eagle's breast feathers. Each side is also untoned. The 1892-CC is a challenging Carson City issue in finer grades, and it is virtually unobtainable any finer than MS65. NGC ID# 255M, PCGS# 7214

1892-S Morgan, AU58  
Mint State Alternative

**5395 1892-S AU58 PCGS.** This near-Mint 1892-S Morgan silver dollar will prove to be a nice alternative to a much higher priced Mint State example for almost any collector working on a Mint State set of Morgan dollars. The PCGS Price Guide values AU58 examples at less than half the price of MS60. Both sides exhibit a trace of rub on the high points, affecting only the hair over Liberty's ear and the eagle's breast feathers, all the while retaining virtually full mint luster. The fields of this lovely example are reflective, while both sides are brilliant and untuned. NGC ID# 255P, PCGS# 7218

1892-S Dollar, MS61  
Famously Challenging Issue

**5396 1892-S MS61 NGC.** The mintage of 1892-S Morgan dollars was modest for the series, at 1.2 million pieces. Almost all of the coins were released into circulation in the 1890s, and few examples were saved by collectors, with the result that the issue is rare in Mint State grades today. Augustus Heaton's reference on branch-mint coins would be published the following year, and collector interest in mintmarked issues blossomed in the early 20th century, but nearly all examples of the 1892-S had seen extensive circulation by that time.

Contemporary collectors largely ignored the 1892-S when it appeared in auction catalogs. An early offering occurred in lot 347 of the New Jersey Collection (Ed Frossard, 3/1898), "1892 San Francisco mint. Uncirculated." The lot realized only \$1.05, a small return, even in those days. The 1892-S was not present in any quantities in the silver dollar releases of the San Francisco Mint in the 1940s and 1950s. Likewise, the issue was underrepresented in the great Treasury releases of the early 1960s. In recent years, analysis by specialists like Wayne Miller revealed the true rarity of the 1892-S in Mint State. Collectors today are aware of its status as a prime condition rarity in the series.

The present coin is an attractive Mint State example, featuring needle-sharp striking details. Even the hair above Liberty's ear is crisply rendered. The fields are reflective and semiprooflike, especially on the reverse. The surfaces are brilliant at the centers, with a light patina of golden color growing stronger at the rims. A scattering of hairlines in the fields and a few minor handling marks on Liberty's cheek explain the grade. Census: 12 in 61, 29 finer (9/16).

Ex: FUN Signature (Heritage, 7/2010), lot 4202; FUN Signature (Heritage, 1/2011), lot 5667. NGC ID# 255P, PCGS# 7218

1893 Morgan Dollar, MS65  
Low-Mintage Issue

**5397** 1893 MS65 PCGS. VAM-2. The 3 in the date is lightly repunched north. Orange-gold toning graces the borders of this lustrous and carefully preserved Gem example. The centers show softness of impression, and a pair of mint-made roller marks pass through the eagle's lower body. A low-mintage date. NGC ID# 255R, PCGS# 7220

1893 Morgan Dollar, MS65  
Only Six Finer PCGS Submissions

**5398** 1893 MS65 PCGS. All of the branch mint issues of 1893 are condition rarities in Mint State grades, making this Philadelphia Mint piece the ideal candidate for those collectors seeking a single example from each of the 28 production years for the design. This impressive Gem has frosty silver luster and excellent design definition with a crescent of gold toning along the left obverse border. PCGS has only certified six finer examples (9/16). NGC ID# 255R, PCGS# 7220

1893-CC Silver Dollar, MS63  
Deeply Toned on Both Sides

**5399** 1893-CC MS63 NGC. As the final date in the Carson City short set and one of the better dates therein in high grade, the 1893-CC Morgan dollar is in constant demand at the Mint State level. This lustrous Select example displays better-than-average strike sharpness with light abrasions under deep toning. The obverse is ocean-blue with a tan-orange center, and the reverse displays more traditional lavender-blue over the interior with lemon-yellow and sun-orange around the border. NGC ID# 255S, PCGS# 7222

1893-O Silver Dollar, MS62+  
Appealing for the Grade

**5400** 1893-O MS62+ PCGS. With a small mintage of 300,000 pieces, the 1893-O Morgan dollar is a semikey date in all grades but becomes particularly challenging in Mint State. This collectible MS62+ coin displays an uncommonly bold strike and bright, satiny luster with modest reflectivity in the fields. Light abrasions on Liberty's cheek contribute to the grade. NGC ID# 255T, PCGS# 7224

1893-S Dollar, XF45  
Well-Detailed Series Key

**5401** 1893-S XF45 PCGS. The 1893-S, arguably the most famous Morgan dollar issue, enjoys perennial popularity because of its series-low mintage of 100,000 coins. Exceedingly high demand places tremendous pressure on the 10,000 or so coins that survive, particularly mid-grade examples like the one here offered. The hair over Liberty's ear and the eagle's breast feathers show an expected amount of blending, but design detail is otherwise strong on this silver-gray representative. NGC ID# 255U, PCGS# 7226

1893-S Silver Dollar, AU50  
Some Luster Remains

**5402** 1893-S AU50 PCGS. A brush of high-point wear determines the grade on this About Uncirculated 1893-S dollar, while remnants of luster glow in the protected regions of the fields. Light golden toning overall deepens to amber-orange around the obverse periphery. There are no significant abrasions.

The 1893-S is a popular issue in AU condition, as this grade represents the finest that most collectors will be able to acquire. Uncirculated pieces are the rarest of any date in the series and will be out of reach for most enthusiasts. An uncleaned, still-lustrous AU coin such as that present piece is ideal for most collecting pursuits. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, MS61  
Rarely Located in Mint Condition

**5403 1893-S MS61 ANACS.** Q. David Bowers writes in his underutilized *Buyer's Guide to Silver Dollar and Trade Dollars of the United States* that "possibly tens of thousands" of 1893-S Morgan dollars were melted under the provisions of the Pittman Act of 1918, out of the original production of 100,000 business strikes. But he adds, "That the 1893-S is not an 'impossible rarity' is because thousands of worn specimens survive." The average survivor is likely to grade somewhere in the VF20 to VF35 range, but examples are available — in theory, at least — from AG up to a couple of MS67 examples that have seen much numismatic ink in the last few years. The ex: Cornelius Vermeule/Jack Lee 2 example, MS67 PCGS, was the first Morgan dollar to break the \$1 million price barrier when Laura Sperber of Legend Numismatics sold it to a private collector in October 2008 for "over one million" dollars.

Although most collectors can never aspire to such heights, nice high-end circulated examples will fill the bill nicely for many. A few fortunate others will actually enter the rarified Uncirculated atmosphere. This is such a piece. It has complete, although slightly thinned luster in the fields, and is remarkably clean, especially for the grade, one that is normally associated with numerous distracting abrasions. Each side has taken on a light, even coating of gray-golden patina. The strike details are just a bit soft over the ear of Liberty and in the center of the eagle's breast, but these are certainly not visual distractions on this rare, Uncirculated key issue in the most widely collected 19th century U.S. series. NGC ID# 255U, PCGS# 7226

**1895-O Morgan Dollar, MS61**  
Elusive in Any Mint State Grade

- 5404 1895-O MS61 PCGS.** Many budget-minded (or quality-minded, for that matter) collectors of Morgan dollars opt — rather than attempt a complete mintmark set, which is unattainable in high grade, except for the megawealthy — to complete a “date set” or “year set” containing one coin from each year.

But 1895 is the stopper. Collectors can expect to spend well into the four figures, even for an 1895-S in MS60, and much more for the more-elusive 1895-O in any Mint State grade. The present MS61 PCGS-certified 1895-O offers far more eye appeal and pizzazz than one might expect; this is far from a “just made it” coin. Gorgeous luster sweeps both sides, and the surfaces are untuned except for a trace of pinkish-gold near the rims. A few scattered ticks and marks are in concert with the grade, but the reverse is semiprooflike. Plenty of eye appeal is present — and collector appeal, as well. NGC ID# 255Y, PCGS# 7236

**1900-O/CC Dollar, CAC-Approved MS66**  
Clear Double Mintmark

- 5405 1900-O/CC VAM-12 MS66 PCGS. CAC.** VAM-12 is one of the clearer O/CC varieties, showing plainly the entire outline of the Carson City mintmark behind the O. All varieties included, the present coin is near the top of the pack for the 1900-O/CC, with only two Superb Gems finer at PCGS (9/16). This CAC Premium Gem displays frosty, untuned luster and a clean cheek, with minor strike weakness on the hair above Liberty’s ear and the eagle’s breast. An exceptional coin for the VAM specialist or date and mintmark collector. NGC ID# 256G, PCGS# 133964 Base PCGS# 7268

**1901 Dollar, Lustrous MS62**  
Appealing for the Grade

- 5406 1901 MS62 PCGS.** Particularly vibrant mint luster gives this Mint State 1901 Morgan dollar unusually strong eye appeal for the MS62 grade. The strike is sharp, and abrasions are minimal. Hints of light golden toning appear on each side. The 1901 has long been a conditional key date at the Mint State level, and attractive coins in the lower Uncirculated grades are seldom encountered. NGC ID# 256J, PCGS# 7272

**1903-S Morgan Dollar, MS62**  
Bold Design Motifs

- 5407 1903-S MS62 NGC.** An important example for the advanced collector, this 1903-S Morgan dollar has satiny silver luster beneath light gold and iridescent toning. The strike is excellent, with the design motifs exhibiting strong hair details over Liberty’s ear, and excellent feather detail on the eagle’s breast. A delightful piece for the advanced collector. NGC ID# 256T, PCGS# 7288

1903-S Morgan Dollar, MS65  
Conditionally Elusive

**5408 1903-S MS65 PCGS.** Just 1.24 million Morgan dollars were coined at San Francisco in 1903, and the majority of those pieces entered circulation as evidenced by the average certified grade of just VF35. This impressive Gem has a typical strike with merged hair strands over Liberty's ear. Fully lustrous surfaces are brilliant and untoned. A satin beauty for the Morgan dollar aficionado. PCGS has only certified 45 numerically finer examples (9/16). NGC ID# 256T, PCGS# 7288

1904 Morgan Dollar, MS66  
None Certified Finer at Either Service

**5409 1904 MS66 PCGS.** Lustrous surfaces are essentially untoned and exhibit well-struck design elements, including most of the detail on the hair over Liberty's ear. A few minuscule, grade-consistent marks do not disturb. After the 1904 Philadelphia, New Orleans, and San Francisco issues, no more Morgan dollars were struck until 1921. Neither service has certified any numerically finer examples (9/16). NGC ID# 256U, PCGS# 7290

PROOF MORGAN DOLLARS

1880 Morgan Dollar, PR67 Cameo  
Stark Contrast, Deep Mirroring

**5410 1880 PR67 Cameo PCGS.** With a single PR64+ PCGS coin being the only Deep Cameo certified, the 1880 proof Morgan dollar is most highly sought-after in high Cameo grades. Such is the appeal of this piece, which is conditionally rare in its PR67 Cameo level. The strike is full, and the preservation is outstanding. Other than a halo of light golden peripheral toning, the coin is brilliant. Deeply mirrored fields provide a depth of cameo contrast that nears qualifications for a Deep Cameo designation.

Proof Morgan dollar coinage in 1880 amounted to an impressive 1,355 coins, making the date slightly more plentiful overall than earlier proofs of this type. Nonetheless, the inherent rarity of Superb Gem Cameo proofs prevails even with this issue. Population: 12 in 67 Cameo, 8 finer (9/16). NGC ID# 2724, PCGS# 87315

**1881 Morgan, PR66 Deep Cameo**  
One of Two Deep Cameos Known

- 5411 1881 PR66 Deep Cameo PCGS. CAC.** In his *Guide Book of Morgan Silver Dollars*, Dave Bowers writes only briefly on the 1881 proof, stating: "Excellent strike and deep cameo contrast go together on most pieces." Nonetheless, the vast majority of proofs certified are in non-Cameo grades, and only about one fourth of the proofs that we have handled were designated as Cameos. In Deep Cameo, the 1881 proof silver dollar is a commanding rarity. PCGS lists only two pieces in this category, including a PR66+ coin and the present PR66 coin. Both examples are CAC-endorsed. NGC has not certified any Ultra Cameos. This is the first recorded auction appearance of the present coin, and the other Deep Cameo has only been offered publicly once: in our ANA Signature sale (Heritage, 10/2012), lot 5031, where it realized \$35,250.

The current example is fully struck and essentially brilliant, showcasing flawless frost-white devices set against jet-black fields that have only a few wispy lines. The eye appeal generated by the cameo contrast is exceptional. The acquisition of this piece could be a one-time opportunity for many Registry Set collectors. NGC ID# 27Z5, PCGS# 97316

**1882 Morgan Dollar, PR63 Deep Cameo**  
Appears Much Finer Than the Stated Grade

- 5412 1882 PR63 Deep Cameo PCGS.** The Deep Cameo contrast seen on both sides of this Select proof specimen is unmistakable. Heavily frosted, snow-white devices seem to hang suspended above the watery depths of inky-black, mirrored fields. An interesting lint mark, shaped exactly like a backwards letter "S" lying on its side, is located on Liberty's cheekbone. A handful of faint alloy spots rest nearby, from the forehead to the neck, and may have influenced the coin's numerical grade assessment. Contact marks are nonexistent, however, and hairlines are minimal on both sides. Ex: *Central States Signature* (Heritage, 5/2007), lot 5062. NGC ID# 27Z6, PCGS# 97317

**1883 Morgan Dollar, PR65**  
Original Toning

- 5413 1883 PR65 NGC.** The availability of the proof 1883 Morgan dollar declines at the Gem level, and finer coins are scarce, with or without a Cameo designation. This PR65 example is boldly struck, with deeply mirrored fields and no bothersome contact marks. Both sides show original rose-gold, ocean-blue, and dusky violet toning around the margins, with lighter lavender-gold in the centers. Census: 53 in 65 (1 in 65+), 36 finer (8/16). NGC ID# 27Z7, PCGS# 7318

**1884 Dollar, PR66 Cameo**  
Attractively Toned, Pronounced Contrast

- 5414 1884 PR66 Cameo PCGS.** This remarkable Gem Cameo 1884 proof Morgan dollar displays dazzling field-device contrast that is accentuated by warm amber-gold toning. Hints of violet and blue around the peripheries draw the eye into the central devices, which are sharp and frosty. An exceptional coin in all respects. Population: 12 in 66 (3 in 66+) Cameo, 3 finer (9/16). NGC ID# 27ZB, PCGS# 87319

1885 Morgan Dollar, Toned PR65

**5415 1885 PR65 PCGS.** This is a sharp Gem proof with deeply reflective fields and contrasting satin devices. Deep gunmetal-blue and green-gray toning encompasses the interiors, ceding to lighter gold and lemon-yellow border hues. Any grade-limiting hairlines are well-hidden by the rich patina. The 1885 proof is seldom available this fine, with or without a Cameo designation. Population: 16 in 65, 18 finer (9/16). NGC ID# 27ZE, PCGS# 7320

1885 Silver Dollar, PR66+ Cameo  
Stark Contrast, Strong Eye Appeal

**5416 1885 PR66+ Cameo PCGS. CAC.** Writing in the popular *Guide Book of Morgan Silver Dollars*, Dave Bowers paints a rather bleak picture for collectors seeking an 1885 proof: "Medium contrast. More than just a few of this date have been dipped so many times that the mirror surfaces are dull gray. Such coins are not for you." This phenomenon contributes to the scarcity of high-grade Cameos and the prohibitive rarity of Deep Cameos. The present Plus-graded, CAC-approved Premium Gem Cameo is a stellar piece, ranking finer than the typically offered example by leaps and bounds. The strike is fully executed, and each side is free of significant toning. The mirrors are deeply imbedded and deliver stark contrast nearly worthy of a Deep Cameo designation. Population: 22 in 66 (3 in 66+) Cameo, 3 finer. CAC: 9 in 66, 2 finer (9/16). NGC ID# 27ZE, PCGS# 87320

1888 Morgan Dollar, PR66 Cameo  
None Finer at PCGS

**5417 1888 PR66 Cameo PCGS. CAC.** Repunched 18 in the date. The proof mintage of 833 pieces was about normal for the decade, but the Mint paid less attention to quality than in earlier years and high quality examples are prized by Morgan proof specialists. This example shows a crescent of tan-gold and blue toning at the margin of the lower-right quadrant on the obverse, while reddish-gold shades occupy the reverse border. The surfaces are nicely mirrored with only the hint of pale golden-gray over the interiors, allowing cameo contrast with the lightly frosted central elements.

A crisp strike goes wanting on most 1888 proofs, but this Premium Gem is sharp except for over-the-ear merging of the hair strands. Both the 1 and the 8 in the date show fairly prominent repunching, described by both Breen and Bowers as rare in earlier references but thought to be less so by today's specialists. This example is CAC-endorsed, with no finer Cameo proofs shown at PCGS. Population: 5 in 66 Cameo, 0 finer. CAC: 5 in 66, 0 finer (9/16). NGC ID# 27ZH, PCGS# 87323

1892 Dollar, PR65  
Vivid Rainbow Hues

- 5418** 1892 PR65 PCGS. Proof production increased considerably in 1892 in anticipation of extra demand for the new Barber coins that would have been included with this Morgan dollar. The surfaces are vividly toned in rainbow hues that overlay reflective fields. Strike definition is complete, as expected of a proof. From a mintage of 1,245 specimens. Population: 29 in 65, 37 finer (9/16). NGC ID# 27ZM, PCGS# 7327

1893 Dollar, PR65  
Beautiful Original Toning

- 5419** 1893 PR65 PCGS. CAC. The 1893 proof Morgan is an available issue overall, but few are seen with CAC approval. This Gem proof is beautifully toned, and the colors are accentuated by the deep mirroring in the fields. The strike is bold, and modest contrast emerges through the patina. Vivid sun-gold, violet, and ocean-blue hues dominate each side. Population: 19 in 65, 13 finer. CAC: 4 in 65, 6 finer (9/16). NGC ID# 27ZN, PCGS# 7328

1894 Dollar, PR63 Cameo  
Pleasing Contrast

- 5420** 1894 PR63 Cameo PCGS. A collectible Cameo example of the 1894 proof, an issue that experiences heightened demand due to the scarcity of high-end circulation strikes. This Select example is fully struck and lightly toned in soft golden hues. Scattered hairlines determine the grade. Population: 15 in 63 Cameo, 53 finer (9/16). NGC ID# 2577, PCGS# 87329

1897 Dollar, PR67 Cameo  
Conditionally Rare, Delicate Toning

- 5421** 1897 PR67 Cameo PCGS. CAC. Despite the challenging economic times of the mid-1890s and a relatively unexciting secondary market for proof Morgan dollars, the Mint struck 731 proof Morgans in 1897. The first delivery, totaling 250 pieces, in March supplied demand until June, when another 101 coins were struck. Other than a small token quantity of 50 proofs delivered in September, collector demand for the new proof dollar was essentially nonexistent after that until December, when Christmastime gift shopping prompted the production of an addition 330 pieces. Relatively few examples survive today in Superb Gem condition, and the number of Cameo coins in this grade is rare. The present example displays a delicate glaze of light golden toning over satiny design elements and deeply mirrored fields. Field-device contrast is appreciable on each side. Population: 6 in 67 Cameo, 3 finer. CAC: 2 in 67, 2 finer (9/16). NGC ID# 27ZV, PCGS# 87332

1898 Dollar, PR65 Deep Cameo  
Attractive Proof Type Coin

- 5422 1898 PR65 Deep Cameo PCGS.** The 1898 proof dollars were well-made, and it shows on this Gem Deep Cameo example. The strike is tack-sharp, and the fields are deeply imbedded with watery mirroring. This starkly contrasted Gem proof shows brilliant centers with a hint of light golden toning around the edges. A small planchet void on Liberty's cheek bone should not be mistaken for an abrasion. Population: 7 in 65 (1 in 65+) Deep Cameo, 28 finer (9/16). NGC ID# 27ZW, PCGS# 97333

1901 Dollar, PR66 Cameo  
Profound Field-Device Contrast

- 5423 1901 PR66 Cameo PCGS.** The 1901 date carries significant importance for collectors of circulation strike Morgan dollars. For those unable to obtain a high-grade business strike, proofs are often a more affordable alternative. This amazing Premium Gem Cameo specimen would certainly fit well into any set. The centers are minimally toned, delivering profound field-device contrast. The peripheral obverse exhibits a ring of pale gold color. From a mintage of 813 proofs. Population: 10 in 66 Cameo, 3 finer (9/16). NGC ID# 27ZZ, PCGS# 87336

1921 Zerbe Proof Morgan Dollar, PR65+  
VAM-1AG, Sharp With Reflective Fields

- 5424 1921 Zerbe PR65+ NGC. VAM-1AG.** While the definitive answers are few about the exact nature of the Zerbe proofs, high-grade examples such as this coin provide an up-close view of what stirs the debate. Were they really struck in proof format? For former ANA President Farran Zerbe?

The present coin certainly resembles a proof more than a prooflike circulation strike. Liberty's hair and cap are razor sharp, but the eagle shows minor blending on the legs and breast. Die polish lines conform to the VAM-1AG criteria. The iridescent fields are fully prooflike with orange, red, blue, and gold hues. The rims are high and sharp throughout. Both services recognize the existence of the proofs, estimating 100 to 125 pieces known. Census: 12 in 65 (1 in 65+, 1 in 65★, 1 in 65+★), 7 finer (9/16). NGC ID# 257A, PCGS# 7341

## PEACE DOLLARS

1926-D Peace Dollar, MS66+  
Few Known Finer

- 5425** 1926-D MS66+ PCGS. CAC. Although available in MS66, the 1926-D Peace dollar becomes a great rarity just one point finer. This Plus-graded Premium Gem with CAC endorsement offers a balance of quality and affordability. The strike is bold, and the satiny surfaces yield vibrant cartwheel luster. Mostly brilliant interiors cede to daubs of olive-gold and russet toning near the borders. PCGS lists eight finer submissions (9/16). NGC ID# 257P, PCGS# 7368

1934-S Peace Dollar, MS65  
Originally Toned

- 5426** 1934-S MS65 PCGS. This lovely Gem 1934-S Peace dollar has original dappled gold toning on its brilliant ivory surfaces that exhibit a bold strike and outstanding eye appeal. The frosty and fully lustrous silver surfaces are pristine. PCGS has only certified 30 numerically finer examples (9/16). NGC ID# 257Z, PCGS# 7377

1935 Peace Dollar, MS66+  
Top-Grade Coin at PCGS

- 5427** 1935 MS66+ PCGS. CAC. No Superb Gem 1935 Peace dollars are known at PCGS, making this CAC-approved, MS66+ coin a top-grade example for the Registry enthusiast. Sharp design elements complement softly frosted luster, and the preservation is outstanding. Ice-blue interiors cede to sun-gold, rose, and mint-green peripheral hues. Eye appeal is exceptional. Population: 29 in 66+, 0 finer. CAC: 64 in 66, 0 finer (9/16). NGC ID# 2582, PCGS# 7378

## EISENHOWER DOLLARS

1971 Eisenhower Dollar, Top-Grade MS66+

- 5428** 1971 MS66+ PCGS. CAC. Set Registry collectors will be excited at the opportunity to bid on, and acquire, a top-quality example of the first-year Eisenhower dollar. This impressive Premium Gem exhibits full cartwheel luster beneath vibrant emerald-green and light blue toning. Population: 82 in 66 (8 in 66+), 0 finer. CAC: 26 in 66, 0 finer (9/16). NGC ID# 2584, PCGS# 7406

1972 FS-901 Eisenhower Dollar, MS66,  
Rare Type Two Globe

- 5429** 1972 Type Two, FS-901, MS66 PCGS. The island nation of Cuba and the surrounding national entities resemble a tropical depression rather than an archipelago on the globe that appears above the eagle on the reverse of this variety. PCGS has certified eight examples each of the Type One and Type Two varieties in MS66, and 26 examples of the Type Three variant. None are graded higher, regardless of the reverse type (9/16). This lovely Premium Gem exhibits frosty mint luster that shines through its greenish-gold toning. PCGS# 510592 Base PCGS# 97409

## GOLD DOLLARS

1849-D Gold Dollar, MS62  
Excellent Type One D-Mint Example

- 5430** 1849-D MS62 NGC. Variety 1-A. This variant shows the mintmark far to the left, compared to the much scarcer 1-B variety that has a more centrally located mintmark. The 1849-D is a relatively obtainable D-mint gold dollar with an estimated 250-300+ survivors in all grades, and 30-40 pieces are believed known in mint condition. This bright yellow-gold example has considerable die flow lines around the margins on each side. There are no singularly mentionable abrasions. The strike is strong, except in the central portion of Liberty's hair. Census: 31 in 62 (1 in 62+), 23 finer (9/16).  
Ex: Summer FUN Signature (Heritage, 7/2012), lot 4649.  
From *The Fenn Family Collection, Part II*. NGC ID# 25BD, PCGS# 7507

1851-O Gold Dollar, MS65  
Only One Finer NGC Coin

- 5431 1851-O MS65 NGC. Variety 2.** Vibrant green-gold luster on both sides with delicate rose toning on the reverse combines to present exceptional eye appeal on this frosty Gem. Both sides have a few minuscule marks to prevent a higher grade. The strike is bold, and the obverse has a delicate die crack from the star at 2 o'clock, across the head, to the border at 10 o'clock. A remarkable Gem for the connoisseur. Housed in a prior generation holder. Census: 23 in 65 (1 in 65+), 1 finer (9/16).  
*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4653.*  
**From The Fenn Family Collection, Part II.** NGC ID# 25BN, PCGS# 7516

1853-C Gold Dollar, MS62  
Difficult Charlotte Issue

- 5432 1853-C MS62 NGC. Variety 1.** Sole dies known. A caramel-gold example of this low-mintage and challenging Charlotte issue. Minute mint-made strike-throughs give the fields an occasionally textured appearance, but no post-strike contact is apparent. Boldly struck by the standards of the remote North Carolina facility. Census: 13 in 62 (2 in 62+), 16 finer (9/16).  
*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4656.*  
**From The Fenn Family Collection, Part II.** NGC ID# 25BV, PCGS# 7522

1854-S Gold Dollar, Luminous MS64  
First Year of San Francisco Coinage

- 5433 1854-S MS64 NGC.** The California Gold Rush had launched the gold dollar denomination in 1849, and when the San Francisco Mint opened its doors in 1854, it is only logical that it was one of the coins produced. This near-Gem representative, housed in a prior-generation NGC holder, is one of the best-preserved survivors and a flat-out gorgeous coin to boot. Both sides are luminous yellow-gold with an undercurrent of orange, while the reverse also exhibits diffuse reflectivity. The obverse is well-defined save for a hint of softness at the hair below the coronet. Rarely seen this fine. Census: 7 in 64, 2 finer (9/16).  
*Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4604.* NGC ID# 25C2, PCGS# 7527

1855 Gold Dollar, MS65  
Excellent Type Two Example

**5434 1855 Type Two MS65 PCGS.** The 1855 gold dollar is always in demand as a representative of the short-lived Type Two design. From a mintage of 758,269 pieces, the 1855 is slightly scarcer in today's market than its 1854 counterpart. Despite the substantial production total, the 1855 is quite elusive at the MS65 grade level, as relatively few examples were saved by contemporary numismatists.

This impressive Gem features well-detailed design elements that show a touch of the always-seen softness on the date and denomination. The 1 in the denomination shows signs of recutting. The orange-gold surfaces are well-preserved, with vibrant, satiny mint luster. Population: 45 in 65 (1 in 65+), 17 finer (9/16). NGC ID# 25C4, PCGS# 7532

1859-C Gold Dollar, Rare MS61

**5435 1859-C MS61 PCGS Secure. Variety 1.** The only known die pair for 1859-C gold dollars was used for production of 5,235 coins. This Mint State piece has the typical mushy strike of the entire production run. The greenish-yellow gold surfaces are fully lustrous with myriad, grade-limiting marks. An appealing coin for the issue. Population: 6 in 61, 7 finer (9/16).

Ex: Long Beach Signature (Heritage, 2/2012), lot 4601; Summer FUN Signature (Heritage, 7/2012), lot 4674.

From *The Fenn Family Collection, Part II*. NGC ID# 25CM, PCGS# 7552

1870 Gold Dollar, MS65  
Only 6,300 Pieces Minted

**5436 1870 MS65 PCGS.** Mint State 1870 gold dollars were seldom saved from the mintage of 6,300 pieces, although a few prooflike circulation strikes were well-preserved in lieu of the preferred proofs that were issued in small quantities. This Gem survivor shows a combination of prooflike surface and mint frost to confirm the business strike designation. Raised die polish lines are visible with a glass across the reverse. Only two or three light marks exist on the obverse, with one faint hair-thin abrasion across Liberty's chin. Population: 10 in 65, 14 finer (9/16). NGC ID# 25D6, PCGS# 7569

## PROOF GOLD DOLLAR

1876 Gold Dollar, PR63 Cameo  
Only 45 Proofs Struck

**5437 1876 PR63 Cameo PCGS.** Proof gold dollar coinage in 1876 amounted to only 45 coins, of which no more than 28 are believed extant, according to the PCGS estimate. The present Select Cameo example offers stark field-device contrast and rich yellow-gold color with deep mirrors. Light handling marks limit the grade, although the rarity of this piece outweighs any minor distractions. Arguably underrated at current price levels. Population: 1 in 63 Cameo, 1 finer (9/16). NGC ID# 25EK, PCGS# 87626

## EARLY QUARTER EAGLES

1802 BD-1 Quarter Eagle, MS61  
Duo-Denomination Reverse Die

- 5438** 1802/1 BD-1, R.4, MS61 PCGS Secure. Bass-Dannreuther Die State a/b. A die crack or engraving mark extends from the first A in AMERICA to the second feather of the right wing. All three die varieties of 1802 quarter eagles share a single obverse die that has traditionally been called an overdate. However, in our opinion, and that of most current students of the early quarter eagle series, a defective punch merely gives the appearance of an overdate (see the discussion in the Bass-Dannreuther reference).

A horizontal die line extends from the left top of the shield into the left (facing) wing on the reverse, providing a “one-glance” attribution for the BD-1 marriage. The reverse die, in a later die state, was used to produce the 1802 JR-3 dimes and, ever later, the 1803 JR-2 dimes. This lovely Mint State piece has smooth and reflective greenish-gold surfaces with traces of pale orange toning on the high points. Population: 6 in 61, 13 finer for all 1802 varieties (9/16).

**Selections From the Collection of Dr. Donald Knaack.** PCGS# 45506 Base PCGS# 7650

1825 B-2 Two and a Half  
AU Sharpness

- 5439** 1825 BD-2, High R.4 — Obverse Repaired, Whizzed — NCS. AU Details. The field near the profile is smoothed, and both sides exhibit a fine-grained matte texture unnatural for the series. Little if any actual wear is apparent, and this evenly struck apricot-gold representative provides an affordable alternative for collectors in search of the rare Capped Head Left type. NGC ID# 25FG, PCGS# 45519 Base PCGS# 7664

## CLASSIC QUARTER EAGLE

1834 Two and a Half, MS62  
Large Head, Wide AM, Variety 2  
Radiant Sun-Gold Surfaces

- 5440** 1834 MS62 PCGS. Breen-6140, Variety 2, R.3. A well struck representative with radiant and refreshingly unabraded sun-gold surfaces. The Large Head subtype, which is scarcer than the Variety 1 Small Head. The Wide AM variety, named after the broad space between the A and M in AMERICA. The reverse die would be reused on later dates, although among 1834 marriages it is known only on Variety-2. NGC ID# 25FS, PCGS# 7692

## LIBERTY QUARTER EAGLES

1840-D Quarter Eagle, AU55  
Very Few Pieces Known in Any Grade

**5441** 1840-D AU55 NGC. **Variety 1-A.** The reverse has heavy die cracks through the second T in STATES, the N in UNITED, and the M in AMERICA. The mintage figure of 3,532 coins goes a long way in explaining the absolute as well as the conditional rarity of this Dahlonega Mint quarter eagle. From that low, original mintage only 60-80 coins are estimated to have survived in all grades, the vast majority in VF and XF grades. The rough, heavy marks normally seen on 1840-D quarter eagles are surprisingly absent on this example. Most of each side is yellow-gold with a slight accent of reddish patina around the margins. Well-defined on the obverse, but softly struck on the reverse.

*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 54TT, PCGS# 7719

1841-D Quarter Eagle, AU50  
Scarce Issue From the 1840s

**5442** 1841-D AU50 NGC. **Variety 2-C.** The 1841-D is one of the scarcest Dahlonega quarter eagles. Only 4,164 pieces were produced, and today a mere 80-100 coins are estimated to have survived in all grades. It is especially challenging in AU condition with approximately three-quarters of the survivors in VF-XF. Only slight high-point softness is noted on each side, most of which is probably attributable to wear rather than strike. Light, numerous abrasions are scattered over both obverse and reverse. Census: 4 in 50, 21 finer (9/16). NGC ID# 54TW, PCGS# 7722

1842-C Quarter Eagle, AU55  
Scarce, Low-Mintage Issue

**5443** 1842-C AU55 NGC. **Variety 1.** Just 6,729 pieces were produced of this challenging Charlotte issue, and only 100-125 coins are believed extant. The remaining luster has a deep reddish-gold hue, and the rest of the piece is light yellow-gold in color. Striking softness is generally localized to the eagle's left (facing) leg. One minor mark is noted above the final star, but the overall appearance is unblemished and bright.

*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GH, PCGS# 7724

1842-D Two and a Half, AU55  
Fewer Than 100 Survivors Known

**5444** 1842-D AU55 PCGS. Variety 3-F, with the date recut at the bottom. Boasting a small mintage of 4,643 pieces, the 1842-D quarter eagle is understandably scarce in all grades. Doug Winter estimates that as few as 85 to 105 pieces are extant, complementing the PCGS population report, which notes "under 100 known." This issue is unknown in Mint State at PCGS, and NGC has seen four heavily abraded submissions in Uncirculated condition. The present Choice AU PCGS coin displays a bold strike with yellow-gold surfaces and hints of reflectivity in the fields. A small strike through on Liberty's neck truncation should not be mistaken for an abrasion. Light handling marks in the fields hardly detract from the visual appeal. Population: 8 in 55, 5 finer (9/16).

*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25GJ, PCGS# 7725

1842-O Quarter Eagle, MS62  
Among the Finest Known

**5445** 1842-O MS62 NGC. Variety 1. As the present coin ably illustrates, the 1842-O is often softly struck. This piece has unbroken light yellow luster, but the detail is soft, perhaps on a VF level if taken out of context. In terms of technical grade, however, this coin ranks among the finest known. Undisturbed aside from a beveled obverse rim at 12 o'clock. Only 19,800 pieces were struck, and of that number a mere 100-125 pieces are believed known today in all grades. Census: 3 in 62 (1 in 62★), 4 finer (9/16). NGC ID# 25GK, PCGS# 7726

1843-C Small Date Quarter Eagle, AU50  
Key to the Charlotte Series

**5446** 1843-C Small Date, Crosslet 4 AU50 PCGS. Variety 1. Die State I. The Small Date 1843-C is the rarest Charlotte quarter eagle in the series; however, it is not rarest in high grade (it is fourth rarest). Only 75-100 examples are believed known today of the Small Date from a mintage of 2,988 pieces. This early (and very rare) die state shows die lines outside stars 11-13 on the obverse rim. There is no trace of the usually seen die crack at 7 o'clock — a feature seen on later die states. The surfaces are bright yellow-gold with numerous small, but undistracting marks over each side. The high-point details show even wear over each side.

*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 7HLG, PCGS# 7729

**1844-C Two and a Half, AU50**  
**Only 150-175 Pieces Believed Extant**

**5447 1844-C AU50 PCGS. Variety 1**, the only known die pairing for the year. This is a somewhat unusual coin, as the obverse and reverse are mismatched. The obverse is much finer and much cleaner than usually seen on 1844-C quarter eagles. The reverse, though, is softly struck and shows several planchet flaws. The fields show some residual brightness, a common trait on C- and D-mint gold. The overall rarity of the 1844-C is 10th out of the 20-coin series, and the original mintage was limited to 11,622 pieces, of which 150-175 coins are believed to exist today in all grades.

*Ex: Long Beach Signature (Heritage, 5/2009), lot 1518; October Signature (Heritage, 10/2009), lot 1301.*

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25GU, PCGS# 7735*

**1845-D Quarter Eagle, MS61**  
**Just Outside the Condition Census**

**5448 1845-D MS61 PCGS. Variety 6-J.** The 1845-D is moderately rare. The original mintage was 19,460 pieces with an estimated 200-250 pieces believed extant today in all grades. However, this picture of availability changes dramatically at the Mint State level. In Doug Winter's 2013 edition on the series, an MS61 coin lies just outside the Condition Census. This is an unusually attractive and well-produced piece. Rather than the usual bagmarked piece with subdued luster, this example has bright, vibrant surfaces that are noticeably clean and display semiprooflike fields. Central strike details are a tad soft, as usual. This is a high-grade Dahlonega gold piece for the advanced date/mintmark or type collector. Population: 5 in 61, 4 finer (9/16).

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25GX, PCGS# 7738*

**1845-O Quarter Eagle, AU50**  
**The Rarest Issue in This O-Mint Series**

**5449 1845-O AU50 PCGS. Variety 1.** The 1845-O is the rarest O-mint quarter eagle. Only 4,000 pieces were struck, and of that tiny number only 65-75 examples are believed to exist today in all grades. Most of the known pieces are VF-XF, placing this AU50 coin in the upper echelon of known specimens. The surfaces are bright yellow-gold and when closely examined there are numerous small, but individually insignificant abrasions present — much cleaner than the usually seen 1845-O. The devices are still surrounded by faint traces of mint luster. Well struck on the obverse, less so on the reverse.

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25GR, PCGS# 7739*

**1846-D Two and a Half, Rare MS61**

**5450 1846-D MS61 PCGS. Variety 7-1**, a scarce reverse die with the mintmark virtually touching the claw. At least five dies are known, despite a stingy production of 19,303 pieces. Canary-gold toning visits this richly detailed example, which has a paucity of the small marks usually found on Dahlonega gold. Population: 5 in 61, 3 finer (9/16).

*Ex: Summer FUN Signature (Heritage, 7/2009), lot 1310.*

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25H3, PCGS# 7742*

**1847-C Two and a Half, MS60**  
**Perfect Uncirculated C-Mint Type Coin**

**5451 1847-C MS60 PCGS. Variety 1.** Doug calls the 1847-C “the most common Charlotte quarter eagle by a fairly substantial margin.” He estimates that 350-450+ pieces may be extant, far more than any other C-mint two and a half. Even Uncirculated coins can be located with some searching. That availability combined with the strong strike and reasonably clean surfaces make this the logical choice for a high-grade Charlotte representative. This is indeed a well-struck and remarkably clean example. Each side also displays bright (but not overly bright) olive-yellow surfaces with a slight reddish tinge.

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25H6, PCGS# 7745*

1848 'CAL.' Quarter Eagle, AU Details  
First United States 'Commemorative' Coin

**5452 1848 CAL. — Plugged — PCGS Genuine. AU Details.** In December 1848, the military governor of California, Colonel R.B. Mason, shipped approximately 230 ounces of newly mined gold from the California mines to Secretary of War, William L. Marcy, who transferred the shipment to Mint Director, Robert M. Patterson, to be used for the production of a number of special quarter eagles commemorating what would one day be viewed as the most famous gold rush in American history. Patterson produced 1,389 quarter eagles with the California gold, and each was hand-stamped with a special CAL. punch, creating what many numismatists herald as the first United States commemorative coin.

The CAL. notation was apparently punched into each coin while it still rested in the die, as no flattening of the obverse design elements from the blow is observed on any known specimens. Only one punch was used, and while its placement in relation to the surrounding design elements varies slightly, the orientation of the letters CAL. in relation to each other is identical on all genuine pieces.

Survival estimates vary, though Garrett and Guth suggest fewer than 75 examples are extant. Directly linked to the famous California Gold Rush, the 1848 CAL. quarter eagle is among the most sought-after gold coins in American numismatics, ranking at number 37 in the third edition of Garrett and Guth's *100 Greatest U.S. Coins*.

This representative exhibits well-defined design elements, with even green-gold color. Only slight evidence of whizzing is seen, the effect being uniformly lackluster surfaces and effacing nearly all surface abrasions, and the plug in the right reverse field is well-masked. A still-pleasing example of this scarce, historically significant quarter eagle.

*From The Wasatch Collection of Liberty Quarter Eagles.*

1848-D Quarter Eagle, MS60  
One of the More Available D-Mint Issues

**5453 1848-D MS60 NGC. Variety 10-M.** This amazing 1848-D quarter eagle is one of only a couple dozen known in Mint State grades from a mintage of 13,771 coins. While the issue is far from the rarest Liberty quarter eagle, it is seldom encountered in full Mint State grades. This lovely piece has brilliant satiny luster with light yellow surfaces and bold design motifs.

*Ex: ANA Signature (Heritage, 8/2010), lot 5794.*

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25HC, PCGS# 7751*

1849-C Quarter Eagle, AU58  
Low Number of Survivors

**5454 1849-C AU58 NGC. Variety 1.** This bright yellow-gold representative displays pleasing sharpness in the centers and keeps glimmers of reflective luster in the protected areas. The luminous fields are only lightly abraded. Only 10,220 pieces were struck, and of that number it is estimated that today only 125-150 coins are known in all grades. At least two-thirds of the survivors are VF or XF.

*Ex: FUN Signature (Heritage, 1/2007), lot 5422; Dallas Signature (Heritage, 11/2007), lot 1876; FUN Signature (Heritage, 1/2009), lot 5208.*

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 7HRT, PCGS# 7753*

1850-C Two and a Half, MS61  
Just Outside the Condition Census

**5455 1850-C MS61 NGC. Variety 1.** Variety 1 with the mintmark nestled between the claw and feather. Two reverse die varieties exist despite a meager mintage of 9,148 pieces. From that mintage, only 175-225 coins are believed known today in all grades. This example is just outside the Condition Census that is listed in Doug Winter's series reference. This is a yellow-gold example that has noticeable luster, clean surfaces, and an absence of consequential abrasions.

*From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25HH, PCGS# 7756*

1851-C Quarter Eagle, MS61  
Variety 1, the Only Dies

**5456** 1851-C MS61 NGC. **Variety 1.** The only dies for this issue. Myriad handling marks are noted on the green-gold surfaces of this boldly detailed Charlotte quarter eagle. Both sides retain full, frosty mint luster with traces of reflectivity in the protected areas. This is an attractive example of a date that is rarely found so nice. Census: 8 in 61 (1 in 61+), 5 finer (9/16).

Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 4715.

From *The Fenn Family Collection, Part II*. NGC ID# 25HM, PCGS# 7760

1851-O Quarter Eagle, MS62  
Scarce in Mint Condition

**5457** 1851-O MS62 PCGS. **Variety 1.** Of the two varieties known for the 1851-O, this one is most easily distinguished by wide repunching at the bottom in the date. Here it is only faintly seen as a lunule below the 5, but almost all the base of the final 1 is apparent. For a branch mint quarter eagle, the mintage was considerable with 148,000 pieces produced. However, far fewer are known than one might imagine. Only 200-250 pieces are believed extant, and only a tiny fraction of those survive in Mint State like this coin. The surfaces display bright yellow-gold mint frost over each side. The centers show high-point softness, more apparent on the reverse. Remarkably clean surfaces overall. Population: 6 in 62, 4 finer (9/16).

From *The Wasatch Collection of Liberty Quarter Eagles*. NGC ID# 25HP, PCGS# 7762

1852-C Quarter Eagle, AU58  
Scarce, Low-Mintage Issue

**5458** 1852-C AU58 NGC. **Variety 1.** The only variety for the year. Because no quarter eagles were minted at the Charlotte Mint in 1853, the small mintage of 9,772 coins from 1852 had to meet the needs of the regional economy for both years. As a result, the 1852-C quarter eagle is usually found in well-circulated condition. Doug Winter estimates the surviving population at 115-165 examples, with 23-32 specimens in AU grades. On the present coin, the strike is relatively strong around the peripheries, with the usual softness over the central devices. The surfaces are an attractive green-gold color, with minimal abrasions.

Ex: *FUN Signature* (Heritage, 1/2011), lot 6719. NGC ID# 25HS, PCGS# 7764

1852-D Two and a Half, AU50  
Only 75-100 Pieces Believed Known

**5459** 1852-D AU50 NGC. **Variety 16-N.** Ex: *Suwannee River Collection*. The 1852-D is one of the scarcer issues in terms of overall rarity in the Dahlonega quarter eagle series, ranking fifth out of 20 issues, as rated by Doug Winter. Only 4,078 pieces were produced, and of that number only an estimated 75-100 coins are believed extant today. The central devices show weakness of strike, as some pieces are known for, and the surfaces are peppered with numerous small to medium-sized abrasions.

From *The Wasatch Collection of Liberty Quarter Eagles*. NGC ID# 25HT, PCGS# 7765

## 1852-O Quarter Eagle, Appealing MS61

- 5460 1852-O MS61 PCGS. CAC. Variety 2.** The 1852-O Liberty quarter eagle boasts a substantial mintage of 140,000 pieces, but probably no more than 200-250 examples are still extant in all grades. Mint State coins are rare. This well-detailed MS61 example exhibits a touch of softness on the central reverse, with lustrous orange-gold surfaces that show only minor contact marks. Population: 8 in 61, 7 finer. CAC: 6 in 61, 0 finer (9/16).  
*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4718.*  
**From The Fenn Family Collection, Part II.** NGC ID# 7HX8, PCGS# 7766

1853-D Quarter Eagle, AU50  
Low Mintage and Low Availability

- 5461 1853-D AU50 PCGS. Variety 17-N.** The 1853-D is one of the rarer D-mint quarter eagles. Only 3,178 pieces were produced, and of that number a mere 85-105 examples are believed known, most in VF-XF. This high-grade survivor has surfaces that are similar to the coin in Doug Winter's book on D-mint gold. Each side displays rich reddish-gold color with light lilac patina interspersed. (The coin in Doug's book has deeper lilac.) The strike details are weakly defined, as expected for this issue. Two as-made die cracks are also present, one running between the upper head of Liberty between stars 7 and 8, the other through the field to the hair between stars 9 and 10.  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25HW, PCGS# 7768

1854-D Two and a Half, XF40  
Surprisingly Clean for the Issue

- 5462 1854-D XF40 PCGS. Variety 18-N.** The mintage of the 1854-D quarter eagle was a paltry 1,760 pieces. While it is not quite as difficult to locate as the mintage suggests, it still ranks fourth in overall rarity among D-mint quarter eagles. As always, the strike details are soft over the high points. The subdued reddish-gold surfaces are otherwise remarkably clean for the issue with a thin outline of mint luster still surrounding the devices.  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25HZ, PCGS# 7771

1855-C Two and a Half, AU53  
Only 85-105 Pieces Believed Extant

- 5463 1855-C AU53 PCGS. Variety 1.** This low-mintage issue (3,677 pieces produced) has a correspondingly low number of estimated survivors with only 85-105 pieces believed known. The 1855-C quarter eagle is known as one of the scarcest C-mint quarter eagles, though its comparative rarity actually drops in higher grades with a similar number known in VF, XF, and AU. This well-struck amber-gold example displays partially prooflike fields and well-struck devices that have slight high-point wear. Minimally abraded and highly appealing.  
*Ex: FUN Signature (Heritage, 1/2007), lot 5439.*  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25J5, PCGS# 7775

1855-C Quarter Eagle, AU55  
Pleasing Surfaces

- 5464 1855-C AU55 PCGS. Variety 1.** It is a rare coincidence when a low-mintage issue, such as the 1855-C quarter eagle, is also relatively available in AU condition. Doug Winter explains: "The distribution of survivors for this issue skews a bit to the high side and this suggests that there may have been a small hoard of relatively choice pieces at one time." This is not to say the 1855-C is a type coin, but it is available for a lesser premium in AU than other, low-mintage C-mint quarter eagles. This is a bright yellow-gold example with slight high-point softness in the centers and minimal abrasions for this normally heavily marked issue.  
**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25J5, PCGS# 7775

1855-D Quarter Eagle, Choice AU  
Only 1,123 Pieces Struck

**5465 1855-D AU55 PCGS. Variety 19-N.** Production of D-mint quarter eagles continued to decline in 1855 to a diminutive mintage figure of just 1,123 pieces. The 1855-D is considered to be the rarest, or least tied for that honor with the even lower-mintage 1856-D, as the most elusive Dahlonega issue of the denomination with only 50-60 pieces believed known in all grades. In addition to the extremely low output, it is also one of the poorest-produced D-mint quarter eagles. AU and finer examples are unquestionably scarce and of the utmost importance to Southern gold specialists.

Both sides of this elusive Dahlonega issue are toned in rich copper-gold hues, with a few isolated steel-blue highlights. Although well struck over the central devices, there is extensive crumbling along the denticles in addition to small laminations and hairline cracks in the vicinity of stars 6 through 8.

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 7J2U, PCGS# 7776

1856-C Quarter Eagle, MS61  
A Lower-Condition Census Example

**5466 1856-C MS61 NGC. Variety 1.** Only 7,913 pieces were struck of the 1856-C quarter eagle, and of that low number only 95-125 individual coins are believed extant today. The 1856-C ranks third rarest in the series in overall rarity and fourth rarest in condition rarity. This piece is grouped with several other MS61 coins in the lower range of the Condition Census. The surfaces are bright yellow-gold, and the usual shallow planchet problems are evident on each side. The strike details are soft, as expected. Identifiable in the future by a short diagonal mark across the brow of Liberty and a shallow scrape in the field between stars 7 and 8.

*Ex: Summer FUN Signature (Heritage, 7/2012), lot 4721.*

**From The Fenn Family Collection, Part II.** NGC ID# 25J8, PCGS# 7778

1856-D Quarter Eagle, AU50  
Only 874 Pieces Produced  
Ex: Ashland City

**5467 1856-D — Minor Obverse Lamination — AU50 PCGS. Variety 20-N.** The 1856-D has the lowest mintage in the Dahlonga series of quarter eagles, with a tiny emission of only 874 coins. Like all known examples, the present piece has ill-defined stars, and is lightly impressed at the centers. The apricot-gold surfaces are impressively void of abrasions, but we note a straight and narrow mint-made obverse lamination between stars 7 and 12 that is less of a distraction than the description might imply.

Ex: Long Beach Signature (Heritage, 2/2001), lot 6869; Ashland City Collection (Heritage, 1/2003), lot 4706; FUN Signature (Heritage, 7/2013), lot 3299.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25J9, PCGS# 7779

1856-S Quarter Eagle, MS63  
Rare in Mint State

**5468 1856-S MS63 PCGS.** Mint State examples of the 1856-S quarter eagle are rare but are scattered fairly evenly through the MS60 to MS63 grade range, with few pieces finer. This Select example is a nice mid-level Uncirculated coin with better eye appeal than is expected for the grade. The strike is sharp everywhere but on the eagle's left (facing) leg, and only a few minor handling marks limit the grade. Satiny yellow-gold luster delivers pleasing eye appeal. Population: 4 in 63, 7 finer (9/16). NGC ID# 25KL, PCGS# 7781

1857-D Quarter Eagle, AU55  
Low Mintage of Only 2,364 Pieces

**5469 1857-D AU55 PCGS. Variety 21-N.** The 1857-D has an impressively low mintage of only 2,364 pieces; yet it is more likely to be found in AU than VF, suggesting as Doug Winter states, "a hoard of a few dozen attractive high grade pieces existed at one time." Slight high-point softness is noted on each side, partially from strike and partially from wear. The surfaces are exceptionally clean for a D-mint quarter eagle, the only exception is a slightly disturbed area on the reverse below the eagle's right (facing) wing. From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25JD, PCGS# 7783

1859 Old Reverse Quarter Eagle, MS63  
Conditionally Elusive

**5470 1859 Old Reverse, Type One, MS63 PCGS.** In this year the Mint introduced a New Reverse quarter eagle, but a few P-mint coins from 1859, 1860, and 1861 feature the Old Reverse, with larger letters, the top two arrowheads touching, and an arrowhead close to the R in AMERICA. The 1859 Old Reverse quarter eagle is scarce in all grades and conditionally elusive. This piece offers much luster and eye appeal despite a small patch of thin marks in the right obverse field behind the portrait. This variety went unrecognized until the 1960s, and examples remain seldom-seen today. Population: 7 in 63, 3 finer (9/16). NGC ID# 25JK, PCGS# 97788

1859-D Two and a Half, AU55  
Final D-Mint Issue, Low Mintage

- 5471** 1859-D AU55 PCGS. Variety 22-N. The 1859 is the final date in the quarter eagle series from the Dahlonega mint. Only 2,244 pieces were struck; yet it is curiously available in AU condition, suggesting a small hoard at one time. The surfaces on this piece are bright yellow-gold and numerous tiny abrasions are scattered evenly across each side. The strike details show a bit of high-point softness.  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25JM, PCGS# 7789

1860 Two and a Half, MS61  
Rare Old Reverse or Type One Hub

- 5472** 1860 Old Reverse, Type One, MS61 PCGS. The upper two arrowheads touch, and the third arrowhead touches the arrow shaft above. These are characteristics of the elusive Type One or Old Reverse. The majority of 1860 quarter eagles are the Type Two reverse, noted for minutely smaller arrowheads and letters. Of course, any 1860 quarter eagle is scarce, since only 22,563 pieces were struck. Orange-gold luster dominates the borders, eagle, and hair. Population: 2 in 61, 10 finer (9/16).  
*Ex: Summer FUN Signature (Heritage, 7/2009), lot 1323.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25JR, PCGS# 97791

1862 Quarter Eagle, MS62  
Scarce Issue

- 5473** 1862 MS62 PCGS Secure. The mintage of Philadelphia quarter eagles was a substantial 98,543 pieces in 1862. Nevertheless, the issue is scarce in all grades today. The present coin is sharply struck, with a few clash marks evident on the reverse. The light yellow-gold surfaces are highlighted by hints of orange and red. Population: 8 in 62 (1 in 62+), 13 finer (9/16).  
*Ex: ANA Signature (Heritage, 8/2010), lot 5812.*  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25JZ, PCGS# 7796

1862-S Two and a Half, AU55  
Elusive in All Grades

- 5474** 1862-S AU55 PCGS. With fewer than 100 examples surviving from a mintage of 8,000 pieces, the 1862-S quarter eagle is an underrated scarcity in all grades. Mint State pieces are prohibitively rare and out of reach for most collectors. This Choice AU example displays partially lustrous yellow-gold fields and well-detailed motifs. Trivial marks accompany the grade. Population: 9 in 55, 14 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25K2, PCGS# 7798

1862-S Two and a Half, Choice AU  
Ex: Norweb Collection

- 5475** 1862-S AU55 PCGS. Ex: Norweb. A rare issue with a mintage of just 8,000 pieces. Rich orange toning is predominant though the open fields are olive-green. The coin is well-struck and attractive to the unaided eye with minor planchet granularity near star 10 and a few faded pinscratches near the profile. Population: 9 in 55, 14 finer (9/16).  
*Ex: Norweb Collection, Part II (Bowers and Merena, 3/1988), lot 2052; Long Beach Signature (Heritage, 5/2012), lot 4822.* NGC ID# 25K2, PCGS# 7798

1864 Quarter Eagle, AU Details  
Rarely Offered, Low-Mintage Issue

- 5476** 1864 — Scratch — PCGS Genuine. AU Details. Once specie payments were suspended by the North early in the Civil War, there was little need for gold coinage. That is reflected in the mintage of 2,824 pieces for the 1864 quarter eagle. It is seldom encountered in any grade, and only a handful of examples are finer than this piece. When closely examined, it is apparent that the initial die polish was never completely eliminated by striking this small production run, as die striations are easily seen in the fields on each side. Also present are several scratches in the fields on each side. Nevertheless, this is a rarely offered opportunity to acquire this low-mintage issue.  
*From The Wasatch Collection of Liberty Quarter Eagles.*

1865 Quarter Eagle, AU50  
Only 1,520 Strikes for Circulation

**5477 1865 AU50 PCGS.** This remarkable quarter eagle survives from an extremely small mintage of only 1,520 business strikes. An additional 25 proofs were coined for collectors. In a series full of rarities, the 1865 is one of those hidden dates that garners little attention. While quarter eagle specialists are fully aware of its rarity, most other collectors would give little thought to this issue. However, a perusal of current population data will clearly show its importance. This splendid piece is sharply detailed, highly lustrous, minimally abraded, and it exhibits pleasing orange-gold color. Population: 2 in 50, 7 finer (9/16).

*Ex: Summer FUN Signature (Heritage, 7/2010), lot 4560.*

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 25K5, PCGS# 7801

1866 Quarter Eagle, AU55  
Low Mintage of Only 3,080 Pieces

**5478 1866 AU55 PCGS.** The obverse shows slight softness of detail, though the reverse is comparatively crisp. Though slightly worn, this piece retains considerable gold-orange reflectivity, unsurprising considering its meager post-Civil War mintage. Two shallow scrapes are noted in the field above the eagle's wings. Population: 6 in 55, 4 finer (9/16).

*Ex: Los Angeles Signature (Heritage, 8/2009), lot 2411.*

**From The Wasatch Collection of Liberty Quarter Eagles.** NGC ID# 7FRZ, PCGS# 7803

**1875 Two and a Half, AU50**  
**Rare Key-Date, Only 400 Pieces Produced**

- 5479 1875 AU50 PCGS.** With a mintage of only 400 pieces, the 1875 quarter eagle is an issue whose rarity is well-known beyond those who specialize in gold coins. It has the second-lowest mintage of all quarter eagles, second only to the 1854-S. Akers estimated only 15 to 20 examples still exist, but that appears to be a bit low. Perhaps a more accurate number would be in the range of 40 to 50 coins. Regardless, the 1875 is very rare.

This is a sharply struck piece that shows a number of small abrasions across the surfaces, as would be expected of an AU coin. However, these small abrasions do not obscure the flashy luster. Rich red-golden patina clings to the design elements and adds to the aesthetic appeal. An important opportunity for an advanced collector.

Ex: FUN Signature (Heritage, 1/2005), lot 30411; Long Beach Signature (Heritage, 9/2009), lot 1474.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 7JS5, PCGS# 7822

**1875-S Quarter Eagle, MS62**  
**Scarce in Mint State**

- 5480 1875-S MS62 PCGS.** For date collectors, the 1875-S quarter eagle is extremely important as the only collectible example from that year. The Philadelphia Mint only produced 400 business strikes for the year. This pleasing example has brilliant, satin luster with hints of pink over the light yellow surfaces. Population: 5 in 62, 5 finer (9/16).

Ex: Houston Signature (Heritage, 12/2009), lot 1555.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25KT, PCGS# 7823

**1881 Quarter Eagle, MS61**  
**Only 640 Examples Minted**

- 5481 1881 MS61 PCGS.** The 1881 quarter eagle is always in demand because of its incredibly low mintage of just 640 pieces. It goes without saying that Mint State examples are very rare. The present coin exhibits semiprooflike surfaces, with intermingled areas of dark and light greenish-gold color. The design elements are sharply impressed, and the fields show only minor abrasions. Housed in a green label holder. Population: 7 in 61, 5 finer (9/16).

Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4649.

From The Wasatch Collection of Liberty Quarter Eagles. NGC ID# 25L5, PCGS# 7833

**1885 Quarter Eagle, Semiprooflike MS62**  
**Mintage 800 Business Strikes**

- 5482 1885 MS62 NGC.** With a tiny mintage of 800 circulation strikes, the 1885 quarter eagle is sought after in all grades. The date nevertheless seems to have been saved in some quantity, as it makes occasional auction appearances, usually in high AU grades. This piece features semiprooflike surfaces, as might be expected from a 19th century low-mintage coin. The strike is full, and abrasions are grade-consistent.

Ex: Long Beach Signature (Heritage, 9/2006), lot 3218; ANA Signature (Heritage, 8/2010), lot 5823. NGC ID# 25L9, PCGS# 7837

1890 Quarter Eagle, MS65  
A Rarity This Fine

- 5483** 1890 MS65 NGC. With a low mintage of 8,720 pieces, the 1890 quarter eagle is expectedly scarce in Mint State, although pieces grading finer than MS63 are genuinely rare. This Gem example displays frosty yellow-gold luster with a few grade-consistent marks that do not detract. Well-struck design elements complement the overall eye appeal. Finer examples of this conditional rarity will be far out of reach for most enthusiasts. Census: 8 in 65, 8 finer (9/16).  
*From The Wasatch Collection of Liberty Quarter Eagles.* NGC ID# 25LE, PCGS# 7842

1903 Two and a Half, MS68  
Top-Grade Type Coin

- 5484** 1903 MS68 NGC. Any MS68-graded Liberty quarter eagle is a major rarity. For the 1903, NGC has seen only five pieces in this top-most grade, with PCGS none (9/16). The present coin showcases virtually flawless fields and glistening honey-gold luster. The strike is fully executed, and the eye appeal is exceptional. A finer 20th century type coin is difficult to imagine.  
*From The Fenn Family Collection, Part II.* NGC ID# 2688, PCGS# 7855

1905 Two and a Half, MS65 Prooflike  
Sole Finest in Prooflike

- 5485** 1905 MS65 Prooflike NGC. CAC. According to the NGC *Census Report*, the present piece is the sole finest of just five Prooflike 1905 quarter eagles certified at NGC (9/16). With the exception of the 1900, NGC has designated at least one Prooflike piece for all dates between 1889 and 1907. The present coin would be among the “stoppers” to such an ambitious collection. It is needle-sharp, flashy, and undisturbed.  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 3244; Dallas Signature (Heritage, 11/2006), lot 1986; Dallas Signature (Heritage, 10/2009), lot 1337.* NGC ID# 25LW, PCGS# 77857

PROOF LIBERTY QUARTER EAGLES

1896 Quarter Eagle, PR65+ Deep Cameo  
Excellently Produced and Preserved

- 5486** 1896 PR65+ Deep Cameo PCGS. CAC. Morgan dollar proofs of the late 19th century exhibit excellent production criteria and, often, Deep Cameo contrast, but they are merely the most famous and widely collected. This Gem proof Deep Cameo quarter eagle is equally to be admired, for it shows many of the same characteristics: deeply mirrored fields, lavishly frosted devices, and a full strike, along with good preservation. A single tick shows on Liberty's chin, along with a faint toning spot near star 3 — minor flaws consistent with the PR65+ grade, and ones that fail to defeat the broad eye appeal on display. This is the sole Plus-graded Gem at PCGS, and a coin with CAC endorsement as well. Population: 5 in 65 (1 in 65+) Deep Cameo, 10 finer. CAC: 4 in 65, 8 finer (9/16). NGC ID# 288K, PCGS# 97922

## 1900 Quarter Eagle, PR68 Deep Cameo Among the Finest at PCGS

**5487 1900 PR68 Deep Cameo PCGS.** The quality of strike on the 1900 proof quarter eagle is outstanding, and the mintage of 205 pieces is among the higher production totals in the proof series. These factors, along with the attraction of the 1900 date, make this proof quarter eagle an unparalleled type-coin candidate.

Of the 205 pieces struck, at least half are believed to still exist in collections, including a coin in the ANS and two Gems in the Smithsonian Institution. However, the combined PCGS and NGC certified population report of 379 pieces in all grades is nearly double the number of coins actually struck. Much of this duplication is likely among the pieces reported as non-Cameo, which include many old listings from before Cameo designations were assigned to proofs. Our Permanent Auction Archives show 23 previous offerings of a non-Cameo coin, 36 appearances of a Cameo, and 29 Deep Cameo offerings. Although these auction listings include reappearances and duplication, it shows that the majority of the surviving population is either in Cameo or Deep Cameo grades. All of the non-Cameo coins that we have handled have been in very low grade or otherwise impaired. The collector seeking a high-grade type coin will have to focus on Cameo and Deep Cameo coins, despite the strong prices they tend to bring.

The remarkable coin in this lot is among the finest Deep Cameos seen by PCGS. The strike is needle-sharp, rendering the frosty yellow-gold devices starkly set off from the jet-black mirroring in the fields. A 10x loupe fails to reveal a single noteworthy imperfection. This coin embodies the epitome of the type collector's dream coin. Our most recent offering of a comparable piece was in lot 3488 of our New York Signature sale (Heritage, 10/2015), where a PR68+ Deep Cameo PCGS coin garnered \$56,400. The present example, while not Plus-graded, is visually almost undifferentiateable from that piece and worthy of an equally strong bid. Population: 4 in 68 (2 in 68+) Deep Cameo, 0 finer (9/16). NGC ID# 288P, PCGS# 97926

Select Proof 1905 Quarter Eagle  
Excellent Type Candidate

- 5488 1905 PR63 NGC. CAC. This Select proof 1905 Liberty quarter eagle is an excellent choice for a proof gold type set, featuring fully mirrored yellow-gold surfaces with bold devices. Faint field-to-device contrast is evident, although not sufficient for a Cameo designation. Perhaps 65 to 70 proofs survive from the 144-coin mintage, far lower than the NGC and PCGS total population of 270 pieces. Census: 21 in 63, 47 finer. CAC: 2 in 63, 11 finer (9/16). NGC ID# 7KG5, PCGS# 7931

INDIAN QUARTER EAGLES

1911-D Two and a Half, AU58  
Rich Reddish-Gold Color

- 5489 1911-D AU58 PCGS. The 1911-D is the unquestioned key to the series and the primary focus of anyone attempting to complete this short series. For most collectors it is unlikely they will be able to assemble a uniformly graded set in, say, MS63 or MS64. That is possible for the common dates, but for most collectors is unrealistic when it comes time to buy a 1911-D. The better option is to assemble a set that has a uniform *look*, rather than uniform grades. For instance, this particular coin would be best suited to a set of original Indian two and a halves that show rich, reddish patina. The strike is also exceptionally strong, and there is just the slightest hint of high-point friction. While the holder doesn't designate it as such, the mintmark is strong and clearly outlined.  
*From The Walter Freeman Collection, Part II.* NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS61  
Bold Mintmark

- 5490 1911-D MS61 NGC. Strong D. Faintly textured satin luster gives this Uncirculated example characteristic eye appeal, although the surface quality is above-average for the grade. A loupe reveals a few stray lines that prevent a higher numeric designation. The 1911-D appeals to Indian quarter eagle collectors as a key date, but rare coin investors and key date specialists also seek this issue in nice condition. The present coin is certainly very nice for the grade.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS61  
Strong D, Appealing for the Grade

- 5491 1911-D MS61 NGC. Strong D. A sharp strike and satiny yellow-gold luster characterize this pleasing lower-end Mint State example. There are no severe abrasions, only light handling marks in the fields. The 1911-D is the key date of the Indian quarter eagle series in all grades, although this produces unusually active trading both at auction and on the bourse floor. Nice-for-the-grade examples like the present piece are always in demand.  
*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

1911-D Strong D Quarter Eagle, MS61  
Pleasing for the Grade

**5492** 1911-D MS61 NGC. Strong D. Save for handling marks in the fields, this lower-end 1911-D shows eye appeal reminiscent of a higher grade. The strike is sharp, and this piece is from the Strong D reverse die. Relatively few Weak D coins appear at auction, and Strong D pieces are actively traded. The patient collector will not have trouble locating a pleasing budget-friendly Mint State coin, such as the present example.

*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS62  
Sharp Mintmark, Pleasing Luster

**5494** 1911-D MS62 NGC. Strong D mintmark. A small mark behind the eagle's head is the only noteworthy abrasion on this piece, and the eye appeal exceeds norms for the grade. The strike is sharp. Yellow-gold luster has the usual slightly textured appearance that is almost exclusive to the 1911-D — This, combined with a sharp wire rim along the upper-right border, aids in authentication of this heavily counterfeited key date.

*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62  
Collectible Mint State Strong D Coin

**5493** 1911-D MS62 NGC. Strong D. A sharp strike and satiny yellow luster give this Mint State 1911-D quarter eagle pleasing appeal for the grade, while a few light marks in the left obverse field determine the numeric designation. The low mintage of this issue (55,680 pieces) largely stems from a lack of commercial demand for the denomination in Western regions during that period. Although Mint State survivors are frequently traded, demand for them is ever increasing, even at the lower levels.

*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, MS62  
Satiny Strong D Example

**5495** 1911-D MS62 NGC. Strong D. Light handling marks limit the grade, but none are discernible to the unaided eye. This lower-end Mint State 1911-D quarter eagle displays excellent visual appeal for the grade with satiny orange-gold luster and sharp design elements. Attractive examples in this grade level are elusive but highly sought-after. Higher-grade pieces exceed the budgets of many enthusiasts.

*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

### 1911-D Quarter Eagle, MS62 Bold Mintmark and Feather Detail

**5496** 1911-D MS62 NGC. Strong D, as usual. In MS62, the 1911-D quarter eagle can still be considered affordable in the context of the issue, and despite the definition of the grade, attractive coins can be located at this level. The present piece is an example. This '11-D displays a sharp strike and the usual slightly textured yellow luster. There are no major abrasions as are typically seen on low-end Mint State coins, and the collector will only observed minor lines and handling marks in the fields beneath a loupe.

*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

### 1911-D Two and a Half, MS63 Strong D Example

**5497** 1911-D MS63 NGC. Strong D. At the MS63 grade level, this 1911-D quarter eagle balances technical quality and affordability for the collector on a restricted budget. The headdress and eagle's feathers are sharply delineated, and the satiny yellow-gold fields are free of singular distractions, producing excellent visual appeal. The diagnostic wire rim along the right obverse border is sharply pronounced.

*From The Twelve Oaks Collection, Part III.* NGC ID# 7KR7, PCGS# 7943

### 1914 Quarter Eagle, High-End MS64+

**5498** 1914 MS64+ PCGS. Alan Schein writes of the 1914 in his recent book on the quarter eagles and half eagles of Bela Lyon Pratt: "The second rarest issue of the quarter eagle series, considered a semi-key date. Rare in Gem grades." Examples almost invariably come sharply struck, and this high-end near-Gem is no different. Frosty orange-gold color dominates with complementary accents of rose. Very scarce any finer. NGC ID# 7KRA, PCGS# 7946

## PROOF INDIAN QUARTER EAGLE

### Proof 1911 Quarter Eagle, Unc Details A Budget-Friendly Matte Proof

**5499** 1911 — Filed Rims — PCGS Genuine. Proof, Unc Details. Here is a beautifully struck and appealing matte proof 1911 quarter eagle that delivers strong aesthetics and rich bronze-gold luster. The delicate sandblast surfaces are quite well preserved, although a 10x loupe reveals faint marks on the upper-left obverse and lower-left reverse rims that PCGS attributes to rim filing — the visual detractor of these is nearly unmentionable. The 1911 matte proof quarter eagle had a minimal mintage of 191 pieces, making it scarce and highly sought-after in any condition today. NGC ID# 289K, PCGS# 7960

## THREE DOLLAR GOLD PIECES

### 1854-O Three Dollar, AU53

**5500** 1854-O AU53 PCGS. CAC. Variety 2. New Orleans only struck the three dollar denomination during the first year of the series. Golden-brown and rose-red luster fills protected areas of this lightly abraded example. The late, lapped die state with a die crack from the upper tip of the right ribbon end. As often seen on this issue, a narrow mint-made strike-through is present, located below the A in STATES. NGC ID# 25M5, PCGS# 7971

**1862 Three Dollar Gold, MS62**  
**Elusive, Low-Mintage Issue**

- 5501 1862 MS62 PCGS. CAC.** The 1862 three dollar gold piece claims a mintage of just 5,750 pieces, making the issue scarce-to-rare in all grades today. This pleasing Mint State example exhibits well-detailed design elements and lustrous surfaces with the expected number of minor contact marks for the grade. A long, thin scrape in the left obverse field is the only individually significant flaw. Faint vertical planchet striations show in the fields on both sides and some faint clash marks are evident on the reverse. Population: 17 in 62, 22 finer. CAC: 5 in 62, 4 finer (9/16). NGC ID# 7K5P, PCGS# 7983

**1880 Gold Three Dollar, MS64**  
**Only 1,000 Pieces Struck**

- 5502 1880 MS64 PCGS. CAC.** Although well-saved in relation to its small 1,000-coin mintage, the 1880 three dollar gold piece is conditionally elusive in MS64 and rarely seen finer. This CAC-approved near-Gem displays a sharp strike and semireflective fields. A few light marks do not detract. Population: 60 in 64 (2 in 64+), 23 finer. CAC: 14 in 64, 4 finer (9/16). NGC ID# 25N3, PCGS# 8002

**PROOF THREE DOLLAR GOLD PIECE**

**1886 Three Dollar Gold, PR64+ Deep Cameo**  
**Starkly Contrasted CAC Coin**

- 5503 1886 PR64+ Deep Cameo PCGS. CAC.** The official PCGS estimate is that only 75 to 90 proof 1886 three dollar gold pieces survive in all grades, negating the inflated PCGS and NGC combined population figure of 164 pieces by a large margin. Only 142 proofs were reportedly struck. Deep Cameos are in the significant minority of survivors. We have handled such a piece on only eight occasions since 1993, with the most recent being a Gem Deep Cameo PCGS coin in our Long Beach Signature sale (Heritage, 9/2015), lot 4165, which realized \$28,200. We estimate that as many as a third of 34 Deep Cameos reported by the grading services are duplications. This Plus-graded, CAC-endorsed near-Gem displays full design definition and incredibly strong field-device contrast. A few stray lines in the fields determine the grade but have little visual impact. Population: 4 in 64 (1 in 64+) Deep Cameo, 14 finer. CAC: 4 in 64, 8 finer (9/16). NGC ID# 38LY, PCGS# 98050

## PROOF FOUR DOLLAR GOLD PIECE

1879 Flowing Hair Stella, Unc Details, Judd-1635  
Iconic Denomination Rarity

**5504 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3 — Tooled — PCGS Proof Genuine. Unc Details.** Roger Burdette's article, "Louis Garnett, Wheeler Hubbell, and the Goloid Fiasco," published in the Spring 2015 issue of the *Journal of Numismatic Research*, does a remarkably thorough job in examining the production processes that led to the striking of four dollar gold stellas in 1879 and 1880. As usual, Burdette's meticulous research covers all aspects from the origins of Hubbell's alloy to his proposal for a metric coinage system, the reason for the four dollar denomination, the involvement of Rep. Alexander H. Stephens, the designer(s) of the stella, quantities produced, how they were distributed, and more.

Burdette addresses the topic of so-called "original" 1879 Flowing Hair stellas. This has been the subject of considerable debate with some arguing unflinchingly for their existence, others denying it outright. Whereas researchers have previously pursued characteristics like weight, striations, and composition as determinants of originals, Burdette clarifies William Wheeler Hubbell's own thoughts on the appearance of the so-called original 25 stellas. He cites a letter from Hubbell to Mint Director Horatio Burchard from March 1, 1880, where the inventor gives precise instructions for preparing the stella planchets for striking:

"We have tested heretofore three modes of finish: one acid, one acid and alkaline, and one alkaline. The acid finish disengages too much of the copper, and leave the coin artificially pale on the face. The late Stellas (25) in this respect were too pale. ... In the finish of the gold and goloid coin, therefore, please use at first on the planchet only a weak solution of acid, to remove the soluble oxide of copper, wash off the acid, and then immerse the planchet in the alkaline solution of muriate of ammonia in water, 1 pound to a half gallon, for about a half hour."

Assuming Hubbell's suggestion for finishing the planchets was implemented (and effective), the first batch of 25 stellas should be distinguishable by their pale yellow-gold color versus the deeper orange-gold hue of later strikes — at least they would have been. An unknown number of 1879 Flowing Hair stellas have since been wiped, dipped, circulated, and otherwise altered, making it impossible to compare the original surface coloration of many survivors. Such is the case with the present coin, which exhibits tool marks on Liberty's cheek and light hairlines in the fields. Reflectivity remains in the mirrors, and each side displays rich orange-gold color — but whether or not the tangerine hue is original is impossible to know. To the unaided eye, this stella is appealing and displays excellent detail. The collector seeking a still-good-looking example of this famous rarity without spending enormous funds may wish to give this piece close consideration.

## EARLY HALF EAGLES

1795 Capped Bust Right Half Eagle, AU58  
 First Year of United States Gold Coinage  
 Small Eagle, BD-10 Variety

**5505** 1795 Small Eagle, BD-10, R.5, AU58 NGC. Bass-Dannreuther Die State c/b. According to Mint records, 8,707 half eagles were struck in 1795, the first year the United States produced gold coinage. It seems virtually certain that some 1795-dated coins were struck in later years, as well, as the hard-pressed Mint continued to use dies until they failed in those early times, regardless of the Calendar year. A total of 12 die varieties have been identified that employ the Capped Bust Right obverse design and the Small Eagle reverse, and three more varieties are known with the Large Eagle reverse design. The Large Eagle coins were probably struck in 1797 or 1798. The coin offered here represents the BD-10 variety, with one point of star 10 pointed to the cap and the second T in STATES recut at the bottom. The BD-10 variety is very scarce in absolute terms, with a surviving population of 40-50 specimens in all grades. BD-10 coins probably accounted for about 750-1,250 pieces of the reported mintage. The obverse die was used previously to strike the BD-8 and BD-9 varieties of this date, but this was the only use of the reverse die.

Perhaps because of its first-year status, early numismatists prized the 1795 half eagle, even before the hobby of coin collecting became widespread in this country. The date began to appear at auction as early as lot 170 of the A.C. Kline Sale (Moses Thomas & Sons, 6/1855), where an example realized \$6.75. Of course, prices have risen astronomically since 1855, and the record price realized for a 1795 half eagle is \$646,250, brought by the MS65 PCGS specimen in the D. Brent Pogue Collection when it sold in September of 2015.

The present coin is an attractive near-Mint example, with strongly impressed design elements and lightly abraded antique-gold surfaces. The obverse shows some loss of detail in the letters, stars and hair, due to lapping, but just a trace of actual wear is evident. There are some faint planchet adjustment marks in several areas, and a lintmark in the field between the bust and star 12. A thin die crack shows on the reverse, from the rim to the foot of the last A in AMERICA. The overall presentation is quite appealing. NGC ID# 25ND, PCGS# 519859 Base PCGS# 8066

1805 Half Eagle, BD-2, MS63  
Late Die State, Luminous Luster

**5506** 1805 BD-2, R.4, MS63 PCGS. Bass-Dannreuther Die State f/c-g/d. This glittering Select Mint State 1805 BD-2 half eagle appears to be in an intermediate die state between the two latest stages listed in John Dannreuther's *Early U.S. Gold Coin Varieties*. The obverse is clashed along the upper border through LIBERTY, and the reverse shows similar clashing through AMERICA and the tailfeathers, but the heavy central clash marks seen on the latest stage of this die marriage are not present. Moreover, the crack from the rim to the hair curls left of the 1 is visible, but the arcing crack from star 13 does not yet progress beyond the hair curls. The reverse is uncracked. A third heavy clashing must have taken place shortly after this coin was struck, inflicting the damage to each die that is seen in die state g/d.

This late-die-state BD-2 1805 half eagle was likely struck in 1806. The reverse die was also employed for the BD-1 1806 half eagle but is seen in an earlier die state for part of that coinage than it is on this 1805 variety. The logical conclusion is that late-die-state BD-2 coins as well as all BD-3, -4, and -5 1805 half eagles were struck after the earliest 1806 coins. Such reuse of outdated but still serviceable dies was commonplace at the early Mint. The coin displays a bold and even strike with frosty and original yellow-gold luster. Abrasions are surprisingly few and far between, and the luster captivates the eye. Remnants of scattered adjustment marks on the obverse are not unusual for the type, and a thin linear mark next to the F in OF is the only mentionable abrasion. Population (all varieties included): 38 in 63 (1 in 63+), 19 finer (9/16). NGC ID# 25P4, PCGS# 45616 Base PCGS# 8088

1806 Half Eagle, Sparkling MS61  
BD-6, 7x6 Stars, Knob 6

**5507** 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS61 PCGS. Bass-Dannreuther Die State d/e with a rust lump on the R in LIBERTY. Among the early half eagles, the BD-6 is easily among the most collectible varieties, yet it is always in demand as the sole Round Top Knobbed 6 die marriage with 7x6 stars on the obverse.

This frosty and lustrous MS61 example displays sumptuous yellow-gold color with a greenish tinge. The strike is uniformly sharp across both sides and marks are few, although a glass reveals a shallow pinscratch across the upper shield into the eagle's neck. A subtle rim bruise near obverse star 11 is noted. Still, there is plenty of eye appeal and the surfaces are otherwise without grade-limiting factors. Housed in a first generation holder. NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Bust Right Half Eagle  
Near-Mint Details, Rare BD-3 Variety

**5508** 1807 Bust Right, BD-3, High R.5 — Cleaned — ANACS. AU58 Details. Bass-Dannreuther Die State b/c. The usual clashed die state of this rare die marriage. Among 1807 varieties, only BD-5 is more desirable. The apricot-gold surfaces are faintly hairlined and slightly bright, but there are no mentionable marks, and the obverse stars display only minor wear. The eagle's breast is incompletely impressed, but the remainder of the strike is good. PCGS# 519900 Base PCGS# 8092

**1810 Capped Bust Left Five, MS64  
Large Date, Large 5, BD-4**

- 5509** 1810 Large Date, Large 5, BD-4, R.2, MS64 NGC. Bass-Dannreuther Die State a/a. The 1810 Capped Bust Left half eagle claims a substantial mintage of 100,287 pieces, with four die varieties known for the date. This coin is an example of the more available BD-4 variety, identified by the Large Date and the Large 5 in the denomination. With an estimated surviving population of 500-750 specimens in all grades, the BD-4 is a popular choice of type collectors and series specialists, alike. The obverse die was used previously to strike the BD-3 variety of this date, while this was the only use of the reverse die.

The present coin is a lustrous Choice specimen, with well-preserved antique-gold surfaces, and no evidence of die cracks, clash marks or planchet adjustment marks on either side. A touch of the usual softness is apparent on the centers, but the peripheral devices are sharply defined and eye appeal is outstanding. Census (for the variety): 24 in 64, 1 in 64+, 7 finer (9/16). NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

**1812 Half Eagle, BD-1, AU55  
Wide 5D Variant**

- 5510** 1812 BD-1, R.3, AU55 NGC. Bass-Dannreuther Die State a/a. This issue represents the final year of this short-lived design type, and it is one of the most plentiful in the series. In addition, the Wide 5D variety is more common than the Close 5D variety, the only other die combination of the date. The result of this combination is a wonderful selection for the type collector who only wants a single example of John Reich's Capped Bust design half eagle. This is a satiny example with greenish-yellow gold surfaces and considerable satiny luster. Only light traces of wear are visible over the high points. Highly desirable with considerable eye appeal. Ex: ANA Signature (Heritage, 7/2005), lot 7489. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

**1812 Wide 5D Half Eagle, BD-1, AU58  
Bright Yellow-Gold Surfaces**

- 5511** 1812 BD-1, R.3, AU58 NGC. Bass-Dannreuther Die State a/a. The BD-2 is easily distinguished from the BD-2 by the wideness vs. narrowness of the denomination. This piece is generally well struck with a bright, satiny sheen over richly colored yellow-gold surfaces. A diagnostic die line curves across the eagle's shield, also the location of numerous vertical adjustment marks. Ex: ANA Signature (Heritage, 7/2005), lot 7490. NGC ID# 25PL, PCGS# 507601 Base PCGS# 8112

## CLASSIC HALF EAGLE

1838-C Five Dollar, VF35  
One of the Three Keys to the Classic Series

**5512 1838-C VF35 PCGS. Breen-6517, Variety 1, R.4.** Normal 5. The 1838-C is in the triumvirate of rarities in the Classic series of half eagles, a trio that also includes the 1838-D and the 1834 Crosslet 4. The mintage was sufficient for a Charlotte five dollar with 17,179 pieces struck, but only 200-250 pieces are believed extant, a number insufficient for both Charlotte and Classic Head collectors. The devices display even wear over the high points, and the surfaces are choppy with small and medium-sized abrasions scattered over each side.

*From The Walter Freeman Collection, Part II.* NGC ID# 25S5, PCGS# 8177

## LIBERTY HALF EAGLES

1841-D Small D Five, Choice AU  
Bisecting Obverse Die Crack

**5513 1841-D Small D AU55 PCGS. Variety 5-D.** A well struck, lightly abraded, and partly lustrous apricot-gold example. The 1841-D has a meager mintage of 29,392 pieces. A majority were Small D examples, although examples with a Tall mintmark can also be found. Both varieties share the same obverse die, and both are known with and without the heavy bisecting obverse crack seen on the present coin. A second prominent radial crack passes through star 5 and the portrait to reach the first crack. Population: 12 in 55, 17 finer (9/16). NGC ID# 25SR, PCGS# 8204

1846 Large Date Five Dollar, MS63  
Semiprooflike with Original Luster

**5514 1846 Large Date MS63 PCGS.** The Large Date 1846 half eagle is more plentiful than its Small Date counterpart, but the difference is of little consequence in light of the fact that the Philadelphia issue as a whole is rarely seen in Mint State. This Select Uncirculated representative is among the finer-known examples of the 1846 half eagle. The strike is bold throughout, despite heavy cracking and clash marks on the reverse. The fields show semiprooflike mirroring and the surfaces are aglow with warm honey and copper-gold hues. Light, scattered abrasions pose little distraction and are not out of line for the grade. This lovely coin is CAC-endorsed in a prior generation holder. Population: 3 in 63, 1 finer (9/16). NGC ID# 25TF, PCGS# 8226

1851-D Half Eagle, Lustrous MS61  
Extremely Rare in Mint State

**5515 1851-D MS61 PCGS. Variety 31-V.** “The 1851-D is one of the rarest half eagles from the Dahlonega Mint”: writes Doug Winter in *Gold Coins of the Dahlonega Mint*, third edition. The same author estimates that only 135 to 185 pieces are extant in all grades, negating the accuracy of the more than 250 pieces reported by PCGS and NGC combined. The rarity of this issue is most plainly seen in Mint State, where Winter suggests that “only four or five” exist against a certified population of a dozen pieces at the two services combined.

The present coin is not only a great condition rarity, but it is also abnormally well-struck for the issue. Only insignificant incompleteness is seen on the eagle’s left (facing) leg and the hair curls around Liberty’s face, and this requires a loupe to discern. The lustrous orange-gold surfaces show expected chatter but retain pleasant eye appeal. Population: 2 in 61, 2 finer (9/16). NGC ID# 25U8, PCGS# 8248

1860-S Half Eagle, AU55  
Fewer Than 100 Pieces Known

**5516 1860-S AU55 NGC.** With “less than 100 known,” according to PCGS reports, the 1860-S half eagle is seldom available in any grade and almost unknown in Mint State. This Choice AU representative displays pleasing yellow-gold color with some luster remaining in the protected regions. Light surface chatter is typical of the grade. The 1860-S comes from a mintage of only 21,200 pieces and is underrated in all grades. Census: 11 in 55, 8 finer (9/16). NGC ID# 25VJ, PCGS# 8287

1862 Half Eagle, AU58  
Very Rare Wartime Issue  
Only 4,430 Pieces Struck

- 5517 1862 AU58 NGC.** As Garrett-Guth point out, once the federal government suspended gold payments during the early days of the Civil War, there was little need to strike gold coins. As a consequence, the mintage for half eagles dropped from 688,084 pieces in 1861 to a paltry 4,430 coins in 1862. All 1862 half eagles are rare — regardless of grade — even rarer than most C and D-mint gold from the 1840s and 1850s. This is a sharply defined example that shows bright yellow-gold color that is tinged with just a slight hint of rose. Field marks are denser on the reverse than the obverse. One curious area is seen around the S and O in STATES OF — an area that appears to be a planchet depression. Census: 11 in 58 (2 in 58+), 1 finer (9/16). NGC ID# 25VP, PCGS# 8292

1876 Half Eagle, AU55  
Only 1,432 Minted

- 5518 1876 AU55 NGC.** This is one of the low-mintage rarities in the Liberty half eagle series, with a total production of 1,432 circulation strikes and 45 proofs. A pleasing Choice AU example, this specimen exhibits a few scattered marks on its light yellow surfaces. Census: 6 in 55, 11 finer (9/16). NGC ID# 25WW, PCGS# 8339

1895 Five Dollar, MS67  
Among the Top Five Certified

- 5519 1895 MS67 PCGS.** Superb Gem Liberty half eagles are rare regardless of date or mintmark. These are the coins that many collectors dream of owning but seldom get the chance to acquire. For the 1895 issue, only five MS67 pieces have been certified, including two at PCGS and three at NGC (one in MS67+) (10/16). In fact, the 1895 becomes a condition rarity as early as MS65. The Superb Gem in this lot is within the Condition Census, and shows frosty peach-gold luster with undeniable originality. A few small ticks on the obverse prevent a finer grade but invoke little significance. An important type coin. NGC ID# 25YH, PCGS# 8390

1904 Five Dollar, MS66+

- 5520 1904 MS66+ PCGS. CAC.** Among the available 20th century type-coin issues, the 1904 is nonetheless conditionally rare at the Premium Gem level and exceedingly so any finer. This Plus-designated coin showcases eye appeal and luster that surpass most of its peers. The strike is sharp, and the yellow-gold surfaces are devoid of significant abrasions. Population: 24 in 66 (3 in 66+), 5 finer. CAC: 9 in 66, 4 finer (9/16). NGC ID# 25Z6, PCGS# 8409

## INDIAN HALF EAGLES

1910-S Half Eagle, Frosty MS65  
Condition Census Rarity  
Few Ever Offered in This Lofty Grade

**5521 1910-S MS65 PCGS Secure.** Despite an unsuspecting mintage of more than 770,000 pieces, the 1910-S Indian half eagle is among the scarcer issues in the series in Mint State, and the typical Uncirculated coin grades no finer than MS62. In MS63 or better grades, the 1910-S five is a rarity, and in Gem or finer condition, only eight pieces are reportedly certified with room in that figure for one or two resubmissions. Our Permanent Auction Archives show only five previous appearances of a Gem-graded example and none finer. The last MS65 PCGS coin that we handled was more than a decade ago in our San Francisco ANA Signature sale (Heritage, 7/2005), lot 10367, where it realized \$49,450. More recently, an MS65+ PCGS CAC coin, offered by Goldberg's (6/2016), lot 1593, realized more than \$123,000. There have been no other Gem examples sold at auction in the last decade and a half.

This is an issue for which demand far surpasses the supply of Gem-quality survivors. The present coin is a landmark offering and an important Registry Set acquisition. Both the current (Simpson) and the all-time finest (Jim O'Neal) PCGS Registry Sets lack or lacked this issue in Gem condition. This does not speak to an inability to afford a piece in this grade but rather an inability to find an example for sale. Only the Duckor and Price collections are listed in the all-time finest top five as having contained Condition Census 1910-S half eagles.

This PCGS Secure Gem offers the active Registry Set assembler the chance to mark his or her place in numismatic history by acquiring one of the premier condition rarities in the series and advancing toward the goal of completing a date and mintmark set that ranks as the finest of all time. This coin's sharp strike, frosty rose-gold luster, and impressively clean fields combine to deliver eye appeal worthy of only the finest collection. This is a coin that just begs to be admired over and over again, both for its rarity and its aesthetic appeal. Population: 6 in 65 (1 in 65+), 1 finer (9/16). NGC ID# 28DN, PCGS# 8519

1911 Half Eagle, MS65+  
Almost Unknown Finer

**5522 1911 MS65+ PCGS. CAC.** The 1911 stands among the most accessible Indian Head half eagles in Gem condition, but that is relative. Every issue in the series is very scarce at the MS65 level. Finer coins like this Plus-designated and CAC-endorsed coin are very rare. PCGS and NGC each report a single finer representative. Shades of orange and green-gold combine over this softly frosted five dollar coin. Marks in the exposed fields are minor in nature. It may take years or decades before a nicer example appears on the market, making this an important acquisition opportunity. Population: 67 in 65 (3 in 65+), 1 finer. CAC: 26 in 65, 0 finer (9/16). NGC ID# 28DP, PCGS# 8520

1916-S Five Dollar, MS63  
Always in High Demand

**5523 1916-S MS63 PCGS.** This is the last issue in the Indian Head five dollar series that can be considered collectible. Examples are always in high demand as the sole coins issued that year. The 1916-S claims a smallish production of 240,000 pieces and becomes scarce at the Select grade level. This orange-gold half eagle is strongly defined with softly glistening mint luster. Lightly scattered marks in the exposed fields do not overly detract. NGC ID# 28DY, PCGS# 8532

1929 Half Eagle, MS62  
Unrivalled Key to the Series

**5524 1929 MS62 PCGS.** No other issue in the Indian Head five dollar gold series comes remotely close to legitimately challenging the 1929 as the key date in the set. The Mint struck 662,000 half eagles that year, but few were released in the wake of the devastating stock market collapse. Instead, the 1929 sat in storage before succumbing to the mass-meltings that followed the Gold Recall of 1933. Only 800 or so coins are believed to have survived, most of them in lower Uncirculated grades. This wonderful MS62 half eagle is well-struck with orange-gold color that allows for accents of rose to come through. Softly frosted luster emanates from surfaces that show a couple of grade-defining marks in the reverse fields, mainly near the motto. NGC ID# 28E2, PCGS# 8533

## EARLY EAGLES

1795 BD-4 Eagle, AU53  
13 Leaves Reverse  
Late Die State

**5525** 1795 13 Leaves, BD-4, R.5, AU53 PCGS Secure. Bass-Dannreuther Die State b/b, the latest recorded die state with a delicate die crack from star 9 to star 10 and the tops of LIBE. The reverse has the die lump between OF and AMERICA that is seen on all known examples of this die pair. Four of the five known 1795 eagle varieties have 13 leaves on the reverse, and BD-4 is the second rarest of those four varieties, only slightly more plentiful than BD-5. Perhaps 60 to 70 examples of this die pair are known in all grades.

The 1795 half eagles were the first gold coins struck at the Philadelphia Mint in late July of that year. The eagles followed several weeks later in September 1795. Henry William DeSaussure was serving as the second Mint Director when the first gold coins were struck. He only directed the Mint operations for three months during the summer of 1795, yet receives credit for the introduction of U.S. gold coinage.

Hints of green appear on the light yellow-gold surfaces of this example, retaining traces of luster on each side. The central details are a trifle weak from adjustment marks that extending into the fields, with other accompanying lines, especially on the obverse. Faint adjustment marks are evident along the upper-right obverse rim, with weakness on the lower-right reverse rim opposite those adjustment marks. The first-year type collector will appreciate this opportunity.

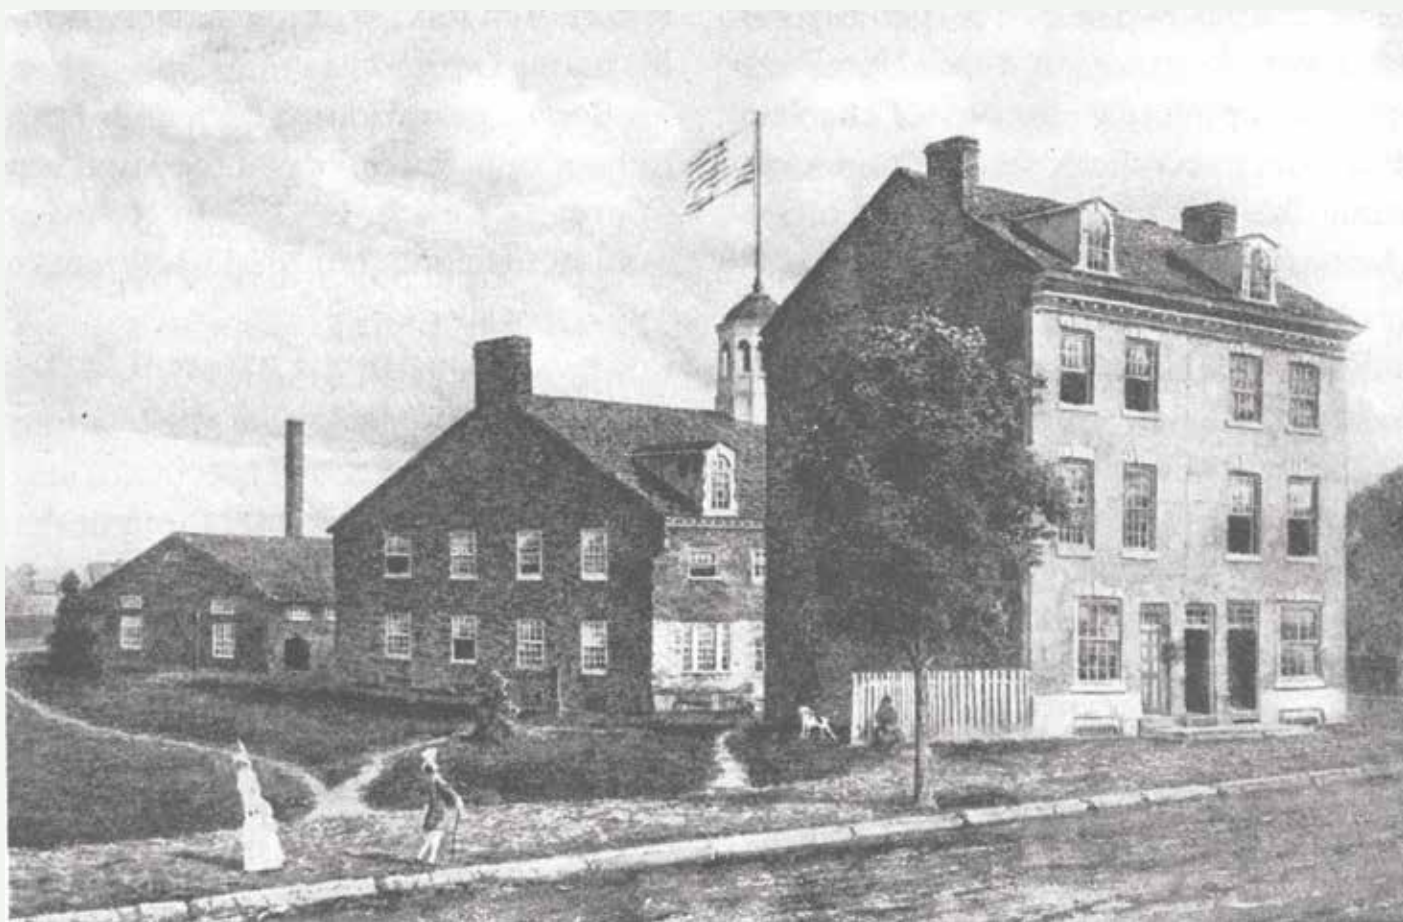

Ex: *Chicago Signature* (Heritage, 8/2013), lot 5870.

**Selections From the Collection of Dr. Donald Knaack.** PCGS# 45712 Base PCGS# 8551

1797 Heraldic Eagle Ten Dollar, AU50  
Better Date, BD-4, Very Scarce Variety

- 5526 1797 Large Eagle, BD-4, High R.4, AU50 NGC. CAC.** Bass-Dannreuther Die State d/b. Four different die varieties exist of the 1797 ten, and each has a different appearance on the eagle's head and neck. For example, the BD-4 eagle has a short tongue, the BD-2 eagle has a long tongue, and BD-1 and BD-3 are without a tongue. All varieties are roughly similar in rarity, although BD-1 is far more costly as it has the obsolete Small Eagle reverse. The present Heraldic Eagle reddish-gold example is well-defined and has light to moderate wear on Liberty's cap and hair. There are no noticeable marks.  
*Selections From the Collection of Dr. Donald Knaack.* NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

1799 Small Stars Obverse Eagle, MS63  
BD-7, High-End Draped Bust Type Coin

**5527** 1799 Small Obverse Stars, BD-7, R.3, MS63 NGC. Bass-Dannreuther Die State f/d, cracked on both sides but most prominently around portions of the obverse periphery. BD-7 is the only Small Stars 1799 eagle variety that is not rare or extremely rare. Approximately 250 to 350 pieces are extant in all grades, but very few are known in pleasing Mint State condition. BD-7 comprises a significant majority of the Small Stars population and, as a type, the Small Stars 1799 eagle is rarer in high grade than its Large Stars counterpart. In MS63, the grade of the present coin, BD-7 is a genuine rarity, and above this grade it is extremely rare.

BD-7 was struck during two different periods, separated by the coinage of the rare BD-8 variety, which shares this obverse die. Early die state examples of BD-7 (obverse states a, b, and c) were struck initially, and the late die states (d and f) were struck during the remarriage of these dies after the obverse was briefly used for BD-8. Thus, the present terminal die state coin was among the final Small Stars 1799 eagles struck before the Large Stars varieties of BD-9 and -10 were created. The remarriage was prompted by the rapid deterioration of the BD-8 reverse, which became unusable before the obverse was ready to be retired.

As a type coin, this Select Mint State BD-7 example is among the finest typically offered at auction, and as a variety candidate, it is a rare and important acquisition. The strike is even and sharp, and the bright yellow-gold surfaces offer satiny luster without significant abrasions. Some lightness of strike on Liberty's central hair curls is hardly noticed and does not affect the reverse eagle.

**Selections From the Collection of Dr. Donald Knaack.** NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1799 Capped Bust Right Eagle, MS62  
Large Obverse Stars, BD-10

**5528** 1799 Large Obverse Stars, BD-10, R.3, MS62 PCGS. Bass-Dannreuther Die State a/a. A nominal mintage of 37,449 Capped Bust Right eagles was produced in 1799, with 10 die varieties known for the date. This coin represents the BD-10 variety, with Large Stars on the obverse, and the leaf touching the right foot of I in AMERICA on the reverse. Possibly as many as 300-400 examples of the BD-10 survive in all grades, making the issue a popular one with type collectors. The obverse die was used to strike the other Large Stars variety of this date, BD-9, while the reverse was later used to strike the BD-1 varieties of 1800 and 1801.

The present coin is an attractive MS62 specimen, with well-detailed design elements and still-lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. A few brown alloy spots show on the obverse. No planchet adjustment marks are evident and the overall presentation is most attractive. Population: 32 in 62, 2 in 62+, 70 finer (9/16). NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1801 BD-2 Eagle, AU55  
No Obverse Spines in Cap

**5529** 1801 BD-2, R.2, AU55 PCGS. CAC. Bass-Dannreuther Die State a/a. BD-2 is easily the most available variety for the 1801 eagles, and it is also the most available early eagle of any date or variety for the type. This example does not show the nine vertical spines in the cap, suggesting it was struck before that often-seen die damage occurred. The point of star 13 is positioned close to the bust, while star 8 is close to the cap, distinguishing the BD-2 from its less-available BD-1 counterpart.

This Choice example is bright-yellow with a hint of green, and untuned. Faint hair-thin lines swirl across both sides. A trace of luster remains at the margins among the obverse stars that are a bit flat in their strike. The central motifs, however, are well brought up and retain their sharpness. There are no heavy marks or to report. CAC adds its green label endorsement. NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

## LIBERTY EAGLES

1849-O Ten Dollar, AU53  
Scarcer, Low-Mintage Issue

- 5530 1849-O AU53 NGC. Variety 2.** One of the secondary characteristics of Variety 2 is only faintly visible: the diagonal die line that pierces the B in LIBERTY. Other diagnostics are no shield ring and partial filling of the top of the 4 in the date. The 1849-O is a scarce O-mint from the 1840s, ranked (by Doug Winter) as fourth scarcest in both overall and high grade rarity. The central striking details are better than often found, and the surfaces are peppered with numerous small, but individually insignificant abrasions. Slightly deeper patina surrounds the devices on each side. NGC ID# 2636, PCGS# 8602

1881-CC Eagle, AU58  
Colorful, Original Surfaces

- 5531 1881-CC AU58 NGC. Variety 1-A.** The only known die pair. The 1881-CC ten dollar is available through MS61, after which it becomes very rare. The present near-Mint State specimen displays very pleasing eye appeal, accounted for by apricot-gold surfaces that retain ample luster and are minimally abraded. Additionally, the design elements are sharply struck, save for the usual softness in the hair above Liberty's ear. Census: 86 in 58 (1 in 58+), 46 finer (9/16). NGC ID# 265X, PCGS# 8692

1882-O Liberty Ten, MS60  
Conditionally Elusive

- 5532 1882-O MS60 NGC. Variety 1.** The only known dies, used to strike 10,820 1882-O eagles. Despite the moderate mintage, Mint State examples are seldom encountered, with just 30 such pieces certified by NGC and PCGS, combined. This one exhibits pleasing yellow surfaces with hints of green, and splendid, reflective fields. None of the myriad trivial marks stands out among the others. Census: 10 in 60, 6 finer (9/16). NGC ID# 55GJ, PCGS# 8697

1883-CC Eagle, AU58  
Variety 2-C

- 5533 1883-CC AU58 NGC. Variety 2-C.** The obverse has die lumps at star 13, and the reverse features a narrow mintmark with both letters over the uprights of the N in TEN. While there is no accurate census data on the individual varieties, only a small number of pieces are finer than this near-Mint representative. In fact, NGC has only certified five finer for all varieties, and PCGS has seen four Mint State pieces. The fields of this pleasing yellow-gold eagle have numerous trivial marks. A trace of wear is noted, with slight weakness of the strike in the usual places. A splendid piece for the advanced collector. Census: 14 in 58 (1 in 58+), 5 finer (9/16). NGC ID# 2667, PCGS# 8700

1890-CC Eagle, MS61  
Late-Date Semikey

- 5534 1890-CC MS61 PCGS. Variety 1-A.** A single die pair is known to have produced 17,500 ten dollar gold coins at the Carson City Mint in 1890. The 1890-CC is undeniably one of the most challenging dates in the latter part of the series because of its rarity in high grades and sustained demand from Nevada branch mint enthusiasts. This lustrous, peach-gold representative showcases complete star radials and nearly full detail on the eagle, fletchings, and olive leaves. Abrasions peppered over each side explain the grade. NGC ID# 266S, PCGS# 8718

1901-S Ten Dollar, MS66+  
Amazing Visual Appeal

- 5535 1901-S MS66+ PCGS. CAC. Breen-7075.** The first two date digits are repunched. A popular choice for type representation, the 1901-S survives to a sizeable extent in MS66 compared to other Liberty Head eagles. However, finer representatives are very rare. This CAC-approved MS66+ example is inarguably among an elite few. Rose-gold centers deepen to orange-gold around the outer areas. An overlay of thick, frosty luster blankets each side. Die cracks around the reverse will be of interest to the specialist. Impeccably preserved and well-impressed. Merely two submissions are finer at PCGS (9/16). NGC ID# 267S, PCGS# 8749

1903-S Eagle, Crisp MS66+  
Smooth Peach-Gold Surfaces

- 5536 1903-S MS66+ PCGS.** The 1903-S has a higher mintage and survival rate in high grades than its Philadelphia and New Orleans cousins, but that should not diminish the importance of this conditionally rare Premium Gem eagle. Coruscating luster embraces smooth peach-gold surfaces, which are devoid of major flaws. Each side exhibits crisp strike detail, although stars 6 and 7 lack their centers and radials. Only a few tiny ticks disturb the otherwise pristine, frosty surfaces. Population: 3 in 66+, 3 finer (9/16). NGC ID# 267X, PCGS# 8754

INDIAN EAGLES

1908-D No Motto Eagle, MS63  
Challenging in High Grade

- 5537 1908-D No Motto MS63 NGC.** Rich orange-gold color gives this Select No Motto 1908-D eagle a warm glow with satiny luster. The strike is sharp, and grade-limiting abrasions are minor. The debut No Motto issue from the Denver Mint is elusive in this grade, and finer pieces are particularly scarce. Census: 36 in 63, 50 finer (9/16). NGC ID# 28GH, PCGS# 8854

1908 Ten Dollar, MS66  
With Motto Type Coin

- 5538 1908 Motto MS66 PCGS.** The 1908 Philadelphia Indian eagle is among the most plentiful With Motto dates in the series in high grade, although this only promotes collector demand among type specialists. The present Superb Gem is conditionally scarce, and finer coins are rarely seen. This piece displays a sharp strike and softly frosted honey-gold luster. A faint graze in the left obverse field near the 7 o'clock rim and a few stray lines on the portrait are all that limit the grade. The radiant cartwheel effect is outstanding. A magnificent first-year With Motto type coin. Population: 37 in 66, 10 finer (9/16). NGC ID# 28GJ, PCGS# 8859

**1909-S Indian Eagle, MS63  
Challenging Conditionally**

- 5539 1909-S MS63 NGC.** The 1909-S Indian eagle is much more difficult to locate in high grade than its mintage of 292,350 pieces would suggest. This impressive Select specimen exhibits well-detailed design elements and lustrous orange-gold surfaces that are remarkably free from large or distracting flaws, aside from two diagonal obverse marks, one on the cheek and one in the lower left field that probably account for the grade. Census: 23 in 63, 58 finer (9/16). NGC ID# 28GP, PCGS# 8864

**1909-S Eagle, Frosty MS64+  
Difficult to Locate This Fine**

- 5540 1909-S MS64+ PCGS.** Although readily accessible through lower Uncirculated grades, the 1909-S becomes a prime condition rarity in MS64. Rose and peach-gold hues combine over this well-struck, eye-appealing example. The surfaces are clearly high-end for the assessment. A couple of stray reeding marks on Liberty's cheek and temple probably limit a full Gem designation. NGC ID# 28GP, PCGS# 8864

**1910-D Ten Dollar, MS66  
Few Seen Finer**

- 5541 1910-D MS66 NGC.** The 1910-D eagle is seldom seen in MS66, and finer pieces are extremely rare. This Premium Gem displays a sharp strike and rich wheat-gold luster. Struck from lightly rusted dies, the coin shows a finely granular appearance rather than a frosty or satiny one as is typical. Census: 44 in 66 (5 in 66+), 6 finer (9/16). NGC ID# 28GS, PCGS# 8866

**1911 Eagle, Dazzling MS67+  
Rare, Tied for Finest at PCGS**

- 5542 1911 MS67+ PCGS.** In Superb Gem condition, most Indian eagle issues are either unknown or prohibitively rare. Even plentiful type-coin issues such as the 1926 and 1932 are essentially uncollectible (or nearly so) in this condition. Among No Motto dates, the 1911 is one of only a handful that — although conditionally very rare — are still collectible in this top condition. PCGS reports 10 Superb Gems, with this piece and one other Plus-graded example standing apart as the finest of the issue at that service (9/16). One look at this piece in-hand and the viewer's eye is dazzled. Radiant, frosty rose-gold and peach-yellow luster cartwheels freely around unabraded fields, illuminating fully rendered design elements. There is a tiny strike through near Liberty's mouth, which should not be mistaken for an abrasion. Eye appeal is outstanding on this stop-and-look-twice No Motto type coin. NGC ID# 28GT, PCGS# 8868

**Better-Date 1914-S Ten Dollar, MS63**

- 5543 1914-S MS63 PCGS.** The 1914-S is a challenging issue in all Mint State grades, but pieces grading finer than the present coin are particularly scarce. This collectible MS63 example displays well-struck devices and rich yellow-gold luster. Light, scattered abrasions are widely hidden by metal flowlines in the fields, produced by worn dies. NGC ID# 28H4, PCGS# 8877

## PROOF INDIAN EAGLE

1909 'Satin Proof' Ten Dollar Indian, PR66  
Seldom Offered in Gem and Finer Condition

**5544** 1909 PR66 NGC. In Mint parlance the proofs that were struck of the new Saint-Gaudens design were called either "bright proofs" or "satin proofs." Those terms remained in use among collectors and dealers through at least World War II. Then at some time after the war, the terms "Roman Gold" and "Roman Finish" were used to describe the gold proofs struck in 1909 and 1910. The first appearance Roger Burdette has found in a numismatic reference was Walter Breen's 1977 *Encyclopedia of United States and Colonial Proof Coins*. As Burdette states in an upcoming work on Saint-Gaudens twenties:

"While 'matte' is a good descriptor of the appearance, it is less informative than the standard term of sandblast which tells us how the surface was made and conveys a metal image of the dull non-reflective appearance. Breen's Roman proof term defies any logical explanation. It refers to no medallic finish type and provides no information about the appearance or method of manufacture."

And yet, the Roman Finish and Roman Gold proof terminology have endured for decades and today seem firmly entrenched in the numismatic lexicon.

After a disappointing initial year for proofs in 1908, in which 116 matte proofs were struck and sold, demand and production dropped significantly the following year with only 74 "Roman Gold" (i.e. satin) proofs produced. Curiously, even though the mintage was small for 1909 proof tens, the number of survivors is high relative to other 1908-1915 proof eagles. Akers ranks this year as sixth out of the eight issues in terms of availability. However, high-grade examples (PR65 and finer) are seldom encountered. Our records indicate that there have only been 10 auction appearances of a PR65 1909 ten dollar since 1990, including both major services as well as a couple of uncertified pieces. The numbers taper predictably in PR66 with only six auction appearances, the last in 2005 until the present coin. Seven PR67 coins have been auctioned since 1982.

This piece displays an attractive sheen characteristic of its proof finish. The underlying brightness is definitely present, as one would expect, but there is a confirmed presence of light reddish patina with occasional fleeting glimpses of lilac on each side. Only two post-strike contact marks are present, marks that undoubtedly influence the grade. One is a shallow horizontal abrasion across the high point of the Indian's cheek. The other is a short mark below and to the right of the second T in TRUST in the left reverse field. Still, exceptional quality and rarely found finer. Census: 9 in 66 (1 in 66 ★), 6 finer (9/16). NGC ID# 28HF, PCGS# 8891

## LIBERTY DOUBLE EAGLES

## 1850 Double Eagle, Lustrous AU55

- 5545** 1850 AU55 NGC. The 1850 double eagle is the debut issue of this denomination, struck largely with California gold. The bright yellow-gold appearance of these coins is characteristic of the ore that was mined on the West Coast during that period. This Choice AU coin displays medium patina with average luster remaining in the protected regions. The surfaces are pleasantly smooth and appealing. NGC ID# 268F, PCGS# 8902

1850-O Twenty Dollar, AU50  
Popular First Year of Issue

- 5546** 1850-O AU50 NGC. **Variety 1.** This is the scarcest of the three varieties of the year. While the issue is not particularly scarce, it is popular with type collectors as the first O-mint twenty produced. Approximately 500-600 pieces are estimated to have survived in all grades of the 1850-O, the vast majority in VF-XF. The surfaces are peppered with numerous small to medium-sized abrasions on each side, as expected from this issue. The strike definition is notably soft on the peripheral stars around the rim on the obverse. An interesting example of this Type One New Orleans twenty. Purchased from *Eastern Numismatics*, flip included. NGC ID# 268G, PCGS# 8903

1851 Double Eagle, MS62  
Elusive in Mint State

- 5547** 1851 MS62 PCGS. CAC. The 1851 is a high-mintage issue from the inaugural period of the double eagle denomination, but few examples survive in Mint State, and this date is rare finer than MS62. In 1850 and '51, approximately 250,000 ounces of gold (mostly dust) was being mined monthly in California, with limited options available to miners and bankers for converting it into usable coin. Various private coiners and later the United States Assay Office in San Francisco consumed part of the ore, but the majority was either shipped abroad or transported via steamship to New Orleans and Philadelphia for coinage, mostly into double eagles. The San Francisco branch mint was not authorized until mid-1852, and did not become operational until April 1854. Thus, the double eagle mintages at Philadelphia in 1850 through '53 were unusually high, and these dates are among the more plentiful Liberty double eagle issues from the period.

This 1851 representative is well-struck, with softly frosted, orange-gold luster. No major abrasions are present, and we instead note just light chatter in the fields that limits the grade. Struck from slightly rotated dies. Population: 62 in 62, 16 finer. CAC: 8 in 62, 2 finer (9/16). NGC ID# 268H, PCGS# 8904

1851-O Twenty Dollar, XF  
Popular Southern Mint

- 5548 1851-O XF40 NGC. Variety 2. Five different mints struck Liberty double eagles, and despite the popularity of Carson City twenties, New Orleans examples are generally most desirable. The facility struck the series for its first twelve years, and again in 1879, but mintages were very low except for the initial four issues, which are collectible but scarce. The present butter-gold representative retains glimmers of luster, particularly within the rays and shield. Minor marks are prevalent but none require singular mention. NGC ID# 268J, PCGS# 8905

1852 Double Eagle, MS61  
Peripheral Reverse Die Cracks

- 5549 1852 MS61 PCGS. Die cracks join the tops of all letters in the statutory legend on the reverse of this piece. Splashes of steel toning appear on the devices with green patina in the fields of this attractive Mint State Type One double eagle. Scattered marks are expected at this grade level, although none are individually significant. Population: 42 in 61, 50 finer (9/16). NGC ID# 268K, PCGS# 8906

1857-S Twenty Dollar, MS61  
Bright and Lustrous

- 5550 1857-S MS61 NGC. Although not pedigreed to the shipwreck, this Mint State 1857-S double eagle has the luminous, textured luster that is common to S.S. *Central America* treasure coins. The strike is sharp, and surprisingly few abrasions are seen — only grazes on Liberty's cheek prevent a finer grade. This coin will be appealing to the budget-conscious collector seeking a Mint State example of this famous issue. NGC ID# 2696, PCGS# 8922

1857-S Liberty Twenty, MS63  
Narrow Serif, Variety 20C

- 5551 1857-S MS63 PCGS. Narrow Serif, Variety 20C. Ex: S.S. *Central America*. SSCA 3935. Before the recovery of the S.S. *Central America*, the 1857-S Liberty double eagle was a rare issue in all Mint State grades. Fortunately for present-day collectors, more than 5,000 examples of the 1857-S were recovered from that famous shipwreck, many of them particularly well-preserved. The surfaces of this attractive Select specimen are lightly abraded, aside from a near-vertical scratch on Liberty's cheek, with vibrant mint luster and sharply detailed design elements throughout. Eye appeal is outstanding. The 1857-S is listed among the *100 Greatest U.S. Coins*. NGC ID# 2696, PCGS# 8922

**1857-S Twenty Dollar, MS65**  
**Ex: S.S. *Central America***

**5552 1857-S MS65 PCGS. CAC. Bold S, Variety 20B.** Ex: S.S. *Central America*. SSCA 1710. A terrible tragedy accounts for the existence of essentially every 1857-S double eagle available today. Prior to the discovery of the S.S. *Central America* in 1988, which sank off the coast of North Carolina in September 1857, only a handful of high-grade representatives were known. The wreckage yielded more than 5,300 examples, most in Uncirculated condition. The hoard also allowed for the extensive study of die varieties. Bob Evans examined 5,107 1857-S double eagles and found eight distinct die varieties. The population of Variety 20B (Bold S mintmark) was 1,071 coins, second-highest after Variety 20A, which totaled 2,233 coins.

Rose-gold color dominates the centers, while orange-gold hues hug the rims. Coruscating frost swirls over each side, giving this spectacular Gem Type One double eagle the appearance of having been freshly minted. The surfaces are exceptionally clean, and the overall impression is striking. This is a premier example that will surely delight. NGC ID# 2696, PCGS# 8922

**1860-S Liberty Head Twenty, AU55**  
**Finer Survivors are Scarce**

**5553 1860-S AU55 PCGS. CAC.** The mintage of 544,950 pieces saw heavy circulation on the West Coast, where few coins were preserved in high grades. This Choice About Uncirculated example retains a portion of its original mint luster and pleasing medium, natural-gold color. Light abrasions and surface chatter include a short mark near the ear and a grouping of shallow marks near stars 1 and 2. Still, the eye appeal is excellent as indicated by the CAC endorsement. Population: 58 in 55, 81 finer. CAC: 22 in 55, 34 finer (9/16). NGC ID# 269F, PCGS# 8931

**1866-S No Motto Twenty, XF45**  
**Final Type One Issue**

**5554 1866-S No Motto XF45 NGC.** San Francisco Mint officials struck a relatively small quantity of No Motto double eagles in 1866 before the new With Motto dies were received. That total came to 120,000 coins, of which maybe 300 pieces survive. Examples are extremely challenging to acquire any finer than this lovely Choice XF representative. The recesses emit glimpses of mint luster that enliven red and green-gold surfaces. Most of the stars exhibit well-delineated radial lines, while Liberty's hair curls are typically soft. Myriad marks do not diminish the importance of this final-year offering. NGC ID# 269W, PCGS# 8945

### 1867 Double Eagle, MS61 Rose-Golden Hues

- 5555 1867 MS61 PCGS.** The year 1866 saw a significant modification to the Liberty double eagle design with the addition of the motto IN GOD WE TRUST above the eagle, creating a new collectible subtype. Production fell to 251,015 pieces in the second year of Type Two production. The 1867 is scarce in Mint State, and there are only a handful of coins finer than MS62. Each side offers glittering frost, and rose-golden color. Well-defined with myriad abrasions. NGC ID# 269Z, PCGS# 8951

### 1867 Liberty Double Eagle, MS62 Nice Type Two Example

- 5556 1867 MS62 NGC.** From a mintage of 251,015 pieces, the 1867 Liberty double eagle can sometimes be found in lower Mint State grades, probably because of a small hoard that surfaced in the 1960s. This makes the 1867 a popular Type Two issue among type collectors. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Census: 41 in 62, 3 finer (9/16). NGC ID# 269Z, PCGS# 8951

### 1867-S Double Eagle, AU58

- 5557 1867-S AU58 PCGS.** Large S, one of three mintmark sizes confirmed for the issue. This yellow-gold double eagle offers substantial luster and shows only a hint of wear on the shoulder curl and wingtips. Both sides display many small marks consistent with the grade, but only a thin horizontal line above the ear merits mention. The 1867-S is collectible in VF and XF grades, but examples approaching Mint State are very scarce. NGC ID# 26A2, PCGS# 8952

### 1868-S Double Eagle, AU58

- 5558 1868-S AU58 PCGS.** This lovely near-Mint Type Two double eagle exhibits splashes of greenish-steel patina on both sides, attesting to its originality. The surfaces are pleasing with minimal marks and nearly full frosty yellow luster. PCGS has only certified 32 finer examples of this conditionally elusive twenty (9/16). NGC ID# 26A4, PCGS# 8954

### 1872 Type Two Twenty, MS60 Conditionally Scarce

- 5559 1872 MS60 PCGS.** This lovely Type Two double eagle has frosty yellow luster with considerable greenish-steel patina on each side that attests to its originality. Although myriad surface marks are evident on each side, none stand out from the rest. The 1872 had a quarter-million coin mintage, and few survive in Mint State grades. NGC ID# 26AD, PCGS# 8963

1873-CC Twenty Dollar, AU50  
Obtainable Type Two Carson City Issue

- 5560** 1873-CC AU50 NGC. **Variety 1-A.** This variety shows no trace of the misplaced digit in the dentils below 73. The 1873-CC had a moderate mintage of 22,410 pieces, but the recent appearance of a small hoard has increased the numbers available in all grades to 400-500 examples, making this a more obtainable Type Two CC twenty. A thin outline of mint luster surrounds the devices, as expected from an AU50, and each side displays numerous small to medium-sized abrasions, as usually seen on this issue. Yellow-gold color is present with little reddish patina, as sometimes seen on CC twenties. NGC ID# 26AJ, PCGS# 8968

1874 Double Eagle, MS61  
Rare in Finer Condition

- 5561** 1874 MS61 NGC. CAC. This Type Two Philadelphia issue is scarcer in Mint State than many collectors realize, as it does not receive the attention of Carson City and San Francisco issues from this period. The present coin is sharply struck and lustrous with frosty yellow-gold luster. Scattered abrasions limit the grade but none are individually noteworthy. NGC lists only 26 numerically finer submissions (9/16). NGC ID# 26AN, PCGS# 8970

1874-CC Double Eagle, AU55  
Type Two Carson City Gold

- 5562** 1874-CC AU55 PCGS. CAC. **Variety 3-A.** Prooflike flash remains around the peripheral elements of this About Uncirculated Carson City double eagle. While the 1874-CC is relatively available in terms of Carson City gold, demand exceeds the supply of Choice coins. Abrasions and small marks are scattered lightly about the obverse and reverse, but there are no heavy marks. A glancing rim knock below the 8 in the date is noted. Pleasing brassy-gold color typical of the Nevada Territory branch mint shows a sharp strike and nice eye appeal. CAC endorsed. Population: 93 in 55, 94 finer. CAC: 14 in 55, 9 finer (9/16). NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU58  
Popular Carson City Twenty

**5563 1874-CC AU58 PCGS.** The six-figure mintage of 115,085 pieces makes the 1874-CC an available issue for collectors. Some of the mintage accumulated in foreign hoards, avoiding wear from circulation (but not bagmarks from transport and counting). The surfaces of this nearly Mint State twenty shows the sharpness of an Uncirculated piece, but friction and coin-on-coin contact account for the assigned AU58 grade.

Apricot-gold color join deep toning on the high points to confirm the original surfaces and color. Numerous bagmarks dot the surfaces, including a pair of reeding marks near star 5. Pale rose highlights are most visible on the central reverse, while fresh mint luster shines through the naturally acquired patina on both sides. Despite the relatively large mintage, the 1874-CC remains scarce in Mint State. This borderline Uncirculated example will fit nicely in any high-grade set. Population: 74 in 58 (1 in 58+), 20 finer (9/16). NGC ID# 26AP, PCGS# 8971

1875 Twenty Dollar, Radiant MS63  
Great Eye Appeal, Extremely Rare Any Finer

**5564 1875 MS63 PCGS.** A lovely Type Two twenty with peach and rose-gold coloration, this Select example boasts radiant mint frost that produces wonderful eye appeal. The stars show complete centers, and the eagle's neck and wing feathers are crisply detailed. Scattered abrasions account for the grade, but locating a better-preserved example would prove to be a major undertaking. Population: 77 in 63 (2 in 63+), 4 finer (9/16). NGC ID# 2547, PCGS# 8973

1875-CC Twenty Dollar, AU53  
Popular Type Two Issue

**5565 1875-CC AU53 NGC. Variety 9-A.** The 1875-CC is one of the more available CC twenties, due mostly to its mintage of 111,151 pieces. It is also a member of a select club of Type Two twenties, and as such is always in demand as both a CC twenty and a Type Two. Honey-gold luster outlines the design elements of this nicely struck coin. Smooth for the grade apart from a couple of moderate marks on the cheek.

*Ex: National Money Show Signature (Heritage, 3/2008), lot 1685.* NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, AU53  
Original Coloration

**5566 1875-CC AU53 PCGS. CAC. Variety 1-B.** About Uncirculated 1875-CC double eagles are available overall, but pieces with original coloration and a CAC endorsement are scarce. This is just such a coin. The strike is bold, and high-point wear is minimal. Scattered abrasions are not unusual for the issue and grade. This piece displays lustrous olive-gold fields and has a pleasing old-time appeal. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, AU55  
Lustrous and Original

**5567** 1875-CC AU55 PCGS. CAC. Variety 4-C. Although plentiful in AU condition, the 1875-CC double eagle experiences high demand from type collectors seeking a single representative from the Carson City Mint. This CAC-endorsed Choice AU representative offers lustrous fields and original green-gold coloration. Scattered abrasions accompany the grade but are expected on a circulated Carson City double eagle. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, MS61  
Carson City Type Issue

**5568** 1875-CC MS61 NGC. Variety 6-B. Die lines through the mintmark and obverse star 11 confirm the die pairing. The Carson City Mint struck double eagles every year during the 1870s, but the mintages were low when compared with San Francisco production. The 1875-CC twenty dollar output was 111,151 pieces, less than one-tenth the 1875-S mintage. Nonetheless, the 1875-CC is collectible in Mint State, courtesy of foreign bank holdings, which held double eagles as reserves during the first half of the 20th century. The present orange-gold example has a good strike and the expected number of small to moderate abrasions. NGC ID# 26AT, PCGS# 8974

1875-CC Twenty Dollar, MS62  
Conditionally Scarce in This Grade

**5569** 1875-CC MS62 PCGS. Variety 2-B. Intense and vibrant yellow-gold luster beams from the frosty surfaces of this Mint-fresh Carson City twenty. Faint glimpses of orange toning add to the outstanding eye appeal. Only a handful of CC-Mint double eagles are reasonably collectible in Mint State, and the 1875-CC never fails to attract the attention of type collectors as well as series specialists.

The present coin is particularly attractive for the MS62 level. The issue is not always well-struck — and this example shows minor incompleteness at the hair bun's highest curls — but it is sharp elsewhere throughout the obverse and reverse devices. A small reeding mark beneath the corner of the eye and some deep alloy speckles in the hair beneath star 10 are the sole marks to mention. PCGS reports just 30 finer examples, all at MS63 except for a single MS64 (9/16). NGC ID# 26AT, PCGS# 8974

**1876-CC Double Eagle, AU50**  
**Lustrous Fields**

**5570** 1876-CC AU50 PCGS. **Variety 3-A.** The 1876-CC is among the most plentiful issues in the Carson City short set of double eagles, ideal for the collector seeking a single Type Two representative from this mint. The present coin displays original olive-gold coloration with moderate luster in the fields. The devices are sharp, although scattered abrasions appear on each side. NGC ID# 26AW, PCGS# 8977

**1876-CC Twenty Dollar, AU58**  
**Lustrous and Reflective**

**5571** 1876-CC AU58 PCGS. **CAC.** More than 50% of the fields retain prooflike reflectivity on this near-Mint twenty. With the highest mintage of any Carson City double eagle, the 1876-CC is readily available in all circulated grades but seldom appears with the eye appeal and naturally alluring surfaces of the present sharply struck coin. Brassy-gold surfaces display scattered, deeply toned accents (some describe it as “dirty” gold), prized by connoisseurs as evidence of the coin’s originality. CAC endorsed for quality. NGC ID# 26AW, PCGS# 8977

**1877-CC Twenty Dollar, AU53**  
**Bright Gold Surfaces**

**5572** 1877-CC AU53 NGC. **Variety 3-A.** Carson City double eagles invariably have significantly lower mintages than their San Francisco cousin of the same date. For example the 1877-CC emission was limited to 42,565 pieces, while the 1877-S production was a bountiful 1,735,000 pieces, more than 40 times greater than its Nevadan counterpart. The present lightly abraded sun-gold ‘77-CC twenty has a good strike and partial cartwheel luster on the reverse. NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty, AU58**  
**Impressive Type Three Example**

**5573** 1877-CC AU58 PCGS. **Variety 1-A.** A mintage of 42,565 piece — lower than the 1874-CC, 1875-CC, or the 1876-CC — joins the first-year Type Three design (changing TWENTY D. to TWENTY DOLLARS) to make the 1877-CC a challenging issue in the double eagle series. The typical example grades XF or low AU, with near-Mint or Uncirculated pieces scarce-to-rare. As is often the case with Carson City double eagles, abrasions are often the grade-limiting factor.

Only minor abrasions are visible on the fields and devices of this still-lustrous AU58 example. A bit of rub on Liberty’s hair strands is visible. Pleasing yellow-gold surfaces display faint peach-gold accents in protected areas around the sharply defined motifs. A streak of deep-charcoal buildup on the obverse remains untouched, a testament to the coin’s natural surfaces. Population: 58 in 58 (1 in 58+), 31 finer (9/16). NGC ID# 26AZ, PCGS# 8983

**1878-S Twenty Dollar, MS62  
Semiprooflike Obverse**

- 5574 1878-S MS62 PCGS.** Mike Fuljenz, writing in *Type Three Double Eagles 1877-1907*, notes: "Today, the 1878-S is often available in MS60 to MS61 and scarce in MS62. In properly graded MS63, this remains a rare issue with probably fewer than twenty known." This strongly S-mint double eagle has a semiprooflike yellow-gold obverse, while the reverse is lustrous with rose-gold coloration. Abrasions are peppered over each side. There are 10 finer submissions at PCGS (9/16). NGC ID# 338K, PCGS# 8987

**1881-S Double Eagle, MS62  
Reddish-Gold Mint Luster**

- 5575 1881-S MS62 NGC.** Original, frosty rose-gold luster is the hallmark of this Mint State 1881-S double eagle, illuminated well-struck design elements. Scattered abrasions account for the grade, although a finer coin will be almost impossible to locate. The 1881-S twenty is scarce in Mint State, and NGC and PCGS combined list just 29 coins finer than the present example. Census: 80 in 62 (1 in 62+, 1 in 62 ★), 4 finer (9/16). NGC ID# 26BD, PCGS# 8995

**1883-CC Twenty Dollar, AU50  
Refreshingly Original Coloration**

- 5576 1883-CC AU50 PCGS. Variety 2-A.** The rustic eye appeal of Old West gold survives on the original surfaces of this About Uncirculated double eagle. Olive-gold toning displays attractive orange accents that surround the raised elements, while subtle mint luster lurks beneath the natural patina. Remarkably few bagmarks exist for the AU50 level, although moderate wear on the high points is consistent with the assigned grade. NGC ID# 26BH, PCGS# 8999

**1883-CC Twenty Dollar, AU55  
Good Choice for a Carson City Type Coin**

- 5577 1883-CC AU55 NGC. Variety 2-A.** In addition to the primary characteristic for attribution which is the location of the mintmark partially over the D in DOLLAR, there are secondary attributes present also including two die chips near star 9 and between stars 8 and 9 and a spike from the dentils above the E in STATES. The 1883-CC is a moderately available CC twenty with possibly as many as a thousand pieces extant in all grades. It is one of the better-struck CC twenties, as seen here, and each side displays rich reddish-gold patina. NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, AU58  
Remarkably Unabraded for the Grade**

- 5578 1883-CC AU58 PCGS. CAC. Variety 2-A.** The surfaces are noticeably less bagmarked than even some Mint State examples of this popular Carson City issue. Reddish-gold luster peeks out around the sharply struck portrait and creeps into the surrounding fields on the obverse, while the reverse displays a more generous portion of remaining mint luster. A pair of short marks — one beneath the chin, the other on the neck — are noted, but they are of little consequence for the grade. Orange and green accents enhance the natural, medium-gold coloration. NGC ID# 26BH, PCGS# 8999

**1884-CC Type Three Twenty  
Attractive Near-Mint Example**

- 5579 1884-CC AU58 PCGS. Variety 1-A.** The 1884-CC is readily available in circulated and lower Mint State grades, yet it retains strong demand from Carson City specialists and type collectors. Nearly full mint luster remains across the briefly circulated surfaces with sparkling, sun-gold color and relatively few marks for the grade. A sharp strike completes the bold eye appeal. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, MS62  
Few Known Finer

**5580 1884-CC MS62 PCGS. Variety 1-A.** The availability of Uncirculated 1884-CC double eagles increased as late as the early 1990s with the return of European hoard coins to the American numismatic market. But most of the Mint State pieces available to collectors today grade only MS60 or MS61. In MS62, the 1884-CC is seldom seen, and likely not more than a dozen finer representatives are known.

The scarcity of this issue in high grade is accentuated by strong demand from collectors pursuing the accessible date in the Carson City double eagle short set. And for the type collector, the 1884-CC is an ideal CC-mint representative of the Type Three design. This example displays sharp motifs amid vibrant, frosty yellow-gold luster. Light chatter limits the grade, but there are no singular abrasions. Population: 58 in 62, 6 finer (9/16). NGC ID# 26BK, PCGS# 9001

1888-S Double Eagle, MS63+  
Frosty and Appealing

**5581 1888-S MS63+ PCGS.** The Plus-designation sets this Select 1888-S double eagle apart from its peers, and finer coins are seldom available. This piece is sharply struck and lustrous with yellow-gold surfaces that show minor, grade-consistent marks. It would be difficult to locate a visually finer example below the expensive MS64 level. NGC ID# 26BU, PCGS# 9009

1888-S Twenty Dollar, MS63+  
Seldom Seen Finer

**5582 1888-S MS63+ PCGS.** Although examples of the 1888-S double eagle were discovered in the Saddle Ridge Hoard, no significant quantities of Mint State pieces were added to the population reports. This issue remains scarce above MS63 and prohibitively rare in Gem condition. The present Plus-graded Select example displays a sharp strike and frosty yellow-gold luster. Light surface grazes contribute to the grade. NGC ID# 26BU, PCGS# 9009

**1888-S Double Eagle, MS65**  
**One of Two Top-Graded Examples**  
**Worthy of a Premium Bid**

**5583 1888-S MS65 NGC.** Although the 1888-S is among the most often seen S-mint double eagles from the decade, it is extremely rare in MS65. In fact, our records suggest that this is one of only two Gems certified at NGC and PCGS combined. The NGC Census records three MS65 grading events, but one of those is a resubmission. In accordance with its top-rated status, this amazing twenty dollar gold piece is undoubtedly deserving of a premium bid.

Spectacular mint frost issues from delightful rose and peach-gold surfaces. The fields are exceptionally clean, while the cheek shows a few faint, wispy marks. Stars 1 to 3 are incomplete, though the others are nearly fully defined. Liberty's hair strands and the eagle's feathers are similarly well-impressed. A top-quality example sure to be a highlight in even the finest collection of Liberty Head double eagles. NGC ID# 26BU, PCGS# 9009

**1889-CC Twenty Dollar, AU53**

**5584 1889-CC AU53 NGC. Variety 1-A.** A mere 30,945 pieces were struck for this Carson City issue, struck after the facility resumed coinage following the election of Republican President Benjamin Harrison. The 1889-CC is one of the more available twenties from this widely collected Western mint. This is a briefly circulated honey-gold representative that possesses a bold strike and only moderate marks. The upper right reverse displays a number of tiny aqua spots. NGC ID# 26BV, PCGS# 9011

**1889-CC Twenty Dollar, Near-Mint**

**5585 1889-CC AU58 NGC. CAC. Variety 1-A.** In early 1889, the White House changed ownership from Democrats to Republicans. The new President, Benjamin Harrison, re-authorized coinage at the Carson City facility, which had been downgraded to assay office status under Grover Cleveland. For the first time in four years, CC-mint double eagles were coined in 1889, but the mintage was only 30,945 pieces. The present canary-gold near-Mint example displays substantial luster, especially on the reverse. No marks are noticeable, and flecks of dirt on the reverse ensure the originality. NGC ID# 26BV, PCGS# 9011

**1890 Twenty Dollar, MS63**  
**Rarely Encountered This Fine**

**5586 1890 MS63 NGC.** Boasting a small mintage of 75,940 pieces, the 1890 double eagle is elusive in Mint State and borderline rare at the MS63 level. Finer pieces are extremely rare. This Select example displays frosty yellow-gold luster and sharp design elements. Light surface grazes contribute to the grade. Census: 18 in 63, 4 finer (9/16). NGC ID# 26BX, PCGS# 9013

1890-CC Double Eagle, MS61  
Elusive Mint State Example

1891 Double Eagle, Semiprooflike AU58  
Exceedingly Rare This Fine  
Only 1,390 Coins Struck

**5587 1890-CC MS61 PCGS. Variety 1-A.** Lapped reverse, as usual, showing weakened tailfeathers on the eagle. Although the 1890-CC double eagle is a plentiful Carson City issue in circulated condition, Mint State pieces remain elusive. This MS61 coin is in the usual grade level of Uncirculated examples, although its eye appeal surpasses expectations. The strike is bold, and vibrant, frosty yellow-gold luster rolls around lightly abraded surfaces. A lack of any singular abrasions separates this piece from the typical MS61-graded double eagle. A small die grease mark near the eagle's head (as struck) serves as a pedigree identifier. The availability of this issue declines sharply in finer condition, where it is out of reach for most enthusiasts. NGC ID# 26BY, PCGS# 9014

**5588 1891 AU58 NGC.** The 1891 double eagle has received considerable demand and heraldry in recent years due to its scant mintage of 1,390 pieces. PCGS reports "about 100 known," although gold specialist Mike Fuljenz, in *Type Three Double Eagles*, second edition (2015), writes: "It is likely that the total number known for business-strikes is around 75 pieces, and most are in the EF40 to AU50 grade range. The 1891 is very rare in the higher AU grades and extremely rare in uncirculated with an estimated 10 to 12 known." Our Permanent Auction Archives contain only 36 previous offerings of this date, almost exclusively in the AU50-AU58 grade range, suggesting that Fuljenz's rarity estimate is accurate. If even a 10% resubmission rate is assumed, the combined NGC and PCGS certified population of 84 coins does not contradict these findings. The 1891 is an issue that is absent from the Smithsonian Institution in circulation strike format.

The present near-Mint example displays a sharp strike and characteristically semiprooflike fields. Rich straw-golden hues dance in the reflective surfaces, and barely a brush of high-point friction occurs over the relief elements. Scattered light marks are not unusual for the grade. Recently, a low-end Uncirculated example garnered more than \$82,000 at auction — FUN Signature (Heritage, 1/2014), lot 5560. The present coin could easily flirt with the half-century mark in light of its superior eye appeal and quality. Census: 17 in 58, 5 finer (9/16). NGC ID# 26C2, PCGS# 9016

1893-CC Double Eagle, Lustrous AU58  
The Final Carson City Issue

**5589 1893-CC AU58 PCGS. CAC. Variety 2-A.** The order to suspend coinage operations at the Carson City Mint came on June 1st, 1893, in response to the reelection of President Grover Cleveland (whose previous administration had been responsible for the Nevada mint's closure in 1885) as well as decreased bullion production from the Comstock, which had been much of the reason for the mint's establishment in the first place. The San Francisco Mint took over coinage production for the region.

Double eagle coinage in the first half of 1893 amounted to only 18,402 coins, of which an unusually high number of survivors exist today. This issue did not circulate extensively, and the typical survivor grades in the AU range. Nonetheless, its status as the final double eagle from the Carson City Mint drives strong collector demand, making it a challenging issue in the CC-mint short set. The present near-Mint coin displays a sharp strike and lustrous straw-gold fields. Light surface chatter masks a brush of high-point friction that accounts for the grade. NGC ID# 26C9, PCGS# 9023

1896 Double Eagle, MS65  
Tied for the Finest Certified

**5590 1896 MS65 PCGS.** The two major grading services, PCGS and NGC, have combined to certify just 16 Gem examples of this important, underrated issue, and none have received a higher grade. The Philadelphia Mint coined 792,535 of these pieces, explaining the considerable availability in lower Mint State grades, mostly from overseas shipments that rarely yielded high quality examples. The mintage may also explain why this piece is underrated. This frosty and highly lustrous Gem exhibits brilliant yellow-gold surfaces and bold design elements. Population: 7 in 65, 0 finer (9/16). NGC ID# 26CF, PCGS# 9029

**1900-S Double Eagle, MS64+  
Very Rare This Well-Preserved**

- 5591 1900-S MS64+ PCGS.** This 1900-S double eagle conforms to the standards of most S-mint twenties from the period. The strike is needle-sharp with bold star radials, crisply delineated hair strands, and strong feather definition on the eagle. Frosty luster radiates over medium-yellow gold surfaces, contributing to the excellent aesthetic quality. This piece is uncharacteristically clean, however, with only two noticeable marks in the lower obverse field. The issue is very scarce in MS64, and this MS64+ representative approaches the finest certified submissions. There are merely four higher grading events at PCGS (9/16). NGC ID# 26CR, PCGS# 9038

**1905 Double Eagle, MS62+  
Low-Mintage Issue**

- 5592 1905 MS62+ PCGS. CAC.** Frosty yellow-gold luster delivers distinctly original eye appeal on this Plus-graded, CAC-approved 1905 double eagle. The strike is sharp, and grade-limiting abrasions are light and dispersed. The 1905 comes from a small mintage of 58,919 pieces, and coins grading finer than the present piece will be out of reach for most enthusiasts. NGC ID# 26D2, PCGS# 9047

**1905-S Twenty Dollar, MS65  
Rarity in This Grade**

- 5593 1905-S MS65 PCGS.** The 1905-S double eagle was produced to the tune of nearly 2 million coins, a production that would seem generous were it not side-by-side with the gargantuan mintages of the 1904 Philadelphia and San Francisco issues, totaling well over 11 million pieces between them. The 1905-S was largely exported (and survivors later reimported), and all that bag travel creates surface issues; most survivors are in lower Mint State grades, and Gems such as this piece are rare. Glowing luster runs over reddish-orange surfaces that offer bold eye appeal, a sharp strike, and minimal distractions of any sort. A great-looking alternative to the 1904 or 1904-S issues for type purposes. Population: 11 in 65, 1 finer (9/16). NGC ID# 26D3, PCGS# 9048

**1906-D Twenty Dollar, MS64+  
Among the First Denver Products**

- 5594 1906-D MS64+ PCGS.** The 1906-D is numismatically significant, though it often goes unrecognized as such. The 620,520 double eagles struck at the Denver Mint in 1906 represent the first twenty dollar gold coins from the Colorado facility, which opened on February 1. This Plus-designated Choice double eagle is sharply detailed and satiny with marvelous peach and rose-gold color. PCGS reports 13 submissions finer (9/16). NGC ID# 26D5, PCGS# 9050

**1906-D Double Eagle, MS64+  
Rare in Finer Grades**

- 5595 1906-D MS64+ PCGS.** Available in MS64, the 1906-D double eagle becomes conditionally rare at the Gem level. This Plus-designated near-Gem showcases a sharp strike and vibrant satin luster. A few light marks on the cheek determine the grade but pose minimal distraction. PCGS has seen 13 finer representatives (9/16). NGC ID# 26D5, PCGS# 9050

**1907-S Twenty Dollar, MS64+  
Final-Year S-Mint Issue**

- 5596 1907-S MS64+ PCGS.** Plentiful through MS64, the 1907-S Liberty double eagle becomes a major condition rarity in MS65. This Plus-graded near-Gem balances the two extremes, offering strong visual appeal and surface quality for an affordable price. The coin is well-struck and frosty with rose-gold interiors that cede to lighter green-gold and yellow peripheries. Abrasions are minimal, as the Plus designation indicates. NGC ID# 26D9, PCGS# 9054

**HIGH RELIEF DOUBLE EAGLES**

**1907 High Relief Twenty Dollar, MS62  
Pronounced Wire Rim Around Each Side**

- 5597 1907 High Relief, Wire Rim MS62 NGC.** The wire rim is pronounced and extends around approximately 50% of both the obverse and reverse of this piece. The surfaces display the usual satiny luster, and the devices are crisply defined. Traces of pink color are seen, particularly on the obverse, as the coin rotates under at light at certain angles. Kept in the MS62 category by a couple of noticeable abrasions in the right obverse field. It is always a pleasure to offer a selection of America's most beautiful coins in the same auction sale.  
Ex: *Denver Signature* (Heritage, 8/2006), lot 5698. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle, MS65  
Significant 'Fin' or Wire Rim Around Each Side**

**5598 1907 High Relief, Wire Rim MS65 PCGS.** By the end of the 19th century, the uniform texture and mechanical precision of form that that Neoclassicism demanded of our coinage was beginning to grow tired. New textures like the matte surfaces found on non-contrasted proofs began to replace the 19th century ideal of deep mirrors and contrast. The most prominent development was ushered in by the adoption of Saint-Gaudens' new ten and twenty dollar gold coins — designs that were not suitable for die polishing and mirrored proofs. Both were classically inspired and showed a "freedom of hand" lacking in previous designs by James Longacre and Charles Barber. Augustus Saint-Gaudens was only the first artist to use realism in coin design; though many of his former students went on to drastically redefine American coinage over the next 14 years.

This Gem example displays glowing, satiny mint luster with no apparent contact marks on either side. The strike details are complete throughout and a significant amount of the rim on each side shows a prominent "fin" or thin extrusion of metal, which accounts for the so-called "wire rim."

**From The Cherny Collection.** NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle  
Flat Rim, Uncirculated Details**

**5599 1907 High Relief, Flat Rim — Improperly Cleaned — NGC Details. Unc.** No hairlines are readily apparent on this lustrous lemon-gold High Relief twenty. The strike is bold, and the only mark worthy of passing mention is on the reverse rim at 6 o'clock. The eye appeal surpasses many examples certified as Mint State. Designated as a Flat Rim variety by NGC, though a wire rim is present between 1 and 3 o'clock on the obverse, and between 5 and 10 o'clock on the reverse. NGC ID# 26F2, PCGS# 9136

**MCMVII High Relief Twenty  
Uncirculated Details**

**5600 1907 High Relief, Flat Rim — Improperly Cleaned — NGC Details. Unc.** The present boldly struck olive-gold High Relief double eagle is free from hairlines, but the lower reverse is minutely granular, as is the upper wingtip and a small portion of the front wing below its crest. The surfaces teem with luster, and no marks are of any consequence. Both sides show only a hint of a wire rim, between 2 and 4 o'clock on the obverse, and from 7 to 10 o'clock on the reverse. NGC ID# 26F2, PCGS# 9136

**1907 Flat Rim High Relief Twenty, MS65  
Bright, Satiny Surfaces**

- 5601 1907 High Relief, Flat Rim, MS65 PCGS. CAC.** While Augustus Saint-Gaudens never repudiated Neoclassicism, he was constantly aware of the influences of Classicism on modern sculpture. He obviously rejected the smooth, flawless contours of the Neoclassicist Canova; rather, he embraced the realistic modeling of his subjects. Saint-Gaudens also harkened back to Hellenistic Greece when he sculpted the figure of Liberty as seen in the Sherman group and later on the High Relief twenty dollar gold piece. The figure was covered with drapery, but in such a way that the physique of the figure would stand out even through stone, as if it were transparent fabric. By striking the new twenty dollar gold pieces in high relief, it was easier to give the figure of Liberty a deeply chiseled, sculpted appearance.

The majority of High Reliefs were struck before the “fin” or wire rim was corrected. This piece shows a remarkably high percentage of the rim on each side that is conspicuously lacking any trace of a fin. Thus, this piece would most likely have been struck in late-November or December 1907, a time when Mint personnel were attentive to the spacing between the collar and die faces which created the finning. The surfaces of this magnificent Gem glow with bright, satiny luster and show little to none of the usual reddish tint. Only the slightest contact marks are widely distributed and are of no visual consequence.

*From The Cherny Collection.* NGC ID# 26F2, PCGS# 9136

**SAINT-GAUDENS DOUBLE EAGLES**

**1907 Arabic Numerals Twenty, MS66  
Appealing First-Year Type**

- 5602 1907 Arabic Numerals MS66 PCGS.** The production of regular-issue Saint-Gaudens double eagles for circulation began on December 16 and continued almost uninterrupted through December 30, the sole exceptions being Christmas Day and December 29 — a Sunday. In total, 361,667 1907 Arabic Numeral twenty dollar gold coins were minted. All examples are highly desirable for type purposes, especially top-notch pieces like this strongly struck Premium Gem. Spectacular sun-gold surfaces glisten with cartwheel luster, accounting for the great eye appeal in-hand. PCGS lists 18 finer pieces (9/16). NGC ID# 26F5, PCGS# 9141

**1907 Twenty Dollar, MS66  
High-End Arabic Numerals Example**

- 5603 1907 Arabic Numerals MS66 PCGS. CAC.** As much as 95% of the 361,667-coin mintage was exported for payments overseas. Roger Burdette reports that more than two-thirds of those went to Europe, where they were handled extensively during counting, stacking, and rebagging. The remaining third probably went to South and Central America, where the coins remained untouched. This Premium Gem likely derives from the latter grouping, as marks are virtually unseen. Bold design detail and softly frosted mint luster are attributes that should appeal to collectors looking for a high-end type coin. PCGS counts 18 finer submissions. CAC: 25 in 66, 6 finer (9/16).

*From The Cherny Collection.* NGC ID# 26F5, PCGS# 9141

1908 No Motto Twenty, MS67  
Ex: Wells Fargo Hoard

- 5604** 1908 No Motto, Wells Fargo Nevada, MS67 PCGS. Ex: Wells Fargo Nevada. The Wells Fargo hoard contained nearly 20,000 1908 No Motto double eagles, including 10 virtually pristine MS69 coins. At first glance, this incredible Super Gem appears technically flawless. A closer look with a high-powered lens reveals a few microscopic specks on each side. Exceptional eye appeal owes much to deep orange-gold coloration and vibrant luster that cover the surfaces. Nearly fully struck and ideal for type purposes. *From The Cherny Collection.* NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-D Saint-Gaudens Double Eagle, MS65  
Long Rays, No Motto Variant

- 5605** 1908-D No Motto MS65 PCGS. Both Short Rays and Long Rays varieties exist for the 1908-D No Motto twenties, as opposed to the 1908-D With Motto coins, which all have Long Rays. Research by Roger Burdette indicates approximately 40% of the 1908-D No Motto survivors have the 1908 Long Rays redesign by Charles Barber. Typically, the Long Rays coins are better-struck than the Short Rays coins.

The present coin is a sharply defined and attractive piece with vibrant cartwheel luster and interspersed areas of orange, reddish-gold, and canary-yellow toning. The eagle's breast feathers show full details. A few shallow field lines beneath LIBERTY are the sole marks of note. PCGS reports just 13 numerically finer pieces (9/16).

*From The Cherny Collection.* NGC ID# 26F7, PCGS# 9143

1908 Motto Double Eagle, MS65  
Challenging First-Year Subtype

- 5606** 1908 Motto MS65 PCGS. A total of 156,232 1908 Motto double eagles were theoretically available for circulation after 26 coins were destroyed for assay purposes. Of those, 154 were sent to the Cashier at the Philadelphia Mint, leaving 156,078 pieces. Ultimately, all but 78 coins were put in storage for eventual export. Orange and yellow-gold provide color to this luminous Gem. Definition is far better than the 1908 No Motto coins, including crisp detail on the eagle's breast. Light chatter and a reeding mark on Liberty's thigh define the grade. Population: 70 in 65 (2 in 65+), 13 finer (9/16). *From The Cherny Collection.* NGC ID# BNAK, PCGS# 9147

1908-D Saint-Gaudens Twenty, MS65  
Burdette Type 3, Long Rays, With Motto

- 5607** 1908-D Motto MS65 PCGS. The refinements made to the Saint-Gaudens design by Charles Barber are apparent on the 1908-D Motto twenties, resulting in improved quality of strike but a departure from the original high-relief design. The design changes resulted in more efficient Mint operations at the expense of some aesthetic appeal, but since the coins were largely confined to banking institutions and foreign trade, the public paid little heed. This lustrous Motto twenty is well-struck with greenish and orange accents among the devices. PCGS has seen just 35 numerically finer examples (9/16).

*From The Cherny Collection.* NGC ID# 26F9, PCGS# 9148

1908-S Twenty Dollar, MS62  
Pursued Low-Mintage Issue

**5608 1908-S MS62 PCGS.** The 1908-S is the lowest mintage Arabic Numerals issue of the series, and is one of the few issues encountered more often in circulated grades than in Mint State, due to the West Coast tradition of hard money that lingered until the Great War. At the MS62 level, the 1908-S is conditionally rare relative to the many Saint-Gaudens collectors. This apricot-gold example displays vibrant cartwheel sheen. Marks are uncommonly few for the grade, although we note a number of small cherry-red alloy imperfections on the reverse, mostly near the wingtips and the eagle's head. Desirable from a technical perspective. NGC ID# 26FA, PCGS# 9149

1908-S Double Eagle, MS64  
Only 22,000 Coins Struck  
Rich Coloration

**5609 1908-S MS64 PCGS.** Only the 1907 High Relief twenty, which was never intended for circulation, has a lower mintage than the 1908-S (22,000 coins struck). In addition to its paltry production total, the 1908-S represents the inaugural output of Saint-Gaudens twenties from the San Francisco branch mint. That facility was the last to receive dies for the new coins. After initial striking difficulties, the 1908-S double eagles were finally manufactured on August 7. They were distributed a month later on September 10. Deep amber and sun-gold tones paint this Choice semikey. Added lilac accents enhance each side. The torch hand and Capitol are strongly impressed, though the highest points of Liberty and the eagle show a hint of incompleteness. Technical and aesthetic quality are phenomenal. Population: 37 in 64 (5 in 64+), 27 finer (9/16). *From The Cherny Collection.* NGC ID# 26FA, PCGS# 9149

1909/8 Twenty Dollar, MS64  
Only Overdate in the Series, FS-301

**5610 1909/8 FS-301 MS64 PCGS.** Collectors of Saint-Gaudens double eagles appreciate the 1909/8 as the only overdate in the series, caused when a 1908-dated hub was inadvertently used in the manufacture of a 1909 die. Examples can be found with minimal effort in MS62 and MS63, but the variety begins to pose a challenge in this grade. The strike is bold and marks are relatively minor for the assessment. They are generally confined to the lower reverse field and are well-hidden in the folds of Liberty's drapery. PCGS has seen 23 finer submissions (9/16).

**From The Cherny Collection.** NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

1909/8 Twenty Dollar, MS64+  
High-End for the Grade

**5611 1909/8 FS-301 MS64+ PCGS. CAC.** Collectors assembling a *Guide Book* set of Saint-Gaudens double eagles will need the 1909/8: the only major variety in the series. The overdate was created during the hubbing process of a 1909 working die. Several hub impressions were required for the double eagle dies to be fully executed, leaving room for the possibility that a 1908 hub was inadvertently used for one of these impressions, and thus resulting in the overdate. More traditionally, it is also possible that a leftover 1908 working die was simply rehubbled with the 1909 date. Concrete answers are lacking, as the variety was unnoticed until 1910, and it did not become a widely sought-after variety until the mid-1940s, when Abe Kosoff wrote about it in the *Coin Collector's Journal*. Numismatic researcher Roger Burdette records an excerpt of Kosoff's 1943 article in a soon-to-be-published reference work on the Saint-Gaudens series.

The 1909/8 double eagle is usually available in lower Mint State grades, but Choice examples are scarce and anything finer is a rarity. This Plus-designated, CAC-approved near-Gem displays vibrant, frosty luster and remarkably well-preserved fields. Only light handling marks on the high points of Liberty's figure prevent a full Gem grade. The strike is sharp throughout. PCGS lists 23 finer submissions (9/16). NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

1909-D Saint-Gaudens Twenty, MS64  
CAC-Endorsed, Low-Mintage Issue

**5612 1909-D MS64 PCGS. CAC.** The 1909-D is a popular issue because of its 52,500-coin mintage, the fourth-lowest production total behind the 1907 High Relief, 1908-S, and 1913-S. It also happens to be one of the more conditionally elusive Saint-Gaudens double eagles. Choice examples are very scarce and garner consistently strong prices. This honey-gold near-Gem is fully struck and clearly high-end for the grade. Insignificant field chatter does not detract. PCGS shows 24 finer grading events. CAC: 12 in 64, 4 finer (9/16).

*From The Cherny Collection.* NGC ID# 26FD, PCGS# 9152

1909-D Twenty Dollar, MS65  
Absolute and Condition Rarity

**5613 1909-D MS65 PCGS.** Virtually unbroken mint frost blankets both the obverse and reverse of this orange-gold double eagle. A small mark on Liberty's left forearm and another on the left knee are the perhaps the only minor distractions keeping this eye-appealing Gem from the next grade level. At 52,500 pieces produced, the 1909-D boasts one of the lowest mintage of coins in the entire Saint-Gaudens double eagle series. And, although it is well known that production figures of this issue do not necessarily correlate with current availability, it is an established fact that the 1909-D is indeed a rare coin in MS65 or better. Several factors are responsible for the limited availability of '09-D twenties in higher grades today, including, but not limited to, the initial low-production quantity, the fact that many circulated, and the stark reality that even more were melted after the 1933 Gold Recall. Population: 17 in 65, 7 finer (9/16).

*Ex: FUN Signature (Heritage, 1/2008), lot 3367.* NGC ID# 26FD, PCGS# 9152

1910 Double Eagle, MS65  
Seldom Found So Well-Preserved

- 5614 1910 MS65 PCGS.** The population of 1910 double eagles declines markedly between MS64 and MS65. Finer coins are extremely rare. Roger Burdette suggests that 400,000 1910 twenties were exported to and handled with minimal care in Europe, explaining the prevalence of MS62 and MS63 representatives. This Gem is a pleasing exception with largely inconsequential flecks. Medium orange-gold color swathes frosted surfaces and well-defined motifs. A planchet void occurs on Liberty's right (facing) leg. There are only four finer grading events at PCGS (9/16).  
*From The Cherny Collection.* NGC ID# 26FE, PCGS# 9154

1910-D Twenty Dollar, MS66  
Out of Reach in Higher Grades

- 5615 1910-D MS66 PCGS. CAC.** Orange-gold coloration and satiny luster are typical attributes of the 1910-D, found on both sides of this marvelous Premium Gem representative. The surfaces are carefully preserved with minimal marks. In fact, the reverse has the look of a higher-graded coin. Well-struck with great eye appeal. Only two examples are reported finer at PCGS. CAC: 17 in 66, 2 finer (9/16).  
*From The Cherny Collection.* NGC ID# 26FG, PCGS# 9155

1910-S Twenty Dollar, Frosty Gem  
Exceedingly Difficult to Upgrade

- 5616 1910-S MS65 PCGS.** Although more than 2.1 million twenty dollar gold pieces were manufactured at San Francisco in 1910, it is believed that only 9,500 or so examples survive, mostly from holdings repatriated from Europe, and Central and South America. They are very scarcely found in MS65, and probably just 10 to 15 finer examples are known. Each side of this glowing Gem is awash in frosty luster that combines with pleasing butter-gold coloration to generate tremendous visual appeal. The devices are well-struck, and trivial softness is limited to the lower obverse. Minimally marked. PCGS shows nine finer submissions (9/16).  
*From The Cherny Collection.* NGC ID# 26FH, PCGS# 9156

1911 Double Eagle, MS65  
Fully Struck With CAC Endorsement

**5617 1911 MS65 PCGS. CAC.** Gem examples of the 1911 are very scarce, bordering on rare. The vast majority of coins survive in MS62 to MS63, consistent with mass exportation to Europe. Higher-grade coins like this were likely paid out by the Philadelphia Mint Cashier or repatriated from one or two bags that remained undisturbed in a foreign holding. The issue usually comes sharply defined, but strike definition on this MS65 twenty is nothing short of full. Yellow-gold color dominates each side with a few copper alloy spots throughout. CAC has rightly awarded an approval sticker for eye appeal and quality within the grade. Population: 46 in 65 (3 in 65+), 13 finer. CAC: 15 in 65, 6 finer (9/16).

*From The Cherny Collection.* NGC ID# 26FK, PCGS# 9157

1912 Twenty Dollar, MS65  
Condition Rarity, CAC-Approved

**5619 1912 MS65 PCGS. CAC.** The 1912 double eagle's primary source of survival was in the form of gold reserves, both in American banks as a federal reserve and in European banks as part of normal commercial trade. After performing new research into the matter, Roger Burdette suggests that at least 115,000 1912 twenties were shipped to foreign banks. These coins "were either melted or repeatedly counted and rebagged." This excessive jostling of the heavy, soft gold coins resulted in extensive bagmarks for the pieces that survived to return to American collectors in recent years. The certified population of 1912 double eagles is thus concentrated in the MS61 to MS64 grade range and falls off at the top end of that spectrum. True Gems are scarcely seen, and finer pieces are prohibitively rare. This is an issue that the Smithsonian Institution lacks representation of.

The present Gem is CAC-approved and as such is quite a rarity within the MS65 grade level. Another Gem that we recently handled garnered \$30,550 without a CAC label in the ANA Signature sale (Heritage, 8/2016), lot 4384. This piece displays a sharp strike and satiny orange-gold luster. A few trivial marks in the left obverse field preclude an even finer grade. Population: 42 in 65 (2 in 65+), 8 finer. CAC: 10 in 65, 3 finer (9/16).

*From The Cherny Collection.* NGC ID# 26FM, PCGS# 9160

1911-D Twenty Dollar, Sharp MS66+

**5618 1911-D MS66+ PCGS. CAC.** The 1911-D double eagle often comes with satiny, slightly textured luster, similar to that seen on the quarter eagles from this date and mint. Nonetheless, this high-end Premium Gem example has a strong cartwheel effect and displays a pleasing wheat-gold glow beneath a light. The strike is razor-sharp, and other than a few small ticks on Liberty's knee, there are no abrasions that limit the grade. PCGS has seen only seven finer representatives (9/16). NGC ID# 26FK, PCGS# 9158

1913 Twenty Dollar, MS64  
Challenging Philadelphia Issue

- 5620 1913 MS64 PCGS.** Most collectors set their sights on a nice MS62 or MS63 example of the 1913. Specialists with better means have the option of acquiring an MS64 representative like the one offered here, but few can even entertain the notion of targeting a Gem given the strong prices they realize and infrequency with which they appear at auction. Coppery-gold tones and glistening mint luster deliver excellent eye appeal. This Choice Saint-Gaudens twenty offers well-detailed relief elements, and surface flaws are surprisingly scant for the grade. The PCGS *Population Report* shows 14 finer coins (9/16).  
*From The Cherny Collection.* NGC ID# 26FN, PCGS# 9161

1913-D Double Eagle, MS65  
Very Rare in Better Condition

- 5621 1913-D MS65 PCGS.** The 1913-D claims a mintage 10 times that of its S-mint counterpart, but examples are still perceived to be more elusive than other Denver emissions from the 1910 to 1916 period. Gems are scarce, and only a handful of finer submissions are reported at the leading grading services. This satiny, orange-gold double eagle offers intermittent lilac accents. A horizontal mark in the left obverse field above the rays is the sole blemish worth mentioning. There are merely six higher-graded coins at PCGS (9/16).  
*From The Cherny Collection.* NGC ID# 26FP, PCGS# 9162

1913-S Double Eagle, MS64  
Third-Lowest Mintage, Rare Any Finer

- 5622 1913-S MS64 PCGS. CAC.** The 1907 High Relief and 1908-S are the only two Saint-Gaudens double eagles that enjoy lower mintages than the 1913-S (34,000 coins struck, all on December 31). The small production generates ever-strong demand and places considerable pressure on the 3,000 or so estimated survivors, most of which grade MS62 to MS64. This CAC-approved near-Gem is about the finest a collector can obtain without a budget in excess of five figures. Rich sun-gold color blends with pale lavender over this lovely Choice representative. The windows on the Capitol are better-defined than usual for the issue, and all but the lowest stars show good relief. On the reverse, UNITED and IN are marginally incomplete, again, typical of the 1913-S. PCGS reports 24 finer grading events. CAC: 50 in 64, 5 finer (9/16).  
*From The Cherny Collection.* NGC ID# 26FR, PCGS# 9163

**1914 Double Eagle, MS65  
Radiant Rose-Gold Example**

**5623 1914 MS65 PCGS.** The onset of the First World War brought about a new era of gold coin production in the United States. Suddenly, mintages at Denver and Philadelphia decreased, ceasing entirely after 1914 and 1915. San Francisco halted the manufacture of gold coins after 1916. All 1914-P double eagles were minted in the second half of the year as backing for gold certificates. That total amounted to just 95,250 coins. Over time the bulk of coins were shipped to Europe, where they were handled extensively as they passed from one bank to the next. Thus, most 1914 twenties survive in lower Uncirculated grades, rarely appearing as fine as this radiant, rose-gold Gem. The Capitol columns and torch fingers and well-defined. Small marks are undistracting, and the only one of note occurs under the eagle's upper feather tips. Population: 40 in 65, 3 finer (9/16).

*From The Cherny Collection.* NGC ID# 26FS, PCGS# 9164

**1914-D Twenty Dollar, Strong MS66  
Just a Single Finer Submission at PCGS**

**5624 1914-D MS66 PCGS.** The 1914-D represents the final issue of Denver double eagles before production recommenced in 1923. By then the war and the economic turbulence that followed had ceased. Examples appear at auction with a degree of frequency through MS65, but comparable representatives are very scarcely offered on the market. Discerning specialists should take advantage of this opportunity. Sun-gold surfaces display copper and lavender accents and lack any singular flaws. The fields are notably clean, and strike characteristics are uniformly strong. Population: 70 in 66 (1 in 66+), 1 finer (9/16).

*From The Cherny Collection.* NGC ID# 26FT, PCGS# 9165

**1914-S Twenty Dollar, MS66  
Merely One Coin Finer At Both Services**

**5625 1914-S MS66 PCGS.** According to recent research by numismatic scholar Roger Burdette, only about 1,500 1914-S double eagles were released into domestic circulation. Roughly 65% of the remaining coins from the 1.5 million-coin mintage were sent to Europe. The rest were exported to Central and South America, "or possibly Japan in 1916-1918 when the U.S. made large purchases of war materials from Tokyo." A characteristically bold strike defines the devices on each side. Splendid S-mint frost cascades over orange-gold surfaces. This is among the finest examples at PCGS, and NGC has seen a single MS67 finer (9/16).

*From The Cherny Collection.* NGC ID# 82KA, PCGS# 9166

**1915 Double Eagle, MS65**  
**Low Mintage, Conditionally Rare**

**5626 1915 MS65 PCGS.** The 1915 has a the ninth-lowest mintage in the series. The United States put restrictions on the circulation of gold coinage during the First World War, and production was correspondingly curtailed during that time. Roger Burdette explains: "Gold circulation, including coin and certificates, rapidly declined as the Treasury sequestered remaining gold coin and certificates from circulation. Pre-war gold circulation patterns remained, but the volumes were very low, with paper currency backed by securities replacing gold certificates." Most 1915 double eagles were shipped to Europe, and the typical example at PCGS and NGC grades just shy of MS62. An attractive Gem is the best nearly any collector, no matter how well-financed, can hope to acquire, as there is but a single MS66 coin at NGC. This condition rarity boats lively luster that illuminates boldly impressed relief elements. Light yellow-gold surfaces show minimal field marks, one of which inconsequentially obscures a portion of the Capitol dome. An excellent representative in all regards. Population: 50 in 65 (2 in 65+), 0 finer (9/16).  
**From The Cherny Collection.** NGC ID# 26FV, PCGS# 9167

**1916-S Saint-Gaudens Twenty, MS66**  
**Tied for Finest at PCGS and CAC**

**5627 1916-S MS66 PCGS. CAC.** The entire run of 796,000 1916-S double eagles was produced between January 11 and March 22. Thereafter, production was suspended until 1920. The aesthetic quality of this amazing Premium Gem twenty is virtually unsurpassed, and technically finer representatives are extremely rare. Tinges of green and rose complement light orange-gold color. Swirling frost radiates over seemingly unmarked surfaces. Boldly rendered and eminently appealing. Tied for finest at PCGS. CAC: 25 in 66, 0 finer (9/16).  
**From The Cherny Collection.** NGC ID# 34NJ, PCGS# 9169

1920-S Double Eagle, Majestic MS65  
Ex: Dallas Bank Collection  
The Akers and Bowers Plate Coin  
High Condition Census

**5628 1920-S MS65 PCGS. CAC.** The 1920-S Saint-Gaudens double eagle is among the greatest rarities in the series, particularly in high grade. In the absolute sense, the '20-S is a trifle more plentiful than the 1927-D, the 1930-1932 melt rarities, and by an even smaller margin, the 1921. However, in Gem condition, the 1920-S excels — at this level, only the 1921 and 1927-D are considered rarer or more significant acquisitions. This, of course, excludes the uncollectible 1933 and the 1907 Ultra High Relief pattern.

No meaningful quantities of the 1920-S double eagle ever turned up in European hoards, and it is likely that none were ever officially used in the foreign trade. The bulk of the 558,000-coin mintage, after assay, was presumably kept in storage until the gold melting of the 1930s consumed the vast coin reserves in federal vaults. New research by Roger Burdette into the origin of surviving coins suggests that the less than 200 pieces believed known today likely came from two sources: a production residual of 144 coins that the San Francisco Mint Cashier paid out shortly after production, and from a group of 543 pieces that was shipped to Philadelphia for the Annual Assay Commission and was later, at least in part, paid out by the Philadelphia Mint Cashier. There is little evidence to suggest that any significant quantities of the 1920-S double eagle were ever distributed through other channels.

The rarity of the 1920-S Saint first came to light publicly through auction appearances in the 1940s, such as the Belden E. Roach Collection (B. Max Mehl, 2/1944), the J.F. Bell Collection (Stack's, 12/1944), and the Dr. Charles W. Green Collection (B. Max Mehl, 4/1949). The latter two sales featured the exact same coin. The small number of 1920-S double eagles appearing at auction led to ever-increasing auction realizations. In recent decades, low-end examples of the date are actively traded, but the top-grade Gems remain incredibly rare.

The present coin is truly special. The plate coin for David Akers' *United States Gold Coins* (1982) and Dave Bowers' *A Guide Book of Double Eagle Gold Coins*, it traces to the legendary Dallas Bank Collection, auctioned by Sotheby's and Stack's in 2001, where it was heralded as "The Finest Known, without question. A truly majestic example." By certified grade today, it ranks third in Roger Burdette's Condition Census, although one glance at this piece in person will make the knowledgeable collector question that third-tier placement. The Dallas Bank coin is noticeably finer in terms of preservation than both of the other MS65s that we have handled, and we would suggest that its visual appeal rivals that of the two MS66 Duckor coins (one also Ex: Eliasberg), which are ranked first and second in the current Condition Census. The published images of this piece in the 2001 Sotheby's/Stack's catalog and the aforementioned references do not do justice to the glowing luster and impeccable preservation.

David Akers wrote of this piece in 1982:

"Of the relatively few uncs that I have seen, only two were gems, the Eliasberg specimen and the Unc-67 coin pictured above that is in a prominent Dallas bank collection."

In his gold coins *Handbook* (1988), Akers reaffirmed:

"The finest specimen I know of is in the Browning Collection held in trust by a Texas bank; it is virtually perfect in all respects with great color and lustre and bagmark-free, satiny surfaces. I graded it MS-67 when I saw it."

At the very least, the CAC endorsement of this piece in MS65 PCGS is duly deserved. The Sotheby's/Stack's catalog beautifully described this coin as "Satiny with an explosive, lustrous sheen, and fully revolving cartwheel lustre." We would add that a loupe fails to reveal even a single mentionable abrasion in the fields of either side, and Liberty's gown and the eagle's wing are virtually devoid of the faint slide marks and minor ticks that often appear on the high points of Gem-graded Saints. Lovely rose, peach, mint-green, and silvery hues swirl in the central regions, ceding to frosty yellow-gold peripheries. Liberty's torch hand fingers are delineated, and the Capitol building is sharp. This is a 1920-S whose aesthetic characteristics seem to have been stolen from a high-grade 1923-D double eagle. It would be difficult to regret acquiring this piece ... at any price.

Ex: H. Jeff Browning; *Dallas Bank Collection* (Sotheby's/Stack's, 10/2001), lot 185; *Pittsburgh ANA Signature* (Heritage, 8/2004), lot 7782; "Dr. EJC" PCGS Registry Set Collection.

**From The Cherny Collection.** NGC ID# 26FZ, PCGS# 9171

## 1921 Double Eagle, Attractive MS62 High-Caliber Rarity in All Grades

**5629 1921 MS62 PCGS.** The 1921 Saint-Gaudens double eagle is the sister issue to the 1920-S: Its mintage is similar (528,500 pieces), it has a similar overall survival rate (estimated at fewer than 175 coins in all grades), and it had similar reasons for that low survival rate. Numismatic researcher Roger Burdette reasons that at least most surviving coins are from production residuals and leftover pyx coins paid out by the Mint Cashier in late 1921 and early 1922. Burdette's studies have further uncovered correspondence that shows that Mint Curator T. Louis Comporette supplied a limited number of pieces directly to collectors during "the last days of the year, (1921)" and likely out of the residual coins in the Cashier's possession — It is likely that these are primarily the source of the high-grade coins known today.

The bulk of the 1921 mintage went into long-term storage. The foreign trade brought significant amounts of gold coin back to the United States in 1921, and exports were minimal. If any portion of the 1921 double eagle mintage was officially exported, it has not survived, as no more than a few handfuls of individual coins have turned up in overseas hoards.

The 1921 double eagle's similarity to the 1920-S erodes in high grades, where the Philadelphia issue emerges as the notably rarer date. It is genuinely rare at any Mint State level, and if a piece grading finer than MS62 can be found, that coin may quickly climb out of reach at auction. The rarity of the 1921 Saint is such that even a "low-end" Mint State example is a headliner when offered at auction. Any Uncirculated 1921 effortlessly climbs to or beyond the six-figure mark, and the tremendous aesthetic merit of the present MS62 coin has the potential to drive record bidding for the grade. Light high-point contact on Liberty's figure and the eagle accounts for the MS62 designation, but the luminous, multicolor fields more than balance the eye appeal. Wisps of tangerine, lavender, mint-silver, and peach-yellow swirl throughout each side. The strike is boldly defined, and the lightly scattered abrasions pose minimal distraction for the grade.

Collectors began to fully appreciate the rarity of the 1921 double eagle as early as the mid-1940s, when published population estimates tallied only four or five coins. The availability of the date gradually increased, but the large quantities of hoard coins that eventually flooded the market for other dates were never found for the 1921, and the issue retains its legendary scarcity to this day. In Mint State, the 1921 is among the most challenging and important acquisitions in the entire date and mintmark set. Population: 20 in 62, 17 finer (9/16).

**From The Cherny Collection.** NGC ID# 26G2, PCGS# 9172

1922-S Double Eagle, MS64  
Nearly the Entire Mintage Melted

**5630 1922-S MS64 PCGS.** Poorly heat-treated dies resulted in many 1922-S double eagles showing extensive cracks, seen here around the upper obverse and left reverse. That aside, most representatives are well-struck with frosty luster and good eye appeal. This Choice twenty is in line with those characteristics. Scattered marks appear over orange-gold surfaces, but the only ticks worth pointing out occur in the left obverse field above the rays. The 1922-S is a challenging melt rarity, and any serious specialists would surely be delighted to have this near-Gem in his or her collection. There are 20 higher grading events at PCGS (9/16).

*From The Cherny Collection.* NGC ID# 26G4, PCGS# 9174

1923-D Twenty Dollar, MS67  
Unseen Finer at PCGS, CAC

**5631 1923-D MS67 PCGS. CAC.** The 1923-D is the final readily available mintmarked issued in the Saint-Gaudens double eagle series. Coins were well-made and many were carefully handled. Roger Burdette writes: "Most pieces seem to have been preserved in foreign holdings, most likely in Argentina or Brazil where it was common practice to leave U.S. gold untouched in its original bags." Superb Gems are very scarce, to be sure, particularly with CAC approval. In fact, it would be nearly impossible to upgrade this outstanding representative. As is often found on the 1923-D, a die crack runs through LIBERTY. The surfaces are nearly immaculate and exhibit a couple of minute ticks below the eagle's breast. A razor-sharp impression, gorgeous orange-gold coloration, and uninhibited mint luster ensure this coin's suitability for type purposes. Population: 72 in 67, 0 finer. CAC: 12 in 67, 0 finer (9/16).

*From The Cherny Collection.* NGC ID# 26G6, PCGS# 9176

1924 Saint-Gaudens Twenty, MS67  
Dazzling Cartwheel Luster  
One Finer Coin at PCGS

**5632 1924 MS67 PCGS. CAC.** This is among the most often encountered of all Saint-Gaudens double eagles. The Mint struck 4.3 million twenty dollar gold pieces in 1924 despite holdings of nearly \$119 million in gold coinage from previous years. The new coins must have been necessary for international payments. Burdette reports that \$50 million in new double eagles were shipped out to the Federal Reserve Banks and New York Assay Office in 1924 for eventual export. Survival rates suggest the 1924 double eagles sat in European and Central and South American vaults, where they were left largely undisturbed. Representatives are widely available through MS66 and only become truly elusive in this remarkable grade. Cartwheel luster swirls over immaculately preserved, peach-gold surfaces. The relief elements show a near-full strike. Slight softness occurs at the lower-left obverse. Locating a more appropriate example for type purposes would prove exceedingly difficult. Population: 97 in 67 (2 in 67+), 1 finer. CAC: 27 in 67, 0 finer (9/16).

*From The Cherny Collection.* NGC ID# 26G7, PCGS# 9177

1924-D Twenty, CAC-Approved MS64  
Sought-After Denver Rarity

**5633 1924-D MS64 PCGS. CAC.** Personnel at the Colorado branch mint accomplished a large production of more than 3 million double eagles in 1924, approaching that of their Philadelphia counterparts. Yet the D-mint coins are among the scarcest in the series, while the 1924-P is the most frequently encountered issue across all grade levels. The difference: all but 13,012 1924-D double eagles were melted under the Gold Recall of 1933. Many of the coins that survived the meltings had already been used in trade with Canada, explaining the high number of XF and AU pieces extant. Uncirculated representatives derive mainly from European holdings returned to this country from the 1950s through the 1970s. About 1,200 examples survive in all. Near-Gems are very scarce, and anything finer is a major rarity.

Luminous peach-gold surfaces exhibit a higher level of care than usually encountered, as few overt marks are present. The torch fingers are clear, and the Capital columns are mostly distinct. PCGS shows 11 finer submissions. CAC: 13 in 64, 3 finer (9/16).

*From The Cherny Collection.* NGC ID# 34VF, PCGS# 9178

**1924-S Double Eagle, MS64**  
Prohibitively Rare Any Finer

**5634 1924-S MS64 PCGS. CAC.** The 1924-S is nearly identical to the 1924-D in terms of the number of coins struck (2.9 million) and the number of survivors believed extant (1,100). Research Roger Burdette explains that “all but approximately 250,000 1924-S double eagles were melted — a huge waste of time, resources, and money.” The quarter million coins that were released were sent to Federal Reserve Banks for export, though only 500 or so pieces have been traced to European sources. Most examples fall within the MS62 to MS63 grade range. Near-Gems will give any dedicated collector a run for his or her money, and anything finer will prove prohibitive. Although strike definition is typical for the issue, this piece enjoys eye-appealing orange-gold surfaces awash in radiant frost. It will surely hold a place of importance in any high-end set. Only five submissions at PCGS are finer. CAC: 20 in 64, 1 finer (9/16).

*From The Cherny Collection.* NGC ID# 26G9, PCGS# 9179

**1925-D Twenty Dollar, MS64**  
Rich Coloration, Important Melt Rarity

**5635 1925-D MS64 PCGS.** This branch mint melt rarity was once considered among the rarest issues in the entire set of Saint-Gaudens double eagles, but that notion dissipated as coins were repatriated from foreign holdings during the 1950s. About 1,000 examples are believed extant. Soon-to-be-published research by Roger Burdette suggests “nearly all known 1925-D double eagles came from European sources, possibly the Merkers Mine hoard. ... A small number of pieces — those now among the finest available — could have been secured direct from the Denver or Philadelphia Mint Cashiers.”

Without question, the primary attribute of this impressive semikey is the rich, multi-hued coloration that adorns each side. Deep copper-orange, lavender, and light-peach gold shades coalesce over minimally abraded surfaces. A horizontal mark in the left obverse field above the rays and another below the eagle's neck will help identify this coin in future appearances. Well-produced, as expected for the issue. PCGS records seven finer grading events (9/16).

*From The Cherny Collection.* NGC ID# 26GB, PCGS# 9181

1925-S Double Eagle, MS63  
Scarce Branch Mint Issue

**5636 1925-S MS63 PCGS. CAC.** The 1925-S is a significant and somewhat underrated condition rarity of the series — the only Saint-Gaudens double eagle that is more plentiful in circulated condition than in Mint State. Select Uncirculated and finer coins are very scarce. Virtually no coins returned to collector hands from European holdings or other hoards.

This sharply struck and lustrous example displays smooth fields that show a scattering of tiny contacts but no distracting marks. The rich-gold color reveals orange and green accents for excellent eye appeal. It is one of just five coins to receive CAC endorsement at the MS63 level. Population: 91 in 63 (1 in 63+), 26 finer. CAC: 5 in 63, 4 finer (9/16).

**From The Cherny Collection.** NGC ID# 26GC, PCGS# 9182

1926-D Twenty Dollar, MS63  
Branch Mint Rarity

**5637 1926-D MS63 PCGS.** The entire production of 481,000 double eagles was accomplished in the first quarter of the year between February 10 and March 13, 1926. Unlike earlier Denver issues, the 1926-D was not shipped overseas in any significant quantity. Nearly all coins remained in storage at the Colorado branch mint until they were melted after the Gold Recall of 1933. Small quantities did make it out of the mint, with a few groups of coins repatriated from Europe. Those make up the 600 estimated survivors. The average 1926-D twenty is apt to grade between MS61 and MS62. Select condition is at the upper range of what is possible for well-resourced specialists to reasonably target, as finer coins are downright rare. This orange-gold semikey offers accents of delicate lilac color and softly shimmering satin luster. A somewhat mushy strike over the lower part of the obverse is expected, while detail is good elsewhere. The 1926-D was formerly considered the top rarity in the Saint-Gaudens series after the 1933. Although recent discoveries have reduced its overall scarcity, ownership of a nice example is truly a badge of accomplishment.

**From The Cherny Collection.** NGC ID# 26GE, PCGS# 9184

**1926-S Double Eagle, MS63  
Bright Mint Luster**

- 5638 1926-S MS63 PCGS.** For almost 20 years, the 1926-S was considered one of the premier rarities in the Saint-Gaudens series. Then, after World War II, pieces began to return to this country. Today its days as a major rarity are long in the past and it is relegated to merely "scarce." This is a dazzling, brightly lustrous example and the strike definition is complete throughout. The obverse fields show numerous die striations, a curious occurrence on a Saint, suggestive of a Mint employee's attempt to burnish the dies and impart a prooflike sheen to the fields (it didn't work). NGC ID# 26GF, PCGS# 9185

**1926-S Twenty Dollar, MS64+  
Outstanding Luster and Coloration**

- 5639 1926-S MS64+ PCGS.** Glowing original mint luster gives this high-end near-Gem strong visual appeal, while a lack of severe abrasions further contributes to its visual merit. Rich yellow, peach, rose, and mint-gold hues appear over each side. The central devices are sharply struck, but the rims are not fully defined. PCGS has seen only 42 finer submissions (9/16), making this piece among the best typically within reach of the average double eagle collector. NGC ID# 26GF, PCGS# 9185

**1926-S Saint-Gaudens Twenty, MS64  
Rose and Green-Gold Color**

- 5640 1926-S MS64 PCGS. CAC.** Here is another branch mint melt rarity from the 1920s, although the 1926-S survives to a greater extent than several other issues. About 2,000 coins are reportedly available from a mintage 1,000 times that figure. This rose and green-gold near-Gem is eminently appealing with lively mint frost that rolls over each side. The approval sticker from CAC is well-earned. Examples are apt to show incompleteness on the Capitol, as here, but design detail is strong elsewhere. PCGS shows 42 finer submissions (9/16).  
*From The Cherny Collection.* NGC ID# 26GF, PCGS# 9185

**1927 Twenty Dollar, MS67  
Tied for Finest Certified**

- 5641 1927 MS67 PCGS.** Almost every one of the 2.9 million double eagles minted in Philadelphia in 1927 was transferred to Federal Reserve Banks for shipment overseas. As many as 530,000 examples have returned from abroad, where they sat idly in storage for decades. Consequently, the 1927 is readily accessible through Premium Gem condition. Only in MS67 does the issue become elusive, frequently targeted by type enthusiasts. This would be an ideal example for such purposes. The strike is bold, the fields largely unabraded, and the eye appeal exceptional. Radiant frost cascades over deep orange-gold surfaces. Population: 20 in 67 (2 in 67+), 0 finer (9/16).  
*From The Cherny Collection.* NGC ID# 26GG, PCGS# 9186

## 1927-S Twenty, Exceptional MS65 One of the Keys to the Saint-Gaudens Series

**5642 1927-S MS65 PCGS. CAC.** The 1927-S is not only a celebrated issue in the Saint-Gaudens series in its own right, but its closest cousin, the fabulously rare 1927-D double eagle, further augments its considerable fame. That the 1927-S has maintained such an elite status is made all the more impressive when one considers the number of issues in the series today considered “less rare than previously thought” — almost invariably due to discoveries of small caches of coins in Europe or Latin America, which mostly occurred in the 1940s through the early 1960s. While the 1927-S has not been entirely immune to that phenomenon, far fewer examples have been found than many other issues that constitute the last decade or so in the manufacture of the denomination.

The only Saint-Gaudens double eagles that we can say with certainty to have entirely escaped the “former rarity syndrome” are the 1927-D and the 1933. And so far as is known, there have been no new 1927-Ds uncovered overseas, if at all, in many decades, as one of its first known auction appearances — in the 1944 J.F. Bell Collection — was accompanied by a description speculating that no more than a dozen were known, and today we can account for only 13 examples. On the other hand, the 1926-D in the 1940s was thought rarer than the 1927-D, and yet today, due to those selfsame repatriations, several hundred examples are known, most of them Mint State.

The 1927-S, however, bears more similarities to the 1927-D than to the 1926-D. In the companion volume to the Phillip H. Morse Collection, which we handled in 2005, we wrote this concerning the 1927-S issue:

“The 1927-S is one of the rarest and best-known issues in the Saint-Gaudens series of double eagles. In 1988, David Akers ranked the 1927-S as tenth in overall rarity out of the 54-coin series. Fifty years ago it was considered as the fourth rarest, trailing only the 1924-S, 1926-D, and 1926-S. Since that time, a few 1927-S twenties have turned up, one or two at a time but nothing approaching the quantities of, say, the 1926-S. This is in spite of the fact that 3.1 million pieces were produced. The key status of the 1927-S is based on absolute rarity rather than conditional rarity. In all grades, there are probably only 160-170 pieces extant today, but curiously, two-thirds of the pieces known are Uncirculated — and there are several that are known at the Superb level.”

As further testament to the modern day rarity of the 1927-S, we note that when the final prices were tallied in the Morse Collection, the finest known 1927-D, an MS67 PCGS example, was in first place. The second, third, and fifth-highest price records went to the incredibly rare 1921s, in MS66, MS65, and MS64, respectively (the 1921 is extremely rare above MS63). Fourth place went to an incredibly rare 1920-S in MS66 — and the sixth-highest price went to a 1927-S double eagle in MS67, at the time the sole finest known.

This piece, CAC-endorsed in MS65, is one of only 11 Gem-graded at NGC and PCGS combined — six at PCGS (two in MS66+) and five at NGC — and there are only nine examples certified finer (9/16). Like other 1927-S twenties we have handled, this example has dynamic luster characteristics. The intensity of the mint luster and intermingled reddish-gold and lilac colors give it a resemblance to a high grade 1923-D. The surfaces are remarkably free from abrasions, with the only one of note for pedigree purposes located in the left obverse field. An outstanding example of this key Saint-Gaudens twenty.

Ex: FUN Signature (Heritage, 1/2010), lot 2333.

From The Cherny Collection. NGC ID# 26GJ, PCGS# 9188

1929 Saint-Gaudens Double Eagle, MS65  
Extravagant Color and Luster  
A Major Rarity in Gem Condition

**5643 1929 MS65 PCGS.** The post-WWI era saw only one country return to the fully convertible gold standard — the United States. As such, U.S. gold coinage became the target of hoarders from countries whose governments had ceased backing their currency with the yellow metal. Numismatic author and research Roger Burdette writes in a soon-to-be-published work on double eagles:

“The immediate post-war period saw a large increase in trade with South America through about 1920. Demand sagged once European competitors re-entered the markets although the United States maintained much of its gains in new markets. This commercial activity accounted for a substantial part of American gold coin exports that were later repatriated and made available to coin collectors.”

Major players in the importation of United States gold hailed from France, Switzerland, Belgium, and the Netherlands, and by the early 1930s as much as \$5 million in U.S. gold was being imported per week into those countries and elsewhere. An entire trade had developed whereby European banks and dealers would buy up coinage from American banks for face value and sell them the intermediaries for a premium of about 5%. Those intermediaries would in turn sell the United States gold to private individuals building up their own personal gold stocks and willing to pay 20% over face value for the privilege.

The gold trade had no direct effect on production in the United States, but it was one of the factors that lead to a tightening of monetary policy, which increased the number of eagles and double eagles struck, and it minimized the demand for money. This dichotomy (high mintages, low demand) explains why millions of gold coins remained in Treasury and bank vaults at the time of the 1933 Gold Recall.

Of the 1.7 million twenty dollar gold pieces struck at Philadelphia in 1929, only a tiny fraction were released by the Mint. Roger Burdette suggests merely 1,176 double eagles were ever made available to the public, and the certification totals at the leading grading services indicate that just 300 to 400 examples of this very scarce date survive. Gem-graded coins near the top of the population chart are decidedly rare.

The present piece displays fiery tangerine-orange color on the obverse amid frosty, glowing luster, while the reverse showcases lighter orange-gold, peach-yellow, and mint-green hues. The strike is razor-sharp, and the only higher-grade-preventative is a pair of marks in the field above Liberty's right (facing) shoulder. Population: 28 in 65, 5 finer (9/16).

**From The Cherry Collection.** NGC ID# 26GL, PCGS# 9190

1930-S Saint-Gaudens Twenty, MS64  
Limited Survival in All Grades

**5644 1930-S MS64 PCGS. CAC.** Acclaimed American sculptor August Saint-Gaudens' double eagle series is widely collected for its artistic beauty and historical significance. As an added bonus, many issues remain relatively accessible in higher states of preservation. However, like most other series in American numismatics, there are a few highly coveted key dates in the Saint-Gaudens set that are only available to a limited number of collectors because of their low survival rates and the correspondingly high prices they consistently realize. Among such dates are the 1920-S, 1921, and 1927-D, and the five issues between 1929 and 1932. The 1930-S is acknowledged to be the most challenging of the exclusive late-date grouping, and the acquisition of an example is undoubtedly the mark of an advanced specialist.

Twenty dollar output dropped to just 74,000 pieces at the San Francisco Mint in 1930, marking the resumption of double eagle production after a three-year hiatus at the facility. The low mintage is among the smallest in the entire series. However, the 1930-S ranks as one of the most elusive dates not because of its mintage, but rather because of the minuscule number of survivors. Like the other "late-date Saints," the 1930-S was struck mainly for reserve purposes as backing for gold certificates. Dr. Charles W. Green's 1947 inquiry into the actual number of distributed coins yielded a total of 3,250 representatives. Few were exported overseas, and the majority remained in the hands of American collectors and dealers. President Franklin D. Roosevelt's issuance of Executive Order 6102 in 1933 forbade private ownership of gold and resulted in the destruction of nearly the entire mintage, ensuring the issue's rarity to the present day. In fact, the certified population reveals the 1930-S to be the second-rarest regular issue in the series behind only the 1927-D.

This CAC-approved near-Gem has limited peers and even fewer superiors. The design elements are sharply brought up amid softly frosted yellow-gold fields. A few light marks prove to be minor for the grade, and the overall eye appeal is reminiscent of the common type-coin issues of the 1920s. Truly a superb representative of this late-series rarity. Population: 16 in 64, 15 finer. CAC: 6 in 64, 5 finer (9/16).

**From The Cherny Collection.** NGC ID# 26GM, PCGS# 9191

1931 Double Eagle, MS64  
Frosty and Sharp, Famous Melt Rarity

**5645 1931 MS64 PCGS.** The final issues in the Saint-Gaudens double eagle series are representative of a time when the United States was in the throes of the Great Depression, wrestling with a deflationary spiral, high unemployment rates, and correspondingly low demand for large denomination coins like the double eagle. The low demand for coinage is not necessarily reflected in the mintages of the twenty dollar issues with which the series concludes, but rather in the number of pieces distributed. The 1929, 1931, and 1932 Philadelphia issues all boast high mintages in excess of 1 million coins (2.9 million pieces in 1931). Yet, along with the 1930-S and 1931-D, they represent some of the most challenging and elusive dates in the series.

An essential component to understanding why the 1931 and other later-date twenties prove so elusive is the number of pieces put out by the Treasury at the time. Despite the vast quantities produced, the coins were merely stored in vaults as reserves for United States currency, which was subject to the Gold Standard at the time. In fact, few double eagles were actually paid out. When Roosevelt issued the Gold Recall in April 1933, only a small handful of late-date twenties avoided conversion into gold bars and ingots. In 1947, Dr. Charles W. Green, whose double eagle collection drew significant attention when it was sold at auction by B. Max Mehl in 1949, went to the office of the Director of the Mint to look into exactly how many coins were paid out by the Treasury Department. He found that 45 examples of the 1931 had been released through official channels. In a new book on double eagles, Roger Burdette writes, "The Dr. Green letter states that '45 were put out' but that quantity is second-hand from documents supplied by Assistant Mint Director Howard and likely refers only to records immediately available in the late 1940s." Instead, Burdette's research shows that as many as 310 1931 twenties were at one point available to collectors, at least 22 of them were distributed to known recipients, and probably 110 or so examples survive.

Since few coins, if any, were exported overseas, the 1931 is often found in high grade — typically in MS64 and MS65 condition. Sharp strikes and vibrant luster are also characteristic of the issue, and the present coin does not disappoint. Sharply defined motifs exist amid thick, frosty wheat-gold luster that has hints of pale green throughout. Merely a few trivial contact marks on the figure of Liberty and the eagle determine the grade while allowing above-average eye appeal to prevail. Population: 27 in 64, 38 finer (9/16).

*From The Cherny Collection.* NGC ID# 26GN, PCGS# 9192

1931 Double Eagle, Frosty MS66  
Among the Finest Known  
Heavily Melted in the 1930s

**5646 1931 MS66 PCGS.** Leading into the debut of Saint-Gaudens' majestic double eagle in 1907, commercial circulation of this denomination had declined significantly since the days of the Reconstruction when paper currencies were widely distrusted. Eventual abandonment of large denomination gold in circulation was then fated by the establishment of the Federal Reserve System in 1913, which centralized the United States' banking system and standardized circulating currency. Following the Federal Reserve Act of December 23rd, 1913, new series of paper currencies were issued by the federal government in the form of Gold Certificates and Federal Reserve Notes. Unlike today, these early notes were "redeemable in gold on demand." This necessitated heavy production of large denomination gold coins, even if there was little or no commercial need.

The stock market crashed in October 1929, which became known as the over-the-cliff moment of the Great Depression that lasted well into the 1930s for many of the countries affected by the collapse of the United States markets. This also exposed a critical flaw in the Federal Reserve System. By the late 1920s, the number of gold certificates and federal reserve notes issued was nearly at the limit of what could be legally backed by gold in government vaults. The Federal Reserve Act necessitated that enough gold be on hand to back at least 40% of the value of the credit issued in the form of reserve notes and certificates. In short, the government was out of credit. During the massive economic slump of the early Great Depression years, gold certificates were heavily redeemed for their gold equivalent, and gold coin was being hoarded by those fortunate enough to have it. This further shortened the government's gold reserves and led to President Roosevelt's Executive Order 6102 in 1933, prohibiting the private ownership of monetary gold and gold certificates. Whether or not this unilateral action helped the economy is debated to this day, but one certain result of it was the massive melting of large numbers of gold coins — out of both government reserves and recalled public holdings — creating great rarities out of what normally would have been common dates.

The double eagle of 1931 is among the late-series Saints known as "melt rarities." Following the gold melts, it is believed that only about 110 pieces survive in all grades, almost exclusively in Mint State, since none ever circulated to a measurable extent — most of the mintage never left government vaults but was stored as a reserve until destroyed in the 1930s. The typical coin grades MS64 or MS65. The present piece is decidedly rare at the Premium Gem level, and only a single MS67 coin is finer. We have previously handled only five individually different MS66 examples, the most recent of which was the Duckor/Eliasberg coin, which realized \$120,750 in our Long Beach Signature sale (Heritage, 5-6/2012), lot 5394. The present coin is at least as fine. Mint-fresh, frosty luster produces a burst of luminescence when rotated beneath a light, delivering an eye-catching yellow-gold cartwheel effect. Incredibly clean fields showcase sharp devices that are uncommonly free of significant marks or grazes. It may be years before a comparable example of this famous rarity is again offered at auction. Population: 10 in 66, 1 finer (9/16). NGC ID# 26GN, PCGS# 9192

## 1931-D Twenty Dollar, Luminous MS64 An Eye-Catching Rarity

**5647 1931-D MS64 PCGS. CAC.** Relatively little coinage was required in the United States in 1931 as the country was in the midst of the Great Depression. Double eagles were coined only at the Philadelphia and Denver mints, and the 106,500 pieces struck at the latter facility was a comparatively low production. In fact, the 1931-D twenty dollar mintage was the second lowest of the 1920s and 1930s, trailing only the 74,000-piece 1930-S. And like the 1930-S, most of the 1931-D production was melted.

Estimates of this issue's survival rate have varied widely. Walter Breen underestimated the 1931-D survival rate in his 1988 *Encyclopedia* when he wrote that "Possibly 30-35 survive." A more realistic, post-grading services estimate of 103 to 156 examples is offered in David Bowers' popular *Guide Book* reference, and the authors of *Coinage of Augustus Saint-Gaudens* estimate a similar survivorship, indicating "100 to 150 known"; PCGS seconds the latter population estimate exactly. Combined, the two major grading services have certified 140 specimens including possible resubmissions, virtually all of which are in Uncirculated grades through MS65. Our Permanent Auction Archives show the 1931-D to have made about 65 appearances at auction since 1993, mostly as expected in MS63 to MS65. Only a handful of Premium Gems are reported, and no coins have been graded finer. These figures suggest that the surviving population may reside well below the 150-coin mark. Recent studies by Roger Burdette suggest that no more than 125 pieces are extant, which is likely accurate.

While some examples display traces of granularity, the present 1931-D is one of the better-produced examples of the issue. The design elements are sharply struck, yielding frosty mint luster that melts into the well-preserved fields. Warm peach-orange interiors cede to brighter green-gold borders. A single hit on Liberty's right (facing) arm is the only mentionable abrasion. This classic rarity is a great numismatic prize in any grade and truly special in this well-preserved condition.

**From The Cherny Collection.** NGC ID# 26GP, PCGS# 9193

1932 Saint-Gaudens Twenty, MS66  
Top-Grade for This Rare Issue

**5648** 1932 MS66 PCGS. Ex: Park Avenue Collection. The 1932 is one of the most desired of all Saint-Gaudens double eagles and represents the final collectible date in the series. The federal government melted virtually the entire mintage of just over 1.1 million pieces. According to records obtained from the mint in 1947 by Dr. Charles W. Green, a New York collector, only 110 Philadelphia double eagles were issued in 1932. Recent research by Roger W. Burdette has unearthed Mint and Treasury records that indicate a slightly different total of 113 double eagles were distributed to various institutions and private individuals in 1932, but these figures are in close agreement.

Estimates of the number of 1932 twenty dollar pieces that have survived to the present day have varied widely but are more or less leveled off in recent years. PCGS estimates that about 100 examples are known, which is consistent with David Akers' (revised 2008) estimate that "fewer than 100 coins have survived. Virtually all of these pieces are Mint State." Early estimates such as Walter Breen's (1988) statement that "possible 22-25 survive, almost all Unc" and David Bowers' (2004) suggestion that "between 60 to 80 different pieces," are too low.

PCGS and NGC combined have seen just more than 150 examples of the 1932 double eagle, a number of which are most probably resubmitted coins. Virtually all certified examples are in Uncirculated grades, primarily through near-Gem. Garrett and Guth write in their *Gold Coins Encyclopedia* that: "The Smithsonian collection example is possibly the finest known, and would probably grade MS67."

The 1932 is usually very sharply struck and exhibits frosty luster, though some are satiny in texture. Excessively abraded surfaces are not usually a problem, although most examples reveal a few scattered bagmarks. All in all, 1932 double eagles are exceptionally attractive coins with outstanding luster and color. The 1932 is superior in this regard to all other late-date issues with the possible exception of the 1930-S.

The present Premium Gem showcases all of these fine qualities to their full extent and combines them with a technical grade that has not been surpassed save for a single Plus-designated Premium Gem at PCGS. Thick, frosty wheat-gold luster rolls over the devices and pools in the fields on each side, illuminating the bold strike and unabraded surfaces. Eye appeal is superb.

**From The Cherny Collection.** NGC ID# 26GR, PCGS# 9194

## COMMEMORATIVE SILVER

1936-S Boone Half, MS68  
Tied for Finest at NGC

- 5649** 1936-S Boone MS68 NGC. Collectors of Boone commemoratives either opt for a single example to represent the series, or endeavor to assemble one of each date and mintmark. This splendid Superb Gem 1936-S will serve either purpose, with spectacular eye appeal and attractive iridescent toning seldom seen on even the finest Boone issues. Lightly toned on both sides, the coin displays shades of sea-green, flame-orange, and ruby-red that grace the impeccably struck and well-preserved surfaces. There are no finer examples at either service. Census: 3 in 68, 0 finer (9/16). NGC ID# BYG2, PCGS# 9268

1954 Washington-Carver Half, MS67  
Among the Few Finest-Graded

- 5650** 1954 Washington-Carver MS67 PCGS. Only rarely do we have the opportunity to catalog a Superb Gem 1954 Washington-Carver half. While the issue itself is not rare, it was seldom well-struck or handled with care by the Mint. MS67 examples are extremely rare, and not surprisingly, neither service reports any finer coins than the few certified MS67 representatives. This is the third such coin we have had the pleasure to offer. It is a satiny and lustrous example that displays brilliant, pale bluish-silver surfaces with faint traces of peach-gold and ash-gray toning. The surfaces are amazingly clear of the inevitable, tiny nicks and marks that plague the issue. The strike is sharp on the conjoined portraits of George Washington Carver and Booker T. Washington, as is the superimposed U.S.A. lettering on the map, which usually is weakly brought up. A prize for the classic commemorative collector who requires only the finest examples for a high-grade set. Population: 3 in 67, 0 finer (9/16). NGC ID# BYL9, PCGS# 9442

## COMMEMORATIVE GOLD

1905 Lewis and Clark Gold Dollar, MS65  
Lemon-Gold and Lilac Color

- 5651** 1905 Lewis and Clark Gold Dollar MS65 PCGS. The centenary of the Lewis and Clark expedition was commemorated on banknotes, stamps, and coinage during the early part of the 20th century. An entire exposition was held to celebrate the event in Portland, Oregon in 1905. These diminutive gold dollars were distributed there to the extent of 10,000 coins. Lemon-gold hues color the centers, while lilac shadings appear around the margins of this boldly struck and radiant Gem. Surface preservation is excellent. Finer coins are very scarce. NGC ID# BYLG, PCGS# 7448

1905 Gold Dollar, MS66  
Lewis and Clark

- 5652** 1905 Lewis and Clark Gold Dollar MS66 NGC. Portland, Oregon was the site of the Lewis and Clark Centennial Exposition the was held from June 1 through October 15, 1905. The event was staged at the fairgrounds, 400 acres on the northwest edge of town. At the time, Portland was a city of just over 100,000 people who were hosts to more than 1.5 million visitors, an average of more than 10,000 visitors each day. This Premium Gem exhibits bold design definition and highly lustrous yellow surfaces with rich lemon peripheral toning. A tiny dark toning spot is evident at the left reverse border. NGC ID# BYLG, PCGS# 7448

**1905 Lewis and Clark Gold Dollar, MS66+  
Extremely Elusive in This High Grade  
Radiant Butter-Gold Example**

- 5653** 1905 Lewis and Clark Gold Dollar MS66+ PCGS. Dave Bowers' commentary on the Lewis and Clark gold dollars in his 1991 book, *Commemorative Coins of the United States*, remains true to this day:

"The 1905-dated issue is at least 20% scarcer than the 1904. It may have been the case that quantities of 1905 coins in the possession of Zerbe were never officially returned for melting but were simply cashed in at face value or melted in 1933. In any event, among all commemorative gold coins of this denomination, the Lewis and Clark issues of 1904 and 1905 are singularly distinctive for their rarity in higher grades. They are far rarer than any other commemorative gold dollar varieties."

This incredible Plus-designated Premium Gem shows razor-sharp borders with fully defined legends and minimal evidence of die erosion. The hair strands on portraits are strong, if a touch soft over the highest points, as usual. Butter-gold surfaces lack any flaws of note and radiate frosty luster. There are only five finer submissions at PCGS (9/16). NGC ID# BYLG, PCGS# 7448

**1915-S Panama-Pacific Quarter Eagle, MS64  
Popular Gold Commemorative**

- 5654** 1915-S Panama-Pacific Quarter Eagle MS64 PCGS. Woodrow Wilson was the U.S. President when Congress authorized the Panama-Pacific half dollars on January 16, 1915. Other commemorative issues authorized during his term were the McKinley gold dollars, the Lincoln-Illinois half dollars, the Maine and Alabama half dollars, and the Pilgrim half dollars. His term also saw passage of the Pittman Act intended to stabilize the price of silver. This Choice Mint State quarter eagle shows only a few trivial marks on its lustrous lemon-yellow surfaces with an excellent strike and good eye appeal.

From *The Twelve Oaks Collection, Part III*. NGC ID# BYLP, PCGS# 7450

**1915-S Quarter Eagle, MS65  
Panama-Pacific Celebration**

- 5655** 1915-S Panama-Pacific Quarter Eagle MS65 NGC. The Panama-Pacific Exposition celebrated the completion of the Panama Canal, while also showcasing San Francisco's recovery from the devastating earthquake nearly a decade earlier. The quarter eagle is one of three gold denomination authorized for the event. This Gem has a hint of peripheral orange toning that frames the brilliant and highly lustrous yellow-gold surfaces. A first-rate example for the connoisseur. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS65  
Farran Zerbe's Program

- 5656** 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. The well-known coin dealer, Farran Zerbe, conceived a five-coin commemorative program for the Panama-Pacific International Exposition that included a silver half dollar, gold dollar, quarter eagle, and two 50-dollar gold pieces, round and octagonal, the latter reminiscent of the similar denomination gold slugs that first appeared in 1851. This Gem quarter eagle is an exceptional example with sharp design motifs and frosty greenish-gold luster. *From The Twelve Oaks Collection, Part III.* NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS65  
Designs by Barber and Morgan

- 5657** 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. Congress authorized a \$5,000 appropriation for designs of the Panama-Pacific coins and related medals, with payment to be reimbursed by the Panama-Pacific International Exposition Company. To reduce expenses, Mint engravers Charles Barber and George Morgan prepared designs for the half dollar and quarter eagle, while outside artists designed the gold dollars and \$50 gold pieces. This splendid and boldly defined Gem exhibits a few trivial marks on its frosty and highly lustrous yellow-gold surfaces. *From The Twelve Oaks Collection, Part III.* NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS65  
Congress Authorized 10,000 Coin Mintage

- 5658** 1915-S Panama-Pacific Quarter Eagle MS65 PCGS. The U.S. Congress authorized the Panama-Pacific commemorative coins on January 16, 1915. The authorizing legislation stipulated that no more than 10,000 of these quarter eagles would be struck, and Mint records indicate that an additional 17 assay coins were minted. The San Francisco Mint melted 3,268 pieces on October 30, 1916, leaving a net distribution of 6,749 coins. This lovely Gem exhibits frosty luster and pristine yellow-gold surfaces with a bold strike and exceptional eye appeal. *From The Twelve Oaks Collection, Part III.* NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS66  
Elusive in Finer Condition

- 5659** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. NGC recognizes outstanding preservation on this Premium Gem Pan-Pac quarter eagle, cast in frosty orange-gold luster that illuminates sharp design elements. The Panama-Pacific quarter eagle had a small distribution of 6,749 pieces. Survivors in MS66 are occasionally seen, but finer coins are scarce. This remains one of the most popular gold issues in the classic commemorative series. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Round Fifty Dollar  
 Satiny Near-Gem  
 Lowest Distribution of the Pan-Pac Issues

**5660 1915-S Panama-Pacific 50 Dollar Round MS64 NGC.** The Panama-Pacific International Exposition, held in San Francisco in 1915 from February to December, was a grand success in many ways, and perhaps most significantly in terms of artistic and architectural exhibition — all the way from the majestic Palace of Fine Arts (the only Exposition structure still standing today on the original fair grounds) to the small gold and silver souvenir coins that were issued at the San Francisco Mint midway through the event. The latter are the most widely collected mementos of the Pan-Pac Exposition today, thanks to avid interest from numismatists.

There were five different coins issued, including a silver half dollar, gold dollar, quarter eagle, and fifty dollar gold pieces in both round and octagonal format. Of these, the fifties are by far the rarest and most sought-after today. Slightly more than 1,500 examples of each variety were struck, including assay pieces. The coins were so large that a medal press had to be shipped to San Francisco from the Philadelphia Mint to strike them. However, sales of the gold fifties fell short of expectations, largely due to the twice-face-value price advertised by Farran Zerbe, which made the them prohibitively expensive for the majority of the Exposition attendees. One hundred dollars was much more money in 1915 than most folks could part with. By the end of the Exposition, 855 octagonal fifties and 1,015 round were melted as unsold, leaving net distributions of only 645 and 483 coins, respectively. No doubt many collectors regretted not purchasing an example of the hefty Pan-Pac fifties at the fair, as within five years the numismatic value of these pieces had virtually doubled. Today, the acquisition of one of these “slugs” is a landmark achievement for the classic commemorative collector.

The round variant is the scarcer and more highly sought-after of the two varieties. Due to the nature of their distribution as mementos, most were well-preserved and are Mint State today. Nonetheless, Gems are rarely seen. This Choice example showcases a full strike and satiny yellow-gold luster. Light marks on Minerva's cheek determine the grade but hardly affect the eye appeal. An outstanding example of this major 20th century gold rarity. NGC ID# BYHP, PCGS# 7451

1915-S Panama-Pacific Octagonal Fifty  
Lustrous and Frosty MS64  
Landmark Commemorative Gold Issue

**5661** 1915-S Panama-Pacific 50 Dollar Octagonal MS64 PCGS. Several souvenir guidebooks were published by the Panama-Pacific International Exposition Company in 1915, each at different price points and with slightly different content. The books outlined the event's mission statement and provided information regarding the location and contents of the palaces, gardens, exhibits, and concessions. The introduction to one of the more lavish guidebooks explains that the fair:

"... celebrates the completion of that epochal achievement the Panama Canal, by which two continents are severed that the entire world may be brought into close contact. It celebrates also the achievements of mankind during the decade preceding the year 1915, shows the great progress that has been made in every branch of human endeavor and depicts the present capabilities of the human race."

In addition to the official guidebooks, a variety of souvenir tokens, medals, and other miscellaneous numismatic items were available for purchase by fair-goers. The United States Mint manufactured a number of commemorative coins for the event: a silver half dollar, a gold dollar, a gold two and a half dollar, and two gold fifty dollar coins. A souvenir medal was also produced and was, in fact, the only Mint-made numismatic item available to exhibition visitors until May 1915, three months after the PPIE opened to the public. Farran Zerbe was contracted to sell the Mint products at his *Money of the World Exhibit* located in the Palace of Liberal Arts.

Buyers could acquire a set containing the three lower coin denominations plus a choice of either the Round or Octagonal "quintuple eagle" for \$100 price. The majority of high-end coin purchasers opted for the distinctly shaped, eight-sided coins, but the high purchase price of these pieces still caused sales to fall short of expectations. Of the 1,500 Octagonal fifties struck, only 645 were sold between July 1915, when they were first issued, and December 1915, when the Exposition shut its doors. While most of the distributed pieces survive, examples are nevertheless scarce in today's market.

The present near-Gem example displays fully struck devices and original, frosty straw-gold luster that exhibits few abrasions. Eye appeal exceeds that of many other Choice examples that we have handled. Due to their unique size and denomination, circumstances of production, and scarcity in the marketplace, Pan-Pac fifties maintain their rank as the greatest acquisition of the classic commemorative series even more than a century after their production. NGC ID# BYHP, PCGS# 7452

Original 1915 Panama-Pacific Expo  
Presentation Case and  
Henry Chapman Letter

- 5662 Presentation Case and Henry Chapman Letter for a Five Piece Panama-Pacific Set.** An original presentation case for commemorative coins sold at the Panama-Pacific Exposition, held in 1915 near San Francisco. The leatherette case has openings for five coins, the 1915-S half dollar, gold dollar, quarter eagle, octagonal \$50, and rectangular \$50. The case dimensions in inches are 5 x 4.5 x 0.75. The outside of the case is black with gold-colored trim. The interior is purple with gold lettering. A card with background information on the coins and their designers is inlaid below the five-piece holder. The clasp for the case is in working condition. The case is in Very Fine condition. The case is accompanied by a Henry Chapman handwritten letter to Floyd Starr, dated 6/13/1934 and offering the set for \$425. No coins are included in this lot. (2 items)

1916 McKinley Gold Dollar, MS67+  
Stellar Preservation, Top-Grade at PCGS

- 5663 1916 McKinley Gold Dollar MS67+ PCGS.** Although distributions were widely separated (estimated in the *Guide Book* as 15,000 and 5,000 pieces, respectively, for the 1916 and 1917 issues), the 1916 McKinley gold dollar is every bit as scarce as the 1917 in Superb Gem condition. The present coin is tied with two other Plus-graded MS67s as the finest at PCGS. The strike is bold, and the frosty surfaces are beautifully free of even minor blemishes. Hints of peach and lilac appear throughout yellow-gold fields, furthering the eye appeal. Population: 96 in 67 (3 in 67+), 0 finer (9/16). NGC ID# BYLK, PCGS# 7454

1922 Grant No Star Gold Dollar, MS68  
'High Numismatic Value'

- 5664 1922 Grant Gold Dollar, No Star, MS68 NGC.** The Grant gold dollars and silver half dollars were issued on behalf of the Ulysses S. Grant Centenary Memorial Association, and that entity selected Laura Gardin Fraser to prepare the designs. A notice appeared in the January 24, 1922 issue of *The Cincinnati Enquirer*:

There will be minted 10,000 \$1 gold pieces and 250,000 silver half dollars, the first to sell for \$2.50 each and the second for \$1 each. This fund will assure the tri-fold purposes of the association which is interested in the construction of a memorial highway from this city to the east along the Ohio River. After the minting the dies will be destroyed, thus giving the coins a high numismatic value."

This incredible Superb Gem features flawless orange-gold luster and wispy blue overtones. The design motifs are boldly defined and the surfaces are flawless. Census: 6 in 68 (1 in 68), 0 finer (9/16). NGC ID# BYLN, PCGS# 7458

**1922 Grant With Star Gold Dollar, MS67+  
Incredible Color and Luster**

- 5665** 1922 Grant Gold Dollar, With Star, MS67+ PCGS. CAC. Deep orange and yellow toning confirms the originality of this deeply lustrous and virtually pristine Superb Gem. Traces of sky-blue visit the portrait, and the strike is complete except on the tree trunk adjacent to the frame house window. Just incredible overall quality. NGC ID# BYPS, PCGS# 7459

**1993-P Half-Ounce Gold Eagle  
PR70 Deep Cameo**

- 5668** 1993-P Half-Ounce Gold Eagle, Philip Diehl Signature, PR70 Deep Cameo PCGS. A scarce top-grade Deep Cameo example of this half-ounce Gold Eagle proof, showcasing dramatic frosty gold-on-black contrast with mirroring that delivers a full reflection. The strike is flawless, and the eye appeal is proportionately strong. A Registry-grade example of this conditionally scarce proof date. NGC ID# 28YF, PCGS# 9873

**MODERN BULLION COINS**

**1990-P Half-Ounce Gold Eagle, PR70 Deep Cameo**

- 5666** 1990-P Half-Ounce Gold Eagle, Philip Diehl Signature, PR70 Deep Cameo PCGS. Picturesque cameo contrast adorns the flawlessly preserved surfaces of this Deep Cameo proof 1990-P half-ounce Gold Eagle, rendering the devices frosty and mint-fresh and the fields jet-black. Close study with a loupe fails to find a single detractor. Examples of this Roman numeral-dated proof bullion issue are seldom available in top grade. NGC ID# 28YC, PCGS# 9843

**1992 Quarter-Ounce Gold Eagle, MS70  
Only Nine Pieces This Fine at PCGS**

- 5667** 1992 Quarter-Ounce Gold Eagle MS70 PCGS. The 1992 quarter-ounce Gold Eagle is the first issue in the series with Arabic date numerals. The date is common in MS69 but rare in MS70. PCGS has seen only nine pieces in this grade, and NGC shows 44 submissions (9/16). The present coin displays a full strike and satiny yellow-gold luster. NGC ID# 26M8, PCGS# 9860

**1995-W Silver Eagle, PR70 Ultra Cameo  
Proof Series Key**

- 5669** 1995-W Silver Eagle PR70 Ultra Cameo NGC. Perhaps no modern coin series is as heavily collected as the Silver Eagles, and many collectors seek to assemble complete proof and regular-issue sets. However, as with any series, the Silver Eagle has its key dates. On the proof side of the collection, the 1995-W is the stand-out rarity. This West Point Mint product was issued as part of 10th Anniversary bullion program proof sets, which included examples of the Silver Eagle and all of its gold counterparts. The sets were distributed at a high cost of \$999 apiece. Sales amounted to only 30,125 sets, which represents the entire distribution of the 1995-W Silver Eagle. Perfectly preserved survivors are elusive. This example displays a full strike and dramatic white-on-black contrast. Eye appeal is exceptional. NGC ID# CFWX, PCGS# 9887

## TERRITORIAL GOLD

1852/1 Humbert K-8 Ten Dollar, Near-Mint  
Among Finest Seen at PCGS  
Old Green Label Holder

- 5670** 1852/1 Humbert Ten Dollar AU58 PCGS. K-8, R.4. The U.S. Assay Office in San Francisco anticipated permission to strike denominations of less than fifty dollars in December 1851, and ten and twenty dollar dies were prepared accordingly. Authority did not arrive until February 11, 1852, at which time the 1851-dated dies were overdated. This is a highly impressive near-Mint example that boasts extensive orange-gold luster. Thorough investigation reveals unobtrusive marks near the eagle's left (facing) wing, but the eye appeal is nonetheless imposing. Certified in an old green label holder. Population: 3 in 58 (1 in 58+), 0 finer (9/16).  
*Selections From the Collection of Dr. Donald Knaack.* NGC ID# 342H, PCGS# 10190

1853 Assay Office Twenty, AU50  
900 Thous., K-18 Variety

- 5671** 1853 Assay Office Twenty Dollar, 900 Thous. AU50 PCGS. CAC. K-18, R.2. Struck by Curtis, Perry, and Ward — principals of the United States Assay Office of Gold. In the previous year Moffat & Company produced a very similar twenty dollar issue. This survivor retains ample luster and displays reddish hues, especially at the peripheries. A small rim bump is noted at the 9 o'clock reverse rim for the sake of full disclosure. Listed on page 395 of the 2017 Guide Book.  
*Ex: FUN Signature (Heritage, 1/2009), lot 5959; FUN Signature (Heritage, 1/2012), lot 6863.* NGC ID# ANHD, PCGS# 10013

1855 Wass Molitor Ten Dollar, AU53  
K-6, S.S. *Central America* Origin

- 5672** 1855 Wass Molitor Ten Dollar AU53 PCGS. CAC. K-6, High R.5. Ex: S.S. *Central America*. SSCA 7290. In addition to the mass-transaction golden cargo stowed in the S.S. *Central America* on its final doomed voyage, the ship also carried the personal fortunes of dozens of passengers, fortunes made during the California Gold Rush and subsequent years. A small portion of that wealth, recovered more than a century later, was held in the private gold coinage of the time. There were 89 Wass Molitor & Co. ten dollar coins salvaged from the wreck, for example, between the 1852 and 1855 issues.

This K-6 piece comes from the latter date, which features a die pair known for the circular "plug" over the final date digit. Like many of its counterparts, it is poorly defined, especially at the top left obverse, but grading by remaining luster shows undeniable traces of bright luster in the protected areas of the finely abraded yellow-gold surfaces. A piece of great historic importance, a reminder not only of the struggle to mine and process gold in 1850s California but also the sobering reality that even those who struck it rich were not immune from losing it all. Listed on page 400 of the 2017 *Guide Book*.

Ex: *Chicago Signature* (Heritage, 8/2011), lot 7726.

**Selections From the Collection of Dr. Donald Knaack.** NGC ID# ANJR, PCGS# 10354

CALIFORNIA FRACTIONAL GOLD

1872 Indian Octagonal Dollar, MS66  
BG-1120, Tied for Finest Certified

- 5673** 1872 Indian Octagonal 1 Dollar, BG-1120, Low R.5, MS66 PCGS. A flashy apricot-gold Premium Gem. Evenly struck and impressively preserved. Two tiny flan flaws near stars 9 and 11 serve as identifiers. From the shop of Christopher Ferdinand Mohrig, who issued many varieties of gold Large Indian Head tokens of various denominations. As of (9/16), tied with one other example as finest seen at PCGS. NGC has certified a single BG-1120 dollar as MS66, with none finer. NGC ID# 2C3M, PCGS# 10931

PATTERNS

1864 Copper-Aluminum Indian Cent  
Judd-355, MS65 Red and Brown

- 5674** 1864 One Cent, Judd-355, Pollock-425, High R.7, MS65 Red and Brown NGC. CAC. The obverse and reverse are both from the regular dies used to coin 1864 Indian cents, of the type not having James Longacre's "L" initial on the hair ribbon. Three different experimental alloys were used to create these pieces, all consisting of a combination of copper and aluminum, in differing ratios. Judd-355 was struck in a ratio of 9 to 1. The red color that remains is bright, most likely from the aluminum alloy. Otherwise each side has streaks of dark brown. The strike is soft on the feathers on the headdress. PCGS# 60522

1870 Standard Silver Half in Silver  
Judd-969, PR66 Cameo

- 5675** 1870 Standard Silver Half Dollar, Judd-969, Pollock-1080, High R.7, PR66 Cameo PCGS. CAC. Standard Silver half dollar with Liberty facing right and three stars (two showing) around the cap, IN GOD WE TRUST on a scroll below the bust. UNITED STATES OF AMERICA surrounds the top two-thirds of the obverse rim. The reverse has 50 CENTS placed centrally and surrounded by a multi-grain wreath which is, in turn, surrounded by STANDARD SILVER with the date below. Struck in silver with a reeded edge. Two variants are known of this design. This one lacks the B for Barber above the L in the wreath and the tip of Liberty's cap is under the second S in STATES. The fields are very deeply mirrored, which gives the piece an easy-to-see cameo contrast, even through the rose and russet toning. PCGS# 61215

1871 Standard Silver Ten Cents  
Judd-1080, PR65 Cameo

- 5676** 1871 Standard Silver Ten Cents, Judd-1080, Pollock-1216, High R.6, PR65 Cameo NGC. The obverse is Longacre's Indian Princess design, here with 13 stars around the rim. On the reverse 10 / CENTS appears, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in silver with a reeded edge. According to USPatterns.com this is the most frequently encountered of the four Longacre designs from 1871. Examples were also struck in copper and aluminum. This is a bright, untuned piece with deeply mirrored fields on each side. A few tiny planchet flakes and flecks of carbon are noted over the obverse. NGC ID# 2A3H, PCGS# 61339

1873 Trade Dollar Pattern in Silver  
Judd-1276, Richly Toned PR65

- 5677** 1873 Trade Dollar, Judd-1276, Pollock-1418, R.5, PR65 PCGS. A distinctive Trade dollar pattern with a small head of Liberty facing left set amid a large, open field with 13 stars at the margin. The reverse has the required legends mostly set in the middle of that side, surrounded by an olive wreath, and UNITED STATES OF AMERICA at the upper periphery. Struck in silver with a reeded edge. This design was sold by the Mint in six-piece sets for \$30. These pieces were struck in both copper, silver, aluminum, and white metal. Reeded and plain edge examples are known, but not in each metal. Beautifully toned, this Gem exhibits multiple layers of purple, olive, and gray toning on each side with multicolored rings around the margins. A spectacular Trade dollar pattern. Ex: Dallas Signature (Heritage, 11/2005), lot 5044; ANA Signature (Heritage, 8/2007), lot 2747; ANA Signature (Heritage, 7-8/2008), lot 2157. NGC ID# 2A88, PCGS# 61561

1879 Morgan Half Dollar in Silver  
Judd-1601, PR65

**5678** 1879 Morgan Half Dollar, Judd-1601, Pollock-1796, High R.6, PR65 PCGS. CAC. Morgan's bust for the 1878 silver dollar appears on the obverse, reduced here in scale for the half dollar denomination. E PLURIBUS UNUM and the stars have a layout similar to the Morgan dollar obverse. The reverse features a perched eagle sans wreath. The eagle clutches an olive branch with seven leaves, and three arrows with large arrowheads. IN GOD WE TRUST is widely spread and in tiny letters. Struck in silver with a reeded edge. More than a dozen examples are known in both silver and copper, according to USPatterns.com. This is a magnificent piece with heavily frosted devices set against the deeply reflective fields. The center of each side is untoned while the margins show golden-russet and deep blue rings of color. PCGS# 61979

1942 Judd-2060 Cent, MS67  
Struck in Brown Plastic

**5679** 1942 Cent, Judd-2060, Pollock-4035, Low R.7, MS67 NGC. Part of the World War II effort to divert copper from the U.S. cent, this design was tried in various unusual materials, including red fiber and Bakelite. The obverse Liberty bust right design is based on the KM-198 Columbia two centavos. The wreath and legend reverse is taken from a Baker-155 Washington medalet. Struck in brown plastic with a plain edge. Burdette's Third Reverse. This highly glossy and precisely struck chocolate-brown Superb Gem has the smooth, wavy fields characteristic of plastic specimens of this experimental wartime type. Census: 3 in 67, 0 finer (9/16). NGC ID# 2ANA, PCGS# 12215

# SESSION FOUR

## COLONIALS

- 7001** 1722 Hibernia Halfpenny, Type One, Harp Left AU53 PCGS. PCGS Population: (9/37). NGC Census: (1/13). NGC ID# 2ATA, PCGS# 167
- 7002** 1722 Hibernia Halfpenny, Type Two, Harp Right XF45 PCGS. PCGS Population: (6/17). NGC Census: (1/6). NGC ID# 2ATB, PCGS# 170
- 7003** 1722 Hibernia Halfpenny, Type Two, Harp Right MS62 Brown PCGS. PCGS Population: (3/3). NGC Census: (1/2). NGC ID# 2ATB, PCGS# 170
- 7004** 1723 Hibernia Farthing, DEI GRATIA MS64 Brown PCGS. PCGS Population: (26/2). NGC Census: (5/3). CDN: \$740 Whsle. Bid for problem-free NGC/PCGS MS64. NGC ID# 2AT6, PCGS# 176
- 7005** 1723 Hibernia Halfpenny MS62 Brown PCGS. PCGS Population: (35/88). NGC Census: (20/27). CDN: \$530 Whsle. Bid for problem-free NGC/PCGS MS62. NGC ID# 2ATD, PCGS# 180
- 7006** 1723 Hibernia Halfpenny MS62 Brown PCGS. PCGS Population: (35/88). NGC Census: (20/27). CDN: \$530 Whsle. Bid for problem-free NGC/PCGS MS62. NGC ID# 2ATD, PCGS# 180
- 7007** 1773 Virginia Halfpenny, Period MS63 Brown PCGS. PCGS Population: (80/75). NGC Census: (27/30). CDN: \$1,000 Whsle. Bid for problem-free NGC/PCGS MS63. NGC ID# 2ATK, PCGS# 240
- 7008** 1787 78/87, Connecticut Copper, Mailed Bust Left — Damaged — NGC Details. VF. NGC Census: (0/4). PCGS Population: (1/5).
- 7009** 1787 New Jersey Copper, Small Planchet, Plain Shield, No Plow Sprig, XF40 NGC. NGC Census: (7/35). PCGS Population: (27/56). NGC ID# AUL8, PCGS# 506
- 7010** 1783 Nova Constellation Copper, Blunt Rays VF30 NGC. NGC Census: (5/15). PCGS Population: (14/95). CDN: \$600 Whsle. Bid for problem-free NGC/PCGS VF30. NGC ID# 2AYZ, PCGS# 807
- 7011** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, — Damage — PCGS Genuine. VF Details. NGC Census: (30/385). PCGS Population: (81/1252).
- 7012** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, — Environmental Damage — NGC Details. XF. NGC Census: (39/265). PCGS Population: (103/820).

- 7013** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown PCGS. PCGS Population: (111/243). NGC Census: (47/91). NGC ID# AX5E, PCGS# 883
- 7014** 1787 Fugio Cent, UNITED STATES, Cinquefoils — Environmental Damage — NGC Details. VF. NGC Census: (3/79). PCGS Population: (16/287).
- 7015** 1795 Talbot, Allum, & Lee Cent MS63 Brown PCGS. PCGS Population: (39/60). NGC Census: (12/16). NGC ID# 2B63, PCGS# 640
- 7016** 1783 Washington & Independence Cent, Large Military Bust AU50 PCGS. CAC. PCGS Population: (27/84). NGC Census: (9/48). NGC ID# 2B6L, PCGS# 667
- 7017** DBLD HEAD Washington Double Head Cent AU50 PCGS. PCGS Population: (36/82). NGC Census: (4/48). NGC ID# 2B6W, PCGS# 692
- 7018** 1791 Washington Large Eagle Cent XF45 PCGS. PCGS Population: (9/150). NGC Census: (2/44). NGC ID# 2B6Z, PCGS# 702
- 7019** 1791 Washington Small Eagle Cent XF40 PCGS. PCGS Population: (24/204). NGC Census: (4/64). NGC ID# 2B73, PCGS# 705
- 7020** 1793 Washington Ship Halfpenny, Copper, Lettered Edge XF40 PCGS. PCGS Population: (36/195). NGC Census: (14/47). NGC ID# 2B7J, PCGS# 734

## HALF CENTS

- 7021** 1795 Plain Edge, No Pole, Thick Planchet, C-6b, B-6b, R.6, — Environmental Damage — PCGS Genuine. Fine Details. NGC Census: (0/0). PCGS Population: (1/3). CDN: \$925 Whsle. Bid for problem-free NGC/PCGS Fine 12. Mintage 139,690.
- 7022** 1826 MS63 Brown PCGS. CAC. PCGS Population: (36/29). NGC Census: (14/21). CDN: \$500 Whsle. Bid for problem-free NGC/PCGS MS63. Mintage 234,000. NGC ID# 222U, PCGS# 1144 Base PCGS# 1144
- 7023** 1853 C-1, B-1, R.1, MS65 Brown NGC. NGC Census: (114/41). PCGS Population: (0/0). CDN: \$875 Whsle. Bid for problem-free NGC/PCGS MS65. Mintage 129,694. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

- 7024** 1854 MS65 Brown PCGS. CAC. PCGS Population: (25/2). NGC Census: (0/0). CDN: \$875 Whsle. Bid for problem-free NGC/PCGS MS65. Mintage 55,358. NGC ID# 26YY, PCGS# 1230 Base PCGS# 1230
- 7025** 1857 MS64 Red and Brown PCGS. PCGS Population: (51/1). NGC Census: (0/0). CDN: \$725 Whsle. Bid for problem-free NGC/PCGS MS64. Mintage 35,180. NGC ID# 26Z3, PCGS# 1240 Base PCGS# 1240

## LARGE CENTS

- 7026** 1793 Wreath, Vine and Bars Edge — Graffiti — PCGS Genuine. AG Details. NGC Census: (0/142). PCGS Population: (40/480). CDN: \$1,180 Whsle. Bid for problem-free NGC/PCGS AG3. Mintage 63,353.
- 7027** 1796 Reverse of 1794, — Corroded — NGC Details. VF. NGC Census: (1/0). PCGS Population: (3/10). CDN: \$2,200 Whsle. Bid for problem-free NGC/PCGS VF20. NGC ID# 223W, PCGS# 1404 Base PCGS# 1404
- 7028** 1797 Reverse of 1795, Plain Edge, S-120a, B-2a, R.3, — Environmental Damage — NGC Details. XF. NGC Census: (0/1). PCGS Population: (0/4). CDN: \$975 Whsle. Bid for problem-free NGC/PCGS XF40.
- 7029** 1798 Second Hair Style VF20 PCGS. PCGS Population: (40/249). NGC Census: (0/0). CDN: \$400 Whsle. Bid for problem-free NGC/PCGS VF20. NGC ID# 2244, PCGS# 1434
- 7030** 1803 Small Date, Small Fraction VF30 PCGS. PCGS Population: (52/239). NGC Census: (21/172). Mintage 3,131,691. NGC ID# 224G, PCGS# 1482

- 7031 1810 S-282, B-3, R.2, VF25 NGC.** NGC Census: (2/6). PCGS Population: (0/6). NGC ID# 224S, PCGS# 36475 Base PCGS# 1549
- 7032 1811 Fine 15 PCGS.** PCGS Population: (10/87). NGC Census: (0/0). Mintage 218,025. NGC ID# 224U, PCGS# 1555
- 7033 1817 13 Stars AU58 NGC. CAC.** NGC Census: (26/97). PCGS Population: (52/139). CDN: \$220 Whsle. Bid for problem-free NGC/PCGS AU58. Mintage 3,948,400. NGC ID# 2252, PCGS# 1594
- 7034 1817 15 Stars AU50 PCGS.** PCGS Population: (9/38). NGC Census: (0/0). CDN: \$750 Whsle. Bid for problem-free NGC/PCGS AU50. Mintage 3,948,400. NGC ID# 2252, PCGS# 1597
- 7035 1818 MS63 Red and Brown PCGS.** PCGS Population: (143/49). NGC Census: (59/51). CDN: \$760 Whsle. Bid for problem-free NGC/PCGS MS63. Mintage 3,167,000. NGC ID# 2253, PCGS# 1601
- 7036 1823/2 N-1, R.2, VF25 NGC.** NGC Census: (6/31). PCGS Population: (1/9). Mintage 1,262,000. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630
- 7037 1824 N-3, R.2, AU50 NGC. Ex: Jules Reiver Collection.** NGC Census: (2/9). PCGS Population: (0/8). CDN: \$180 Whsle. Bid for problem-free NGC/PCGS AU50. Mintage 1,262,000. PCGS# 36772 Base PCGS# 1636
- 7038 1831 Large Letters AU58 PCGS. CAC.** PCGS Population: (26/66). NGC Census: (26/60). CDN: \$220 Whsle. Bid for problem-free NGC/PCGS AU58. Mintage 3,359,260. NGC ID# 225M, PCGS# 1678
- 7039 1831 Large Letters AU58 NGC. CAC.** NGC Census: (26/60). PCGS Population: (26/66). CDN: \$220 Whsle. Bid for problem-free NGC/PCGS AU58. Mintage 3,359,260. NGC ID# 225M, PCGS# 1678
- 7040 1831 Medium Letters, N-3, R.1, MS62 Brown NGC. Ex: Jules Reiver Collection.** NGC Census: (3/5). PCGS Population: (2/6). NGC ID# 225M, PCGS# 36997 Base PCGS# 1681
- 7041 1837 Head of 1838, MS64 Brown NGC.** NGC Census: (72/84). PCGS Population: (53/44). CDN: \$840 Whsle. Bid for problem-free NGC/PCGS MS64. Mintage 5,558,300. NGC ID# 225U, PCGS# 1729
- 7042 1838 MS63 Brown PCGS. CAC.** PCGS Population: (95/168). NGC Census: (68/167). CDN: \$550 Whsle. Bid for problem-free NGC/PCGS MS63. Mintage 6,370,200. NGC ID# 225V, PCGS# 1741
- 7043 1839 Head of 1838, Beaded Cords, MS62 Brown NGC.** NGC Census: (7/12). PCGS Population: (9/28). Mintage 3,128,661. NGC ID# 2265, PCGS# 1744

- 7044 1839 Booby Head AU58 PCGS.** PCGS Population: (22/68). NGC Census: (7/63). CDN: \$220 Whsle. Bid for problem-free NGC/PCGS AU58. Mintage 3,128,661. NGC ID# 225Z, PCGS# 1751
- 7045 1839 Booby Head MS61 Brown NGC.** NGC Census: (8/55). PCGS Population: (3/65). Mintage 3,128,661. NGC ID# 225Z, PCGS# 1751
- 7046 1840 Large Date MS63 Brown NGC.** NGC Census: (13/33). PCGS Population: (20/35). CDN: \$270 Whsle. Bid for problem-free NGC/PCGS MS63. Mintage 2,462,700. NGC ID# 2266, PCGS# 1820
- 7047 1845 N-13, R.2, MS64 Brown NGC.** NGC Census: (2/1). PCGS Population: (1/0). CDN: \$345 Whsle. Bid for problem-free NGC/PCGS MS64. Mintage 3,894,804. PCGS# 405791 Base PCGS# 1862
- 7048 1847 MS64 Brown PCGS. CAC.** PCGS Population: (81/22). NGC Census: (54/27). CDN: \$500 Whsle. Bid for problem-free NGC/PCGS MS64. Mintage 6,183,669. NGC ID# 226D, PCGS# 1877
- 7049 1851 N-15, R.4, MS64 Brown PCGS. CAC.** PCGS Population: (4/2). NGC Census: (2/5). CDN: \$345 Whsle. Bid for problem-free NGC/PCGS MS64. Mintage 9,889,707. NGC ID# 226H, PCGS# 406689 Base PCGS# 1892

## CERTIFIED MODERN PROOF SETS

**8562** Five-Piece 1939 Proof Set PR65 to PR67 PCGS. The set is individually certified in holders with consecutive serial numbers. The set includes: **cent PR66 Red and Brown; Reverse of 1938 nickel PR66; dime PR67; quarter PR66; No AW half dollar, PR65.** (Total: 5 coins)

**8563** Five-Piece 1941 Proof Set PR65 to PR66 PCGS. The set is individually certified in holders with consecutive serial numbers. The set includes: cent PR66 Red; nickel PR66; dime PR66; quarter PR65; No AW half dollar, PR66. (Total: 5 coins)

**8564** Six-Piece 1942 Proof Set PR64 to PR66+ PCGS. The set is individually certified in holders with consecutive serial numbers. The set includes: cent PR64 Red; Type One nickel PR64; Type Two nickel PR66+; dime PR65; quarter PR65; half dollar, PR66+. (Total: 6 coins)

## WASHINGTONIA

**8565** (1858) Geo. Doll & Co., Philadelphia, PA, MS66 NGC. Baker-531, Miller-PA-126. Brass, 19 mm, plain edge.

**8566** Uncertified 1909 U.S. Assay Medal. Julian-AC-53. Bronze, 56 x 39 mm. This was the final plaque issued for the Assay Commission. Beginning in 1910 and continuing through 1975, all Assay medals reverted to the familiar round shape. The obverse has a bust of George B. Cortelyou, facing right, with SECRETARY OF THE TREASURY below. The reverse is the same design used earlier in 1905, except for the changed date.

## SO-CALLED DOLLARS

**8567** 1876 U.S. Centennial Exposition MS63 NGC. HK-20, Julian CM-10a, R.4. Accompanied by the original box, Fine. Silver, 38 mm. Philadelphia, PA.

**8568** 1876 U.S. Centennial Exposition MS65 Brown NGC. HK-21, Julian CM-10b, R.3. Bronze, 38 mm. Philadelphia, PA.

## EXPOSITIONS AND FAIRS

**8569** 1926 U.S. Sesquicentennial Exposition, Official Medal, MS65 NGC. HK-453, Baker-F421B, R.3. Brass, plain edge.

## SO-CALLED DOLLARS

**8570** 1926 U.S. Sesquicentennial Exposition, Official Medal, MS65 NGC. HK-454, Baker-F421, R.3. Nickel, plain edge.

**8571** 1896 Bryan Dollar, Gorham Mfg. Co., MS61 NGC. Zerbe-5, HK-780, Schornstein-6, R.5. Silver.

**8572** 1896 Bryan Dollar, Gorham Mfg. Co., MS61 NGC. Zerbe-5, HK-780, Schornstein-6, R.5. Silver.

## COUNTERSTAMPS

**8573** 1923 Peace Dollar — Counterstamped “1978” Camp David Peace Summit — MS65 NGC.

**8574** 1977-D Eisenhower Dollar — Counterstamped “1979” International Year of the Child — MS65 NGC.

## EARLY AMERICAN TOKEN

**8575** 1823 C. & I.D. Wolfe, New York, NY, MS63 NGC. Miller-957A, Rulau-E-NY-957A, R.4. Silvered brass, 26 mm. Reeded edge.

## CIVIL WAR MERCHANTS

**8576** 1863 A. White Calendar Medal, New Boston, CT, MS63 NGC. Fuld-CT280A-1b.

## WESTERN SOUVENIR GOLD

**8577** 1849-Dated California Counter, Brass, MS63 NGC. Kagin-1 (page 374). 22 mm. Reeded edge.

**8578** 1904 Louisiana Purchase Exposition, 1/2 Louisiana Gold, MS63 NGC. Hendershott-61-330.

**8579** 1909 Alaska-Yukon-Pacific Exposition, Alaska Gold 1/2 DWT, MS65 NGC. Ex: Hart's Coins of the West.

## MINT SETS

**8580** Uncertified 1947 Double Mint Set. The set includes 28 coins, two of each denomination issued by the Philadelphia, San Francisco, and Denver Mints in 1947 (San Francisco did not strike half dollars that year). The coins are in the original cardboard holders. The outer kraft envelope and mailing envelope are missing. (Total: 28 coins)

**8581** Uncertified 1948 Double Mint Set. San Francisco did not coin Franklin halves during 1948, but the present 28-piece double mint set includes two each of the other Philadelphia, Denver, and San Francisco issues struck for circulation that year. The coins are housed in the issued cardboard holders. The outer kraft envelope and mailing envelope are absent. (Total: 28 coins)

**8582** Uncertified 1949 Double Mint Set. San Francisco did not coin quarters during 1949, but the present 28-piece double mint set includes two each of the other Philadelphia, Denver, and San Francisco issues struck for circulation that year. The coins are housed in the issued cardboard holders. The outer kraft envelope is present, but the mailing envelope is absent. (Total: 28 coins)

**8583** Uncertified 1951 Double Mint Set. This 30-piece double mint set includes two each of the Philadelphia, Denver, and San Francisco issues struck for circulation that year. The coins are housed in the issued cardboard holders. The outer kraft envelope is present, but the mailing envelope is absent. (Total: 30 coins)

**8584** Uncertified 1952 Double Mint Set. This 30-piece double mint set includes two each of the Philadelphia, Denver, and San Francisco issues struck for circulation that year. The coins are housed in the issued cardboard holders. The outer kraft envelope is present, but the mailing envelope is absent. (Total: 30 coins)

**8585** Uncertified 1953 Double Mint Set. 30 coins total, 2 each of the five denominations from the Philadelphia, Denver, and San Francisco Mints. Housed in the cardboard holders of issue. The outer mailing envelope is included, addressed to Birmingham, Alabama. (Total: 30 coins)

**8586** Uncertified 1954 and 1955 Double Mint Sets. The 30-piece 1954 double mint set includes two each of the Philadelphia, Denver, and San Francisco issues struck for circulation that year. The 22-piece 1955 double mint set includes two each of the Philadelphia, Denver, and San Francisco issues struck for circulation that year. No 1955-D halves were struck, and the San Francisco Mint only struck cents and dimes that year. All coins are housed in the issued cardboard holders. No mailing envelopes are absent. (Total: 52 coins)

**8587** Uncertified 1957 Double Mint Set. 20 coins total, 2 each of the five denominations from the Philadelphia and Denver Mints. Housed in the cardboard holders of issue. The outer mailing envelope is absent.

**8588** Uncertified 1957 Double Mint Set. 20 coins total, 2 each of the five denominations from the Philadelphia and Denver Mints. Housed in the cardboard holders of issue. The outer mailing envelope is absent. (Total: 20 coins)

## End of Auction

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
  - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
  - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
  - Twenty-two percent (22%) on Wine Auction lots;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$200,000, plus twenty percent (20%) of any amount between \$200,000 and \$2,000,000, plus twelve percent (12%) of any amount over \$2,000,000.
  - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature\* Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments  
(see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment	Current Bid .....	Bid Increment
< \$10.....	\$1	\$10,000 - \$19,999 .....	\$1,000
\$10 - \$49 .....	\$2	\$20,000 - \$49,999 .....	\$2,000
\$50 - \$99 .....	\$5	\$50,000 - \$99,999 .....	\$5,000
\$100 - \$199 .....	\$10	\$100,000 - \$199,999 .....	\$10,000
\$200 - \$499 .....	\$20	\$200,000 - \$499,999 .....	\$20,000
\$500 - \$999 .....	\$50	\$500,000 - \$999,999 .....	\$50,000
\$1,000 - \$1,999 .....	\$100	\$1,000,000 - \$4,999,999 ....	\$100,000
\$2,000 - \$4,999 .....	\$200	\$5,000,000 - \$9,999,999 ....	\$250,000
\$5,000 - \$9,999 .....	\$500	>= \$10,000,000 .....	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature\* Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer.

# Terms and Conditions of Auction

With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer {which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/ Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

**COINS and CURRENCY TERM A:** Signature- Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

**COINS and CURRENCY TERM B:** Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

**COINS and CURRENCY TERM C:** Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

**COINS and CURRENCY TERM D:** Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

**COINS and CURRENCY TERM E:** Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

**COINS and CURRENCY TERM F:** Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

**COINS and CURRENCY TERM G:** Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

**COINS and CURRENCY TERM H:** Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

**COINS and CURRENCY TERM I:** Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

**COINS and CURRENCY TERM J:** All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

**COINS and CURRENCY TERM K:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS and CURRENCY TERM L: NOTE:** Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

**COINS and CURRENCY TERM M:** For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

**COINS and CURRENCY TERM N:** Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

**COINS and CURRENCY TERM O:** Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: [CreditDept@HA.com](mailto:CreditDept@HA.com)

## Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at [HA.com/Licenses](http://HA.com/Licenses) and as posted at the venue site.

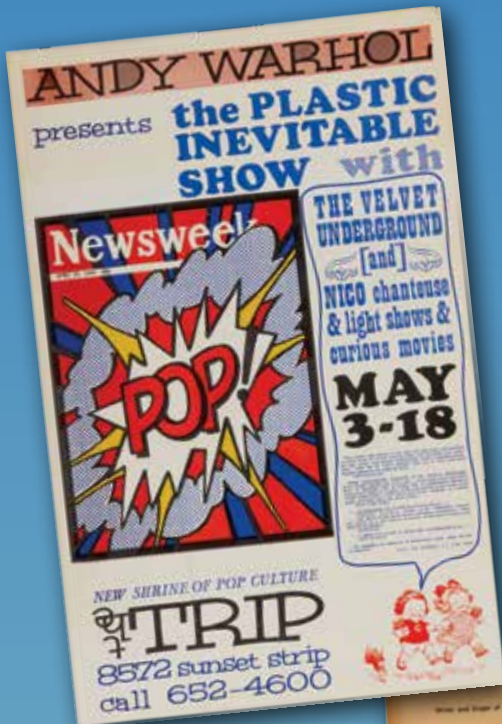

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at [HA.com](http://HA.com) and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

# The Largest Coin Show on the West Coast!

Feb. 16  
Feb. 17  
Feb. 18

Held three times annually, each show offers a complete collectibles experience and includes:

- Multi-million dollar auction by Heritage Auctions – the official auctioneer of the Long Beach Expo.
- Over 500 of the nation's top dealers ready to do business.
- On-site coin grading by PCGS.
- Collector education programs, grading competitions and meet the expert sessions.
- Young numismatist events and free coins for kids.
- Daily gold coin drawing and more!

## Don't miss the next show February 16-18, 2017!

Dealers, call **888-743-9316** or email **Info@LongBeachExpo.com** to reserve your booth.

### Free Admission – February 16-18, 2017

Bring this coupon and get free admission for all three days!

Or for quicker registration, visit **LongBeachExpo.com** and use promo code **AUCTION17**

**Show Hours:** Thursday: 10:00 a.m. – 7:00 p.m. • Friday: 10:00 a.m. – 7:00 p.m. • Saturday: 10:00 a.m. – 3:00 p.m.

LongBeachExpo.com | 888-743-9316  
Long Beach Convention Center | Hall A  
100 South Pine Ave | Long Beach, CA 90802

**Future Show Dates:**

June 8-10, 2017 | September 7-9, 2017

5628

A collection of various US coins and medals, including Liberty Bells, Indian Head, and Buffalo Nickels, displayed on a dark background. The coins are arranged in a grid-like pattern, with some overlapping. The background is dark with a subtle pattern of light-colored lines. The coins are shown in various orientations, some facing the obverse and some the reverse. The coins include Liberty Bells, Indian Head, Buffalo Nickels, and others. The coins are arranged in a grid-like pattern, with some overlapping. The background is dark with a subtle pattern of light-colored lines.
